Can be configured as a Simple to Use thermostat

COLORTOUCH ASSISTANT SOFTWARE

- Sizes and positions photos for use as a screensaver and as custom background wallpaper for the home screen
- Program time period schedule and/or configure installation settings from the comfort of your desktop computer
- Venstar dealers may use this application to import their logo and contact information to the ColorTouch thermostat
- This software communicates with the Venstar website to keep both the application and the firmware of the thermostat up to date

Skyport Cloud FREE Services

… help you connect to your ColorTouch thermostats (with Wi-Fi) for FREE

With the FREE app, access all these features remotely from your mobile device or computer

- View the name & location of the thermostat
- View the current weather and a 3-day weather forecast
- View and change the heat and/or cool set point temperatures
- View and change the equipment modes: Heat, Cool, Auto Changeover or Off
- View the equipment status (heating, cooling, off, etc.) including number of minutes until equipment starts when lockout because of timers
- Set "Home" or "Away" at the touch of a button. "Home" brings in your comfort set points for when you are home, and "Away" sets the energy savings set points desired when you are away
- Turn the thermostat's time period schedule on or off
- See Alerts including supply air temp alert (did not reach desired temp in specified time), service alerts, change filter alerts, humidity pad alerts, and UV light alerts
- Send text messages directly to the thermostat screen
- View the *current* values as well as the *High and Low during the day* for:
  - Indoor Temperature
  - Indoor humidity*
  - Outdoor temperature
  - Remote temperature OR Supply air temperature OR Return air temperature**
- See cooling & heating runtimes for today, this week, and last week
- Create a ColorTouch account

Additional Features available with the Skyport web application:

- View daily, weekly and monthly runtime graphs of cooling & heating hours
- Configure and set, or disable alerts, such as:
  - Desired supply air temperature and the time to reach it
  - UV light replacement
  - Air filter replacement
  - Humidifier pad replacement
  - Service reminders
  - Low or high space temperatures
- Change name and/or location of the thermostat
- Add or delete additional users
- Alter security settings, such as:
  - Change the users passcode
  - Allow the user to do everything
  - Let the user change set points but not the modes
  - Allow / disallow override of unoccupied setting
  - Invoke set point limiting
- Configure the set-up of thermostat including:
  - Type of equipment controlled
  - Dead bands
  - Stages of cooling & heating
  - Type of sensors
  - Humidification/Dehumidification set points*
  - Languages
  - Readout in Degrees F or C
  - Brightness of the display
  - Night dimmer
  - Screen savers, etc.
- Program the thermostat time period schedules including time & temperature
- Turn popular holidays on or off: Labor Day, Christmas, Christmas Eve, Thanksgiving, etc.
- Program for holidays, 365 days, 20 years out, just click on the stored calendars

  T5900 & T6900 only.
  ***Remote sensor required for this feature*
