INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Mutual of Omaha Insurance Company
Omaha, Nebraska

We have audited the accompanying statutory-basis financial statements of Mutual of Omaha Insurance Company (the "Company"), which comprise the statutory-basis statements of admitted assets, liabilities, and surplus as of December 31, 2018 and 2017, and the related statutory-basis statements of operations, changes in surplus, and cash flows for the years then ended and the related notes to the statutory-basis financial statements.

Management's Responsibility for the Statutory-Basis Financial Statements

Management is responsible for the preparation and fair presentation of these statutory-basis financial statements in accordance with the accounting practices prescribed or permitted by the State of Nebraska Department of Insurance. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these statutory-basis financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statutory-basis financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the statutory-basis financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the statutory-basis financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the statutory-basis financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the statutory-basis financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on Accounting Principles Generally Accepted in the United States of America

As described in Note 1 to the statutory-basis financial statements, the statutory-basis financial statements are prepared by Mutual of Omaha Insurance Company using the accounting practices prescribed or permitted by the State of Nebraska Department of Insurance, which is a basis of accounting other than accounting principles generally accepted in the United States of America, to meet the requirements of the State of Nebraska Department of Insurance.

The effects on the statutory-basis financial statements of the variances between the statutory-basis of accounting described in Note 1 to the statutory-basis financial statements and accounting principles generally accepted in the United States of America; although not reasonably determinable, are presumed to be material.

Adverse Opinion on Accounting Principles Generally Accepted in the United States of America

In our opinion, because of the significance of the matter described in the Basis for Adverse Opinion on Accounting Principles Generally Accepted in the United States of America paragraph, the statutory-basis financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Mutual of Omaha Insurance Company as of December 31, 2018 and 2017, or the results of its operations or its cash flows for the years then ended.

Opinion on Statutory Basis of Accounting

In our opinion, the statutory-basis financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of Mutual of Omaha Insurance Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for the years then ended, in accordance with the accounting practices prescribed or permitted by the State of Nebraska Department of Insurance as described in Note 1 to the statutory-basis financial statements.

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations — Mutual of Omaha Insurance Company (the "Company") is a mutual health and accident and life insurance company, domiciled in the State of Nebraska. The following are wholly owned subsidiaries of the Company as of December 31, 2018: United of Omaha Life Insurance Company ("United of Omaha"); Mutual of Omaha Holdings, Inc.; Omaha Financial Holdings, Inc.; East Campus Realty, L.L.C. ("ECR"); Turner Park North, L.L.C.; Omaha Health Insurance Company and Mutual of Omaha Medicare Advantage Company ("Medicare Advantage Company").

The Company provides a wide array of financial products and services to a broad range of institutional and individual customers and is licensed in 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. Principal products and services provided include individual and group health insurance.

Basis of Presentation — The accompanying statutory financial statements have been prepared in conformity with accounting practices prescribed or permitted by the State of Nebraska Department of Insurance ("NDOI"). The State of Nebraska has adopted the National Association of Insurance Commissioners' ("NAIC") Statutory Accounting Principles ("NAIC SAP") as the basis of its statutory accounting practices. The Commissioner of the NDOI has the right to permit other specific practices that may deviate from NAIC SAP. The Company does not follow any practices that deviate from NAIC SAP except as discussed in Note 7.

The accompanying statutory financial statements vary in some respects from those that would be presented in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The most significant differences include:

a. Bonds are generally carried at amortized cost, while under GAAP, they are generally carried at fair value. Exchange Traded Funds, eligible for bond reporting by the NAIC Securities Valuation Office ("SVO Identified Funds-ETFs"), are carried at fair value and classified as bonds, while under GAAP, they are carried at fair value and classified as equity.

b. An other-than-temporary impairment ("OTTI") exists for NAIC SAP on a loan-backed or structured security if the fair value is less than the amortized cost basis and the Company has the intent to sell, does not have the intent and ability to retain the investment for a period of time sufficient to recover the amortized cost basis, or the Company does not expect to recover the entire amortized cost basis. For all other securities on an NAIC SAP basis, an OTTI is recognized if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of the security in effect at the date of acquisition or since the last OTTI. An OTTI exists for GAAP if a security's fair value is less than the amortized cost and if the Company has the intent to sell, it is more likely than not that the Company will be required to sell before the recovery of the amortized cost basis, or if the Company does not expect to recover the entire amortized cost of the security.

c. Investments in preferred stocks are generally carried at amortized cost, while under GAAP, preferred stocks are carried at their estimated fair value.

d. Limited partnerships are carried at the underlying audited GAAP equity value with the change in valuation reflected in unassigned surplus on an NAIC SAP basis. Income distributions from the limited partnerships are reported as net investment income on an NAIC SAP basis. Under GAAP, the change in valuation as well as the income distributions is reflected in either net investment income or as a realized capital gain or loss depending on the underlying investments.

e. Under NAIC SAP, derivative instruments that meet the criteria of an effective hedge are valued and reported in a manner that is consistent with the hedged asset or liability. The change in fair value of derivative instruments that do not meet the criteria of an effective hedge are recorded as an unrealized capital gain or loss in surplus. Under GAAP, all derivatives are reported on the balance sheet at fair value and the effective and ineffective portions of a single hedge are accounted for separately. Changes in fair value of derivatives, to the extent they are effective at offsetting hedged risk, are recorded through either income or equity, depending on the nature of the hedge. The ineffective portion of all changes in fair value is recorded in income.

f. Acquisition costs, such as commissions and other costs directly related to acquiring new business, are charged to operations as incurred, while under GAAP, to the extent associated with successful sales and recoverable from future policy revenues, are deferred and amortized to income as premiums are earned or in relation to estimated gross profits.

g. NAIC SAP requires an amount to be recorded for deferred taxes as a component of surplus; however, there are limitations as to the amount of deferred tax assets ("DTAs") that may be reported as admitted assets that are not applicable under GAAP. Federal income tax provision is required on a current basis for the statutory statements of operations, the same for GAAP.

h. NAIC SAP policy reserves for health insurance contracts are calculated using mortality, morbidity, interest, and voluntary lapse assumptions. The effect on reserves, if any, due to a change in valuation basis, is recorded directly to unassigned surplus rather than included in the determination of net gain (loss) from operations. GAAP policy reserves are based on the Company's estimates of morbidity, mortality, interest, and withdrawals assumptions.

i. The asset valuation reserve ("AVR") and interest maintenance reserve ("IMR") are established only in the statutory financial statements.

j. Assets are reported under NAIC SAP at admitted asset value and nonadmitted assets are excluded through a charge to surplus, while under GAAP, nonadmitted assets are reinstated to the balance sheet, net of any valuation allowance.

k. Reinsurance recoverables on unpaid losses are reported as a reduction of policy reserves, while under GAAP, they are reported as an asset.

l. Comprehensive income and its components are not presented in the statutory financial statements.

m. Subsidiaries included as common stocks are carried under the equity method, with the equity in the operating results of subsidiaries credited or charged directly to the Company's surplus for NAIC SAP. Dividends received from subsidiaries are recorded in net investment income. GAAP requires either consolidation or equity method reporting with operating results of subsidiaries reflected in the statements of operations.

n. Surplus notes are reported as surplus for NAIC SAP while under GAAP, they are reported as long-term debt.

o. For loss contingencies, when no amount within management's estimate of a range is a better estimate than any other amount, the midpoint of the range is accrued. Under GAAP, the minimum amount in the range is accrued.

p. Gains on economic transactions, defined as arm's-length transactions that result in the transfer of the risks and the rewards of ownership, with related parties are recognized and deferred in surplus under NAIC SAP rather than deferred until the assets are sold to third parties as required under GAAP.

