## Introduction

Thank you for joining us for this special presentation! You are about to find out how you can make daily sales on the world's biggest eCommerce sites without spending any money up front. The information was originally presented by Rachel Rofé, and she is sharing how you can use very simple, text-based phrases and funny ideas, put them on merchandise, such as mugs, shirts, posters, and pillowcases, and then sell them on eCommerce sites like Amazon, Etsy, and eBay.

The screenshot above shows some of the profits that Rachel has been able to make with this system in a year. She's not trying to show off by showing you this. She just wants you to know that generating substantial amounts of revenue is possible with this system, and truthfully, it's so easy that you could actually get started making money today. The graph above shows that Rachel was able to generate five figures in passive income during the month of January. She is able to do this fairly consistently using this system.

Rachel has other businesses, and she really doesn't get to spend a lot of time running this one. She thinks this business model is very fun, and so she doesn't really want to make it her main business. That might ruin the fun. Her sales from holiday sales are shown below. Of course, there are going to be spikes throughout the year. However you can see that in January alone (during the Christmas season), Rachel was able to generate \$133,928.59 in sales.

According to Rachel, she's still able to make at least five-figures in passive income, in spite of the fact that sales vary from month to month. These screenshots only pertain to what sales she's made on Amazon, but Rachel has sales coming in from all over the place. You can sell the types of products she is selling on Etsy, eBay, Bonanza, and so many other places! You're going to learn how to put these on all these different marketplaces and get sales from all over the place.

You don't have to worry about whether or not you know enough about technology or marketing to use this system. This is something that's really fun, creates passive income, and

you get to sell products that you can be proud of. Below, you'll find some screenshots pertaining the ratings and reviews that Rachel sees on Amazon. There's always going to be unhappy customers, but the products she is selling are high-quality, so Rachel never worries about bad feedback, and as you can see, for the most part she is getting 5-star ratings on her products.

## Why This Business Model Works Like Crazy

Here's 7 quick reasons why this fun and profitable business works like gangbusters:

### 1. Get in Front of 1,000's

One of the reasons why this system is so powerful is because it helps you to get in front of thousands of people. As previously mentioned, you can sell these products on all sorts of ecommerce sites, including big marketplaces like Amazon and Ebay. Many of these companies have spent millions, if not billions, of dollars to get in front of customers and build trust with them. That means you don't have learn search engine optimization or pay for ads to make a system like Rachel's work for you.

Simply by listing quality products on these sites are you able to level the playing field and get in front of tons and tons of people. These companies have already done all of the heavy lifting for you. That makes this a great system to get started with, whether you have access to other traffic sources or not.

### 2. You Don't Need to Spend Money

[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

When you follow this system, you don't have to invest money to make it work for you. Most eCommerce-based businesses have to pay for ads, inventory, and other such investments. This isn't like that at all. This is a "low-hanging" system, meaning that you take advantage of its simplicity and grab up the easy stuff. It doesn't require very much time, and you don't have to take on much of a risk. You can invest as much or as little into this system as you like. That's totally up to you.

### 3. You Don't Have to Spend Much Time

If you want to just sell these products sporadically, you absolutely can. If you feel like working on it one day and not the next, that's fine too. Rachel says that sometimes she likes to wake up in the morning and create a cool design just for fun, and then other times she gets busy and doesn't touch this business for weeks. It doesn't really matter because as long as you have things set up for yourself, you can continue making a passive income. Of course, the more time you put into the system, the better results you'll yield, but it's not like you have to work on this every single day to generate a substantial income.

### 4. It's All VERY Simple

[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

This system really couldn't be simpler. A little kid can do it, and they are doing it. The process is really fun too, and it's not hard to generate income. The screenshot above is of one of Rachel's Amazon accounts, and as you can see, she has sales rolling in consistently. It's not only her that's finding success with this business model either.

## 5. Your Products Can Be "Ugly"

A screenshot below shows one of her students saying, "Put up 9 mugs on eBay 3 hours ago and already sold 2! Just plain "ugly" black & white ones." There are some other people who left messages because they were excited that they sold their first mug. Take note that one of Rachel's students, Shawna, says that the mugs are ugly. Your products really don't even have to look that get to make sales. In fact, the mugs that sell the best are just plain white mugs with black lettering. It's time for you to enjoy this too!

## 7 Steps to Passive Product Sales on Etsy, Ebay, and Amazon

It's a system...

My Low Hanging method is a **7-step system**.

It's formulaic. You just follow the steps, and you make money.

**If you follow my guidelines... you simply cannot do it wrong.**

Probably the best part of all of this is that Rachel's "low hanging" system is really formulaic. Therefore, there's little to no room for errors. Really, if you follow her guidelines, you can't go wrong. You follow the 7 steps provided, and you'll make money. It's as simple as that. For the remainder of the training, you're going to discover:

- How to make ugly designs that sell like gangbusters on sites like Amazon and eBay
- How to find winning concepts in seconds
- How to sell hundreds of products without ever touching inventory or buying a thing
- How to get items sent from USA (and some from Europe) on your behalf

- How to get your products listed and selling, even if you have NO experience
- How to scoop up tons of low-hanging sales
- Exactly how you can make DAILY sales without spending ANY money up front.
- You'll walk away knowing exactly how to get started!
- And much more... All adding up to Rachel's commitment to you today:

*"You'll learn exactly how you can make DAILY sales on the world's biggest e-commerce sites without spending ANY upfront money whatsoever."*

Rachel knows that she is making some big promises, but she also knows that this presentation includes everything you need to get started right away. She has an offer for you at the end of the presentation, but she doesn't want you to even consider it if you don't feel like she's fulfilled the promises that she has already made. If that sounds like a good deal to you, then continue through the training and discover how all of the pieces fit together.

These mugs have been sold several

### ***Step 1: Come up with a concept***

Let's dig in. The first step is to come up with some ideas about what you want to sell. The good news is that there's no way to mess this up. This is all about throwing spaghetti at the wall and seeing what sticks, and it's okay if you run into things that just aren't working. You just move on to the next idea. This system is very fun, and Rachel wants you to enjoy yourself as you get the process down. Just because this system lacks complexity doesn't mean it lacks opportunity. Its simplicity is really where its power lies, and that's largely because it's a stress-free model that you can continue to carry it on without giving up.

Look at the screenshot above. Believe it or not, these mugs have each sold thousands of times over. All of these are white mugs with black lettering. All that really makes them appealing at all are the catchy messages printed onto them. People purchase these types of products on impulse, and since they are priced at under \$20 each, all you really have to do is make someone smile.

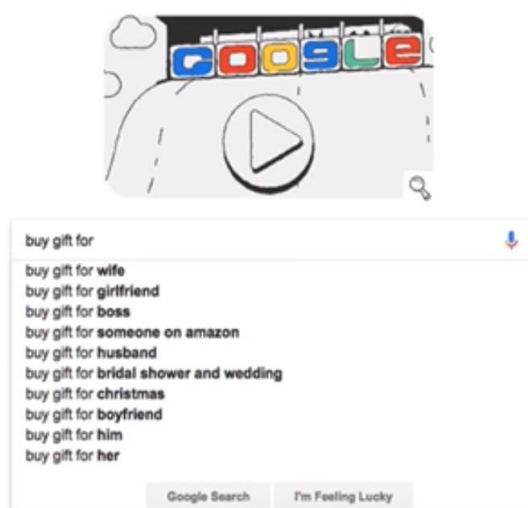

Now, you might be thinking, "That's all well and good, but you can't convince me that I can just throw a mug with some words on it, up on Amazon and expect it to make me tens of thousands of dollars every month." That's true. There's a trick to that, and that is finding out what people want to spend money on and giving it to them.

As you probably know, people search for products all of the time, and they use keywords to find what they are looking for. Luckily, many of the biggest search engines can predict what you are most likely to type in based upon what other people have, and therefore, are able to offer you keyword suggestions. You can use this feature to discover what other people are searching for.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

