Jun 4, 2020 Version 20.23 Fixes for loading content. Thanks for the support! Every time I follow the instructions, it says that we need to download pocket mine over and over again! It's not fair that all the mods that work and are good are for PC they should have better and more mods that work for pocket edition. Every time I see a mod, I see: mods for PC edition. Plz plz plz JUST WORK! Okay so as in the title I saw a lot of good reviews, but this does not work on p.e so just putting that out there. Okay now this is the real issue... I go onto this app to try to get some cool stuff, so I go onto a search tab and no matter what I search I see the same packs and mods! So I think okay, it's not taking in my search, odd? So I reload it and the same thing happens, so what I'm trying to say is that there aren't a lot of packs or mods. They just put it in a different order so that it looks like there is a lot.(don't get this app it's a waste of time) Really cool app, but some addons download successfully, such as the mods, while others, such as the maps, don't. Is there a specific way I can get the maps to work? Other than this, this app is really enjoyable. The developer, Seejaykay LLC, has not provided details about its privacy practices and handling of data to Apple. For more information, see the developer's privacy policy. The developer will be required to provide privacy details when they submit their next app update. App Support Privacy Policy It's the first beta of the mod so it's still quite limited in terms of functionality. It will detect only the closest range of blocks. It definitely proves useful, especially when you are down mining, as it will detect most ores on the minimap. Follows 5 Steps bellow to install Xaero's Minimap Mod 1.16.5 | 1.15.2 (Radar, Waypoint, Zoom) on Windows and Mac :1. Ready installed Minecraft Forge.2. Download a Forge compatible mod from url download, or anywhere else!3. Open Minecraft game, click ->> 'Mods' button from main menu, click – >> 'Open Mods Folder'.Important: Some older versions of Forge may not have the 'Open Mods Folder' button. If that is the case, you will need to find the folder manually. Windows:Press the Windows key and R at the same timeType %appdata% and press enterFind folder Minecraft and then look for the Mods folder within thatMac:Click on the desktop and then press Command+Shift+G all at the same timeType ~/Library and press enterOpen the folder Application Support and then Minecraft4. Place the mod file downloaded (.jar or .zip) into the Mods folder.5. Run Minecraft, and you should now see the new mod installed in the list!Top 8 Best Java Seeds 1.16.5 for Minecraft in 2021Top 5 best Shaders 1.16.5 for Minecraft | Minecraft 1.16.5 ShadersTop 12 Best Mods 1.16.5 for Minecraft | Best Minecraft Mods 1.16 in 2021 .Xaero's Minimap Mod 1.16.5 has a very clean interface and blends well with the overall Minecraft aesthetic. You can set waypoints manually and even kill points will be created automatically if you die. In general, it is very customizable to suit your needs.Xaero's Minimap Mod 1.16.5 | 1.15.2 Screenshot :Requires:Minecraft ForgeXaero's Minimap Mod 1.16.5 | 1.15.2 Download LinksHow to install Minecraft ForgeMinecraft Forge is a Modding API that makes it very easy to install a number of different Minecraft mods. This guide will explain how to correctly install Forge.1. Visit the Forge website, choose the Minecraft version you would like to run from the sidebar on the left, then download the installer.2. Open the .jar file you have just downloaded, make sure 'Install client' is selected and click OK. Once this has finished you will see a success message.3. Launch Minecraft and select the Forge profile then click Play.4. You should now see the Minecraft Forge text in the lower left hand corner and a Mods button below Multiplayer.If so, congratulations, you have successfully installed Minecraft ForgeMinecraft mods 1.15.2Minecraft mods 1.16.4Minecraft mods 1.16.5Minimap Mods © UTK.io – Creations copyright of the original creators UTK.io is not affiliated with Minecraft or Mojang AB. Google Play and the Google Play logo are trademarks of Google LLC. Follow @UTKio Tweet There are many Minimap options for Minecraft but few are as clean as Xaero's. It has a very clean interface and blends well with the overall Minecraft aesthetic. You can set waypoints manually and even deathpoints will be created automatically if you die. Overall it's very customizable to suit your needs. Waypoints can be created by pressing B and you can even teleport to them if you want. You can also choose whether you want to see those in game or have them hidden. They'll still remain in your list regardless, which can be access by pressing U. Possibly the best part of this minimap is that it recognizes when you're underground. This is greatly helpful if you're trekking through caves and abandoned mines and need a quick reference of where you are. Combine that with waypoints and you'll never get lost again. The custom settings are what makes this map truly personal. You can adjust the size exactly to your liking. Set the display HUD to show players, items, and mobs. And even move it around wherever it works best for you. Choose wherever you want it to be or choose from one of four presets. DownloadForumInstall Guide Xaero's Minimap, 3.67 / 5 (350 votes)
