

Life Care

“Independent” Living?
“Assisted” Living?
“Skilled Nursing?”
What’s the Difference?

Independent Living:

Self-sufficient lifestyle in an apartment home or villa in a senior living community with access to community amenities, activities, services, meals, etc.

Assisted Living:

Semi-independent lifestyle with increased health care services and assistance with daily activities

Skilled Nursing:

Medical accommodations for short-term rehabilitation, therapy and recovery or long-term, 24-hour nursing care

Friendship Village offers a full continuum of care that includes these services and more:

As my needs
change, will I
have to move?

What is
Life Care?

It Depends on Where You Go...

- It's important to understand the differences between senior living options, and the different levels of care that come with them.
- Not all retirement communities offer the accommodations and care resources you need.
- Some communities offer a **continuing care retirement community (CCRC)** or “**life plan**” model with a full range of care options on site.

Life Care is...

- A predictable plan for future health care needs
- A guarantee to receive care when you need it
- A way to preserve assets and estate plans
- A form of long-term insurance

How much
will it cost?

Consider Your Future:

- As your needs change, services like **Assisted Living, Memory Care** and **Skilled Nursing** come at an additional monthly cost.
- It's critical to have a financial plan for your future health care and living situation.