The model is simple: we're giving people what they're going to spend money on

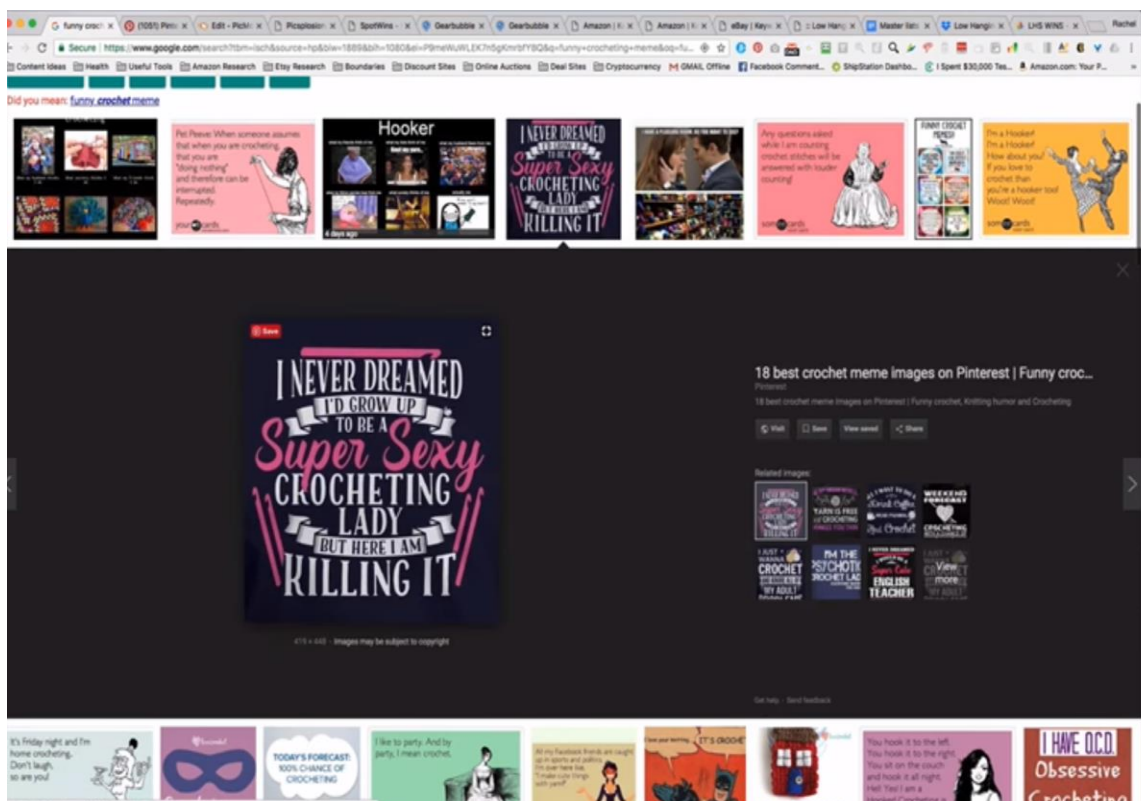

### Route #1: Google Images

Look at the screenshot above. Rachel has typed in the words “Buy gift for” and Google has provided some keyword suggestions, revealing what people are looking to do the most. Furthermore, these are the types of “buyer” keywords that people type in when they are ready to pull out their credit card and make a purchase. So, this really is about giving people what they are looking for and then just collecting the cash when they find your product.

The people searching for products online already want to buy something. You just have to make them smile, and the sale is yours. You will have to do some research, but that can be fun too, especially if you're the kind of person who likes cheeky remarks and funny messages. Typically, Rachel will start by looking at other products on Google Images (Images.Google.com).

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

Before starting her search, Rachel thinks about what type of niche she would like to create her designs in. Then she types in a related keyword to see what comes up and looks to see if she can come up with any interesting ideas. To demonstrate this, she typed in “funny crocheting meme” during the live presentation of this material, and the results shown above appeared. One caught her attention almost immediately. It said, “I Never Dreamed I’d Grow Up to Be a Super-Sexy Crocheting Lady but Here I Am Killing It”.

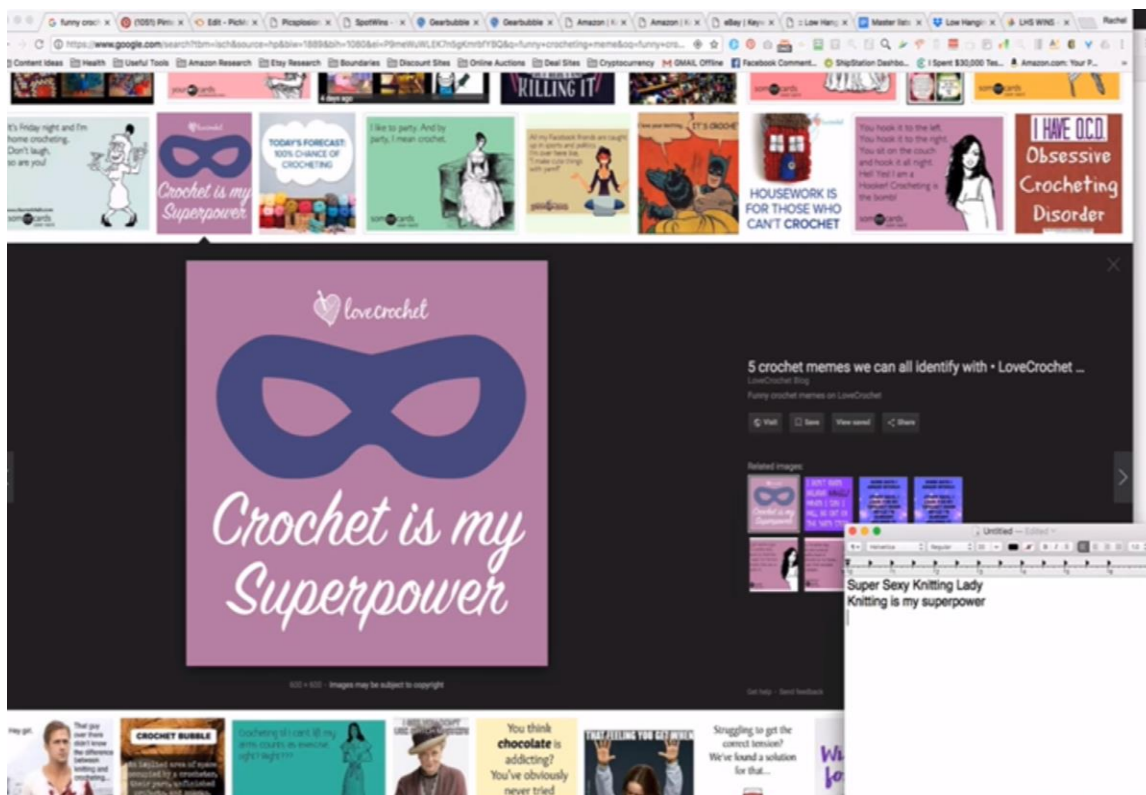

Typically, when Rachel researches a niche, she keeps her computer’s Notepad program open so that she can jot down the most interesting things she finds in her research. You don’t want to just steal other people’s designs or ideas, but you can use what you find as inspiration to come up with some of your own ideas later on. In this case, she just jotted down the phrase “Super Sexy Knitting Lady” because she thought that she might be able to incorporate those words somehow into a design later.

Next, Rachel found a meme that said, “Crochet is my Superpower,” and she jotted down “Knitting is my superpower” on her notepad. This is shown in the screenshot below. Third, she found a meme that says, “Today’s Forecast: 100% Chance of Crocheting”. She then typed the words, “There’s a 100% chance of knitting today.” Notice that she doesn’t copy people’s memes word-for-word. You model after popular ideas closely, however, without actually stealing people’s ideas.

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

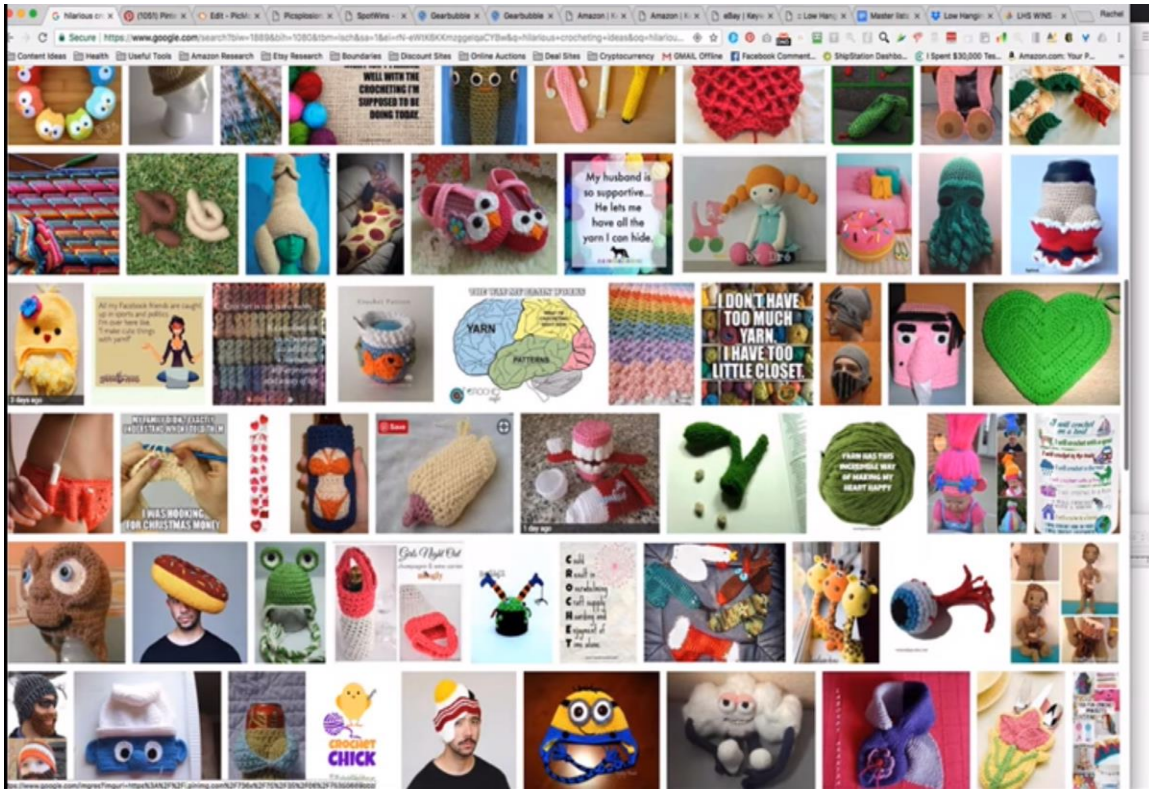

Another meme Rachel found said, “I like to party. And by party, I mean crochet.” Rachel once again jotted this down, replacing the word “crochet” with the word “knitting”. You could just as easily replace it with the word “basketball,” or “running,” or “scrapbooking”. In any case, this is how you can go about getting tons of ideas, really quickly, for things that you can sell. Rachel also found one that said, “Housework is for those who can’t crochet.” Based on this, you could come up with a product that said, “Housework is for those who can’t knit,” or “for those who can’t scrapbook.”

