## Introduction

Dear excited trader,

Thank you for downloading your free copy of:

***“TradingView – How To Guide: Trading Chart Platform”.***

Whether you're new to trading or you're an advanced chartist – we all have the same expectations when it comes to choosing a charting platform.

It must be online, fast, safe, customizable and user friendly.

And you know what – it should be free!

With the high competition of charting platforms available world-wide, each company must ensure they have free, live streaming, cutting edge, secure and easy to use platforms to offer their customers and clients at the very least – top-notch service.

I've used many charting platforms since 2003. From London School of Investments, Amibroker, MetaStock, ProTrader, Cycle Trends, IG Markets, Oanda, MetaTrader, Sword Fish... You name it.

But there is one free charting platform, which has become my absolute favourite over the years, which I am beyond excited to introduce to you right now.

In this beginner's guide, I'll go over everything you need to know, to help you start using the platform with ease.

It's called *TradingView*...

Trade well,

Timon Rossolimos  
Founder, **MATI Trader**

## Elevator Pitch

### What *TradingView* is

*TradingView* (est. 2012) is a world leading, cutting-edge FREE online visualisation financial charting platform for beginners up to the most advanced professional traders, with over 10 million subscribers.

The platform has direct access to unlimited live streaming data from stocks, futures, bonds, indices, Forex, commodities, ETFs and even crypto-currencies.

It allows you to customise your watch lists, back test your strategies, share, publish or enjoy live and active trading ideas, signals and tutorials through the platform or directly to your Twitter and Stock Twits feed.

With Trading View you'll be able to enjoy this free charting phenomena across either your web browser, Android or Apple iOS devices.

## The Downside

It's important to note that *TradingView* is not integrated with most brokers. This means you'll need to have two platforms at all times to place a trade.

However, this might change in the near future as *TradingView* is already associated with some of the world's leading brokers such as, Oanda and FXCM.

## Start to chart, learn and share trading ideas

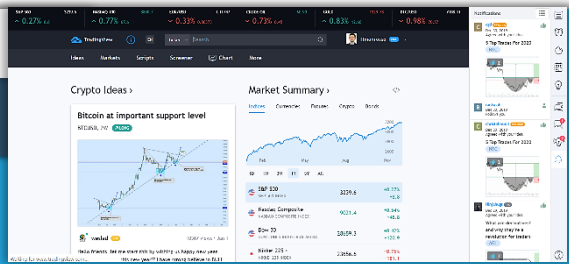

*TradingView* has been in the making for the last 20 years, and so you'll find that it offers more services than what is mentioned in this short guide.

When you go to their website, you'll see a whole range of trading real-time data, information, analyses tutorials coming from both professional, corporate as well as trading individuals...

Here's what you'll see as when you enter their website.

**PLEASE NOTE:** If you'd like to read about the charting platform, please skip to the next part of the guide.

## Website The Front End

The screenshot displays the TradingView interface. At the top, there are market tickers for SBP 500 (3221.3, -0.58%), NASDAQ 100 (8709.7, +0.70%), EUR/USD (1.12337, +0.32%), CRUDE OIL (60.82, -1.31%), GOLD (1522.21, +0.48%), and BTC/USD (7211.26, -0.12%). Below this is a navigation bar with icons 1-7. A secondary bar contains icons 8-15 and a search bar. A third bar lists menu items 16-21. The main content area is divided into two sections: 'Crypto Ideas' featuring a chart for '#BITCOIN - One January Habit' by BillCharison, and 'Market Summary' showing a line chart and a table of indices.

Index	Value	Change
S&P 500	3221.3	-0.58%
Nasdaq Composite	8946.0	-0.67%
Dow 30	28462.1	-0.64%
Nikkei 225	23656.6	-0.76%

## *TradingView* and its spectacular chart platform

When you click on the '**Chart**' tab in the website, or when you click on the app on your Android or Apple device, you'll gain instant access to the best charts, trading tools and social networking all in one.