Use of Estimates — The preparation of statutory financial statements in accordance with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the statutory financial statements, and reported amounts of revenues and expenses during the reporting period. The most significant estimates and assumptions include those used in determining investment valuation in the absence of quoted market values, impairments, reserves for policies and contracts, policy and contract claims, the liability for retiree benefits under defined-benefit plans, and deferred taxes. Actual results could differ from those estimates.

The process of determining the fair value and recoverability of an asset relies on projections of future cash flows, operating results, and market conditions. Projections are inherently uncertain and, accordingly, actual future cash flows may differ materially from projected cash flows. As a result, the Company's asset valuations are susceptible to the risk inherent in making such projections.

Due to the nature of health and accident contracts and the risks involved, health and accident active life reserves are estimates. These reserves are calculated using morbidity, mortality, and interest rate assumptions. Voluntary lapse assumptions are permitted in certain situations subject to limitations for certain products. Actual morbidity, mortality, interest rates, and voluntary lapse rates may differ from valuation assumptions.

Policy and contract claims are estimated based upon the industry and/or company experience and other actuarial assumptions that consider the effects of current developments, anticipated trends, and risk management programs. Revisions of these estimates are reflected in operations in the year they are made.

Investments — Investments are reported according to valuation procedures prescribed by the NAIC. Bonds are stated at amortized cost using the effective yield method, except for bonds with an NAIC designation of 6, which are stated at lower of amortized cost or fair value. The use of fair value may cause some of the loan-backed securities previously designated as NAIC 6 to be reassigned to a different designation. SVO Identified Funds-ETFs, captured within the scope of Statement of Statutory Accounting Principles ("SSAP") No. 26 *Bonds,* are eligible for bond reporting. The Company has elected to value SVO Identified Funds-ETFs at fair value.

Premiums and discounts on loan-backed bonds and structured securities are amortized using the retrospective or prospective method based on anticipated prepayments from the date of purchase. Prepayment assumptions are based on information obtained from brokers or internal estimates based on original term sheets, offer memoranda, historical performance, or other forecasts. Changes in estimated cash flows due to changes in estimated prepayments are accounted for using the prospective method for impaired securities and securities valued based on an index, and the retrospective method for all other securities.

Preferred stocks, redeemable and perpetual, are carried at amortized cost, except for preferred stocks that are NAIC rated 4 through 6, which are stated at lower of amortized cost or fair value.

Common stocks of unaffiliated companies are stated at fair value and common stocks of affiliated insurance companies are carried at the underlying statutory equity value while affiliated non-insurance companies are carried at the GAAP equity value. Changes in the carrying values are recorded as a change in net unrealized capital gains (losses), a component of surplus. Dividends are reported in net investment income.

Mortgage loans held for investment are carried at the aggregate unpaid principal balance adjusted for unamortized premium or discount, except impaired loans. Such loans are carried at the lower of the amortized cost, or the fair value of the loan determined by the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral less cost to sell if collateral dependent. Interest income is accrued on the unpaid principal balance based on the loan's contractual interest rate. The Company records a reserve for losses on mortgage loans as part of the AVR.

The Company calculates specific reserves on loans identified individually as impaired. Loans evaluated individually are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect principal or interest amounts according to the contractual terms of the loan agreement. Interest income earned on impaired loans is accrued on the principal amount of the loan based on the loan's contractual interest rate until the loan is placed on non-accrual status.

Loans are reviewed on an individual basis to identify charge-offs. Charge-offs, net of recoveries, are deducted from the allowance. Mortgage loans are considered past due if the required principal and interest payments have not been received when contractually due. All mortgage loans are placed on non-accrual status when payments are determined to be uncollectible. Mortgage loans are returned to accrual status when all the principal and interest amounts contractually due have been brought current and future payments are reasonably assured.

A mortgage loan is considered a troubled debt restructuring ("TDR") if the borrower is experiencing financial difficulties and the Company has granted a concession it would not otherwise consider. A TDR typically involves a modification of terms such as a change of the interest rate below market rate, a forgiveness of principal or interest, an extended repayment period (maturity date) at a contractual interest rate lower than the current interest rate for new debt with similar risk, or capitalization and deferral of interest payments.

Real estate, excluding real estate held for sale, is valued at cost, less accumulated depreciation. Real estate held for the production of income is comprised of real estate owned by the Company that is primarily leased to non-affiliated third parties. Depreciation is provided on the straight-line method over the estimated useful lives, generally forty years, of the related assets. Real estate held for sale is valued at the lower of depreciated cost or fair value less estimated costs to sell. Real estate held for sale consists of collateral received on foreclosed mortgage loans.

Cash equivalents are highly liquid debt securities purchased with an original maturity of less than three months. Cash equivalents are carried at cost, which approximates fair value.

Short-term investments include related party notes and investments whose original maturities at the time of purchase are three months to one year and are stated at cost, which approximates fair value.

The Company has securities lending agreements whereby unrelated parties, primarily major brokerage firms, borrow securities from the Company. The Company requires a minimum of 102% and 105% of the fair value of the domestic and foreign securities, respectively, loaned at the outset of the contract as collateral. The Company continues to retain control over and receive interest on loaned securities, and accordingly, the loaned securities continue to be reported as bonds. The securities loaned are on open terms and can be returned to the Company on the next business day requiring a return of the collateral. Collateral received is invested in cash equivalents and securities with a corresponding liability for funds held for securities on loan included in borrowings in the statutory financial statements. The Company cannot access the collateral unless the borrower fails to deliver the loaned securities. To further minimize the credit risks related to this securities lending program, the Company regularly monitors the financial condition of counterparties to these agreements and also receives an indemnification from the financial intermediary who structures the transactions.

Other invested assets include the Company's investment in ECR, and investments in derivatives, low-income housing properties (carried at amortized cost), limited partnerships and receivables for securities. ECR is a limited liability company established for the operation of real estate in Omaha, Nebraska. Mutual of Omaha is the sole member. The investment in ECR is carried at the underlying GAAP equity. Changes are recorded in net unrealized capital gains (losses) within the Statutory Statements of Changes in Surplus. Distributions of income from this investment are recorded in net investment income. During 2018, the Company recognized a $1,991,776 impairment of its investment in ECR as a result of real estate investment impairments ECR recognized in 2017 subsequent to the Company's issuance of its 2017 financial statements. Additional cashflow testing by ECR in 2018 resulted in no additional impairments. As of December 31, 2018 and 2017, the Company's investment in ECR was $2,871,417 and $3,953,934, respectively.