Here’s another one. “You think chocolate is addicting? You’ve obviously never tried crochet?” Even if you aren’t into crotchet, you’ve got to admit that’s cute. Again, this same statement would still be cute if you replaced the word “crochet” with the name of any other type of hobby, and as hobbies go, people are always looking for products related to what they are into.

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

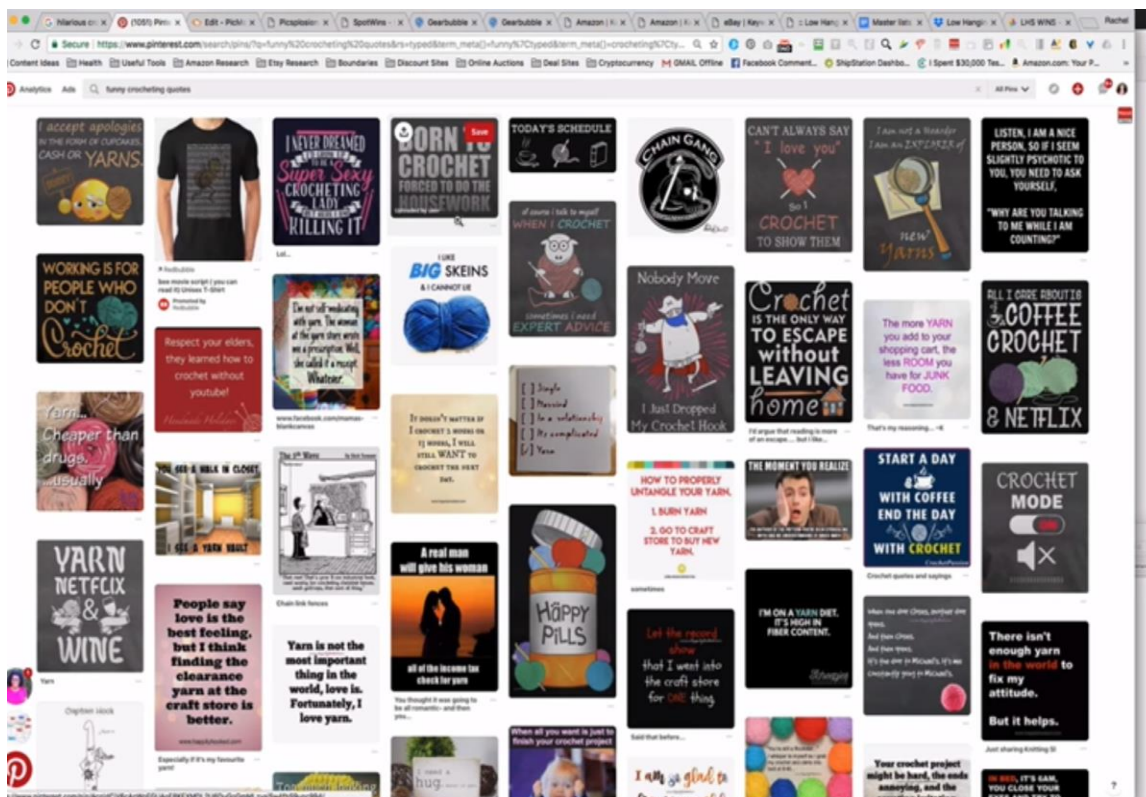

You could also search for “funny crocheting shirts,” or “funny crocheting quotes,” and get more ideas that way. Then you might also try “hilarious crocheting quotes,” which would bring up a whole new set of results. One meme said, “I don’t have too much yarn. I have too little closet.” That’s another one that you could base some ideas on. For instance, you can say, “I don’t have too many scrapbooking supplies. I have too little closet.” Or, perhaps you might use, “I don’t have too many baking supplies. I have too little closet.” The list goes on and on.

You can probably tell, just from this small set of examples, how easily it would be to come up with 10 or 20 ideas this way. Rachel found yet another one, which said, “It’s Okay If All You Did Today Was Crochet.” What about, “It’s Okay If All You Did Today Was Knit”? You could also try other search terms like, “Hilarious Scrapbook Ideas,” and then just continue applying these keywords to different niches.

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

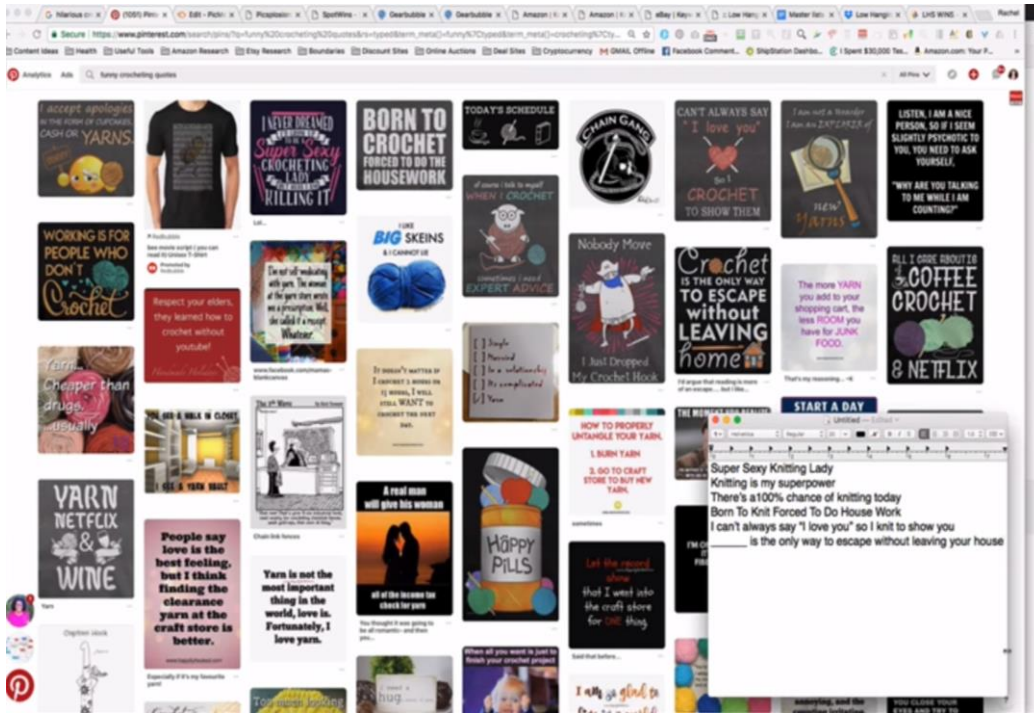

## Route #2: Pinterest

Another way to come up with ideas is to search for pins on Pinterest. Rachel logged into the site, typed in “funny crocheting quotes,” and the platform returned results above. She first pointed out the one that said, “Born to Crochet. Forced to Do the Housework.” Based on this, she typed, “Born to Knit. Forced to Clean,” into her notes. There’s nothing wrong with saying, “Born to Knit. Forced to Do Housework” though. There’s also one that says, “Can’t Always Say I Love You, but I Crochet to Show Them.” Once again, Rachel replaced the word “crochet” in this sentence with “knit,” and then she typed the sentence into her notes.

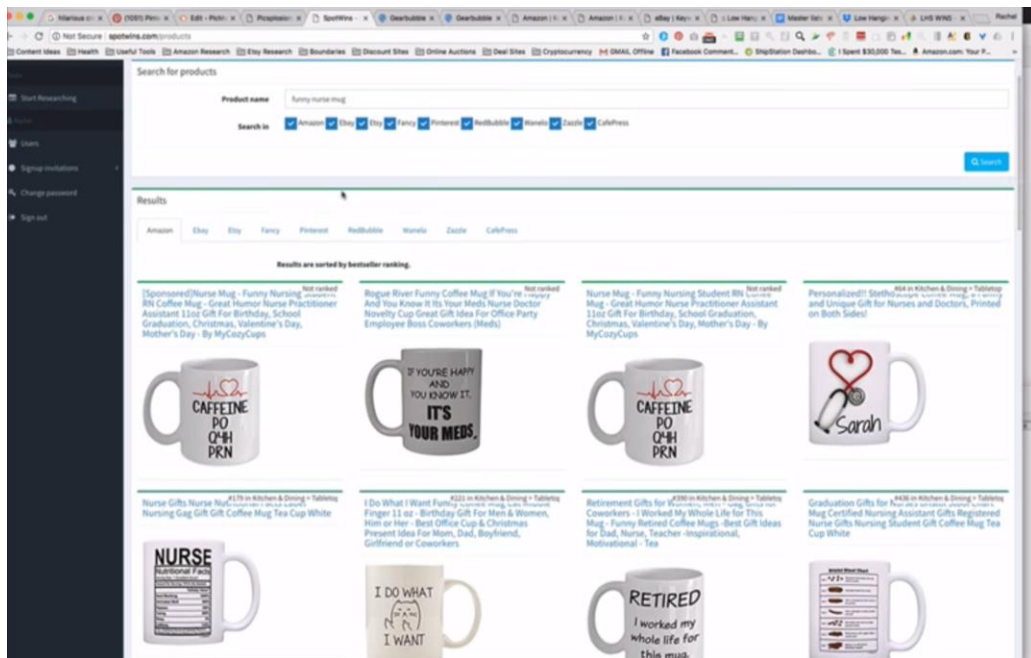

Next, Rachel started just putting blanks in where the niche keyword should go. You could fill in these blanks with just about any niche-related you wanted to. For example, she typed in her notes, “\_\_\_\_\_ is the only way to escape without leaving your house.” You could fill in the blank with knitting, playing basketball, and just about any other action keyword. “Start a Day with Coffee. End the Day with Crochet,” is one that she found that would be perfect to put on a coffee mug.