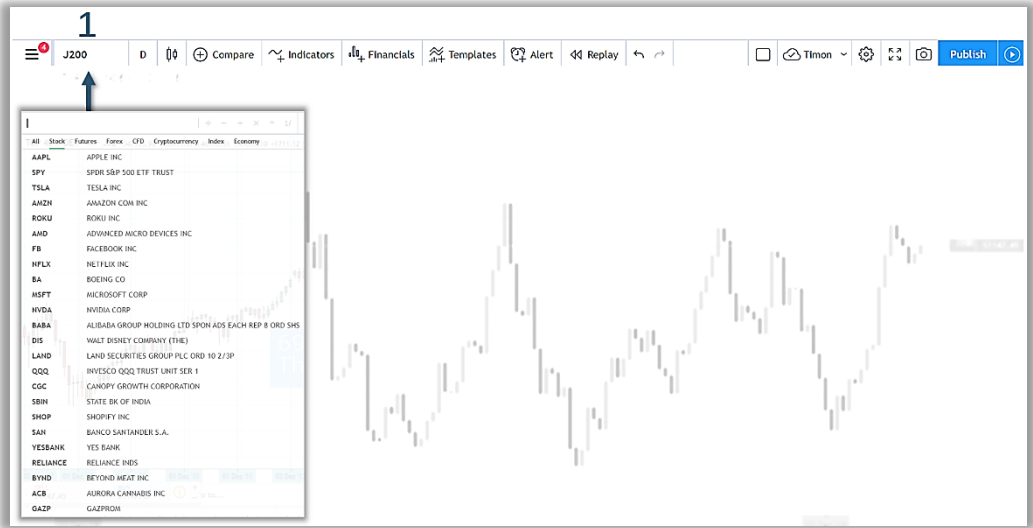

Let's get into the visuals to see how to use the charting platform with *TradingView*...

# Charting Platform Top Toolbar

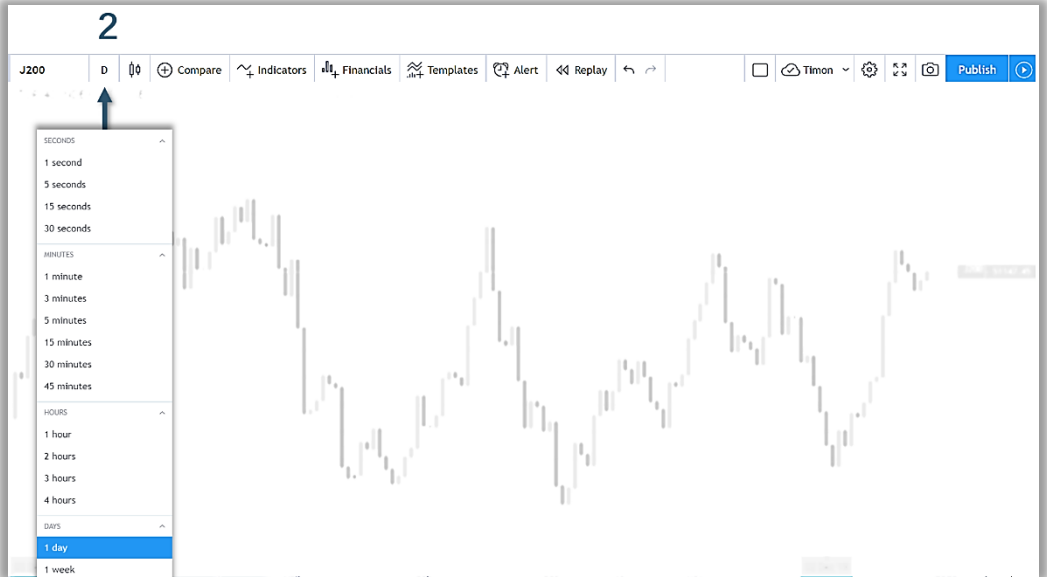

# #1: Search bar

Type and search the market you're looking for:  
(Stock, Futures, Forex, CFD, Cryptocurrency, Index & Economy)