The Company's derivatives include foreign currency swaps. When derivative financial instruments meet specific criteria, they may be designated as accounting hedges and accounted for on an amortized cost basis, in a manner consistent with the item hedged. Derivative financial instruments that are not designated as accounting hedges are accounted for on a fair value basis with changes recorded as a change in net unrealized capital gains (losses) within the statutory statements of changes in surplus. Interest on currency swaps is included in net investment income.

The Company designates certain of its foreign currency swaps as cash flow hedges when they are highly effective in offsetting the exposure of variations in cash flows for the hedged item. For currency swaps, the Company is exposed to credit-related losses in the amount of the net currency differential in the event of non-performance by the swap counterparty.

Limited partnerships are carried at their underlying GAAP equity with a one quarter lag adjusted for all capital distributions, cash distributions, and impairment charges for the quarter with changes recorded in unrealized capital gains (losses) through surplus. The fair values of the limited liability partnerships are determined using the underlying audited GAAP financial statements. Distributions of income from these investments are recorded in net investment income.

Investment income consists primarily of interest and dividends. Interest is recognized on an accrual basis and dividends are recorded as earned at the ex-dividend date. Interest income on mortgage-backed securities ("MBS") and asset-backed securities ("ABS") is determined on the effective yield method based on estimated principal repayments. Accrual of income is suspended when securities are in default or when the receipt of interest payments is in doubt. Realized capital gains (losses) on the sale of investments are determined on the specific identification basis.

Investment income due or accrued for which it is probable the balance is uncollectible is written off and charged to investment income. Investment income due or accrued deemed collectible on mortgage loans in default that is more than 180 days past due is nonadmitted. All other investment income due or accrued deemed collectible that is more than 90 days past due is nonadmitted.

Goodwill — The Company acquired a 100% interest in Omaha Health Insurance Company on September 30, 2016 for $20,871,303. As a result of this transaction, the Company recognized $4,234,605 of goodwill. As of December 31, 2018 and 2017, admitted goodwill included in Common stocks - affiliated was $3,281,819 and $3,705,280, respectively. The admitted goodwill was 25.86% of Omaha Health Insurance Company's book adjusted carrying value, gross of the admitted goodwill as of December 31, 2018.

Goodwill is amortized on a straight-line basis. Amortization expense recognized for the years ended December 31, 2018 and 2017, was $423,461, each. Goodwill is reviewed periodically for indicators of impairment. If facts and circumstances suggest possible impairment, the Company performs a qualitative assessment and recognizes impairment to the extent the carrying value exceeds the sum of expected undiscounted future cash flows There were no indicators of impairment as of December 31, 2018 and 2017.

Company-Owned Life Insurance — Company-owned life insurance represents individual life insurance policies on the lives of certain officers and other key employees who have provided positive consent allowing the Company to be the beneficiary of such policies and is carried at cash surrender value derived from an underlying portfolio of investments. The cash surrender values of the policies included in other assets were $419,276,537 and $434,978,268 as of December 31, 2018 and 2017, respectively. The Company paid no premiums in 2018 and 2017. The underlying investment characteristics at December 31, 2018 were 62% bonds and 38% common stocks. A loss of $15,701,731 and a gain of $41,970,349 in the surrender value of the policies was included in other income for the year ended December 31, 2018 and 2017, respectively. The company-owned life insurance policies are in compliance with Internal Revenue Code section7702.

Property — Property is carried at cost less accumulated depreciation and amortization and is included in other assets. The Company provides for depreciation of property using the straight-line method over the estimated useful lives of the assets. Furniture and fixtures are generally depreciated over one to twenty years. Leasehold improvements are carried at cost less accumulated amortization. The Company provides for amortization of leasehold improvements using the straight-line method over the lesser of the useful life of the asset or the remaining original lease term, excluding options or renewal periods. Leasehold improvements are depreciated over one to seven years. There was $9,058,853 and $7,834,835 in fully depreciated write-offs of home office property no longer in use at December 31, 2018 and 2017, respectively. Depreciation and amortization expense was $2,930,869 and $2,683,964 for the years ended December 31, 2018 and 2017, respectively.

Electronic Data Processing ("EDP") Equipment and Software — EDP equipment and operating and non-operating software are carried at cost less accumulated depreciation or amortization and are included in other assets. Depreciation expense is computed using the straight-line method over the lesser of the estimated useful life of the related asset or three years for EDP equipment and operating system software. Depreciation expense for non-operating-system software is computed using the straight-line method over the lesser of its estimated useful life or five years. Costs incurred for the development of internal use software are capitalized and amortized using the straight-line method over the lesser of the useful lives of the assets or five years.

Policy Reserves — Policy reserves include active life reserves and unearned premium reserves.

Active life reserves provide amounts adequate to discharge estimated future obligations in excess of estimated future net premiums on policies in force. Such reserves are based on statutory mortality and interest assumptions. Morbidity assumptions are either industry experience or a blend of industry and Company experience. Voluntary lapse assumptions, when applicable, are based on Company experience with statutory limitations. Such reserves are calculated on a net level premium method or on a one- or two-year preliminary term basis.

Unearned premium reserves include premiums that have been collected but have not been earned.

Claim Reserves — Claim reserves include the amounts estimated for claims that have been reported but not settled, estimates for claims incurred but not reported, and disabled life reserves. Such reserves are estimated based upon the Company's and affiliates' historical experience and other actuarial assumptions that consider the effects of current developments, anticipated trends, and risk management programs. Disabled life reserves are determined within statutory interest assumption limitations. Continuance assumptions are based on either industry experience or a blend of Company and industry experience that comply with statutory guidelines. Revisions of these estimates are reflected in operations in the year they are made.

The Company anticipates investment income as a factor in premium deficiency reserve calculations. As of December 31, 2018 and 2017, the Company had $11,731,155 and $17,054,636, respectively, of premium deficiency reserves related to its individual and discretionary group major medical lines of business. Liabilities for losses are based on projections of aggregated and policy-level cash flows reflective of contractual limits of liability.

Reinsurance — In the normal course of business, the Company assumes and cedes insurance business from its affiliates and unrelated third parties in order to limit its maximum loss, provide greater diversification of risk, minimize exposures on larger risks and expand certain business lines and manage capital. The ceding of insurance business does not discharge an insurer from its primary legal liability to a policyholder. The Company remains liable to the extent that a reinsurer is unable to meet its obligations. Amounts recoverable from reinsurers are reviewed for collectibility and length of time overdue on a quarterly basis. All amounts deemed uncollectible are written off through a charge to the statutory statements of operations when the uncollectibility of amounts recoverable from reinsurers is confirmed. Balances are included in the statutory statements of admitted assets, liabilities, and surplus and the statutory statements of operations, net of reinsurance, except for commissions and expense allowances on reinsurance ceded which are shown as income. Commission and expense allowances on reinsurance assumed are included in commissions expenses on the statutory statements of operations.

Amounts recoverable from reinsurers are based upon assumptions consistent with those used in establishing the liabilities related to the underlying reinsured contracts. Management believes the amounts recoverable are appropriately established.

Federal Income Taxes — The provision for income taxes includes amounts paid and accrued. The Company is subject to income tax in the United States and several state jurisdictions. Significant judgments and estimates are required in the determination of the Company's income tax expense, DTAs, and deferred tax liabilities ("DTLs").

