July 2001

To Our Partners in Health:

This year, as in years past, the San Antonio Metropolitan Health District dedicates this annual Health Profiles report to the men and women who have the daily, frontline responsibility for promoting and protecting the health of all San Antonio and Bexar County residents as well as visitors to our community. These individuals, who often perform their duties unnoticed by the public they serve, create and implement the plans, strategies and programs that guarantee us the clean air, safe food and pure water that we all take for granted. They staff the clinics, administer the immunizations, control the contagious diseases, reduce the injuries and promote the positive lifestyle choices that improve the overall health of all of our residents.

Our mission to create and sustain conditions that will allow for the development of safe and healthy communities has caused us to adopt a very proactive and comprehensive system of identifying, enumerating and analyzing selected health and social indicators that impact on these conditions. Our responsibility includes assessing the current health status of the community, establishing programs of prevention and education, identifying areas of potential threat or concern and monitoring the effectiveness of various intervention strategies that address these problems.

The Health Profiles reports were developed to track our progress in achieving the goal of healthy people in a healthy community. Our initial efforts were little more than a summary of birth and death statistics, a review of communicable disease activity and identification of selected high-risk populations. This initiative has evolved over the years to become a sophisticated tool that serves the needs of the policy maker, the clinician, the researcher, the educator, funding bodies and community activists. As we have grown to appreciate the complexity and multiplicity of the conditions that shape and define a community's health status, we have significantly expanded and broadened the list of target indicators. In doing so, public health has engaged in new dialogue with important community stakeholders who have provided new information and insights. Some of these contacts will, we hope, develop into partnerships and will be mutually beneficial. Data on school performance, housing stock, family stability, economic conditions, employment levels, crime and environmental degradation have real quality of life implications and no small impact on positive health outcomes.

The Health District has been using this type of analysis in planning the location of new clinics and other facilities. Identification of clusters of older sub-standard and renter occupied housing guides our lead abatement activities by targeting children at risk of elevated blood lead levels. Schools that have high rates of teen pregnancy can be identified and additional prevention and education resources directed to them. Other indicators we can measure and track have broader social justice implications and require political action or grass roots community response if truly effective remedies are to be implemented. By presenting selected maternal health indicators by county precincts, city council districts and school districts we hope to inform and encourage local participation in the search for solutions. We must remember that persistent poverty, low self-esteem, limited employment opportunities and inadequate education cripple a community as well as an individual.

This annual assessment must continue to be sensitive to and inclusive of this psychosocial dimension as it affects people in their daily lives. We also cannot lose sight of the fact that we need to improve our efforts in the area of prevention. We must more effectively address those indicators and conditions that continue to contribute disproportionately to untimely and avoidable death and injury in our community. Finally, as we look to the future, we anticipate that the growing

impact of environmental degradation and contamination will lay claim to an ever-increasing share of our resources as we learn to cope with the public health consequences of this growing threat.

The process of designing a report such as this is much like creating a mosaic. Individually, the data sets, charts and graphs reveal only a narrow and limited insight into the heart of a community. Viewed as a whole, however, we can begin to perceive interrelationships, linkages and patterns that can inform and focus our efforts to understand the dynamics at work in our community. We are pleased to report that San Antonio and Bexar County continue to enjoy overall good health as measured against many benchmarks. Especially heartening is the significantly lower infant death rate for the year 2000. This finding will be monitored with special interest over the coming years to ensure that this development is confirmed and can be sustained. We welcome the input and response of all our colleagues and partners in the various public and private health care systems as we work together to make future editions of this assessment even more relevant and meaningful.

A handwritten signature in black ink that reads "Fernando A. Guerra".

