Warehouse Management System — Control Your Inventory, Control Your Business

The Ponderosa Warehouse Management System (WMS) is a real-time inventory control solution that helps LBM dealers and manufacturers improve efficiency and accuracy in their warehousing and yard management operations, reduce inventory levels and costs and gain a competitive edge.

Ponderosa uses wireless, durable, handheld RF (radio frequency) mobile PCs and barcode scanners, capable of reading barcodes from up to 40 feet away, to track inventory and its location from the time materials arrive until it is shipped. The system captures inventory information at the receiving dock and then utilizes this data to help you optimize all facets of your warehousing operations.

Handhelds and Bar Code Scanning Maximize Efficiency and Lower Costs

Ponderosa's combination of barcode identification, RF data collection technology and specialized warehousing software tools help you:

- Lower inventory levels
- Maximize accuracy of inventory management
- Reduce receiving, stocking, staging, picking, shipping and replenishment time
- Improve order fulfillment and customer satisfaction
- Improve warehouse workflow, material movement and space utilization
- Minimize receiving, stocking, picking, packing and shipping errors
- Increase employee accuracy, productivity and efficiency
- Simplify cycle counting and full physical inventories

The Ponderosa WMS also supports manufacturing, remanufacturing and production scheduling to optimize manufacturing processes, material movement, work centers, labor, overhead costs and allocated inventory. The result is reduced labor costs, increased productivity, better manufacturing space utilization and near-perfect accuracy.

The system provides detailed audit trails that, so you can analyze, plan, and distribute resources based on real-time inventory and operator data, and improve customer service and business profitability. Optimize warehouse operations and make informed decisions that get your customers the right products in the right place at the right time for total customer satisfaction with greater profitability.

Ponderosa utilizes durable, wireless handhelds mobile that improve the efficiency and accuracy of stocking, picking, staging, shipping, invoicing and cycle counts from the time materials arrive until they are shipped.

Ponderosa maximizes the efficiency, speed and accuracy of warehouse operations and helps drive costs from your business.
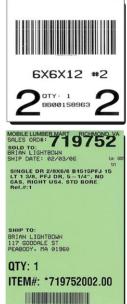

Written by Us. Supported by Us.

Ponderosa WMS technology is fully integrated with the Ponderosa core applications at no additional fee. You have it from day one and we stand ready to implement for you when you are ready. Many companies start by simply utilizing the Receiving functions and grow into it from there. Companies that are doing remanufacturing, i.e. milling, treating, custom molding, generally use it from day one to accurately track inventory that is pulled for manufacturing and to be sure that all of the related production costs are included in the price of their inventory out. Ponderosa supports full Absorption Cost Accounting.

WMS is of particular benefit to multi-location companies. You can always be confident that Quantities on Hand at another location are accurate in order to transfer or to ship materials directly from there.

The Ponderosa Warehouse Management System lets you print a range of customized barcode labels for maximum flexbility and control throughout your operations.

About Ponderosa

Ponderosa Enterprise Resource Planning (ERP) software is a fully integrated, Windows-based solution that automates Point of Sale, Product Configuration, Sales Order Processing, Purchasing, Manufacturing and Production Scheduling, Inventory Control, Warehouse Management, Installed Sales, Deliveries, Accounting, Business Intelligence (BI), e-Commerce and more — that automates daily business processes and manages operations more efficiently and help you to make the most informed business decisions.

Developed by Computer Associates and continually enhanced and supported by CAI for more than 35 years with state-of-the-art technology and industry best practices, Ponderosa consolidates critical information—from all areas of the business—to provide the industry's most comprehensive LBM Business Management System.
