12 Reasons Why More and More Investors Trust AbleTrend To Make Their Trading Decisions

1 AbleTrend identifies trend changes instantly with colors

Here are two charts with the same data. The chart on the top is a plain chart. AbleTrend is added to the chart on the bottom.

AbleTrend charts are color-coded to show resistance and support levels — and specific buy and sell signals — that tell you exactly what to do ... and when.

1. Buy on **BLUE**.
2. Sell on **RED**.
3. Seek more **PROFIT**.

Simplicity and ease of use — that's what makes AbleTrend popular.

2 Based on a scientific, break-through formula, AbleTrend is applicable to ALL markets (an impossible challenge for curve-fitting methods)

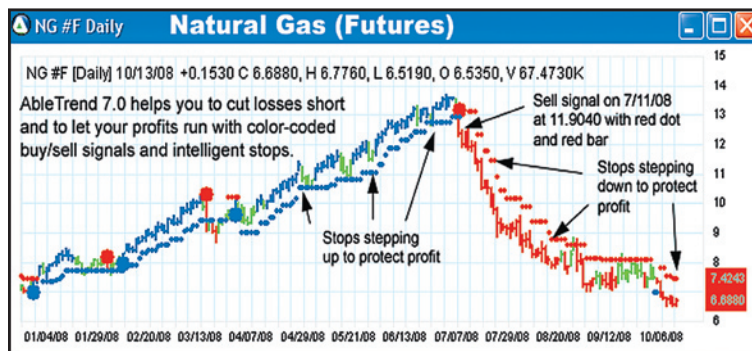

Dr. Wang's AbleTrend software reveals the universal law of the market, showing you the most probable course the market will take in the future. Proprietary indicators set optimal stops to minimize potential losses and protect profits. AbleTrend 7.0 works in every market — and every time frame. Beware of programs designed to trade only one particular market within a particular time interval — for instance, a system that only trades the E-mini S&P 2-minute chart. Reason: there

1.888.272.1688

is a very high likelihood that the program is curve-fitting the historical data. A program based on curve fitting is worthless. Why? Financial markets are dynamic and constantly changing. Only algorithms based on timeless and universal market principles work in today's markets — and in all markets, all the time.

3 An added margin of risk management: AbleTrend's dynamic intelligent stops

AbleTrend 7.0 tells you where to place protective stops as a defense measure to preserve gains or limit losses. AbleTrend 7.0 software uses principle-based "intelligent" stops — stops defined by the market's own support and resistance levels. On a chart, the software indicates where to place stops with small blue dots below the bars for buy positions, and small red dots above the bars for sell positions. These intelligent stops are dynamic and automatically adjusted by the software as prices change. A built-in feedback loop retrieves the data for market direction, price range, and momentum. Because the stops are determined by actual market conditions, they are objective, reliable, back-testable, and safe to use in real-world trading.

4 Real-Time AutoScan

Through the years, traders have expressed their wish to perform AutoScan in real-time. Now with AbleTrend 7.0, this dream of many traders comes true. You will be able to receive instant alerts for your day trading! Gerry Wollert commented "The AbleTrend AutoScan feature enables me to quickly roll through over 200 potential ETFs in less than 5 minutes as I look for new trading opportunities."

Examples of How AbleTrend Performed Before and During The Current and Historical Financial Crises

-- PAST RESULTS ARE NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. FUTURES AND SECURITIES TRADING HAVE RISK OF LOSS AND MAY NOT BE SUITABLE FOR ALL PERSONS. USING STOPS MAY NOT REDUCE THE RISK OF LOSS IN TRADING. PAST RESULTS AND TESTIMONIAL OF PARTIAL ACTUAL ACCOUNT RESULTS DO NOT REPRESENT THE RESULTS OF ALL USERS OF THE SYSTEM AND ARE NOT INDICATIVE OF FUTURE PERFORMANCE OR SUCCESS. THE TESTIMONIALS IN THIS BROCHURE WERE PROVIDED WITHOUT COMPENSATION. ABLESYS BELIEVES THAT THEY ARE TRUE BASED ON THE REPRESENTATIONS OF THEIR USERS, BUT HAVE NOT INDEPENDENTLY VERIFIED THEM NOR HAVE THEY ATTEMPTED TO DETERMINE THE EXPERIENCES OF THE USERS AFTER THE TESTIMONIALS WERE GIVEN.