Deferred taxes are recognized to the extent there are differences between the statutory and tax bases of assets and liabilities by using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on DTAs and DTLs is recognized in surplus in the period that includes the enactment date. Deferred taxes are also recognized for carryforward items including net operating loss, capital loss, and charitable contributions. NAIC SAP requires that temporary differences and carryforward items be identified and measured. Deductible temporary differences and carryforward amounts that generate tax benefits when they reverse or are utilized are tax affected in determining the DTA or DTL. Taxable temporary differences include items that will generate tax expense when they reverse and are tax affected in determining the DTL.

In the determination of the amount of the DTA that can be recognized and admitted, the NAIC SAP requires that DTAs be limited to an amount that is expected to be realized in the future based on a qualitative analysis of the Company's temporary differences, past financial history and future earnings projections. The net admitted DTA shall not exceed the excess of the adjusted gross DTA over the gross DTL. The adjusted gross DTA shall be admitted based upon two components: an amount that is limited to the lesser of future deductible temporary differences and carryforward amounts that are expected to be realized within three years from the reporting date, or 15% of adjusted capital and surplus (defined as capital and surplus net of the admitted DTA, electronic data processing equipment and operating software) and the adjusted gross DTA in an amount equal to the DTL.

The Company records uncertain tax positions in accordance with NAIC SAP on the basis of a two-step process in which (1) it determines whether a tax loss contingency meets a more-likely-than-not threshold (a likelihood of more than 50%) on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the Company recognizes 100% of the tax loss contingency. The Company recognizes interest accrued related to uncertain tax positions and penalties as income tax expense. The liability for uncertain tax positions and the associated interest liability are included in current federal income tax payable on the statutory statements of admitted assets, liabilities, and surplus.

Asset Valuation Reserve and Interest Maintenance Reserve — The Company establishes certain reserves under NAIC guidelines. The AVR is determined by formula and is based on the Company's investments in bonds, preferred stocks, common stocks, mortgage loans, real estate, short-term investments and other invested assets. This valuation reserve requires appropriation of surplus to provide for possible losses on these investments. Realized and unrealized capital gains (losses), other than those resulting from interest rate changes, are credited or charged to the AVR.

The IMR is used to defer realized capital gains (losses), net of tax, on sales of bonds and certain other investments that result from interest rate changes. These gains (losses) are then amortized into investment income over what would have been the remaining years to maturity of the underlying investments. Losses in excess of gains are recorded as an asset and nonadmitted.

Premiums and Related Commissions — Health and accident premiums are recognized as income over the terms of the policies. Commissions and other expenses related to the acquisition of policies are charged to operations as incurred.

Vulnerability Due to Certain Risks and Concentrations — The following is a description of the most significant risks facing life and health insurers and how the Company manages those risks:

Morbidity/mortality risk is the risk that experience is unfavorable compared to company assumptions due to errors in setting assumption, catastrophic risk (e.g. pandemic), volatility, and changes in trend. The Company mitigates these risks through reinsurance programs, adherence to strict underwriting guidelines, monitoring underwriting exceptions, and a formal assumption review and approval process.

Legal/regulatory risk is the risk that changes in the legal or regulatory environment in which an insurer operates will occur and create additional costs or expenses not anticipated by the insurer in pricing its products. The Company mitigates this risk by operating throughout the United States, thus reducing its exposure to any single jurisdiction, and by diversifying its products. The Company monitors economic and regulatory developments that have the potential to impact its business.

Interest rate risk is the risk that interest rates will change and cause a decrease in the value of an insurer's investments or cause changes in policyholder behavior resulting in changes in asset or liability cash flows. The Company mitigates this risk through various asset-liability management techniques, including duration matching and matching the maturity schedules of its assets with the expected payouts of its liabilities. To the extent that liabilities come due more quickly than assets mature, the Company may have to sell assets prior to maturity and recognize a gain or loss.

Credit risk is the risk that issuers of securities owned by the Company will default, or that other parties, including reinsurers who owe the Company money, will not pay. The Company has policies regarding the financial stability and credit standing of its counterparties. The Company attempts to limit its credit risk by dealing with creditworthy counterparties and obtaining collateral where appropriate.

Liquidity risk is the risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss, generate cash to meet funding requirements, or make a required profit. The Company has established an appropriate liquidity risk management framework to evaluate current and future funding and liquidity requirements. Future liquidity requirements are projected on a regular basis as part of the financial planning process.

Fair Value — Financial assets and liabilities have been categorized into a three-level fair value hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are as follows:

Level 1 — Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available.

Level 2 — Fair value is based on significant inputs that are observable for the asset or liability, either directly or indirectly, through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities and other market observable inputs. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities and validated or determined through use of valuation methodologies using observable market inputs.

Level 3 — Fair value is based on significant unobservable inputs for the asset or liability. These inputs reflect assumptions about what market participants would use in pricing the asset or liability. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Fair value for certain investments in qualifying investment funds is approximated by using the fund's net asset value ("NAV") per share.

Other-Than-temporary Declines in Fair Value — The Company regularly reviews its investment portfolio for factors that may indicate that a decline in fair value of an investment is other-than-temporary. Some factors considered in evaluating whether or not a decline in fair value is other-than-temporary include the Company’s ability and intent to retain the investment for a period of time sufficient to allow for a recovery in value, the Company’s intent to sell the investment at the reporting date, and the financial condition and prospects of the issuer.

The Company recognizes OTTI of bonds not backed by loans when it is either probable that the Company will not collect all amounts due according to the contractual terms of the bond in effect at the date of acquisition or when the Company has made a decision to sell the bond prior to its maturity at an amount below its amortized cost. When an OTTI is recognized, the bond is written down to fair value and the amount of the write down is recorded as a realized capital loss in the statutory statements of operations.

For loan-backed securities, OTTI is recognized when the fair value is less than the amortized cost basis and the Company has the intent to sell or lacks the intent and ability to retain the investment until recovery. When an OTTI is recognized because the Company has the intent to sell or lacks the intent and ability to retain the investment until recovery, the amortized cost basis of the loan-backed security is written down to the fair value and the amount of the write-down is recorded as a realized capital loss in the statutory statements of operations.

If the Company does not have the intent to sell and has the intent and ability to retain the investment until recovery, OTTI is recognized when the present value of future cash flows discounted at the security’s effective interest rate is less than the amortized cost basis as of the balance sheet date. When an OTTI is recognized, the loan-backed security is written down to the discounted estimated future cash flows and is recorded as a realized capital loss in the statutory statements of operations.

The Company recognizes OTTI of stocks for declines in value that are other-than-temporary and reports those adjustments as realized capital losses in the statutory statements of operations.

The Company recognizes OTTI of limited partnerships generally when the underlying GAAP equity of the partnership is less than 80% of amortized cost and the limited partnership reports realized capital losses on their statutory financial statements or the limited partnership shows other indicators of loss. When an OTTI is recognized, the limited partnership is written down to fair value and the amount of the impairment is recorded as a realized capital loss in the statutory statements of operations.

