

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, February 4, 2022 – 0730 MDT  
National Preparedness Level 1**

**National Fire Activity (January 28 – February 3, 2022):**

|                               |                   |
|-------------------------------|-------------------|
| Initial attack activity:      | Light (661 fires) |
| New large incidents:          | 24                |
| Large fires contained:        | 14                |
| Uncontained large fires: ***  | 11                |
| Area Command teams committed: | 0                 |
| NIMOs committed:              | 0                 |
| Type 1 IMTs committed:        | 0                 |
| Type 2 IMTs committed:        | 0                 |

Nationally, there are 0 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** Offshore winds are likely over California for the next week with periods of stronger Santa Ana winds likely over southern California today, Sunday, and mid-next week. However, earlier winter rainfall will mitigate fire potential. Gusty north winds are also likely over portions of the Mojave and Sonoran Deserts today and Sunday. Periods of windy and dry conditions due to down sloping are forecast today and early next week across central and eastern Montana.

A winter storms and associated cold front will move off the East Coast today with mixed precipitation gradually ending across New England and rain moving through Georgia, the Carolinas, and north Florida. A weak Pacific cold front will move into the Northwest and northern Rockies today with light valley rain and mountain snow. High pressure is forecast to strength off the West Coast this weekend into next week with much above normal temperatures for California and Arizona. Above normal temperatures are forecast for the remainder of the West for the next week. Much below normal temperatures across the eastern US today and Saturday will moderate next week with the Plains returning above normal and the US east of the Mississippi River closer to normal.

## Extended Attack

Operational Engagement Category

After the initial size-up of the fire and/or transfer of command from an initial attack Incident Commander (IC), task yourself with answering the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the assigned resources and support functions associated with the fire?
- Can you control the fire with the resources available (either on the incident or en route) under expected conditions?
- Have you developed a plan to attack the fire?
  - Direct or indirect
  - Anchor points
  - Escape routes
  - Safety zones
  - Head or flank attack
  - Priority areas
- Have you communicated the plan to all personnel assigned to the incident, including new arrivals?
- Can you see the entire fire area? Do you have lookouts posted?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
  - If you are using the black, is it completely burned and without reburn potential?
- Are safety guidelines and the Standard Firefighting Orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of resources that have been ordered?