-- ALL CHARTS ARE HYPOTHETICAL AND NOT THE RESULTS OF AN ACTUAL ACCOUNT. HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

-- ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

INTERVIEW
1

With The Higher Volatility And 300-500 Point Dow Moves In A Day, My Day Trading Profits Are Approximately 4 Times Higher Than In 2007

Interview with Mr. Jim Kane – A Trader Using AbleSys Software

Mr. Jim Kane, How long have you been trading?

I have been trading, on and off, for 20 years. Several times I got so frustrated that I switched to mutual funds, but that never went well.

How long have you been using AbleSys software?

I have been using AbleSys software since early 2007.

What do you trade?

Stocks, ETFs, plus some time decay option trades.

What is your occupation?

I am a retired US Air Force dentist and am currently employed as a computer programmer.

How many other trading software programs did you use before using AbleTrend?

I used many other trading software programs as well as numerous newsletters. I currently use Zacks research wizard to help me pick stocks to trade. Zacks suggests what stocks to trade and AbleSys tells me how to trade them.

In your opinion, what are the main differences between other software programs and AbleTrend?

AbleSys software works in all markets, any time frame, long or short, without excuses.

What is the most important factor in trading? How does AbleTrend help?

Risk management. AbleSys T2 indicator provides excellent stops as well as entry points.

Were you able to find good trades during the current financial crisis? Could you give an example?

With the higher volatility and 300-500 point Dow moves in a day, my day trading profits are approximately 4 times higher than in 2007.

Do you have the confidence to use AbleTrend in trading for years to come?

Yes, if AbleSys software can handle the 2008 market, it can handle any market.

Could you share some of the exciting trades that you've made?

My best position trades were probably shorts in MTH, BC, and CC. They just kept going down. Stops based on the AbleSys T2 indicator were good and helped me move in and out of the stocks to maximize gains. My first year of using AbleSys, 2007, was the first year in 20 years of investing in which I made more money trading than I made at my day job. On the long side, AbleSys T2 indicated trending stock behavior in WLT in Jan 2008. I had a good run in WLT until early June.

Interviewed by Grace Wang, Head of Customer Relations, AbleSys December 2008

5 AbleTrend creator, Dr. John Wang, is a Quantum Physical Chemist and active trader

Dr. John Wang, CEO of AbleSys, holds an M.S. in quantum chemistry and a Ph.D. in physical chemistry. Dr. Wang has been an active trader since 1990. He is a registered Commodity Trading Advisor (CTA) with the Commodity Futures Trading Commission (CFTC). Dr. Wang notes: "Fundamental natural laws not only can be applied to the natural sciences, but also work in financial markets."

6 AbleSys is a CTA firm registered with the CFTC since 1995

What is a CTA firm?

A CTA firm is a Commodity Trading Advisor (CTA) firm registered with the CFTC.

What is the CFTC?

The CFTC is a government regulatory body. Its mission is to protect market users and the public from fraud, manipulation, and abusive practices related to the sale of commodity and financial futures and options, and to foster open competitive and financially sound futures and option markets.

How to Protect Yourself From Fraud

It's important to select trading software from companies with proper registration. AbleSys has been registered with the CFTC since 1995 with an excellent record. Before purchasing any trading software, check to see if the company offers a one-month trial. Normally, if the software does not work, the company will not offer a trial. Dishonest companies would prefer to collect thousands of dollars up front. Beware!

7 AbleTrend has won Stocks & Commodities Magazine Reader's Choice Awards for 13 years in a row

Only AbleTrend has won Stocks & Commodities magazine readers' choice awards of triple trading systems for 13 years in a row, including stock trading systems, futures trading systems, and option trading systems. This is no small achievement. Every year, countless new trading software systems hit the market. AbleTrend has stood the test of time when others have bitten the dust. AbleSys does not make any outlandish claims – we don't have to! Our countless satisfied users around the world are our best source of advertising.

"The Current Financial Crisis Offers the Absolute BEST Conditions For Trading, Lots of Movement, which provides unprecedented opportunities."

Interview with Dr. John Meyer – A Trader Using AbleTrend 7.0

Dr. Meyer, how long have you been trading?

I've been trading in the futures markets for 10 years.

What do you trade?

I day trade the S&P e-mini and trade FOREX.

What is your occupation?

I am a radiologist (MD).

How many other trading software programs did you use before using AbleTrend?