The Company performs a monthly analysis of the prices received from third parties to assess if the prices represent a reasonable estimate of fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals.

Subsequent Events — The Company has evaluated events subsequent to December 31, 2018, through May 20, 2019 the date these statutory financial statements were available to be issued.

Accounting Pronouncements — During 2017, the NAIC issued revisions to SSAP No. 100R *Fair Value* that allow insurance entities to use the NAV as a practical expedient to fair value when specifically stated in SSAP or when an investment does not have a readily determinable fair value and the investee meets the conditions of an investment or real estate investment company. In addition, the revisions require disclosure of investments using the NAV practical expedient as a separate category within the fair value hierarchy. The revisions were effective in 2018. See Note 4 for the required disclosures.

During 2018, the NAIC issued revisions to SSAP No. 68 *Business Combinations and Goodwill and SSAP No. 97 Investments in Subsidiary, Controlled and Affiliated Entities* ("SCA") that requires additional disclosures about goodwill, including the acquisition date, the original and current amount of admitted goodwill, and the goodwill as a percentage of the SCA entity's book adjusted carrying value. See Goodwill policy disclosure in Note 1 for the required disclosures.

During 2018, the NAIC issued revisions to SSAP No. 92 *Postretirement Benefits Other Than Pensions* and SSAP No. 102 *Pensions* that remove the disclosure for reconciling the beginning and ending balances for fair value measurements of pension and postretirement benefit plan assets using significant unobservable inputs (Level 3 inputs on the fair value hierarchy). The revisions also remove the requirement to disclose separately changes during the period attributable to the actual return on plan assets, transfers in and out of Level 3, and net of purchases, sales, and settlements. Note 10 was updated to reflect this revised guidance.

During 2018, the NAIC issued revisions to SSAP No. 21 *Other Admitted Assets* that clarifies that a life insurance contract of which the reporting entity is the owner and beneficiary must comply with Internal Revenue Code section 7702 in order to be an admitted asset. The revisions also require disclosure of the cash surrender value amount that is within an investment vehicle by investment category. See Note 1 for the required disclosures.

During 2018, the NAIC issued revisions to SSAP No. 51R *Life Contracts*, SSAP No. 52 *Deposit-Type Contracts,* and SSAP No. 61R *Life, Deposit-Type and Accident Health Reinsurance* that require disclosure of the amount of annuity actuarial reserves and deposit liabilities by withdrawal characteristics, and the amount and percentage of total amount by individual and group contracts. These disclosures are effective in 2019 for the Company.

During 2016, the NAIC issued revisions to SSAP No. 51 *Life Contracts* and SSAP No. 54R *Individual and Group Accident and Health Contracts* that require life, annuity, and health policies issued on or after the implementation of principles-based reserving to use the *Valuation Manual*, which describes reserve valuation under principles-based reserving ("PBR"), following an entity's adoption of PBR. These changes were effective January 1, 2017, however reporting entities may delay implementation for up to three years. The Company intends to adopt PBR in 2020 and is evaluating the impact of this guidance on its statutory financial statements.

Transfers between Levels 1 and 2 — Transfers in and/or out of any level are assumed to occur at the beginning of the period. During the years ended December 31, 2018 and 2017, there were no transfers between Level 1 and Level 2.

Transfers into and out of Level 3 — Assets and liabilities are transferred into or out of Level 3 when a significant input can no longer be corroborated or can be corroborated with market observable data. This occurs when market activity decreases or increases related to certain securities and transparency to the underlying inputs is no longer available or can be observed with current pricing. During the years ended December 31, 2018 and 2017 there were no transfers into and one transfer out of Level 3.

A description of the significant inputs and valuation techniques used to determine estimated fair value for assets and liabilities on a recurring basis is as follows:

Level 1 Measurements

SVO Identified Funds-ETFs and Common Stocks - Unaffiliated - The valuation of these securities is based on unadjusted quoted prices in active markets that are accessible for identical assets.

Derivative Cash Collateral and Securities Lending Cash Collateral — Comprised of U.S. Direct Obligation/Full Faith and Credit Exempt money market instruments, commercial paper, cash, and all highly-liquid debt securities purchased with an original maturity of less than three months. These money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. If public quotations are not available for commercial paper or debt securities, because of the highly liquid nature of these assets, carrying amounts may be used to approximate fair values. The carrying amount of cash approximates fair value.

Derivative Assets — These balances are comprised entirely of warrants and were valued using recent trade activity.

Level 2 Measurements

State and Political Subdivisions Securities — These securities are principally valued using the market approach, which uses prices and other relevant information generated by market transactions for similar assets. The valuation of these securities is based primarily on quoted prices in active markets, or through the use of matrix pricing or other similar techniques using standard market observable inputs such as the benchmark U.S. Treasury yield curve, the spread from the U.S. Treasury curve for the identical security and comparable securities that are actively traded.

Common Stocks-Unaffiliated — These securities are only redeemable at par, so the fair value is presumed to be par.

Derivative Assets and Liabilities — These derivatives consist of foreign currency swaps and are principally valued using an income approach. The valuation of these securities are based on option pricing models, which utilize significant inputs that may include the swap yield curve, LIBOR basis curves, currency spot rates and cross currency basis curves.

Level 3 Measurements

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described above. However, if key inputs are unobservable, or if the investments are illiquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency to develop the valuation estimates, causing these investments to be classified in Level 3. There were no investments measured at fair value on a recurring basis classified within Level 3 as of December 31, 2018.

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

The fair values of securities lending cash collateral, derivative financial instruments, common stock-unaffiliated, and payable for securities lending are estimated as discussed above.

Bonds — The fair values for bonds, including loan-backed securities, are based on quoted market prices, where available. For bonds for which market values are not readily available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Preferred Stocks — The fair values for preferred stocks are based on market value, where available. For preferred stocks for which market values are not available, fair values were estimated by the Company using projected future cash flows, current market rates, credit quality, and maturity date.

Mortgage Loans — The fair values for mortgage loans are estimated by discounting expected future cash flows using current interest rates for similar loans with similar credit risk.

Other Invested Assets — Surplus Notes — The fair values for other invested assets — surplus notes are based on quoted market prices.

Cash & Cash Equivalents— The carrying amount for this instrument approximates fair value.

Short-term Investments — The fair values for short-term investments, which consists of loans to affiliates with maturities of less than one year, approximates cost due to their short-term nature, but are limited to the value of any underlying collateral.

Borrowings — The carrying amounts for borrowings, approximates their fair value due to their short-term nature.

Certain of the Company's derivative instruments contain provisions requiring collateral against the fair value subject to minimum transfer amounts. The aggregate fair value of all the derivative instruments with collateral features was a liability of $1,101,118 and $6,659,798 as of December 31, 2018 and 2017, respectively. The Company pledged $1,200,000 and $5,610,000 of cash collateral as of December 31, 2018 and 2017, respectively. The Company was holding no cash collateral as of December 31, 2018 and 2017.

6. INCOME TAXES

The Company is the parent corporation of an affiliated group of corporations that file a consolidated U.S. Corporate Income Tax Return. The Company's federal income tax return is consolidated with the following affiliates: Mutual of Omaha Holdings, Inc. and its subsidiaries, Omaha Financial Holdings, Inc. and its subsidiaries, United of Omaha and its subsidiaries, Medicare Advantage Company, and Omaha Health Insurance Company.

