### Answer key

# The Water Cycle

Observe the picture and write the appropriate term and definition.

PICTURE	TERM	DEFINITION
	<b>Water Cycle</b>	The continuous process by which water is circulated throughout the Earth's surface, atmosphere and underground through a series of processes.
	<b>Precipitation</b>	When water condenses in the atmosphere and becomes too heavy, the clouds release the water in the form of rain, snow, sleet or hail.
	<b>Condensation</b>	Condensation is the process by which water vapor in the air is changed into liquid water.
	<b>Evaporation</b>	Evaporation is the process by which a substance in a liquid state changes to a gaseous state due to an increase in temperature and/or decrease in pressure.
	<b>Transpiration</b>	Transpiration is the process by which a plant releases water in the form of moisture or water vapor.
