Preventive/Wellness Diagnosis Codes

(The diagnosis codes listed in the table below should be used to report preventive/wellness evaluations.)

- Use diagnosis codes Z00.121, Z00.129, Z00.111, Z00.00, Z00.01, Z01.411, or Z01.419 whenever preventive/wellness evaluation and management (E/M) services are reported on the claim (other services may also be reported on the claim).
- Use diagnosis code Z23 to report preventive/wellness evaluations when the only service performed during the encounter is the administration of immunizations.
- Use diagnosis codes Z12.39, Z12.31, Z12.39, Z12.4, Z12.12, Z12.72, Z11.51, or Z12.11 to report special screenings for a specific disease (e.g., breast cancer).

ICD-10-CM Code	Code Text
Z23	Encounter for immunization
Z00.121	Encounter for routine child health examination with abnormal findings
Z00.129	Encounter for routine child health examination without abnormal findings
Z00.111	Health examination for newborn 8 to 28 days old
Z00.00	Encounter for general adult medical examination without abnormal findings
Z00.01	Encounter for general adult medical examination with abnormal findings
Z01.411	Encounter for gynecological examination (general) (routine) with abnormal findings
Z01.419	Encounter for gynecological examination (general) (routine) without abnormal findings
Z12.39	Encounter for other screening for malignant neoplasm of breast
Z12.31	Encounter for screening mammogram for malignant neoplasm of breast
Z12.39	Encounter for other screening for malignant neoplasm of breast
Z12.4	Encounter for screening for malignant neoplasm of cervix
Z12.12	Encounter for screening for malignant neoplasm of rectum
Z12.72	Encounter for screening for malignant neoplasm of vagina
Z11.51	Encounter for screening for intestinal infectious diseases
Z12.11	Encounter for screening for malignant neoplasm of colon
Z13.1	Encounter for screening for diabetes mellitus
Z13.220	Encounter for screening for lipid disorders
Z13.820	Encounter for screening for osteoporosis

* Routine vision and hearing testing is not reimbursed as a separate procedure but is considered a component of the preventive medicine evaluation or re-evaluation.

Codes for Immunizations and Skin Test

Please use the appropriate code(s) when filing wellness claims which include immunizations or skin testing.

CPT Code	CPT Code Text	CPT Code	CPT Code Text
G0008	Administration of influenza virus vaccine	90620	Meningococcal recombinant protein and outer membrane vesicle vaccine, serogroup B (MenB), 2 dose schedule, ages 10-25, for intramuscular use
G0009	Administration of pneumococcal vaccine	90621	Meningococcal recombinant lipoprotein vaccine, serogroup B (MenB), 3 dose schedule (0,2,6 months), ages 10-25, for intramuscular use
G0010	Administration of hepatitis B vaccine	90630	Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, ages 18-64, for intradermal use (Code reinstated 01012015)
Q2035	Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (AFLURIA)	90632	Hepatitis A vaccine, adult dosage, for intramuscular use
Q2036	Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (FL ULA VAL)	90633	Hepatitis A vaccine, pediatric/adolescent dosage-2 dose schedule, for intramuscular use
Q2037	Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (FLUVIRIN)	90634	Hepatitis A vaccine, pediatric/adolescent dosage-3 dose schedule, for intramuscular use
Q2038	Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use (Fluzone)	90636	Hepatitis A and B vaccine (HepA-HepB), adult dosage, for intramuscular use
0001A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-Co V-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted; first dose	90644	Meningococcal conjugate vaccine, serogroups C & Y and haemophilus influenzae B vaccine (Hib-MenCY), 4 dose schedule, ages 2-18 months , for intramuscular use (Desc revised 7/1/2015)
0002A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-Co V-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted; second dose	90647	Hemophilus influenza b vaccine (Hib), PRP-OMP conjugate (3 dose schedule), for intramuscular use
0011A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-Co V-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage; first dose	90648	Hemophilus influenza b vaccine (Hib), PRP-T conjugate (4 dose schedule), for intramuscular use
0012A	Immunization administration by intramuscular injection of severe acute respiratory syndrome coronavirus 2 (SARS-Co V-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage; second dose	90649	Human Papilloma Virus (HPV) vaccine, types 6, 11, 16, 18 (quadrivalent), 3 dose schedule, for intramuscular use, ages 9-26, once per lifetime (includes Gardasil).
86580	Skin test; tuberculosis, intradermal	90650	Human Papilloma Virus (HPV) vaccine, types 16, 18, bivalent, 3 dose schedule (0, 1, 6 mos.), for intramuscular use, ages 9-26, once per lifetime (includes Cervarix).
90460	Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first vaccine/toxoid component (New 01/01/2011)	90651	Human Papilloma Virus (HPV) vaccine, types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent, 3 dose schedule, for intramuscular use, ages 9-45, once per lifetime (Gardasil 9).
90461	Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; each additional vaccine/toxoid component (List separately in addition to code for primary procedure.) (New 01/01/2011)	90653	Influenza vaccine, inactivated (IIV), subunit, adjuvanted, for intramuscular use
90470	H1N1 immunization administration (intramuscular, intranasal), including counseling when performed (Effective 09/28/2009)	90654	Influenza virus vaccine, trivalent (IIV3), split virus, preservative-free, for intradermal use
90471	Immunization administration; one vaccine	90655	Influenza virus vaccine, split virus, preservative free, 6-35 months dosage, for intramuscular or jet injection use
90472	Immunization administration; each additional vaccine	90656	Influenza virus vaccine, split virus, preservative free, ages 3-18 years, for intramuscular use
90619	Meningococcal conjugate vaccine, serogroups A, C,W,Y, quadrivalent, tetanus toxoid carrier (MenACWY-TT), for intramuscular use	90657	Influenza virus vaccine, split virus, 6-35 months dosage, for intramuscular or jet injection use