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

When you're on Pinterest, it's a good idea to pay attention to how many pins a pin gets. This will give you some insight into which pins people are responding to the most. You can find a lot of great ideas on Pinterest. There are other places that you can go to get ideas. One of the advantages of Pinterest, however, is the ability to look into how popular one meme is compared with another.

### **Route #3: See What's Selling**

Rachel uses a tool that's not available publicly, but you could do the same thing manually in a number of different ways. The way the tool works is, you put in a phrase like, "funny nurse mug," and it returns examples of related products, all sorted by their bestseller ranking on various sites. In other words, it will show you which ones are selling the best on Amazon.

The results that Rachel got when she typed in, "funny nurse mug," are shown above. Rachel immediately pointed out the mug that said, "Retired. I worked my whole life for this mug." Another one said, "Please Do Not Confuse Your Google Search with My Nursing Degree". You could, of course, replace that with something like, "Please Do Not Confuse Your Google Search with My Nursing Experience." Then, one said, "You Can't Scare Me. I'm a Retired Nurse." Obviously, you could replace the word "Nurse" with another occupation too.

The best thing about this tool is that it shows you what people are already actively paying for. You can search through bestselling Amazon products with this tool, and you can look over products that are on eBay and Etsy as well. There are other platforms like Zazzle and CafePress that you can look into, and each platform has different types of products on them, so you can see which ones sell best where and how much they sell for.

You could also look at other types of products to get even more ideas. You could look up, "funny nurse shirts," for instance. Again, you could visit all of these different sites to view all of their most popular items manually, but you are going to learn how you can gain access to this tool today.

The screenshot below provides a recap of what you have learned so far from this section. One thing that hasn't been thoroughly explained is that you want to look for products that people are buying, versus just going with random ideas that you've come up with. You know, sometimes people try to come up with random phrases that they think are funny, but the reality is that you want to go after products that people are already actively looking for.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

## Recap / Things To Remember:

- \* Look for products where groups of people buy (versus random ideas)
- \* There is no need to copy completely - you can make variations (i.e. "Scrapbooking makes me happy" can be "Scrapbooking is my happy place")
- \* You can change out words to get into brand new niches (i.e. "Scrapbooking makes me happy" can be "Socces makes me happy")
- \* Start with word-based designs (*though some of the things you can do with images are shockingly easy*)
- \* Feel blank? Go to bestseller or trending lists!

You want them to already have their cards out and ready to purchase your products. This way, you don't have to do any hard selling. They look for it, you provide it, they buy it, and it's done. If you follow this system, you don't have to like anything or do anything extra. Rachel also recommends using word-based designs, especially when you first start out. You can add images to your products, but it's a lot easier not to, and a lot of word-based do designs do very well. In fact, they sell better in most cases.

### ***Step 2: Make a Great Design***

Text-based designs do great. The screenshot above shows some of the mugs on Amazon's bestseller list. You can see that these mugs are primarily black and white with some text, and these mugs are selling a lot. Now look at the screenshot below. This person says that they searched for the #1 best selling novelty coffee mug, and the mug being shown is what they found.

As previously mentioned, these products sell for under \$20. If someone likes it, they are very likely to buy it. The mug designs that Rachel and her students sell are all very simple, yet they provide people with exactly what they are looking to buy.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

People might be searching for a funny beard mug and come across a mug that says, “This coffee is almost as hot as my beard.” They might be looking for a gift for a drummer and find a mug that says, “Eat. Sleep. Drum.” Or, maybe they are looking for a gift for a dog lover and end up looking at a mug that says, “Best Dog Dad Ever”. In any of these cases, they are likely to purchase one of the mugs shown in the screenshot below.

These are all very simple, yet provide people with what they want to buy

Below, you'll find a screenshot of a mug Rachel created, which sold really well. It says, "You are the luckiest dad in the world. I would love to have me as a daughter. She originally came up with this because she was searching for funny boyfriend gifts, and she saw a mug that said, "You're the luckiest guy in the world. I would love to be dating me." She thought that was cute, so she decided to switch the words up a little bit and create some variations.

The mug above sells really well around Father's Day, but it continues to do well the rest of the year. It just peaks on Father's Day, and also Christmas, because those are holidays in which dads often get gifts. However, this is purchased for birthdays and just as a regular gift too. Obviously, you could do something similar just by switching the words around to say, "You're the luckiest mom," or, "You're the luckiest grandma," or, "You're the luckiest grandpa". You could make mugs for uncles, aunts, cousins, etc.

You could also do this for occupations. Rachel has one design that says, "You are the luckiest teacher in the world. I would love to have me as a student." What about, "You are the luckiest coach in the world. I would love to have me as a volleyball player"? Or, "You are the luckiest client in the world..." Surely you get the drift by now.

Another such cup is shown below. It says, "'I Do This For The Money' said no policeman, ever". Again, you can simply change the occupation and hit all kinds of other audiences, such as government workers, firefighters, teachers, etc. Another idea would be, "'I Do This For Respect' said no lawyer, ever."

One of the first mugs that Rachel ever created said, "My Brain Has Too Many Tabs Open." She says that all of the mugs she has made were very easy to create. One of the apps that she uses is called Word Swag. This is an app that you can create designs with on your smartphone. If you don't want to use your phone, that's fine because you are about to see some desktop options as well.

Word Swag is fantastic for coming up with phrases, and it only costs \$4.99. That's just a one-time purchase, but there are also similar tools that you can get for free. Rachel loves Word Swag, and definitely feels like it's worth that small cost. She says that she can make design after design on it in no time at all. You just open the app and choose a transparent background. That's because you are going to have images that are text-only with no background. Then, you are going to take your designs and put them on the products that you're going to sell.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

The next screen that you see will say, “Double Tap Me to Change Text,” and you’ll do just that. After double-tapping your smartphone screen, you’ll be able to type in whatever phrase that you want. The screen to follow will allow you to choose your font options. Some examples of the types of fonts you can choose are shown above, and if you were to keep scrolling to the right, you would see even more.

When you reach the screen above, you’ll also want to make sure that you’ve selected the color black for your text. That’s because you are going to want black text on a white mug, as previously demonstrated. Those sell better, and they are easier to produce, so why spend any more time than you have to designing them? Just create a catchy design and call it a day. After you make your design inside of the app, you can simply click to save it, close the app, and you’re done. This whole process literally just takes a few seconds.

PicMonkey is another app that you can use. This tool used to be free, and it still has a free trial, but it’s also very inexpensive to purchase the full version. This is a desktop application that you can use. Simply visit [PicMonkey.com](http://PicMonkey.com) to access it, and before you begin designing anything, you’re going to want to choose a transparent canvas. Again, you always want to have a transparent background for these designs.

Your next step is to choose the text tool and click “Add Text”. From there, you’ll want to choose a very simple font. Remember, all of the mugs that you saw before had easy-to-read fonts that weren’t fancy at all. Once you have chosen your font, you can type in the phrase you want to use in your design. You’ll probably want to crop your design neatly before saving it, but that’s essentially all you have to do.

Hopefully, you can tell that this is all very easy. Another tool that you can use for this is Picsplosion. This tool is absolutely free. Rachel actually created this program for people who were making these mugs designs. She wanted people to have something that was very easy to use and that was free. The screenshot below shows a testimonial from a student of Rachel’s. She says that she was able to create over 50 designs with this software. The first design took her a little while, but after that she was able to create the rest within 30 minutes.