I have used several other software programs but none has the power of AbleTrend. Specifically, none of the others has the power to find trend changes early and reliably and then, to follow the market very precisely.

I have used Bill Williams' "Profitunity" indicators but they are imprecise and tend to build a large pyramid that crashes against a position. I tried Advanced GET, but Elliot wave trading does not follow a market and tries to impose a "wave" pattern. Elliot wave experts admit that this "wave" pattern does not actually exist in a market 40 to 50% of the time. I tried using other Elliot wave trading programs but the same problem exists. No one can impose upon the market. The market tells the trader what it is doing. I used Kwikpop indicators, including their "special proprietary indicators," but there are too many indicators and the charts are cluttered.

I tried all the standard indicators, which are packaged in trading software, but they are confusing. I tried using CQG with some of their add-ons including those of Tom Demark, but there are too many things to watch. CQG has the best support and charting app but AbleTrend is simple to use and gives a true picture of what is happening and likely to happen.

I have used John Ehlers cycle finding methods, but they are similar to Elliot wave software in that they try to impose themselves upon the market rather than let market show what it is actually doing. A trader does have to have knowledge of the market and chart patterns, but I find that AbleTrend is MORE RELIABLE than my personal reading of the charts most of the time.

In your opinion, what are the main differences between other software programs and AbleTrend?

AbleTrend can find a trend very early. One of the other main differences between other software programs and AbleTrend is that AbleTrend has the truest dynamic support and resistance indicators that I have seen (trend 2). These indicators work fine with default settings. AbleTrend lets

a trade develop and controls potential losses well. A trade needs to "BREATHE". The market tells the trader where it is going so that he or she can confidently follow it and make money. The program does this in real time better than a human can!

What are the most important factors in trading? How does AbleTrend help?

I have found that the most important things in trading are: (1) Finding the trend early, (2) Entering on retracements to control losses, and (3) SUPPORT and RESISTANCE in real time. It is also important to STAY IN THE TREND until the market takes you out. You can scale out when you meet a target if you like. AbleTrend shows me how to do these things with precise accuracy and elegant simplicity. One additional very important thing is AbleTrend helps one to control one's emotions and (often wrong) "gut" feelings about the patterns. AbleTrend gives one confidence to enter and exit positions. AbleTrend gives one confidence to STAY IN a position.

Were you able to find good trades during the current financial crisis? Could you give an example?

The current financial crisis offers the absolute BEST conditions for trading, lots of movement (volatility), which provides unprecedented opportunities. I have attached two examples of AbleTrend giving buy/sell/stop signals on the TradeStation platform.

Do you have the confidence to use AbleTrend in trading for years to come?

Yes. Because AbleTrend is not a curve fitting software, it facilitates a trader to build reliable trading skills to follow the market objectively, therefore I have the confidence to use AbleTrend to make a good living day trading and position trading. I love the markets and I love trading.

8 For the cost of one system (Real-time Deluxe), AbleTrend empowers you to trade all markets, in all time frames

There are trading software companies that sell their software on a module-by-module basis. For example, if you trade stocks, and a few different commodities, you would need to pay a fee for stocks and for each commodity. That could quickly add up to tens of thousands of dollars. However, with AbleTrend, you only have to buy one system to cover all your trading needs. There's no need to shell out big bucks for a different system for each and every market and style you trade. Once you learn how to trade one market, you will know how to trade every other market with AbleTrend. AbleTrend knows no bounds; it goes wherever the profit can be found. With today's global economy and great volatility, opportunities abound.

9 FREE one-on-one consultation

In today's fast changing global market environment, having a million dollars in your account does not necessarily mean security. Rather, true security comes from possessing a winning system and the skills to manage your assets – profitably and prudently – especially in volatile markets like we're currently seeing.

To have a private consultant for building a life-time skill in managing your own financial assets could be expensive – very expensive. That's why our value-added one-on-one consultation service makes owning AbleTrend software a cannot-miss opportunity.

So don't wait another day to discover the power of AbleTrend 7.0 for yourself. To activate your 30-day trial immediately, call us toll-free at 888-272-1688 now.

Or visit: www.ablesys.com

Or complete and mail the reply form on page 8 today.

10 AbleSys offers interactive webinars every day

Register FREE at: www.ablesys.com

- ✘ Webinars for the general public are held Mondays at 4 pm, Wednesdays at 7 pm, and Fridays at 2 pm EST.
- ✘ Continuing education webinars for members only are held Tuesdays and Thursdays.