Income taxes are allocated among its subsidiaries pursuant to a written agreement approved by the Board of Directors. Each subsidiary's provision for federal income taxes is based on separate return calculations. Omaha Reinsurance Company ("Omaha Re"), a wholly owned subsidiary of United of Omaha, is entitled to a refund of income taxes for any losses, regardless of whether these losses result in a reduction in the consolidated tax liability.

The Company also has an enforceable right to use consolidated net operating loss, capital loss, and charitable contributions, if any, against future net income subject to federal income taxes. The annual cost or benefit of this tax sharing agreement between the Company and its subsidiaries is charged or credited to surplus. Amounts due from subsidiaries as of December 31, 2018 and 2017 were $9,407,992 and $13,569,032, respectively, and were included in federal income taxes recoverable.

The Company's DTL does not include a DTL for the unrealized capital gains (losses) for its investment in subsidiaries.

On December 22, 2017, the Tax Cuts and Jobs Act of 2018 ("Act") was signed into law. The Act included numerous changes, including a permanent reduction in the federal corporate income tax rate from 35% to 21%, effective January 1, 2018. As a result of the reduction in rates, the deferred tax was reduced, which resulted in a decrease of $155,277,183 to surplus for the year ended December 31, 2017. In addition, certain adjustments were made to the Company's taxable income in conjunction with finalizing its U.S. federal income tax return for the period ended December 31, 2017. As a result of management's tax planning strategies, the adjustments included revaluing tax reserves using interest rates that reset every five years. The Company also carried back capital losses incurred in 2018 that offset capital gains incurred in 2015. These items resulted in an increase of $27,643,992 to the Company's net income and surplus for the year ended December 31, 2018. See the effective tax rate reconciliation table below for details of this adjustment. As of December 31, 2018, the accounting for the material financial reporting impacts of the Act was complete.

There were no deposits admitted under Section 6603 of the Internal Revenue Code.

The statute of limitations has closed on all years through 2014. Therefore, the years after 2014 remain subject to audit by federal and state tax jurisdictions.

The Company is included in a consolidated United States Corporate Income Tax Return that is being examined by the Internal Revenue Service for the years 2014, 2015, and 2017. The Company remains subject to examination by the Internal Revenue Service for the year 2016, as well as state examinations for the years 2015 through 2018.

In the event of future tax losses, operating losses cannot be carried back to prior years, but can be carried forward indefinitely where such carryforward is limited to a deduction equal to 80% of the taxable income in any one year. Capital losses are still available as a carryback. There were no net operating loss carryforwards as of December 31, 2018.

For the years ended December 31, 2018 and 2017, there was no income tax accrual for uncertain tax positions. As of December 31, 2018, there were no positions for which management believes it is reasonably possible that the total amounts of tax contingencies will significantly increase within 12 months of the reporting date. As of December 31, 2018 and 2017, the Company had no statutory valuation allowance reducing its DTA.

The components of DTA and DTL as of December 31, were as follows:

The Company invests in low-income housing tax credit ("LIHTC") limited partnerships from which federal credits are scheduled to be received through 2030. The federal LIHTC programs provide tax credits over a ten-year period, after which the required holding period extends five years.

7. RELATED PARTY INFORMATION

The Company's investments in non-insurance Subsidiary, Controlled, or Affiliated entities' ("SCAs"), as of December 31, were as follows:

	2018		2017	
	Admitted	Nonadmitted	Admitted	Nonadmitted
Omaha Financial Holdings, Inc.	$ 901,524,800	$ -	$ 825,272,254	$ -
Mutual of Omaha Investor Services, Inc.	3,105,059	-	2,706,673	-

The Company has an investment in an insurance SCA, United of Omaha, for which the audited statutory surplus and income reflects a departure from NAIC SAP, for a prescribed practices from the NDOI. The prescribed practice requires an accounting practice for synthetic guaranteed interest contracts ("synthetic GIC") that differs from NAIC SAP in how certain reserves are determined. In 2018 and 2017, this practice increased net income by $513,285 and decreased net income by $147,409 and decreased surplus $7,269,722 and $7,783,006, respectively. The Company's investment in United of Omaha was $1,639,369,793 and $1,605,717,331 at December 31, 2018 and 2017, respectively. The investment would have been $1,646,639,515 and $1,613,500,337 at December 31, 2018 and 2017, respectively, without the prescribed practices. The RBC of United of Omaha would not have triggered a regulatory event if the prescribed practice was not used.

The Company has reinsurance agreements with affiliate entities. The Company assumes certain individual health insurance from United of Omaha, Omaha Insurance Company, United World Life Insurance Company and Companion Life Insurance Company. See Note 9 for impacts on the statutory financial statements due to these agreements.

The Company is a member of a controlled group of companies and as such its results may not be indicative of those if it were to be operated on a stand-alone basis. Certain amounts are paid or collected by the Company on behalf of its direct and indirect subsidiaries. Additionally, the Company and certain of its direct and indirect subsidiaries share certain resources such as personnel, operational and administrative services, facilities, information and communication services, employee benefits administration, investment management, advertising and general management services. Most of the expenses related to these resources were paid by the Company and are subject to allocation among the Company and such subsidiaries. Management believes the measures used to allocate expenses among companies provide a reasonable allocation that conforms to NAIC guidelines and are usually settled within 30 days. Amounts due to the Company for these services were included in receivable from subsidiaries and were $80,102,261 and $90,177,328 as of December 31, 2018 and 2017, respectively. Also included in recivable from subsidiaries was net amounts due the Company for premiums deposited, tax payments, claims processed, and commissions paid.

Additionally, the Company received the following fees under management agreements, service contracts and cost sharing agreements from its subsidiaries and affiliates. Mutual of Omaha Marketing Corporation was $1,557,215 and $1,524,076 for December 31, 2018 and 2017, respectively, which were included as a reduction of operating expenses.

8. BORROWINGS

The Company has a borrowing agreement with the FHLB under which the Company pledges bonds in return for extensions of credit. The Company and United of Omaha have jointly authorized a maximum extension of credit with the FHLB of $1,500,000,000. There were no advances against the credit agreement at December 31, 2018 and 2017. The maximum amount borrowed by the Company under this agreement was $131,200,000 during the year ended December 31, 2018.

The Company had securities loaned to third parties of $146,935,788 and $62,210,557 as of December 31, 2018 and 2017, respectively. The Company received cash collateral of $149,354,470 and $64,460,023 through these security lending agreements as of December 31, 2018 and 2017, respectively, and is reported as a payable for securities lending on the statutory statements of admitted assets, liabilities, and surplus. The securities loaned as of December 31, 2018 and 2017, were on open terms whereby the related loaned security could be returned to the Company on the next business day requiring return of cash collateral. The Company cannot access the cash collateral unless the borrower fails to deliver the loaned securities.