## #2: Time frame

To view the overall market over different time periods

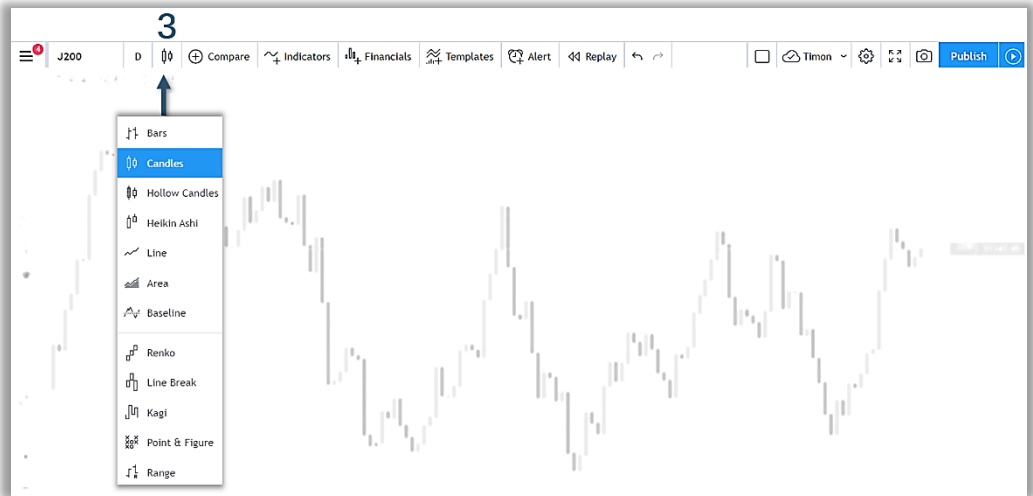

### NOTE:

Click on the star on the right next to your favourite time frames to be added to the top for quick and easy access.