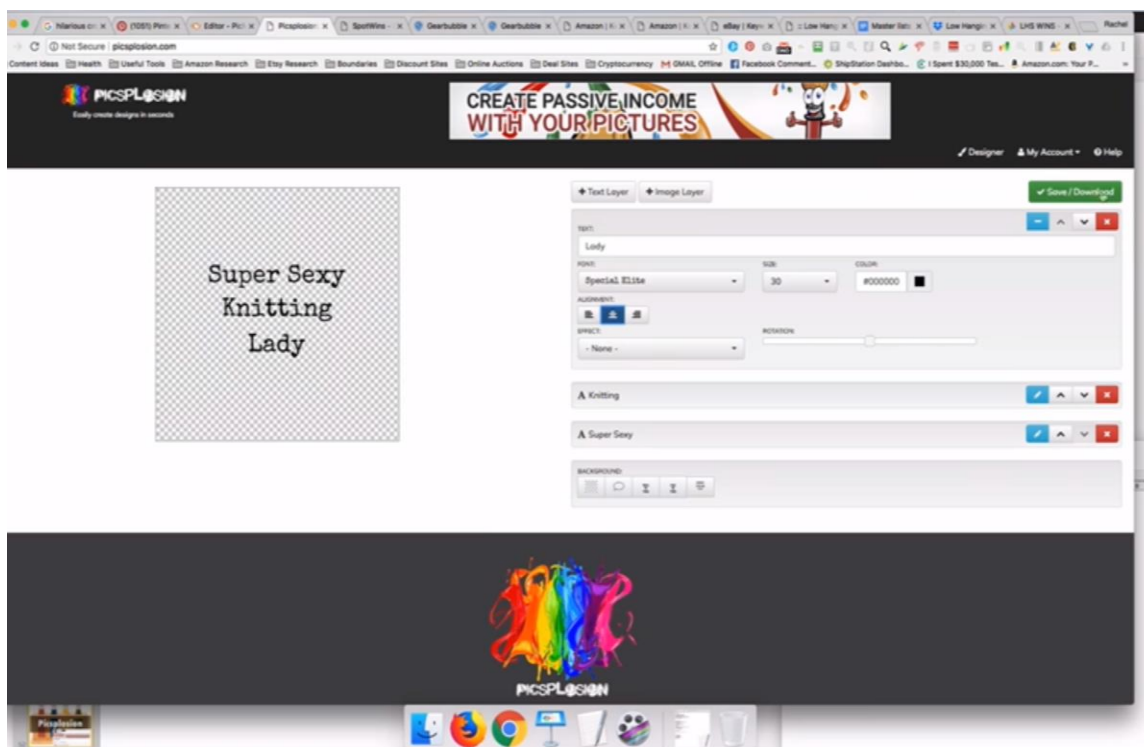

Think about it. Every new design you make can be put on a product. If you can make nearly 50 designs in 30 minutes, imagine what potential this system has. Plus, you have over 10 different products that you can put any one of your designs on. The possibilities are literally endless.

The Picsplosion interface is shown below. As you can see, Rachel chose to create a design that says, “Super Sexy Knitting Lady”. She saved this and quickly replaced the word “knitting” with

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

the word “scrapbooking”. So, she had two designs made in about a minute’s time. Keep in mind that each of these designs could be applied to over 10 products, and each of those products could be put up on Amazon or another platform fairly quickly too. Pretty cool, right?

There are a few things that Rachel would like you to remember before continuing on to try and use this system yourself. They are:

- Start with simple word-based designs. There’s no need to spend money on fancy designs until you’re making sales.
- The simpler, the better. Basic black and white is just fine. Intricate and fancy might do well in a specialized store, but we’re going for broad, mass-market appeal.

Rachel has found that the more intricate a design is, the more reasons there are for people to not like it or decide not to buy it. So, if you’ll just use white mugs with black text on them, there’s more of a chance that they won’t have a reason to turn it down. Some of the designs might not seem very interesting, and even just plain ugly at times, but if it appeals to a specific audience looking for a particular type of product, people will buy it.

## What You Can Do With ONE Image

### ***Step 3: Launch on UseGearBubble.com***

UseGearBubble.com is a site that's free to sign up on. They do have some paid options, but they allow you to list your products for free. The screenshot above demonstrates how you can create one image and put it onto all kinds of products. These are just some of the products that you can have your design printed on. They include:

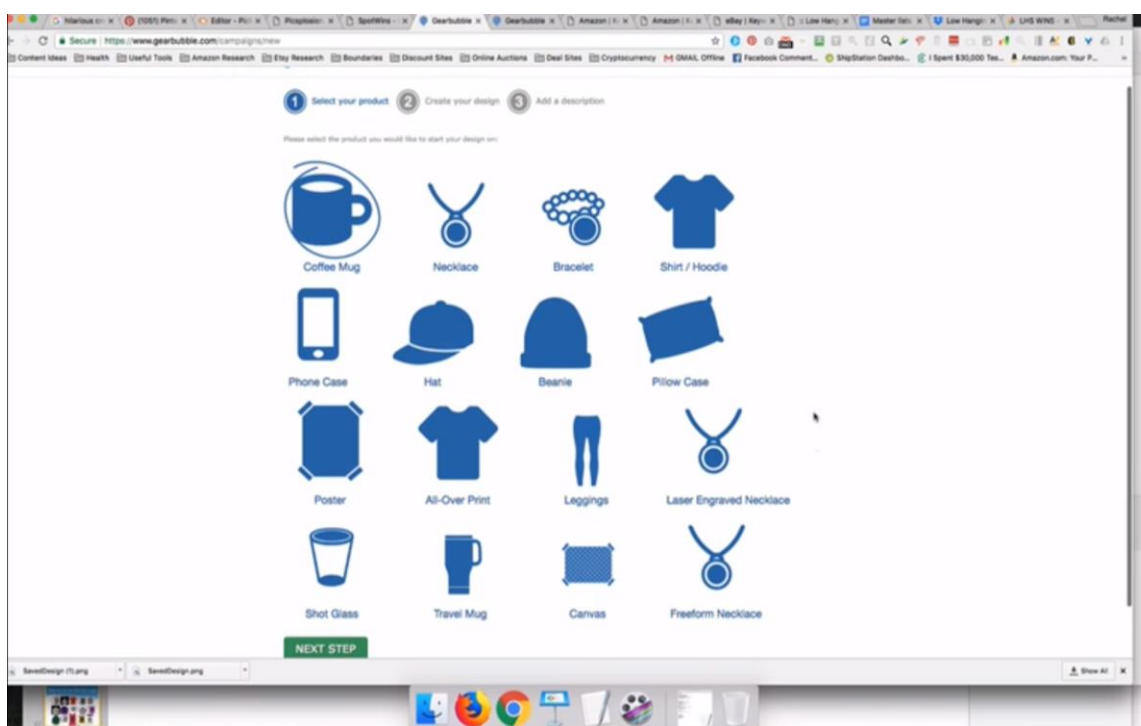

- Mugs
- Color-changing mugs
- Travel mugs
- Metallic mugs
- Shot glasses
- Necklaces
- Bracelets

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

- Posters
- Pillowcases
- Laser-engraved items
- And More!

After you create an account on UseGearBubble.com and log in, you'll be ready to put up your first product. All you have to do is click on "Launch Campaign" and then choose "Traditional" for the type of campaign you're setting up. After that, you'll reach the screen shown below. As you can see, there are a number of different products that you can choose from. For this walk-through, Rachel decided to create a mug.

Once you choose the type of product you would like to sell, you'll reach the screen shown below. You'll hit the "Upload Design" button, and then you'll be able to choose the design that you created in Step 2. The design will then appear on the cup, and you'll be able to resize it so that it fits appropriately. If it doesn't look perfect, don't worry about it. You want to make sales, not create some kind of masterpiece.

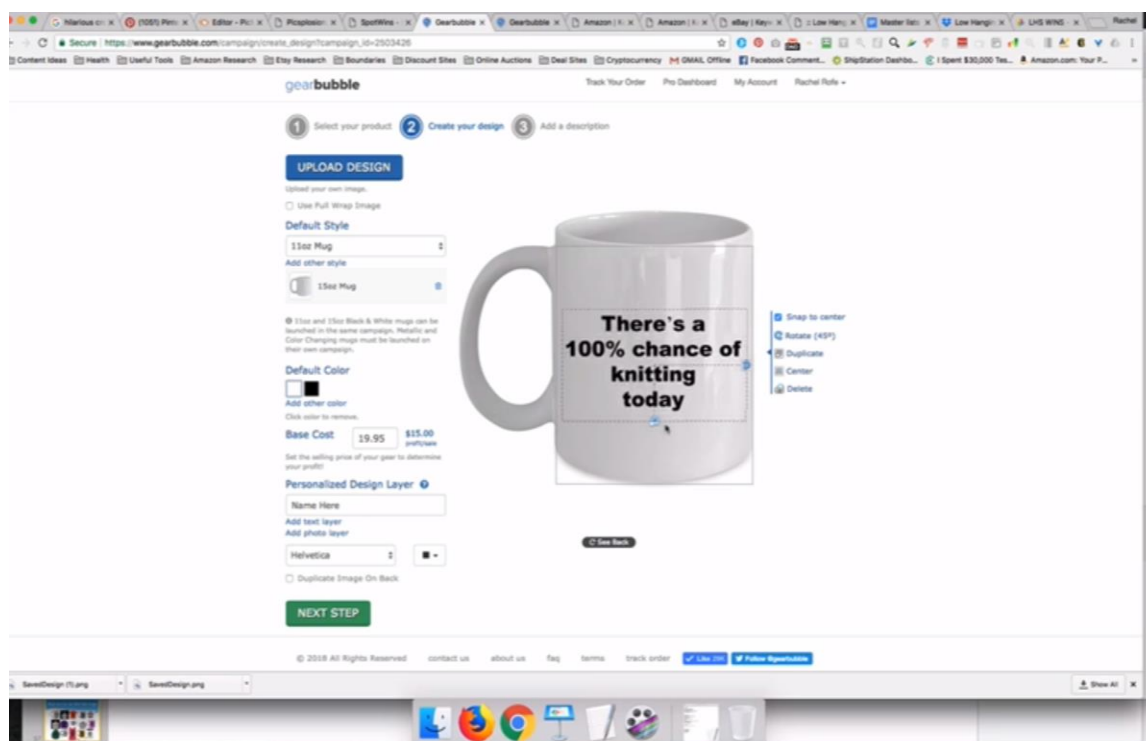

There are some different options to choose from, as you can see. Of course, if you designed your words in black, you'll want to choose a white mug. Then, there are a few different mug sizes to choose from, Rachel typically just chooses an 11 Oz mug, and she charges \$14.95 for

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

each one she sells. She also clicks the option to duplicate the image on the back, and that's so that the design shows up on both the front and back of the mug. That way, people who are left-handed will also see the image.