90672	Influenza virus vaccine, quadrivalent, live, ages 2-49, for intranasal use	90702	Diphtheria and tetanus toxoids (DT) absorbed when administered to individuals younger than 7 years, for intramuscular use
90673	Influenza virus vaccine, trivalent (RIV3), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use	90707	Measles, mumps and rubella virus vaccine (MMR), live, for subcutaneous use *
90674	Influenza virus vaccine, quadrivalent, ages 4 and older, for intramuscular use	90710	Measles, mumps, rubella, and varicella vaccine (MMRV), live, for subcutaneous use *
90677	Pneumococcal conjugate vaccine, 20 valent (PCV20), for intramuscular use	90713	Poliomyelitis vaccine, inactivated, (IPV), for subcutaneous or intramuscular use
90680	Rotavirus vaccine, pentavalent, 3 dose schedule, live, ages 2-8 months, for oral use	90714	Tetanus and diphtheria toxoids (Td) absorbed, preservative free, when administered to individuals 7 years or older, for intramuscular use
90681	Rotavirus vaccine, human, attenuated, 2 dose schedule, live, ages 2-5 months, for oral use	90715	Tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap), when administered to individuals 7 years or older, for intramuscular use
90682	Influenza virus vaccine, quadrivalent (RIV4), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use	90716	Varicella virus vaccine, live, for subcutaneous use
90685	Influenza virus vaccine, split virus, preservative free, when administered to children 6-35 months of age, for intramuscular use	90723	Diphtheria, tetanus toxoids, acellular pertussis vaccine, Hepatitis B, and polio virus vaccine, inactivated (DtaP-HepB-IPV), for intramuscular use
90686	Influenza virus vaccine, split virus, preservative free, when administered to individuals 3 years of age and older, for intramuscular use	90732	Pneumococcal polysaccharide vaccine, 23-valent, adult or immunosuppressed patient dosage, when administered to individuals 2 years or older, for subcutaneous or intramuscular use
90687	Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.25 mL dosage, for intramuscular use	90734	Meningococcal conjugate vaccine, serogroups A, C, Y and W-135, (tetravalent), ages 2-55, for intramuscular use
90688	Influenza virus vaccine, split virus, when administered to individuals 3 years of age and older, for intramuscular use	90736	Zoster (shingles) vaccine, live, for subcutaneous injection. Zostavax vaccine for shingles for individuals age 50 and older, once per lifetime.
90689	Influenza virus vaccine quadrivalent (IIV 4), inactivated, adjuvanted, preservative free, 0.25 mL dosage, for intramuscular use	90739	Hepatitis B vaccine (HepB), adult dosage, 2 dose schedule, for intramuscular use

* Rubella Screening for Women of Childbearing Age: If patient is not pregnant and vaccination history is unknown, provide vaccination. Serology is not recommended prior to vaccination for non-pregnant women. If patient is pregnant, serology is recommended. If serology is negative, provide vaccination after delivery.