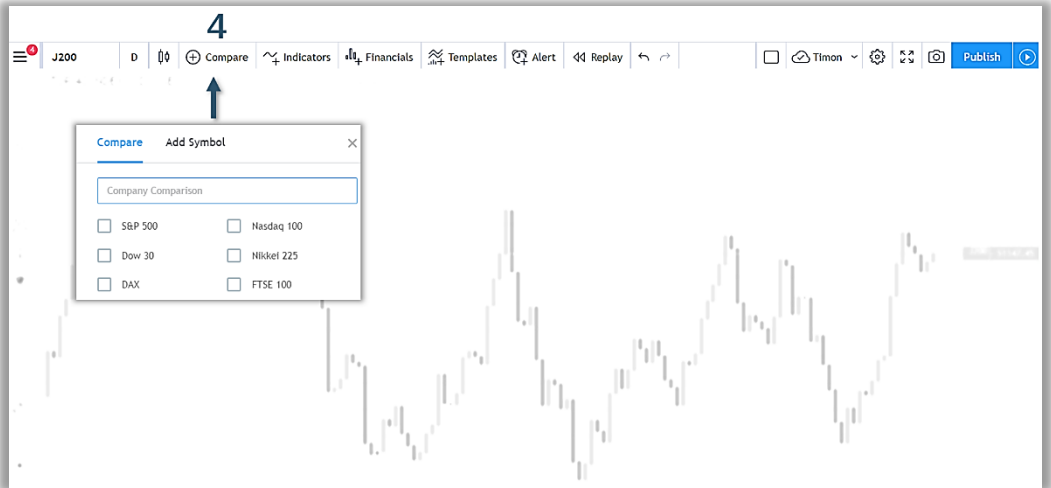

## #3: Chart type

Choose your ideal chart type

## #4: Compare

Compare and overlay any market on another market

## #5: Indicators

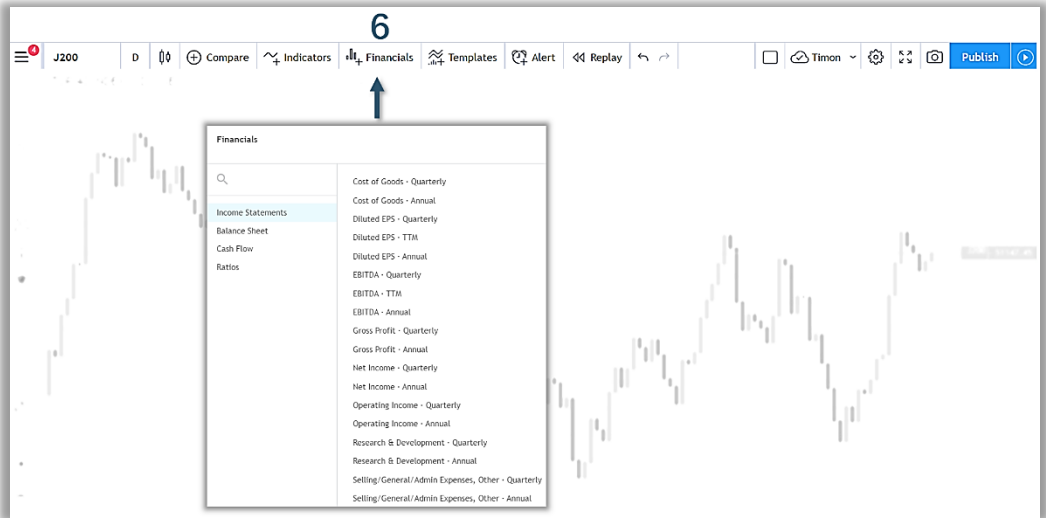

Choose or type your preferred indicator, band or oscillator to add to the chart

## #6: Financials

Here you'll find real-time market fundamentals information

## #7: Templates

Customise and save your indicator template to suit your charting needs

## #8: Alert

Create and modify your trading alerts on any market

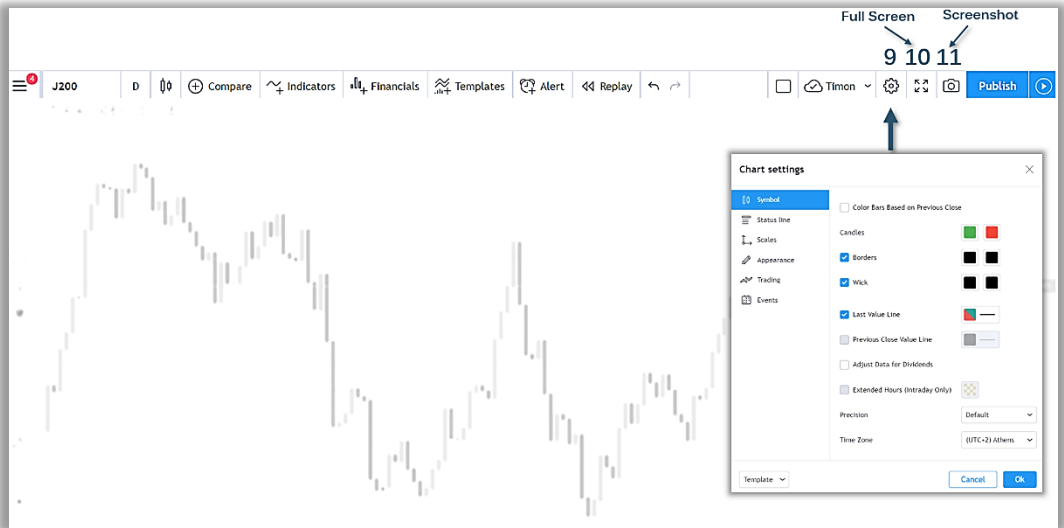

### NOTE:

You can also right-click on the chart area at the price you'd like to create your alert.

## #9, #10, #11:

Change your settings, view full screen or screenshot your chart

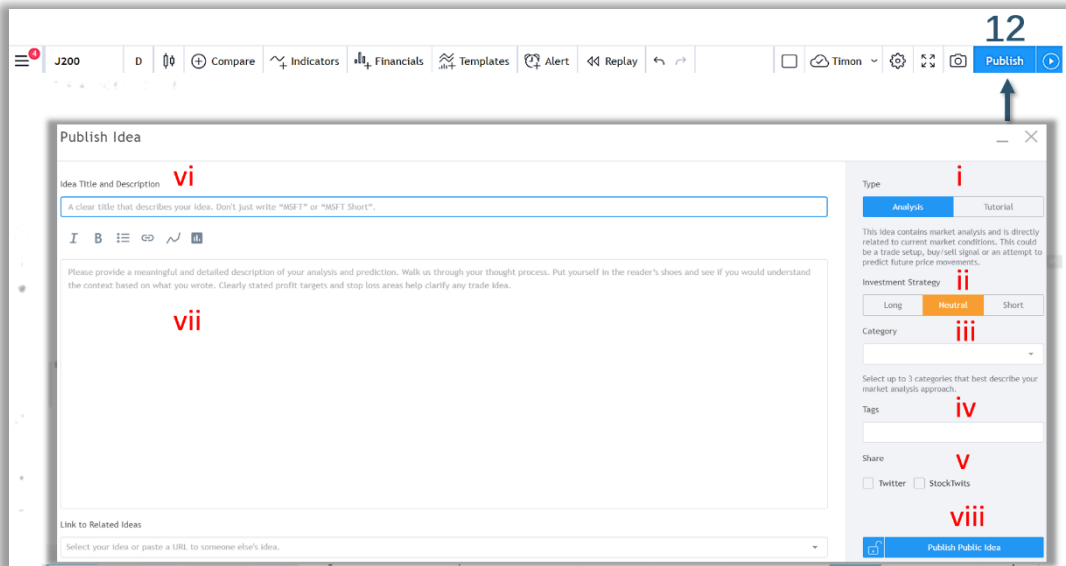

### NOTE:

To exit the full-screen mode –  
hit the Esc key.