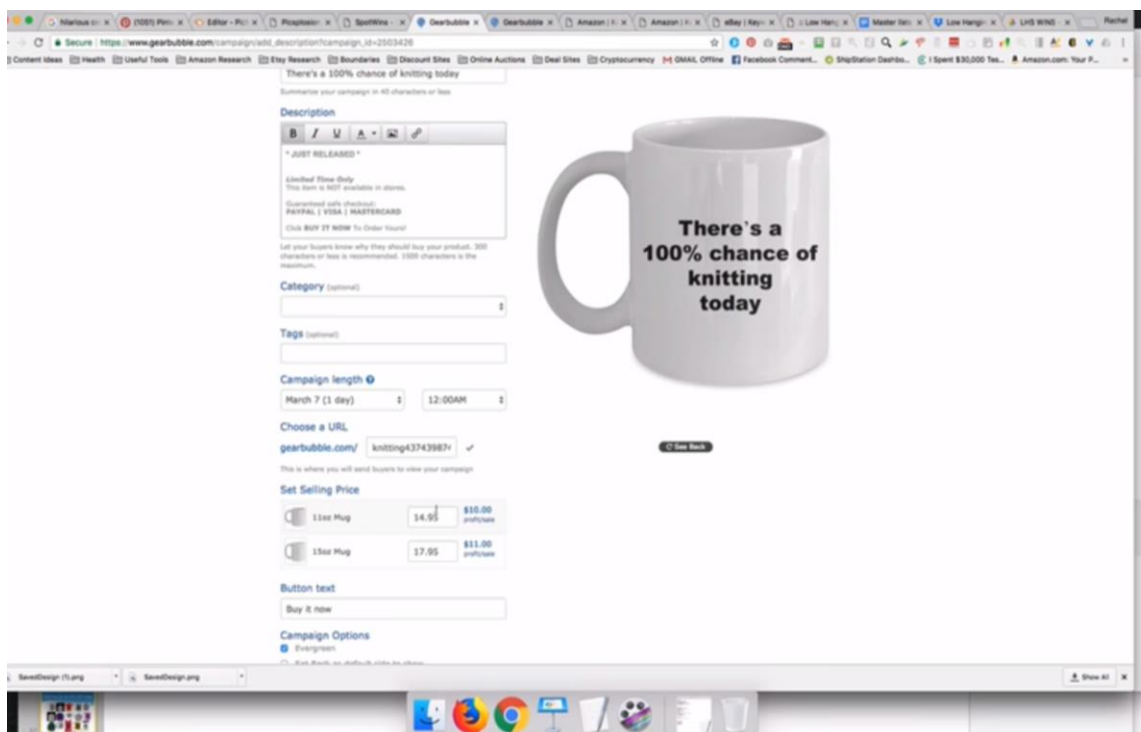

When you click the button to save your progress, you'll be redirected to another page. There, you'll be able to create a title for your campaign and write a short description. You can also select a category and type in some tags, but both of these are optional. You will need to create a URL for your product. It's going to start with GearBubble.com, and then you'll just add a tagline to it. Rachel just added the word "knitting" with a bunch of numbers after it.

On the previous page, Rachel had selected an 11 Oz mug and a 15 Oz one. The 15 Oz, she priced at \$17.95. How this works, by the way, is there's a base cost for each product. A mug costs \$4.95. So, if you sell it for \$14.95, that's a \$10 profit. Anyway, after finalizing the details on this last setup page, Rachel hit the "Launch Campaign" button, located at the bottom of the page. The page Rachel filled out is shown in the screenshot below.

[\*\*CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!\*\*](#)

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

Now, if you sell on different sites, there are other fees involved. You'll be shown a little bit more about how all of this works further on in the training. The next page you come to will provide you with a link that allows you to view your campaign now that it's all set up. Not only that, but you will have product images that you can use to start selling on other platforms.

You can right-click on your images and save them in a location on your computer, but at this point, you can take your images and use them to upload the product on different sites. Then, you can begin selling them in these other marketplaces without even having to buy inventory upfront or anything like that. That's pretty cool, isn't it?

People absolutely love the types of products that you are going to be able to sell with this system. Some of the comments that Rachel has gotten through Facebook about selling these items are shown below. Not only are people having success selling these products, they are getting good reviews because of how high-quality the products are. One student states the following:

*"I just got the review on Etsy about a mug... 'Bought this for my husband to take to work. He LOVES it. VERY well packaged. Like seriously. GREAT packaging. Communication is fantastic. Thank you so much!'"*

Got my first review on Amazon....5 stars. And two five star reviews on Etsy, one with the comment "perfect!!" Another says "super fast shipping!" I had nothing to do with the shipping, obviously, so kudos to GearBubble! It sort of makes me feel bad for not leaving more reviews on products I've ordered....I know better now.

In short, these products are high-quality, and customers really like them. Take note that sometimes you can get sales just by launching your products on GearBubble. Now, this doesn't happen all the time, but there is a marketplace on GearBubble, and you can click an option to make your products available there. Rachel says that she wouldn't count on making sales just on GearBubble, but extra sales can come about this way.

**You are about to be walked through Steps 4-7.** Rachel wants everything to be crystal-clear so that you can experience all of this yourself. She is confident that if you just follow this system, you'll prosper. In this section, you'll also learn about listing your products on Amazon. Whether you decide to invest in Rachel's offer today or not, you'll want to pay attention to every word, as you are about to learn how the rest of the system works.

To reiterate, you already have steps 1-3. They are:

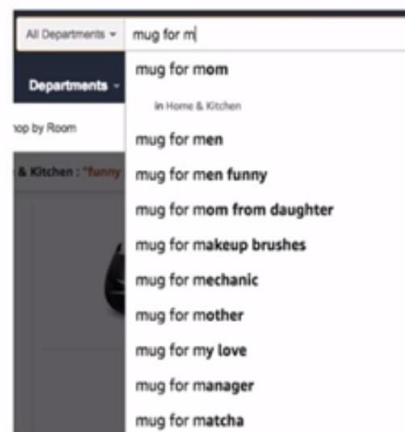

- Find a niche
- Make a great design
- Launch on UseGearBubble.com

# Find sales-getting keywords

- \* Figure out the obvious (*and not so obvious*) terms people are searching for
- \* Learn the best tools for automating your keyword research
- \* See how many searches per month there are for keywords so you can grab the best fruit possible
- \* This will help take your mugs from being hidden to the top of the search engines

## ***Step 4: Find Sales-Getting Keywords***

The screenshot above describes what this step entails as well as what you are going to discover in this portion of the lesson. The next step is to find keywords that people would type in when searching for a product like yours. A person might type in “funny knitting mug,” for example, to find a product that they want to buy, but sometimes people type in something like “funny knitting mug for sister,” or “funny knitting gifts,” or “hilarious knitting mug,” or something of the like.

You want to find the keywords people are using and put them in the right places in your product listing. That way, you can get the people who are typing in these keywords to purchase your product. One of the topics that Rachel covers in her course is what tools to use to automate your keyword research. People use all kinds of keywords in their searches, and the more of these relevant keywords that you find, the more opportunity you have to make sales.

When properly done, keyword research will take your mugs from being hidden in the marketplaces to being shown at the top of the search engines on the platforms you have them

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

listed on. You really want to do this keyword research before you start launching your products. That way, you don't have to go back and edit anything later on.

### ***Step 5: Launch on Amazon***

The next step is to launch on Amazon. Rachel's course covers how to rank high on Amazon's search engine so that people can find and buy your items. You'll also discover where to find people who love to buy discounted products. This will help you to increase your sales ranking.

You can't sell discounted products in exchange for reviews anymore, but you can still have people purchase your products at discounted rates. When you do this, Amazon sees that you're getting sales, and the platform ends up giving you more exposure. That's because you are basically telling them, "Hey, people like buying my products." Amazon obviously wants to provide their customers access to products that they want to buy, so if you are a source of these products, they will help your products to get found.

Rachel's course will help you learn how to make lots of sales on Amazon. Specifically, you'll discover:

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

proof that you can do this from anywhere, essentially, and you don't have to have a specific set of skills to become successful with this system.

Finally, there's a message at the bottom of the screenshot that states, "1,088 orders for the month of December. Will someone pinch me please, so that I can make sure it's not a dream?" Obviously, this student, John, is enjoying the success that he's had with this system. Rachel is confident that if you follow her system closely, you'll have success as well and end up feeling the exact same way that John does.

