FAQs

What makes the Hammer Head Swim Cap different?

We invented the world's only protective swim cap – built for safety, but it does so much more! The Hammer Head is for all ages and skill levels.

Here are the Hammer Head Swim Cap unique features and benefits.

- **HIT Honeycomb Impact Technology®** – patented technology designed to reduce the shock of accidental and repetitive head strikes in the pool
- **TEKFIT®** – comfortable design with no wrinkles and built for racing
- **DURABILITY** – tear-resistant, premium silicone that is designed to outlast other caps

How does it help protect from impacts and collisions?

A layer of honeycomb chambers – invisible from the exterior – designed to help absorb and dissipate the shock from accidental and repeated head strikes with the pool wall and other swimmers.

How common are head injuries in swimming?

Approximately 70 percent of swimmer head injuries occur during busy swim practice and in crowded warm up lanes at meets. Of all injuries, 68 percent occur from swimmer's colliding with each other, the bottom of the pool or the pool wall.

Hammer Head has worked with instructors, coaches and parents since 2013 focusing on collaboration to increase safety in the pool as a "mutual responsibility." It is especially critical for youth swimmers and their developing brains, as they continue to get comfortable in the water and clumsily learn their strokes.

How do I wear the Hammer Head Caps?

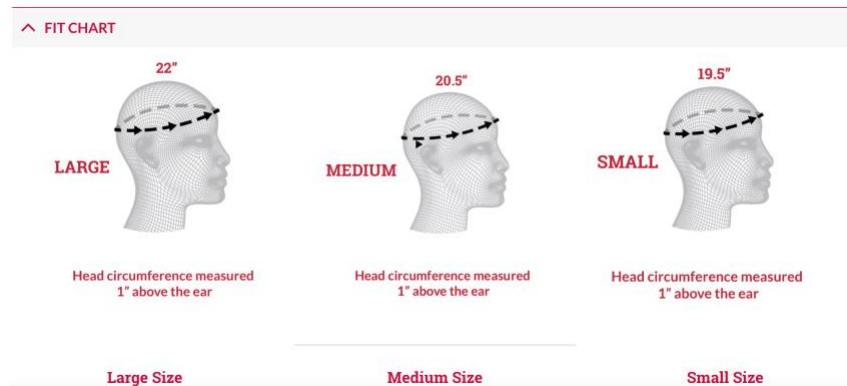

There is a front and a back and our logo will always go in the front of the cap. If you are a swimmer with long hair, for the best fit you will want to make a low ponytail and tuck your hair up in the back of your new Hammer Head. You can wear your team cap over the Hammer Head and maintain the smooth-wrinkle-free racing surface.

How do I care for my Hammer Head Caps?

You can simply rinse it with soap and water occasionally and turn it inside out to dry.

Is the Hammer Head One-Size-Fits-All?

The Hammer Head comes in three sizes; small, medium and large. Although every head is unique, generally the small fits swimmers ages 2-8, the medium ages 8-14 and the large fits an adult. Variables include size and shape of head and length of hair. You will know you have the right size when it feels like the most comfortable cap you have ever worn!

Do Hammer Head Caps look different?

They are a little longer on the sides, covering the ears and unlike a traditional silicone swim cap there are no wrinkles on the Hammer Head Swim Cap. This is a result of the patented HIT Honeycomb Impact Technology® which is invisible from the exterior.

How do I order caps for my team or school?

You can go to www.hammerheadswimcaps.com/shop/, contact us at info@hammerheadswimcaps.com or call 1-888-842-5151 to speak to us live. Be sure to ask about volume discounts for teams, clubs and schools.

Is the Hammer Head Swim Cap more durable than other caps?

Yes. Hammer Head Swim Caps is made as one part and has no seams like traditional latex or silicone swim caps. Because of this it will outlast most other caps.

Can I customize the Hammer Head Swim Cap?

Yes. Hammer Head Swim Caps can be custom customized with a one-color team logo (one or two sides) in the same way as a traditional silicone cap. You can contact us at info@hammerheadswimcaps.com, or call 1-888-842-5151 to speak to us live.

Is it approved for competition swimming?

Yes. Hammer Head Swim Caps meet all USA Swimming standards and certifications.

**The World's Only
Protective Swim Cap®**
and it does so much more!

“The Hammer Head® Swim cap is nothing short of a game changer for all swimmers.

-Rowdy Gaines, Olympic Gold Medalist

“Concussion Protocol Training (CPT) is now being implemented and enforced at the state level. So one thing is for sure, athlete safety is going to remain top of the agenda and a big discussion topic for all of us for the foreseeable future.

-Paris Jacobs, COO, ASCA

“Hammer Head is the safest, fastest, most comfortable and longest lasting swim cap in the world.

-Josh Davis, Olympic Gold Medalist

“Athlete safety is a top priority of USA Synchro and partnering with companies like Hammer Head demonstrates how serious we are about it.

-Adam Andrasko, CEO USA Synchro

“We are thrilled that for every Hammer Head Swim Cap purchased, a donation will be made to Hope Floats Foundation to provide swimming lessons for children living in poverty.

-Cindy Tonnesen, Founder and President of Hope Floats Foundation

Full blown concussions are rare but it's the recurring day to day “head strikes” from walls, pools, elbows and feet that can have a cumulative effect on the developing brain. Protect them with Hammer Head Swim Caps today.
