## Chapter 1: Mind, Behavior, & Psychological Science

| *What is the complete definition of Psychology                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| *What are the steps of the Scientific Method                                                                                                                                                                                                                                                                                                                                                           |
| *Theory vs. Hypothesis- What are the definitions of each and how are they different                                                                                                                                                                                                                                                                                                                    |
| *Descriptive Methods of Research- what is the purpose of descriptive research? know the definition of and purpose of the 4 types of descriptive research: Naturalistic Observation, Surveys and Interviews, Standardized Tests, Case Study                                                                                                                                                             |
| *Correlational research- what is the purpose/goal of correlational research? What do magnitude and direction explain? What does a positive vs. a negative correlation mean? What is the strongest relationship? Weakest relationship?                                                                                                                                                                  |
| *Experimental Design (research) What is the purpose of the experimental design? Define, explain, and give examples for Independent Variable and Dependent Variable. Explain the difference between the experimental group and control group. What is a placebo, why is it given, and to whom? Describe random assignment. What is experimenter bias, participant bias, and how can they be alleviated? |

Explain the difference between Population vs. Sample in research

| Describe each of the following approaches to psychology<br>Behavioral Approach |
|--------------------------------------------------------------------------------|
| Social Cognitive Approach                                                      |
| Psychodynamic Approach                                                         |
| Cognitive & Cognitive Behavioral                                               |
| Biological View/ Behavioral Neuroscience Approach                              |
| Developmental Approach                                                         |
| Sociocultural Approach                                                         |
| Humanistic Approach                                                            |
| Trait View                                                                     |
| Careers in Psychology: What are the basic duties of: Psychologist              |
| Psychiatrist                                                                   |
| Licensed Professional Counselor                                                |

| Chapter 2: Biospychology                                                             |
|--------------------------------------------------------------------------------------|
| Organization of Nervous System:                                                      |
| What composes the Central Nervous System?                                            |
| What composes the Peripheral Nervous System?                                         |
| Explain the responsibilities of the subdivisions of the PNS                          |
|                                                                                      |
| What is the definition of a neuron?                                                  |
| Define and explain the purpose the 6 main structures of a neuron identified in class |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |
|                                                                                      |
| What is a Neurotransmitter?                                                          |
| What is the normal function of the following NTs?  Dopamine                          |
| Serotonin                                                                            |
| Norepinephrine                                                                       |
| Endorphins                                                                           |

| Identify the 4 lobes of the brain and explain what each lobe is basically responsible for (as noted in lecture) |
|-----------------------------------------------------------------------------------------------------------------|
|                                                                                                                 |
| Who was Phineas Gage, what happened to him, and why was his story significant to psychology?                    |
| What is the Corpus Callosum and what does it allow?                                                             |
| Explain Split-brain patients- what happened to them, why did it happen, and what is the result?                 |
| Chapter 3: Sensation & Perception What is the definition of Sensation?                                          |
| What is the definition of Perception?                                                                           |
| Define and explain Absolute Threshold                                                                           |
| Define "Noise" as it relates to the absolute threshold                                                          |
| Define Subliminal Perception. Is it believed to be effective based on scientific research?                      |
| Define the Difference Threshold and Weber's Law.                                                                |

| Define Sensory Adaptation and provide an example                      |
|-----------------------------------------------------------------------|
|                                                                       |
|                                                                       |
|                                                                       |
| Identify and define the 9 structures of the eye discussed in lecture  |
| · · · · · · · · · · · · · · · · · · ·                                 |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
|                                                                       |
| Briefly explain the Trichromatic Theory of Vision and Color Blindness |

| What are After Images?                                                                                               |
|----------------------------------------------------------------------------------------------------------------------|
| Identify common monocular cues that help with depth perception                                                       |
| Explain the Process of hearing including the 3 main parts of the ear and the 8 main structures identified in lecture |
|                                                                                                                      |
|                                                                                                                      |
|                                                                                                                      |
|                                                                                                                      |
| Explain the final process in hearing                                                                                 |
| What are the sensory receptors for taste? What are they covered by?                                                  |
| What is the Olfactory Epithelium? What happens to neurons there after injury?                                        |
|                                                                                                                      |

| Professor Hutchinson                                                                                     |     |
|----------------------------------------------------------------------------------------------------------|-----|
| <u>Chapter 8: States of Consciousness</u>                                                                |     |
| Identify/Explain the 5 levels of awareness                                                               |     |
|                                                                                                          |     |
|                                                                                                          |     |