Obviously, Rachel can't guarantee that you'll get good results, or any at all for that matter. All she knows is that her system works. She's seen thousands of successful results from people who have applied her system to sell various products. There's so much opportunity and so many possibilities with this system, she is absolutely certain that you are going to do great as long as you go through the training and apply it.

You're going to want to visit SellerCentral.Amazon.com to get started. This is where you will list your products. It is free to create an account. There is a paid option available for \$40 a month, and you can pay for it if you want to, but you don't need it to get started. Once you log in, you're going to choose Inventory > Add a Product, and you want to choose Create a New Product Listing. That's because even though your product was created rather quickly, it's still a brand-new product. No one else has it.

Next, you'll choose a category for your product, and in this case, that would be "Novelty Coffee Mug". You will then be asked to enter in a "Product ID". Rachel doesn't use UPC codes anymore. Most sellers do, but she has training in her program that shows how to go about listing a product without having to buy one. For the "Product Name," she just entered in, "There's a 100% Chance of Knitting Today," but if you were to follow her system, you would include all of your keywords in your title. This would help you to reach as many buyers as possible.

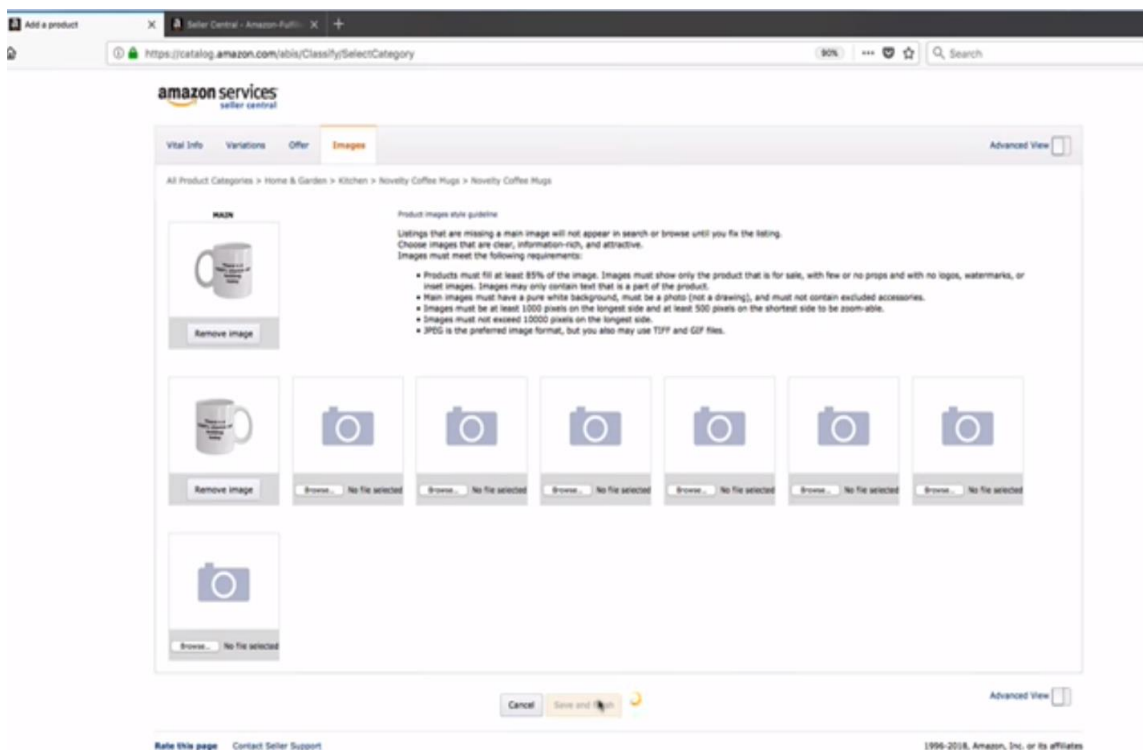

You could enter anything you wanted into the "Brand Name" field. Rachel just entered "Knitting Designs," and she skipped the "Variations" step. You would use this if you wanted to offer different colors or mug sizes. After making those selections, you'll reach the page above, and you are going to want to choose the option to ship the product to the customer yourself if it sells. That's because you aren't shipping anything to Amazon. You don't even have any inventory at this since you've just created a mug out of thin air. Also, you don't want to pay for any inventory until you know that you have a product that will sell.

Rachel entered in \$14.95 for the price, then selected "New" for the condition. Then, she typed "999999" in the "Quantity" field. That's because this is a print-on-demand product, which

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

means that they aren't printed until they sell. If you sell a bunch of them, that's awesome. Your products will be printed on and shipped as your orders stream in.

The last step is to upload your images. You should already have your product images ready to upload because you downloaded them from the GearBubble site earlier in this process. After uploading them, you are going to click to “Save and Finish”. That’s it. You’re going to receive a message that your product will be uploaded within 15 minutes and the mug will be available for sale.

It’s so easy to create designs, list your products on GearBubble, and then get them launched on Amazon. It does take a little bit of time to list products on Amazon, but GearBubble does offer Amazon Integration as well, which makes things even easier. Once you have this set up, you can simply log into your GearBubble store and hit an “Upload” button for any products that you wish to sell on Amazon. Your product will be automatically listed on Amazon on your behalf with the use of this feature.

Also, with this integration in place, every time you make a sale the order information is sent to GearBubble. From there, GearBubble will create the product for you and ship it directly back to your customer. As soon as the product is shipped, its tracking number is sent to Amazon via your account as well, and it’s also sent to your customer. So, all you really have to do is list your product, and everything else is hands-off.

# Launch On More Sites - It's Too Easy Not To!

## ***Step 6: Launch on More Sites***

You've learned how easy it is to launch products on Amazon, but you might as well launch on other sites too. The screenshot above shows some examples of people who have had success selling their products on other platforms besides Amazon. One student, named Frederick, was able to generate \$54,992.96 in net profit, with \$110k worth of sales from November through December. All but \$9,500 of it was made on Etsy.

A student named John was able to generate \$9,226.97 on eBay from November 1<sup>st</sup> thru November 30<sup>th</sup>. He also left a note saying that Rachel's Low Hanging System (LHS) was a great investment. He only just started and advised that anyone just starting out should try this system as well. Some of the things you'll learn in the course related to launching on various platforms are:

- How you can push a button and have all of your Amazon listings imported into other marketplaces
- The best practices for eBay, Etsy, and Shopify (optional)

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

- A girl making TONS of sales thanks to Etsy’s sponsored ads – watch the video from Rachel’s “flea market find”
- The automated tool that helps you to rack up a lot of feedback on eBay
- ... And a lot more (and growing!)

A lot of people are actually doing better on Etsy than Amazon right now, which is really surprising to Rachel. The screenshot above shows a conversation some students are having about whether it’s possible to make money without ads on Etsy, and one student replied that he hit 100 orders that way. He’s made many more sales since he left this message. So, it is very possible to sell on the platform for free, and then of course, as you make more and more sales, you can start investing more if you want to.

### ***Step 7: Process Your Orders***

It is inevitable that you will make sales if you follow the Low-Hanging System. Of course, no one can guarantee that you’ll become incredibly successful using this system, or that your first

**[CLICK HERE Now to Access the “Low Hanging System” - and Jay’s \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

few products will fly off the shelves. Some people get the process down faster than others, but there isn't anyone who has followed this system and not made sales. This business model is super-simple, and it just works!

Rachel says that when she first started marketing online, someone told her that the amount of money that you make online is directly correlated to how many buy buttons you have online. In other words, the more opportunities you give people to purchase from you, the more money you stand to make. That's what you are doing with this system. You're giving people lots of opportunities to purchase your products.

If every design can be turned into 10+ products, then it makes sense that you can quickly start selling tons and tons of products. So, what happens when someone buys one of your products? Here's a quick rundown of what occurs:

1. Your order gets submitted to UseGearBubble
2. Your design is printed onto a product
3. The product is shipped to your customer from within the USA (not China!) in a matter of days
4. You'll get a tracking number you can give your customer – or it'll be automatically updated for you completely hands-off... more on this shortly!
5. That's it!

This isn't a complicated process at all. You are taking your designs, you're listing them, and as they are selling, the tracking numbers are getting reported back. Obviously, you are going to want to keep an eye on things and make sure everything is running seamlessly, but for the most part it's very hands-off. Then, from there, if you want to scale up, you absolutely can. You can start listing your items on GearBubble Pro or on Shopify.

## Get The Most You Can From This!

- \* Free apps you can use to make more sales in your Shopify store
- \* How you can build a list
- \* How to “bundle” items and earn much more per order than ever before
- \* Set up monthly campaign strategies
- \* ....and a bit more!

The screenshot above lists a few of the things that you can do to start making more sales. You'll learn more about each of these topics when you join Rachel's LHS program. There truly is no limit to what you can do with this system. Of course, all of this is optional. You can spend as much time or as little time on this business model as you want to. Rachel enjoys creating designs and selling these products, but she likes that it's just a side business for her. However, there is definitely an ample opportunity here for anyone that wants to turn this into a full-time business.

When you join the LHS program, you're going to learn how to gain access to even more unique items. Some of the items shown below, for example, are not available to anyone who hasn't joined in on LHS. Shot glasses were just recently made available to non-members, but for a while they were only available to LHS members. According to Rachel, many other products are about to be added to the program that aren't going to be available publicly for others to sell.