Sincerely,
Fernando A. Guerra, M.D., M.P.H.
Director of Health

ACKNOWLEDGMENTS

Gratitude is extended to everyone who participated in the development of this year's San Antonio Health Profiles. The contributions of Mr. Frank Blalock, Assistant Director of Health, Mr. Charles Pruski, Executive Assistant and Mr. John Berlanga, Management Analyst were especially insightful and substantive. Dr. Pamela Wood, Professor of Pediatrics, University of Texas Health Science Center at San Antonio is recognized for her generous assistance with sections dealing with asthma. We are also grateful for the support and endorsement extended by the Bexar County Medical Society to this year's report and we appreciate the input and suggestions provided by staff at the University of Texas Health Science Center School of Public Health. We offer special thanks to the residents in Occupational and Preventive Medicine, USAF School of Aerospace Medicine, Brooks AFB and to Mr. Ave Sutton, our Duke University student intern. Their input and review of the material added immeasurable to the quality of the final product. The Texas Department of Health, the Bexar County Appraisal District and the San Antonio Housing Authority provided invaluable assistance through the data they made available. Finally, special appreciation is extended to Ms. Terry M. Brechtel, City Manager and Ms. Melissa Byrne Vossmer, Assistant City Manager for their guidance and support throughout this process.

ACCESS TO THIS PUBLICATION

In addition to the printed version of Health Profiles 2000, access is available:

1) Internet access to the complete report is available at:

<http://www.samhd.org/profiles/>

2) A CD-ROM of the complete report is available. Orders may be placed by mail, e-mail, fax, or telephone.

Questions or comments regarding this report should be directed to:

John A. Berlanga

Management Analyst

Late Prenatal Care refers to mother who did not receive prenatal care during the first trimester of pregnancy.

Low Birth Weight represents live-born infants weighing less than 2,500 grams at birth.

Infant Death Rates are computed Per 1,000 Live Births.

Maternal Health Indicators by San Antonio City Council District 1999 to 2001

Maternal Age < 18 as a Percentage of all Births

San Antonio City Council Districts

Healthy People 2010 Goal no more than 5% of all Births.

Late or no Prenatal Care as a Percentage of All Births

San Antonio City Council Districts

Healthy People 2010 Goal at least 90% Care within the 1st trimester.

Low Birth Weight (<2500) Grams as a Percentage of all Births

San Antonio City Council Districts

Healthy People 2010 Goal at least 95% of live born infants weighing > 2,500 grams at birth.

Maternal Health Indicators by San Antonio City Council District 1999 to 2001

Births to Single Mothers as a Percentage of all Births

San Antonio City Council District

Infant Mortality Rate per 1,000 Births

San Antonio City Council District

— Healthy People 2010 Goal of less 4.5 infant Deaths per 1000 Births.

Bexar County Leading Causes of Death by Year Using Preliminary Texas Department of Health Data

Cause of Death	2001
Diseases of heart	2,671
Malignant neoplasms	2,039
Cerebrovascular diseases	678
Chronic lower respiratory diseases	634
Diabetes mellitus	475
Alzheimer's disease	233
All other accidents and adverse events	226
Chronic liver disease and cirrhosis	193
Influenza and pneumonia	159
Renal Disease(kidney)	142
Septicemia	132
Suicide	131
Perinatal, Congenital Malformations or Chromosomal Abnormalities	121
Homicide	113
Unlisted Deaths	1,564
Total	9,511

* The differences in these two tables can be attributed to two factors. First, the TDH data has not been finalized and several deaths still need to be added to the database. Second, the City of San Antonio deaths have been classified using ICD- 9 codes and TDH now uses ICD -10 codes. Different classification methodologies can affect the cause attributed to the death.