## #12: Publish

Publish a tutorial or a trading signal (long, short or neutral)

- i. What type of post?**  
Choose whether to publish a chart analysis or a chart tutorial.
- ii. Investment strategy**

**NOTE:**

With this social platform, you might make your name in the trading community where you get discovered by top trading firms.

## Charting Platform Left Toolbar

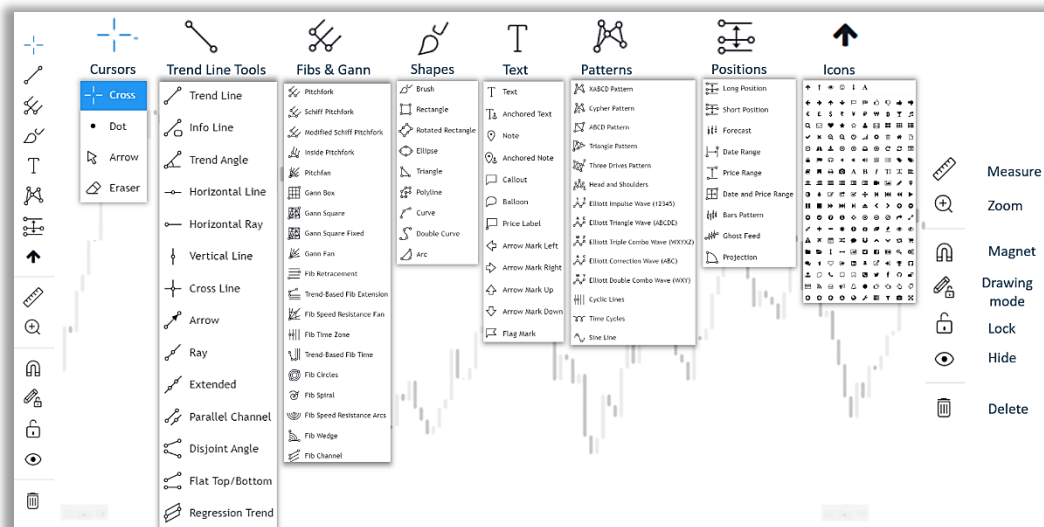

# Drawing and Annotation tools

Chart your analysis with ease

The left toolbar will give you the ability to personalise your charts.

It houses a whole bunch of drawing, analyses and annotation tools you can place on your chart window.

## SHORTCUT NOTES:

Copy = Cntrl+C / Cmd+C

Paste = Cntrl+V / Cmd+V

Undo = Cntrl+Z / Cmd+Z

Duplicate = Hold Cntrl + Click item and drag down

Remove All = Right-Click on the main chart and choose Remove All Indicators / Drawing Tools

## Positions

Visualise your trading positions

This button allows you to visually place a Long Position, Short Position, Price range as well as calculate your risk-to-reward ratio simultaneously.

You'll save time as a trader, rather than having to use your calculator each time.

I've personally never seen this option available on any charting or trading platform other than with *TradingView*.

If you come across one, please let me know by emailing [info@timonandmati.com](mailto:info@timonandmati.com).

Below you'll see a trade idea I published with the position tool in use.

# Charting Platform

## BottomToolbar

The bottom toolbar gives you access to mainly taking down notes, testing strategies, coding, paper trading and connecting to the brokers available.

## PLEASE NOTE:

I was not compensated by *TradingView* to write this PDF.

*TradingView* is a fantastic platform for not only *MATI Trader* members but for anyone who would like to learn and make a success from the markets.

I wrote this e-book because I would've wanted someone to do the same for me when I started trading in 2003.

Remember these words into 2020 and beyond:

*“If not me, who?” “If not now, when?”*

*Thank you for your support!*

Please remember to share this e-book or at least, this link to the **‘TradingView – Free Charting Platform Recommended Letter’** to a few friends and family members that you believe would be interesting in trading.