Bring your own symbols and find out what AbleTrend 7.0 says about your positions. Learn if any buy/sell signals have occurred. Identify support levels. And get the answers instantly! Whether you trade stocks, commodities, FOREX, the E-minis, or the ETFs . . . whether you prefer day trading, swing trading, or position trading . . . you will see results on the spot.

11 AbleSys offers a 30-day "Test drive" of the AbleTrend 7.0 software

The only way to determine whether AbleTrend 7.0 fits your trading style is to try it. That's why, for a limited time only, we invite you to "test drive" AbleTrend 7.0 for the next 30 days at a special price (see page 8). Trade with AbleTrend 7.0 for up to one full month – either with real money or on paper. Keep track of your win-and-loss record . . . and your profits. Then evaluate our system and the results you get using it. We would not offer this 30-day trial if we weren't certain that you will love AbleTrend once you give it a try. We do not want you to become an AbleTrend user unless you are really convinced that it will help you make money in the markets.

When you sign up to test drive AbleTrend 7.0, you will not only see how powerful the software is in action, but you will also receive friendly customer support. AbleTrend users tell us our support is the best in the industry. You can call us toll-free at 1-888-272-1688 for assistance, including one-on-one phone consultation. Our daily interactive webinars are another excellent resource for your ongoing training.

3 Both Weekly And Monthly Charts Of AbleSys Software Gave Specific Sell Signals Long Before This Crisis Happened *Interview with Dr. Harvey Saff – A Trader Using AbleTrend 7.0*

Dr. Saff, how long have you been trading and what is your occupation?

I have been trading in the stock market for 30 years. I trade stocks, options and mutual funds. I am a retired physician who has taken a secondary occupation in trading. I have become a financial adviser for the past 8 years.

How many other trading software programs did you use before using AbleTrend?

I used a number of programs before I selected AbleSys software. The programs that I used in the past are AIQ, Wizetrade, and Bestchoice. None of them was as effective as AbleSys. The major difference is that in any time frame, intraday, daily, or weekly, AbleSys provides almost pinpoint buy and sell points. It enables me to see the exact support and resistance areas, making trading more accurate.

How are you doing with the current market situation?

As this past ten months of financial crisis spread, many people

have lost between 25 - 80% of their equity holdings. I am pleased to say that I have preserved ALL my capital and also my clients' capital. In many instances, my clients place their life savings with me and entrust me to preserve their investments. Using the AbleSys trading software, I have been guided to stay out of the stock market since December of 2007. Both weekly and monthly charts of AbleSys software gave specific sell signals long before this crisis happened. It did not require any complex interpretation; it simply and graphically demonstrated the downtrend. My clients and I are indeed grateful.

Do you have the confidence to use AbleTrend in trading for years to come?

Due to the nature of the AbleSys program, I foresee using AbleSys both currently and in the years to come. It has proven to be an accurate program under all market conditions. As an example, I traded the inverse ETFs DXD and QLD in the month of January. AbleSys clearly guided me to capture and profit from the downward movement in the market.

Interviewed by Grace Wang, Head of Customer Relations, AbleSys February 2009

1.888.272.1688

6

See disclaimer on page 3

Abletrend 7.0 Empowered Me To Create My Own Rule-Based Strategies With Back-Testing Without Writing Programming Codes.

Interview with Mike Weingart, MBA, CTA - Using AbleSys Software

How long have you been using AbleSys software?

What strategy do you use?

I started with AbleSys back in 2004. I started with a 30-day trial and liked the software. It was easy to use and set-up. In 2007, with the release of the new AbleTrend 7.0 version, I was empowered to create my own rule-based strategy with back-testing without writing programming codes. I was able to develop my own fully mechanical system with AbleTrend 7.0 for the Forex market. I now use my own system to manage clients' funds.

What is your occupation?

I am now a licensed CTA and I manage money for clients full-time. I owned and operated a finance company that originated residential and commercial loans.

What are the main differences between AbleSys and other programs?

I use AbleSys in a fully mechanical way, optimized for each market. It is like no other program. I am always in the market, either long or short, as the software handles different volatilities and market changes in truly robust and consistent ways. Other programs I have seen are ok for the entries, but leave users on their own for the exits. These programs do not give clear indications when to get out if the trade goes wrong or when to book profits. AbleTrend, on the other hand, handles the

following key items well:

- 1) Early entry
- 2) Stop loss placement calculated for volatility and not a fixed number.
- 3) Trailing stops that calculate exits (support / resistance) and keep me in the trend longer than humanly would ever stay in to maximize profits
- 4) Money Management or size calculation.

