

2022 ICD-10-CM Diagnosis Code Excel Tool Introduction, Instructions and Resources

This document has been prepared for you by Healthcare Training Leader, 800-767-1181; info@trainingleader.com; www.healthcare.trainingleader.com

The new 2022 ICD-10-CM diagnosis codes go into effect on October 1, 2021 until September 30, 2022. The purpose of this tool is to help you more efficiently integrate these upcoming code changes into your practice's day-to-day operations more seamlessly.

This workbook is broken down in 2 sections:

1. Summary and Reference information: You'll find 3 orange tabs that include the following information:

- a. 2022 Summary: This is a high level look of how many and what kind of changes occurred in each chapter.
- b. CMS Conv. Table: CMS produces this table with updates to the ICD-10-CM codes with a crosswalk from the previous year's code assignments to the current year.
- c. 2022 Breakdown: This is a listing of all code changes for the upcoming year in a spreadsheet that you can filter to make it easier to find what you are looking for.

2. Chapters: You'll find 22 separate tabs related to each chapter of the 2022 ICD-10-CM Diagnosis code changes. Each tab also includes the code range so that you can more easily find what you are looking for. To make the tool easier to use, we've utilized some color coding to identify changes:

- a. Green = Additions
- b. Blue = Revisions
- c. Black = Deletions
- d. Grey highlight = New Codes or Deleted Codes

*Note: Each chapter has an additional column added "Code Order." This column was only added to help you organize the codes the same as the ICD-10-CM original document. To achieve this, sort columns using the filters in the following order (1) 2022 Code Description (2) *Code Order (3) Codes.*
