

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 22, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (108 fires)
New large incidents:	9
Large fires contained:	2
Uncontained large fires: **	15
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 41 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	4
New large incidents:	1
Uncontained large fires:	9
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Contreras, Papago Agency, BIA. IMT 2 (EA Gold Team). Fifteen miles northeast of Topawa, AZ. Brush and short grass. Active fire behavior with uphill runs, running and short-range spotting. Numerous structures and energy infrastructure threatened. Evacuations, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Pipeline, Coconino NF, USFS. IMT 1 (GB Team 2). IMT is also managing the Haywire fire. Five miles north of Flagstaff, AZ. Timber, brush and grass. Minimal fire behavior with flanking, backing and creeping. Energy infrastructure and residences threatened. Evacuations, area, road and trail closures in effect.

Haywire, Coconino NF, USFS. Seventeen miles northeast of Flagstaff, AZ. Timber, brush and short grass. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2) and IMT 2 (SW Team 5). Transfer of command from IMT 1 (SW Team 1) to IMT 2 (SW Team 3) will occur tomorrow. Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Minimal fire behavior with backing, creeping and smoldering. Numerous residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Black, Gila NF, USFS. IMT 2 (SW Team 4). Twenty-four miles north of Mimbres, NM. Grass and timber. Minimal fire behavior with smoldering, backing and creeping. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Raspberry, Coronado NF, USFS. Eleven miles northeast of Portal, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened.

Midnight, Carson NF, USFS. Eight miles northwest of El Rito, NM. Timber. Minimal fire behavior.

Fish, Apache-Sitgreaves NF, USFS. Twenty miles southwest of Alpine, AZ. Timber and medium slash. Minimal fire behavior with creeping and smoldering. Road closures in effect. Precipitation occurred over the fire area yesterday.

* **Hog Spring**, Apache-Sitgreaves NF, USFS. Ten miles east of Show Low, AZ. Timber and short grass. Minimal fire behavior with creeping, backing and smoldering.

Alaska Area (PL 3)

New fires:	14
New large incidents:	7
Uncontained large fires:	1
Type 2 IMTs committed:	2

Lime Complex (12 fires), Southwest Area Forestry, Alaska DOF. IMT 2 (AK Black Team). Fifty miles east of Chuathbaluk, AK. Grass, timber and brush. Active fire behavior with wind-driven runs, flanking and torching. Numerous structures and energy infrastructure threatened.

East Fork, Galena Zone, BLM. Transfer of command from IMT 2 (AK Green Team) back to the local unit will occur today. Started on FWS land 25 miles northeast of St. Mary's, AK. Moderate fire behavior with smoldering, creeping and backing. Structures threatened. Precipitation occurred over the fire area yesterday.

* **Sithylenekat**, Tanana Zone, BLM. Forty-six miles southeast of Allakaket, AK. Timber and short grass. Active fire behavior with creeping, smoldering and isolated torching.

* **Curky**, Tanana Zone, BLM. Forty-five miles northwest of Stevens Village, AK. Timber and short grass. Active fire behavior. Energy infrastructure threatened. Last narrative report unless significant activity occurs.

* **Douglas**, Upper Yukon Zone, BLM. Twenty-seven miles southeast of Evansville, AK. Timber and short grass. Active fire behavior with smoldering and creeping. Structures and energy infrastructure threatened. Last narrative report unless significant activity occurs.

* **Paddle**, Upper Yukon Zone, BLM. Thirty-six miles northeast of Circle, AK. Timber and short grass. Active fire behavior with torching, backing and running. Last narrative report unless significant activity occurs.

* **Chitanana**, Tanana Zone, BLM. Twenty-four miles southeast of Tanana, AK. Timber. Active fire behavior with smoldering and creeping. Last narrative report unless significant activity occurs.

* **Lansing Creek**, Upper Yukon Zone, BLM. Thirty miles southeast of Coldfoot, AK. Short grass. Active fire behavior with smoldering, creeping and backing. Last narrative report unless significant activity occurs.

* **Donut**, Tanana Zone, BLM. Thirty-eight miles southeast of Ruby, AK. Timber litter. Active fire behavior with smoldering, creeping and isolated torching. Last narrative report unless significant activity occurs.

Submarine Creek, Southwest Area Forestry, Alaska DOF. Previously reported incident. Forty-five miles west of Telida, AK. Timber, tall grass and hardwood litter. Minimal fire behavior with smoldering, creeping and running. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Strong high pressure aloft will remain across the southern Plains into the Southeast with a weak upper low near the southern California coast. Hot and dry conditions with near record setting temperatures are likely across the southern Plains, the southern Appalachians, Carolinas, and Georgia, but winds are likely to remain light overall. Isolated dry thunderstorms will be ongoing this morning across the Transverse Ranges of southern California, with thunderstorms becoming scattered and a mix of wet and dry this afternoon across much of central and southern California. Isolated mixed wet and dry thunderstorms likely across portions of the southern Great Basin on the monsoon periphery, with wet monsoon thunderstorms across much of Arizona, New Mexico, and southern Colorado. Debris flows will be possible on recent burn scars such as the Hermits Peak and Black Fires. To the north, breezy and dry conditions will develop across portions of eastern Montana and eastern Wyoming. Scattered showers and thunderstorms will develop along a cold front from the central Plains to the Mid-Atlantic and Northeast with the heaviest rain in the Mid-Atlantic. A warming and drying trend will begin across south-Central Alaska and the central and eastern Interior, with isolated mixed wet and dry thunderstorms in the afternoon across south-central Alaska.

SAFETY ZONES 1 (LCES)

Operational Engagement Category

A safety zone is a location where a threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - In a safety zone, a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
- How do you identify a good safety zone?
 - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
 - The best locations are usually in the black, have with a minimum of, or are devoid of, ground/aerial vegetation, or are large bodies of water.
 - Location is scouted and marked well for visibility at all times.
 - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
 - For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height. This distance must be maintained on all sides if the fire has ability to burn completely around the safety zone. Convective heat from wind and/or terrain influences will increase this distance requirement.
 - Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.
- What should you avoid in selecting a safety zone?
 - Locations that are downwind from the fire.
 - Locations that are in chimneys, saddles, or narrow canyons.
 - Locations that require a steep uphill escape route.