Were you able to find good trades during the financial crisis? Can you give an example?

I sure can. I was short AUD/USD, GBP/JPY, GBP/USD, and EUR/USD all at the same time in September and October using 240-480 minute charts. Most of them gave short signals on about October 20th and buy to cover signals on October 27th. I know that on GBP/JPY, I booked over 2,000 pips in seven days. The others generated gains of 1,100 – 1,500 pips, so that I had about 5,000 pips in gains for the week. It was truly unbelievable indeed. Using the longer time interval charts was a walk in the park. The volatility did not matter because AbleSys software got my clients and me into the market very early. It was just a matter of how much profit I would have when the storm was over. That may have been a once in a lifetime event, but I was part of it thanks to AbleSys and my strategy.

Interviewed by Grace Wang, Head of Customer Relations, AbleSys

\$5 Per Trade Special Commission And Real-Time Data for TD AMERITRADE and AbleSys Mutual Customers*

AMERITRADE AbleSys Corporation proudly announces that we have now teamed up with **TD AMERITRADE!**

12 Long-term users around the world, novice and experienced traders alike, praise AbleTrend!

"I am a full-time trader, trading QQQQ and the SPY using 1 minute and 5-minute chart. I've been using AbleSys software for more than 4 years now, since mid 2004. If any new traders would ask my advice on how to get started in trading, the first thing I would do is to introduce AbleTrend, it's the best out there, in terms of effectiveness as a trading software."

— A. S., Montreal, Quebec, Canada

"eASCTrend is the first piece of trading software I've owned that actually works and can consistently make money."

— G.C., Perth, Australia

"By far AbleTrend is rated as one of the best-performing technical analysis programs in today's market. AbleTrend is time tested, outperforming competitors for more than four years. The software's buy and sell signal program, in conjunction with our quote service, can guide both novice and seasoned traders in obtaining their financial goals."

— S.W., eSignal, Hayward, CA

"Among all the trading software I bought, AbleTrend 7.0 is the most simple and easy to use, and it makes money. I've bought many trading software during the years. I've been using AbleSys software since June 2006, trading E-mini S&P500 between 2 to 4 Eastern Time and I am trading 9 contracts. One of the helpful services that AbleSys offers is its Tuesday and Thursday free Webinars. Just picked up one great idea last week, the Guidance Chart, which helps me to scalp the market while stay on top of bigger picture of the market direction."

— Dr. Edward Christy

INTERVIEW
5

AbleTrend generates certain entry points that they call "sweet spots." If price continues in the direction of the sweet spot, payoff is big, if price action goes against it the risk is minimal

Interview with Mr. Scot Sholl - A trader using AbleTrend 7.0

Mr. Sholl, how long have you been trading?

A little over 2 years

How long have you been using AbleSys software?

About 2 years

What do you trade?

Currencies, primarily USDJPY

In your opinion, what are the main differences between other software programs and AbleTrend?

Before purchasing AbleTrend, I looked at other software. The difference for me was the AbleTrend "Trade Signal Report" feature. Other buy/sell software generated signals, but they did not generate a back test report. Trading with AbleTrend is like trading with a totally objective, successful trader.

What are the most important factors in trading? How does AbleTrend help?

Support/ resistance levels and pivot points are critical in trading. AbleTrend generates all these critical points in real time and displays them. AbleTrend generates certain entry points they call "sweet spots." If price continues in the trend direction of the sweet spots, the payoff is big, if price action goes against it the risk is minimal. Price action around these sweet spots is critical. It's amazing how price consolidates and bounces off AbleTrend generated support/ resistance levels over and over again.

Interviewed by Grace Wang, Head of Customer Relations, AbleSys February 2009

30-day trial!

Trade with the full working version of AbleTrend 7.0 — with real money or on paper — for a full 30 days!

Then decide whether you want to keep using AbleTrend 7.0!

**Order Online:
Go to www.ablesys.com**

Your 30-day AbleTrend 7.0 test drive includes:

- Full working version of AbleTrend 7.0 for a full month
- 4 half-hour one-on-one training consultations (value \$200)
- 1-800 number for tech support
- Free Wintick stock-picking system (value: \$58)
