

Announcing upgrades to the reporting features of the CONTOUR®DIABETES app

Two new reports are now available on the CONTOUR®DIABETES app. Data from the app can now be exported as the Blood Sugar Diary, a new, easy-to-use logbook designed from consumer feedback. A report with raw data (.csv file) that is compatible with multiple platforms, including Microsoft Excel, can also be printed, viewed and shared.

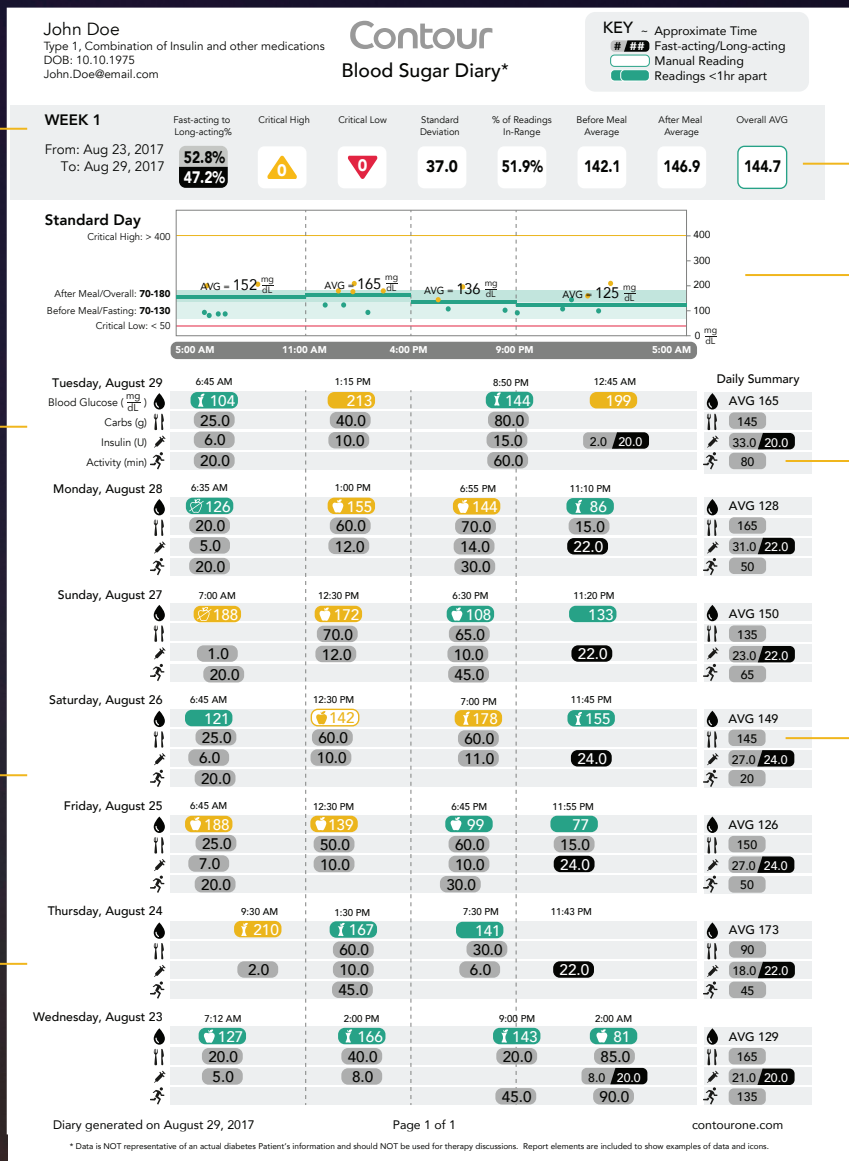

Download the app and start using this new feature today!

Select from 1, 2, 4, or 12 week time frames

Key measures such as blood glucose (BG), carbs, insulin and physical activity are automatically logged from the app

Easily identify patterns of key measures

Color-coded entries for ease of understanding

A quick headline of key measures for the selected time frame

Average BG reading compared to customizable ranges

Daily summary for easy analysis

Review BG throughout the day

Your diabetes, illuminated

Blind Glucose Monitoring System