The amortized cost and estimated fair values of the Company's collateral as of December 31, 2018, were as follows:

	Fair Value	Amortized Cost
30 days or less	$ 7,498,327	$ 7,498,620
31 to 60 days	12,858,543	12,858,543

10. EMPLOYEE BENEFIT PLANS

The Company is both the sponsor and administrator of a non-contributory defined benefit plan ("Pension Plan") covering all U.S. employees meeting certain minimum requirements. Retirement benefits are based upon years of credited service and final average earnings history. Effective January 1, 2005, the Pension Plan was amended to freeze plan benefits for participants under 40 years of age. No benefits are available under the Pension Plan included in pension benefits below for employees hired on or after January 1, 2005. The Company also sponsors and administers a supplemental defined benefit plan covering certain current and former employees. The Company also provides certain postretirement medical and life insurance benefits (other benefits) to retired employees hired before January 1, 1995. Other benefits are based upon hire date, age, and years of service. The Company uses the accrual method of accounting for other benefits.

Projected Benefit Obligations and Plan Assets — The Company has no pension or other benefit plans in which projected benefit obligations are overfunded as of December 31, 2018 and 2017. The changes in the projected benefit obligation and plan assets for the Company's underfunded plans as of December 31, the measurement date, were as follows:

Limited partnerships	122,954,901	106,278,117
Total	$ 978,284,557	$ 974,764,752

Investments in the group annuity contract include the General Asset Account, which is valued at contract value, Separate Account K and Separate Account II. The Separate Account K and Separate Account II funds are recorded at the fair value of the defined benefit pension plan's proportionate share of the underlying net assets. The underlying net assets of the Separate Account K consist primarily of small cap common stocks traded on organized exchanges and over-the-counter markets. Separate account II is an index mutual fund based on the S&P 500 index.

Limited partnerships are valued at fair value based on the proportionate share of the partnership's capital balance. Equity securities — domestic and equity securities — foreign consist of mutual funds and collective investment trusts valued at fair value based on the proportionate share of the underlying net assets. The assets consist of securities traded on organized exchanges and over-the-counter markets indices.

The estimated fair values of the Separate Account K, Separate Account II, mutual funds, and limited partnerships as of December 31, were as follows:

The investment objective of the Pension Plan is to produce current income and long-term capital growth through a combination of equity and fixed income investments that, together with appropriate employer contributions, will be adequate to provide for the payment of the plan's benefit obligations. The assets of the Pension Plan may be invested in both fixed income and equity investments. Fixed income investments may include group annuity contracts, cash and short-term instruments, corporate bonds, mortgages and other fixed income investments. Equity investments may include large cap, mid cap and small cap stocks, and venture capital.

The Company has various regulated investment advisors that monitor investments in the Pension Plan to ensure they are in compliance with the Company's investment policy and guidelines. The use of derivative instruments as direct investments is prohibited. The Company's Retirement Plans Committee periodically reviews the performance of the defined benefit plan's investments and asset allocation. The current allocation strategy is 50% fixed income and 50% equities and other. The Company, subject to general guidelines set by the Retirement Plans Committee, makes all investment decisions.

The Company determines its expected long-term rate of return on assets based primarily on the Company's expectations of future returns for the Pension Plan's investments, based on target allocations of the defined benefit plan's investments. Additionally, the Company considers historical returns on comparable fixed income investments and equity investments and adjusts its estimate as deemed appropriate.

The Company expects to use available credits in lieu of required contributions in 2019. Additional voluntary contributions may be made pursuant to the maximum funding limits under the Employee Retirement Income Security Act of 1974, as amended. The Company does not expect to make a contribution in 2019.

Actuarial Assumptions — Actuarial assumptions used to calculate the projected benefit obligation and net periodic pension cost for the plans as of and for the years ended December 31, are set forth in the following table:

	Pension Benefits		Other Benefits	
	2018	**2017**	**2018**	**2017**
Projected benefit obligation				
Discount rate	4.65 %	4.00 %	4.65 %	4.00 %
Rate of increase in compensation levels	3.40	3.40	N/A	N/A
Net periodic pension cost				
Discount rate	4.00 %	4.55 %	4.00 %	4.55 %
Rate of increase in compensation levels	3.40	3.40	N/A	N/A
Expected long-term rate of return on plan assets	6.50	7.00	4.00	4.00

Actuarial assumptions used may differ materially from actual results due to, among other factors, changing market and economic conditions and changes in participant demographics and result in actuarial gains (losses) included in the projected benefit obligation. The actuarial loss in 2018 and 2017 are primarily the result of the changes in the discount rate and application of the new projection scales in 2018 and 2017.

The assumed health care cost trend rates used in measuring the accumulated postretirement benefit obligation was 5.20% and 5.00% in 2018 and 2017, respectively, gradually declining to 4.00% in 2083, and remaining at that level thereafter. Increasing and decreasing, respectively, the assumed health care cost trend rate by one percentage point in each year would increase (decrease) the Company's accumulated postretirement benefit obligation as of December 31, 2018, by approximately $2.5 million and the net periodic postretirement benefit costs for 2018 by approximately $150,000.

Savings and Investment Plans — The Company sponsors a savings and investment plan under which the Company matches a portion of employee contributions. The expense for this plan was $5,001,445 and $5,208,168 in 2018 and 2017, respectively. The Company also provides deferred compensation benefits for certain key executive officers. As of December 31, 2018 and 2017, the liability for deferred compensation benefits included in liability for benefits for employees and agents in the statutory statements of admitted assets, liabilities, and surplus was $20,361,210 and $27,020,691, respectively.

11. SURPLUS

The portion of unassigned surplus represented by each item below as of December 31, was as follows:

	2018	**2017**
Unrealized capital gain (loss)	$ 1,154,074,951	$ 1,113,329,555
Nonadmitted assets	(309,338,169)	(270,679,326)
AVR	(196,488,329)	(179,437,566)

The minimum statutory capital and surplus necessary to satisfy regulatory requirements was $875,795,716 as of December 31, 2018 (company action level RBC). Company action level RBC is the level at which a company is required to file a corrective action plan with its regulators. Company action level RBC is equal to 200% of the authorized control level RBC, which is the level at which regulatory action is taken.

12. SURPLUS NOTES

On July 17, 2014, the Company issued $300,000,000 in surplus notes due July 15, 2054, at par. Interest on the 2014 notes is fixed at 4.297% and payable semiannually until January 15, 2024, at which time interest resets quarterly to three month LIBOR plus 2.642%, payable quarterly. The 2014 notes were underwritten by Goldman, Sachs & Co. and J.P. Morgan Securities LLC, and are administered by US Bank, NA as registrar and paying agent. The 2014 notes are callable under a make-whole provision calculated as the present value of the remaining principal and interest payments any time prior to July 15, 2024 or at any time on or after July 15, 2024 at par. On October 12, 2010, the Company issued a 6.95%, $300,000,000 surplus note due October 15, 2040, at a discount of $10,095,000 with interest due semiannually. The notes were underwritten by Goldman, Sachs & Co. and J.P. Morgan Securities LLC and are administered by US Bank, NA as registrar and paying agent. On June 15, 2006, the Company issued a 6.80%, $300,000,000 surplus note due June 15, 2036, at a discount of $3,630,000 with interest due semiannually. The notes are carried at amortized cost. The notes were underwritten by Goldman, Sachs & Co. and Merrill Lynch & Co., and are administered by U.S. Bank, NA as registrar and paying agent.