** FluMist® is recommended for patients 2-49 years of age. FluMist® is not recommended for patients who are pregnant, immunocompromised, actively wheezing, less than 5 years of age and currently wheezing, have a history of Guillain-Barre syndrome, or have asthma or other underlying medical condition that predisposes them to influenza complications.

Please use the appropriate code(s) when filing wellness claims which include immunizations or skin testing.

CPT Code	CPT Code Text	CPT Code	CPT Code Text
90740	Hepatitis B vaccine, dialysis or immunosuppressed patient dosage (3 dose schedule), for intramuscular use	90748	Hepatitis B and Hemophilus influenza B vaccine (HepB-Hib), for intramuscular use
90743	Hepatitis B vaccine, adolescent (2 dose schedule), for intramuscular use	90750	Zoster (shingles) vaccine (HZV), recombinant, subunit, adjuvanted, for intramuscular use
90744	Hepatitis B vaccine, pediatric/adolescent dosages (3 dose schedule), for intramuscular use	90756	Influenza virus vaccine, quadrivalent (CCIIV4), derived from cell cultures, subunit, antibiotic free, 0.5 ml dosage, for intramuscular use
90746	Hepatitis B vaccine, adult dosage, for intramuscular use	91300	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted, for intramuscular use
90747	Hepatitis B vaccine, dialysis immunosuppressed patient dosages (4 dose schedule), for intramuscular use	91301	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage, for intramuscular use

Healthy You! Counseling Recommendations

You should provide preventive counseling on the following topics to patients of the appropriate age or stage of development. Preventive counseling and risk assessment are an integral part of preventive medicine evaluations and re-evaluations. Preventive counseling should also be provided as appropriate during other patient encounters.

Topic	Age(s) to Consider Counseling for Patient and/or Parent
Counseling to promote physical activity	All ages
Counseling to promote a healthy diet and healthy weight	All ages
Counseling to prevent or stop smoking / tobacco use	Ages 9 and up
Counseling to promote achievement of developmental milestones and healthy cognition	infancy-adolescence
Counseling to promote healthy emotional and social well-being	All ages
Counseling to prevent chronic health disease related to personal or family health risk factors	All ages
Counseling to prevent motor and sports vehicle injury to include speed and use of car seats, seat belts and helmets	All ages
Counseling to prevent household and recreational injuries	All ages
Counseling to prevent lead exposure and identify exposure risk	6 months - 6 years
Counseling to prevent alcohol / drug abuse	Ages 9 and up
Counseling to prevent unintended pregnancy	As appropriate based on stage of development and sexual activity
Counseling to prevent sexually transmitted diseases	As appropriate based on stage of development and sexual activity

Additional Screening Guidelines for Cholesterol, Glucose and Cancer:

¹ Annual lipid profile screenings are available beginning at age 2.

High-risk individuals should have their first lipid profile screening before age 11. A fasting lipid profile is the recommended screening method. If values are within the normal reference range, the patient should be retested in 3-5 years. High-risk is defined as a family history of high lipids or early CVD; or unknown history; or other CVD risk factors such as overweight, obesity, hypertension or diabetes.

² Annual glucose screenings are available for high-risk individuals between the ages of 3 - 39.

High-risk individuals are defined as follows:

- Family history of diabetes (i.e., parents or siblings with diabetes)

- Obesity
- Blood pressure of 135/80 or greater
- Race/ethnicity (i.e., African-Americans, Hispanic-Americans, Native Americans, Asian-Americans, or Pacific Islanders)
- Previously identified pre-diabetic or diagnosed diabetic
- Low HDL cholesterol or high triglycerides
- History of gestational diabetes

³ Flexible sigmoidoscopy and colonoscopy information:

Consultations are not covered under *Healthy You!*.

Additional screenings (flexible sigmoidoscopy, colonoscopy) for individuals considered to be at high risk for colorectal cancer, as outlined below, may be covered under the appropriate medical portion of your health plan.

High-risk individuals in this category are defined as follows:

- Strong family history of colorectal cancer or polyps (in first-degree relative younger than 60 or two first-degree

relatives of any age). A first-degree relative is defined as a parent, sibling or child.

- Known family history of colorectal cancer syndromes
- Personal history of colorectal cancer polyps

Please note: The *Healthy You!* benefit covers only one of these visits per calendar year for patients. If a patient is referred to another provider to complete the wellness screening test(s) or for a consultation visit, only the wellness screening test(s) will be covered under the *Healthy You!* wellness benefit. Subsequent office visits and/or consultations are not covered under the *Healthy You!* wellness benefit.