Average Age at Death by Race/Ethnicity for Select Causes of Death

Note: Other Deaths included on Deaths by Race /Ethnicity

Bexar County Population Health Benchmarks

2001 Age Adjusted Death Rates for Selected Causes

* Rates are age adjusted for 1,000,000 population

Healthy People 2010 Objectives

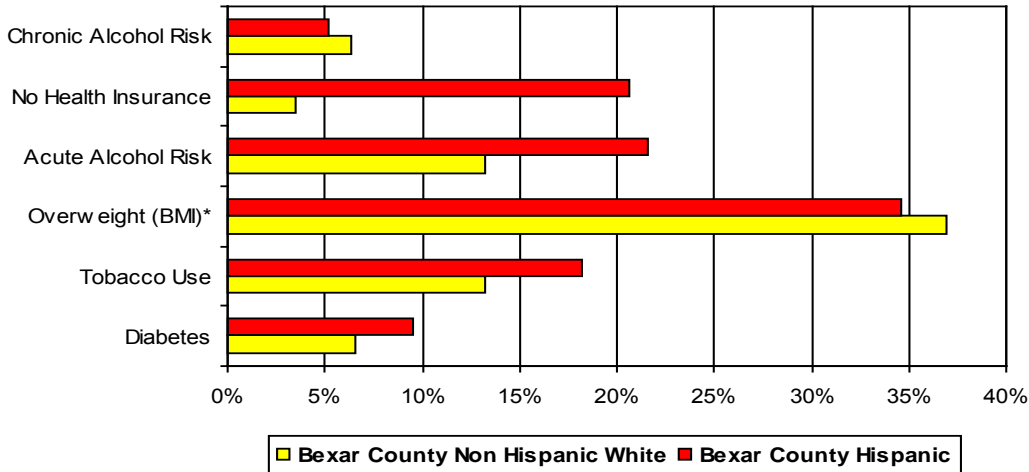

Infant Mortality Rates calculated for 1,000 births.

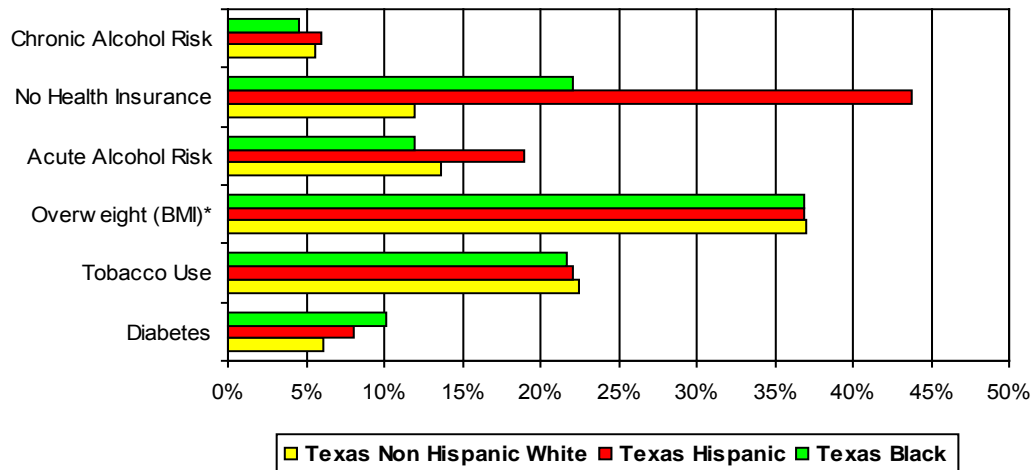

Behavioral Risk Factor Surveillance by Race and Ethnicity 2001

	Diabetes	Tobacco Use	Overweight (BMI)*	Acute Alcohol Risk	No Health Insurance	Chronic Alcohol Risk
Bexar County Non Hispanic White	6.6%	13.2%	36.9%	13.2%	3.5%	6.4%
Bexar County Hispanic	9.5%	18.2%	34.6%	21.6%	20.6%	5.2%
Texas Non Hispanic White	6.1%	22.5%	37.0%	13.7%	11.9%	5.6%
Texas Hispanic	8.1%	22.1%	36.9%	18.9%	43.8%	6.0%
Texas Black	10.1%	21.7%	36.9%	12.0%	22.1%	4.5%

Bexar County Behavioral Risk Factor Surveillance by Race and Ethnicity 2001

Texas Behavioral Risk Factor Surveillance by Race and Ethnicity 2001

Source: Behavioral Risk Factor Surveillance Survey (BRFSS) is a random telephone survey of 334 Bexar County Residents.

Overweight (BMI)* = Body Mass Index (25-29.9)

Acute alcohol risk = 5 or more drinks on an occasion in the past 30 days

Chronic Alcohol risk = 60 or more alcoholic drinks in the past 30 days

Note: There were insufficient responses from population of Blacks to reliably estimate risk factors for 2001.
