

## Tucson's Innovative Bike HAWK

A man waves as he uses a HAWK light to cross a 6-lane roadway. The HAWK (High-Intensity Activated Crosswalk) was designed by Dr. Richard Nassi of Tucson. The HAWK is included in the MUTCD as an effective street crossing treatment.

A bike HAWK allows bicyclists to activate the light without dismounting. This is a new Bike HAWK feature.

# Additional Bicycle Crossings

These two bicycle signals help cyclists cross busy roads on 3<sup>rd</sup> Street, the most popular bike route in Tucson.

# Tucson Bicycle Culture!

Bicycling – both on road and off – is inherent to the local Tucson culture.

The Bike Church was designed and produced in 2009 by professional artists eight youth assistants as part of a summer youth art program. *Photo Credit: [Artscape International](#)*
