Predictive Services Discussion: Tropical Storm lan is forecast to weaken to a tropical depression as it tracks north-northwest into western Virginia. Heavy rain (1-3") will fall over much of West Virginia and portions of Virginia, the Upper Ohio Valley, southern Pennsylvania, and coastal Delaware, New Jersey, and southern New England. Continued low relative of $20-35 \%$ is expected across the western Ohio Valley into the Mid and Lower Mississippi Valleys to the central Gulf Coast, east and central Texas, and eastern Oklahoma, with occasionally gusty northerly to easterly winds. South-southeast sustained winds of 12-20 mph gusting 20-30 mph amid minimum relative humidity of $15-30 \%$ is forecast across much of the Plains into the Missouri and Upper and Mid-Mississippi Valleys likely resulting in locally elevated conditions. Isolated to scattered thunderstorms are likely from the Southwest through the greater Four Corners and Wyoming into southern Montana and the northern High Plains, with scattered showers likely across much of Montana into Wyoming, eastern Idaho, and western North Dakota.

# Spot Weather Forecast Weather - Fire Behavior Category 

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.
Basic elements needed for a spot weather forecast include:

- Location by street address/zip code/city name, latitude/longitude, or US National Grid, or drag to a location using the spot weather forecast request webpage https://www.weather.gov/spot/.
- Type of incident (wildfire, prescribed burn, hazardous materials, search and rescue).
- Project/incident name.
- Requesting agency/official, email address, and phone number.
- Elevation (at top and bottom of incident).
- Drainage name, size, aspect, fuel type, and sheltering (full, partial, unsheltered).
- Forecast delivery time (i.e., as soon as possible or a later time), time forecast should start, and time zone.
- Any remarks that can help meteorologists forecast the site, pertinent feedback information (i.e., humidity values were lower than predicted), or special requests (i.e., very interested in potential wind shifts).

## Activity

Calibrate your handheld fire weather meter and review belt weather kit use. Refer to the NWCG Standards for Fire Weather Stations, PMS 426-3, for information.
