

# 18<sup>th</sup> International Conference on Pharmaceutical Microbiology and Biotechnology

Edward B Walker

Weber State University, USA, E-mail: ewalker@weber.edu

[Pharmaceutical microbiology](#) provides knowledge and understanding with regards to the significance of the presence of bacteria, yeasts, moulds, viruses and toxins in pharmaceutical raw materials, intermediates, products and pharmaceutical production environments, as well as the microbiological control of pharmaceutical products, production environments and people. Biotechnology is technology that utilizes biological systems, living organisms or parts of this to develop or create different products.

“18th International Conference on Pharmaceutical Microbiology and Biotechnology” is organizing an outstanding Scientific Exhibition/Program and anticipates the world's leading specialists who are involved in the field of Microbiology and Biotechnology. Pharmaceutical Microbiology 2020 is an exciting opportunity to showcase the new technology, the new products of your company, and/or the service your Industry may offer to a broad international audience. This conference enables the sponsors a unique chance to choose from a pool of outstanding scopes for expansion of their business. All these factors combined and several more make Pharmaceutical Microbiology 2020 a “must attend” Microbiology Conference.

Pharmaceutical Microbiology 2019 witnessed an amalgamation of peerless speakers who enlightened the crowd with their knowledge and confabulated on various new-fangled topics related to the field of Microbiology and Biotechnology. Edward B Walker, Weber State University, USA presented a Keynote speech on “The search for bacterial anti-adherence agents”, Huang Wei Ling, Medical Acupuncture and Pain Management Clinic, Brazil presented a Keynote speech on “Is it possible to treat community-acquired and nosocomial infections with the same method, without the use of antibiotics?” and Jos van der Vossen. TNO Quality of Life, Netherlands presented a Keynote speech on “In vitro fermentation of selected prebiotics and their effects on the composition and activity of the adult gut microbiota”.

With the grand success of Pharmaceutical Microbiology 2019, we are glad to announce our next upcoming conference Pharmaceutical [Microbiology](#) 2020 at Berlin, Germany on February 24-25, 2020. The conference will

serve as a platform to bring together leading Researchers with different specialties such as Microbiology, Biotechnology etc. Pharmaceutical Microbiology Congress will discuss on the topics such as Microorganisms in Pharmaceutical Industry, Microbial Identification and Contamination, Microbial Ecology and Next Gen Sequencing, Microbial Biochemistry, Molecular Immunology, Photochemistry Pharmacokinetic, Pharmacodynamic studies, Biotechnology Outbreak, Nano biotechnology, Oncology and Recombinant pharmaceuticals. Microbiology market size will grow from USD 3.74 Billion in 2017 to USD 7.26 Billion by 2023, at an estimated CAGR of 11.7%. The base year considered for the study is 2017, and the market size is projected from 2019 to 2023.

[Pharmaceutical Microbiology](#) Conferences going to be held during February, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh. And Many More!
