Note: The cost of a Sum It Up! play is in addition to the cost of the connected play. For example, if a player selects a 3-Way Combo (2 like numbers) play for a base play amount of $\$ 1$, the cost of the combo play would be $\$ 3$. If the player chooses to play Sum It Up! for a base play amount of $\$ .50$, the cost of the two plays together would be $\$ 3.50$.
