SECTION V: Population Count for Age Group 18-64 with No College Degree ..... 119

## EXECUTIVE SUMMARY

This report presents data on the educational attainment of Tennessee residents by county, postsecondary degree level, age group, and ethnicity. The report is made available through interactive maps which allow the user to view county-level educational attainment data for different populations. The interactive maps are available at <http://thec.ppr.tn.gov/THECSIS/GIS/GIS.aspx>.

Data for this analysis were drawn from the U.S. Census Bureau's American Community Survey 5-Year Estimates from 2007-2011. In the survey, individuals were asked about the highest degree or level of school completed. This analysis focuses primarily on Tennessee residents who have **not** been awarded a college degree. For purposes of this analysis, college degrees are defined as an associate's degree or higher.

The data presented in the report are based on two distinct populations, which cannot be combined due to the manner in which the Census Bureau compiles age and race data. The first population observed in this study includes adults ages 25 – 64, residing in all 95 Tennessee counties, by educational attainment<sup>1</sup>. In contrast, the data on race were reported for the aggregate 25 and higher age group and were not separated into more specific age ranges. Direct comparisons between the race and population data would be inaccurate and the reader should be cautioned when comparing results.

### Key Findings

- Counties with the highest levels of college degree attainment are generally in proximity to densely populated metropolitan areas, especially the ones with university campuses.
  - ✓ This finding may reflect the fact that universities are situated in urban areas with a more educated workforce and overall population. Universities may also influence educational attainment levels in surrounding areas by hiring well educated employees and attracting former students who choose to settle near their alma mater.
- The counties with the highest share of non-degreed adults typically have a small population and are rural.
  1. These counties are concentrated in the West and East Tennessee Grand Divisions, with only four located in the Middle Tennessee area.
  2. While many counties included in the top 10 have small populations, we cannot conclude that counties containing major cities are without educational needs.
  3. For instance, at 92 percent, Lake County has the highest share of non-degreed adults between the ages of 25 and 64, representing over 4,000 county residents. On the other hand, 36 percent of Shelby County's working-age population (25-64) has a college degree, but the 64 percent without a degree represents over 300,000 people.
- The distribution of educational attainment needs within racial groups is generally consistent with the overall percentage of people without a college degree, with some variation among racial groups:

---

<sup>1</sup> Educational attainment data was reported based on specific age ranges (18-24, 25-34, 35-44, and 45-64).

- ✓ Of the counties with the highest percent of population without a college degree, White residents have lower educational attainment needs than Black and Hispanic residents— although the needs of White residents are also high.
- ✓ In counties with the highest levels of educational attainment, there is also a large attainment gap: college completion among Whites is at a much higher level than Blacks or Hispanics.
- ✓ A small number of people in specific racial groups may lead to an improbable 100% of residents without a college degree for a specific county; however, this is a function of a very small sample size and does not necessarily reflect reality.

The following table presents the top ten counties with the highest percentage of residents without a college degree. The data to the left of the line show the population in each county between the ages of 25 and 64, and the percentage of that population without a college degree. The information to the right of the line is based on county residents 25 years or older and is not appropriate for direct comparisons with the 25-64 population featured in the data on the left side of the table.

### **Ten Counties with the Highest Percentage of Population 25 and Above with No College Degree**

<b>County</b>	<b>Population 25-64</b>	<b>% No Degree</b>	<b>White</b>	<b>Black</b>	<b>Hispanic</b>
Lake	4,712	92.0%	89.8%	95.1%	94.5%
Grundy	7,187	89.8%	89.0%	83.5%	65.1%
Hancock	3,691	89.5%	90.4%	100%	96.5%
Morgan	12,446	87.7%	88.9%	97.6%	73.8%
Union	10,393	87.7%	88.9%	97.3%	94.0%
Bledsoe	7,219	87.5%	87.2%	95.9%	98.9%
Van Buren	2,977	87.5%	89.5%	100%	100%
Grainger	12,381	87.1%	88.1%	72.5%	87.5%
Meigs	6,482	86.7%	86.3%	82.9%	100.0%
Lauderdale	14,989	85.8%	84.4%	91.8%	96.3%

**NOTE:** The third column represents the total percentage of residents in the 25-64 age range without a college degree. The subsequent columns represent the percentage of county residents, in that specific racial group, without a college degree

The following table presents the percentage of residents without a college degree in each county. As in the previous table, the data to the left of the line show the population in each county between the ages of 25 and 64, and the percentage of that population without a college degree. The information to the right of the line is based on county residents 25 years or older and is not appropriate for direct comparisons with the 25-64 population featured in the data on the left side of the table.

**Percentage of Working-age Adults with No College Degree, Population 25 and Above, by County**

### Ten Counties with the Highest Percentage of Residents with Some College No Degree

County	Population 25-64 Some College, No Degree	% of Statewide Total
Shelby	121,278	16.5%
Davidson	71,503	9.7%
Knox	47,334	6.4%
Hamilton	43,539	5.9%
Rutherford	34,713	4.7%
Montgomery	24,885	3.4%
Sumner	20,655	2.8%
Sullivan	18,770	2.6%
Williamson	18,556	2.5%
Blount	15,252	2.1%

**NOTE:** This table is based on the total population of Tennessee residents, ages 25-64, with some college and no degree (734,375). The following counties contain the greatest number of residents with some college, no degree. For instance, 16.5% of the entire Tennessee population with some college and no degree reside in Shelby County.

# SECTION I: Maps Showing Percentage of Population without a College Degree\* by Quintile

**Percentage without a College Degree  
Ages 25-64**

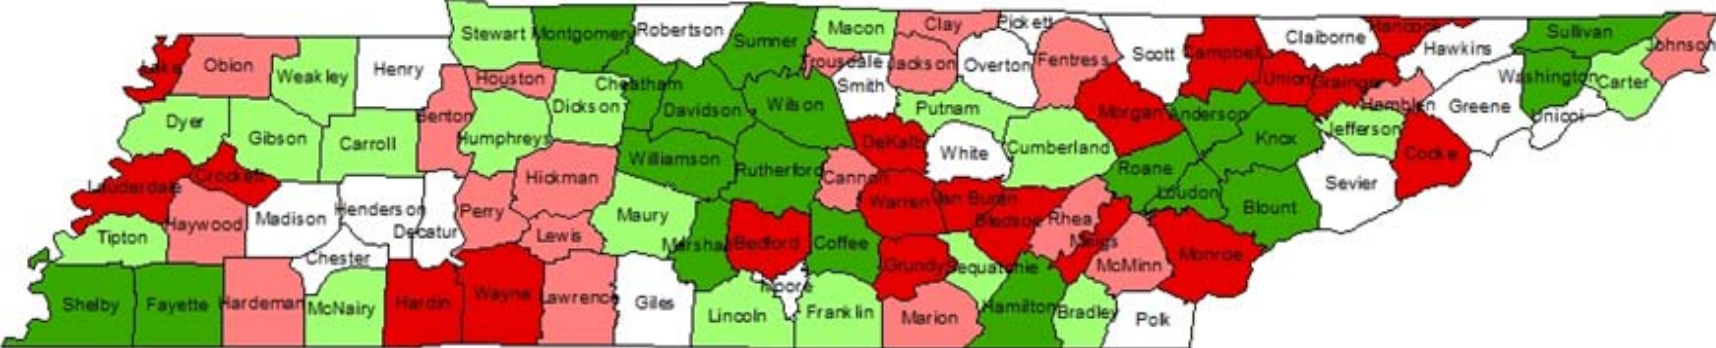

**Percentage without College Degree**

\* Refers to an associate's degree and above