Any payment of interest or repayment of principal on any outstanding surplus note may be made, either in full or in part, from available surplus funds of the Company only with the prior approval of the NDOI. Interest of $41,495,015 paid in 2018 and 2017, is included in net investment income. The notes are unsecured obligations of the Company and are expressly subordinated in right of payment to all present and future claims and senior indebtedness of the Company.

13. COMMITMENTS AND CONTINGENCIES

The Company had unfunded investment commitments for limited partnerships of $115,913,062 as of December 31, 2018 and unfunded investment commitments for bonds, mortgage lending, and limited partnerships of $145,044,992 as of December 31, 2017. As a condition of doing business, all states and jurisdictions have adopted laws requiring membership in life and health insurance guaranty funds. Member companies are subject to assessments each year based on life, health, or annuity premiums collected in the state. The Company estimated its costs related to past insolvencies and had a liability for guaranty fund assessments of $4,692,186 and $5,959,178 as of December 31, 2018 and 2017, respectively. The Company estimated premium tax credits that it will receive related to guaranty funds of $11,313,698 and $12,020,389 as of December 31, 2018 and 2017, respectively.

The Company recognizes discounted and undiscounted amounts relating to Penn Treaty Network America and its subsidiaries (together “Penn Treaty”). As of December 31, 2018, the discounted and undiscounted liabilities and receivables were $4,297,600 and $11,239,967, and $3,499,167 and $8,855,448, respectively. As of December 31, 2017, the discounted and undiscounted liabilities and receivables were $5,315,316 and $12,257,681, and $4,504,798 and $9,861,077, respectively. There are 51 jurisdictions for liabilities and premium tax credits by insolvency. Amounts used for the Penn Treaty accruals are the discounted amounts, using a 4.25% discount rate, reported by the National Organization of Life and Health Insurance Guaranty Association.

The Company has adopted resolutions to deliver a written guarantee to various departments of insurance to maintain Omaha Insurance Company’s capital and surplus at or above various statutory minimum levels or RBC, whichever is greater. Omaha Insurance Company is an indirect subsidiary of the Company.

The Company entered into a Portfolio Maintenance Agreement with Omaha Re effective October 1, 2017. Under the Portfolio Matenance Agreement, to the extent there are any realized capital losses during any calendar quarter on any of the assets credited to certain funds withheld accounts established by United, the Company will contribute equity capital in the form of cash or assets to Omaha Re. There were no amounts due under this agreement as of December 31, 2017 and 2018.

Various lawsuits have arisen in the ordinary course of the Company's business. The Company believes that its defenses in these various lawsuits are meritorious and that the eventual outcome of those lawsuits will not have a material effect on the Company's financial position, results of operations, or cash flows.

14. LEASES

The Company and United of Omaha jointly enter into agreements for the rental of office space, equipment and computer software under non-cancelable operating leases. Future required minimum rental payments under leases as of December 31, 2018, were as follows:

2019	$ 9,738,672
2020	7,640,240
2021	5,530,010
2022	4,085,965
2023	3,075,152
Thereafter	9,133,874
Total	$ 39,203,913

The Company's rental expense for the years ended December 31, 2018 and 2017, was $8,315,066 and $6,882,617, respectively.

15. DIRECT PREMIUM WRITTEN

The Company's direct accident and health premium written by third-party administrators were $323,530,613 and $279,423,503 during the years ended December 31, 2018 and 2017, respectively.

16. LIABILITY FOR POLICY AND CONTRACT CLAIMS

A reconciliation of the liability for policy and contract claims, which includes unpaid claims and the present value of amounts not yet due on claims that existed, as of December 31, was as follows:

	2018	2017
Balance at January 1	$ 1,112,898,678	$ 1,095,548,761
Reinsurance recoverable	48,739,223	47,104,158
Net balance at January 1	1,064,159,455	1,048,444,603
Incurred related to:		
Current year	2,437,007,449	2,165,032,145
Prior years	29,666,573	(38,012,180)
Total incurred	2,466,674,022	2,127,019,965
Paid related to:		
Current year	1,835,038,252	1,637,089,073
Prior years	517,407,377	474,216,040
Total paid	2,352,445,629	2,111,305,113
Net balance at December 31	1,178,387,848	1,064,159,455
Reinsurance recoverable	54,295,334	48,739,223
Balance at December 31	$ 1,232,683,182	$ 1,112,898,678

For 2018, runout on prior year incurrals appears unfavorable on a non-interest adjusted basis; however, on an interest adjusted basis, runout was favorable, driven primarily by Long-Term Care and Group Long-Term Disability. In 2017, incurred claims related to prior years were negative primarily due to favorable experience within certain health and accident coverages on a non-interest adjusted basis. On an interest adjusted basis, prior years incurred claims were favorable for both years.

Management believes that the liability for unpaid claims is adequate to cover the ultimate development of claims. The liability is regularly reviewed and revised to reflect current conditions and claim trends and any resulting adjustments are reflected in operating results in the year they are made.

A roll forward of the liability for claim adjustment expenses included in general expenses, due or accrued, as of December 31, was as follows:

	2018	2017
Prior year accrual	$ 22,672,906	$ 25,270,440
Incurred claim adjustment expenses	31,502,138	22,534,439
Paid claim adjustment expenses	(30,302,996)	(25,131,973)
	$ 23,872,048	$ 22,672,906

17. ELECTRONIC DATA PROCESSING EQUIPMENT AND SOFTWARE

EDP equipment and operating and non-operating software included in other assets as of December 31, consisted of the following:

	2018	2017
EDP equipment	$ 74,734,320	$ 71,963,690
Operating system software	12,803,256	12,792,216
Non-operating system software	230,245,741	205,115,391
Accumulated depreciation	(249,774,280)	(234,698,586)
Nonadmitted assets	(53,691,952)	(41,764,496)
	$ 14,317,085	$ 13,408,215

Depreciation expense related to EDP equipment and operating and non-operating software totaled $23,586,439 and $21,827,639 for the years ended December 31, 2018 and 2017, respectively.

INDEPENDENT AUDITORS' REPORT ON ADDITIONAL INFORMATION

To the Board of Directors
Mutual of Omaha Insurance Company
Omaha, Nebraska

Our 2018 audit was conducted for the purpose of forming an opinion on the 2018 statutory-basis financial statements as a whole. The supplemental schedule of selected financial data, the supplemental summary investment schedule, and the supplemental schedule of investment risks interrogatories as of and for the year ended December 31, 2018, are presented for purposes of additional analysis and are not a required part of the 2018 statutory-basis financial statements. These schedules are the responsibility of the Company's management and were derived from and relate directly to the underlying accounting and other records used to prepare the statutory-basis financial statements. Such schedules have been subjected to the auditing procedures applied in our audit of the 2018 statutory-basis financial statements and certain additional procedures, including comparing and reconciling such schedules directly to the underlying accounting and other records used to prepare the statutory-basis financial statements or to the statutory-basis financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, such schedules are fairly stated in all material respects in relation to the 2018 statutory-basis financial statements as a whole.