Part of the genius of this system is that you are selling really unique items, but you are targeting smaller pools of people. So, you avoid a lot of the competition by selling these unique products in these extremely targeted niches. Also, keep in mind that you are able to create all of these products quickly and get them into these marketplaces fast. Before you know it, you can have avid streams of income, without much work on your end. That's what Doug Johnson was able to do. Check out his testimonial below.

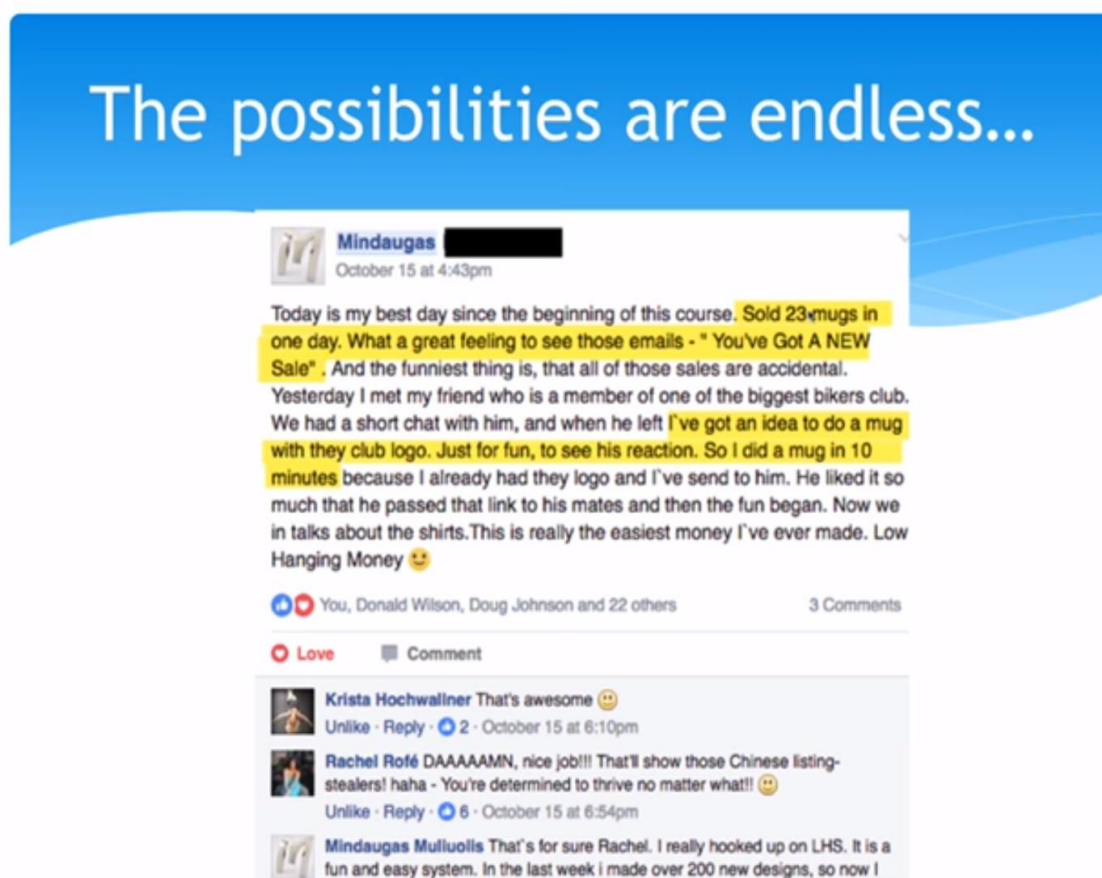

This isn't even Doug's main business, but according to his message, he's bringing in hundreds of dollars a week this way, and without doing anything but keeping an eye on the shipments (which is what he meant when he said other than fulfilling orders). Rachel says that it's still only one of his businesses, and not his primary focus, but she believes that his business has grown since Doug left this message and that he is now making somewhere in the market of \$40,000 a year with this model.

MJ Wood was able to make \$10k in almost 2 days with one of her mugs, and she shared this experience with the rest of the LHS group through a Q&A session that was held. By the way,

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

the LHS Facebook group is highly interactive. There are a lot of like-minded individuals helping each other out and sharing advice in there. Check out the screenshots below.

The screenshot above shows how people have had success by selling these products in bulk. One student was able to sell 23 mugs in one day. He had a friend that was a member of a biker's club, and he had a cool idea to make a mug with their logo on it.

This was just for fun, but the friend liked it so much that he passed the link around to other members. Now, they are thinking about getting shirts made, and he says that this is the easiest money he has ever made. This is just one example of the many different things you can do with this business model.

Rachel loves hearing stories from her students about how many sales they were able to make. She has tons of testimonials with people sharing their results and letting her know how easy it was to start generating an income this way. Sometimes it's not just the money they tell her about. Sometimes they tell her that they were able to go on a special trip or spend more time with family and friends, thanks to the extra cash they are able to earn with their products.

## 10 Winning Mug Designs That Have Sold at Least 1000 Units

As Rachel says in her presentation, don't overthink this! Literally anybody can come up with funny mug designs – in just about any niche -- that will start selling within 24 hours. To prove her point, here's ten actual examples of some silly mug designs that have gone on to sell at least 1000 units for Rachel:

## How to Earn Passive Income with This Proven System

The screenshot below shows a breakdown of what you can make for each mug that you sell. If you follow the training that Rachel provides, and you sell a mug for \$14.95, as she suggested, your total sale will bring in \$19.44 when you add the \$4.49 shipping fee. There are some expenses involved. If you are selling your mug on Amazon, the platform is going to charge you \$2.24, and you do have to pay \$4.95 for the mug itself and \$4.95 for the shipping yourself. Still, that leaves you with a net profit of \$7.30 per mug sold.

### Here's the math

For a \$14.95 white mug:

Income: \$14.95 (mug) + \$4.49 (shipping) = \$19.44

Expenses: \$2.24 (Amazon fees), \$4.95 (mug cost), \$4.95 (shipping) = \$12.14

**Net Profit: \$7.3 per mug**

*(You could also charge more - especially for personalized mugs.)*

Of course, you could charge more for your mugs, and in some markets people will pay more. There are also personalized mugs that you can sell for quite a bit more. There are also color-changing mugs, 15 Oz mugs, and black mugs that you can sell. So, there's a lot of opportunity to make more, but even a net profit of \$7.30 is great, especially when you consider that it only takes a few minutes to create a design, put it on a mug, and upload it to Amazon, where each design can sell over and over again.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

The screenshot below shows proof that Rachel was able to make 200 sales a week, and this was a pretty standard week, not during the holiday season. Selling 200 mugs per week equates to \$1,460 each week and \$5,840 a month. Not bad for a passive income stream that you set up one time and pretty much let run on its own. When the holiday season comes along, these sales spike significantly, and that's how Rachel was able to make almost half a million dollars passively in a year's time.

200 orders in the last 7 days - it's not even holiday season yet...

The screenshot shows an Amazon Seller Central dashboard. At the top, a red box highlights the text: "All orders with Product Name = mug placed in the last 7 day(s) in all marketplaces | Clear all filters". Below this, there is a section for "Orders 1 - 15 of 200" with a red box around the number "200". A button labeled "Print packing slips for selected orders" is visible. The "Order Date" column shows "Oct 17, 2016 4:43:14 PM PDT". The "Order Details" column shows a blacked-out area with "Sales Channel: Amazon.com" and "Fulfillment method: Seller" visible below it.

**At my 200 sales that would work out to \$1460 a WEEK... which is \$5,840 a MONTH... in NON HOLIDAY time...**

The best part is that those numbers only pertain to selling mugs. Each design that you come up with can be printed on all kinds of products. You could also put a lot more time into building up your business than Rachel does. Again, the more buy buttons you have out there, the more money you could potentially earn.

So, we've established that you could potentially earn \$5,840 in a slow month. If Rachel charged this much for entry into her LHS program, a person following the system closely could potentially earn that money back during their first month. That would be fair, wouldn't it? This doesn't even include the major spike that could occur at Christmas time. And, that just pertains to the training that she offers. Rachel has a much better deal than that for you today. She calls it "The Low-Hanging Jumpstart Done-For-You Solution".

Rachel is offering you a comprehensive package. She looked at the 1,000s of people that were doing well with the system, and she created a package from what she found that would basically make it inevitable that you would succeed. It gives you everything that you need in order to make sales. First and foremost, you are going to be given 100 done-for-you designs. So, you don't even have to come up with any ideas yourself. You can use these designs and start selling products right away!

With 10 or more products available to sell for each design, this means that right out of the gate you could have over 1,000 done-for-you products available for you to sell. Not only that, but you can start selling them on Amazon, Etsy, eBay, and all sorts of other eCommerce sites. By the way, each person entering the program will each get their own designs, and that way you don't have to worry about competing with other students with the same designs.

On top of that, you get training that walks you through all 7 steps that were covered today in much greater detail. This is step-by-step training that covers everything that you need to know to get your products up and selling, and it covers how to do so on a number of different platforms. Plus, you'll get access to the software tool that you were shown earlier in the training, which shows you exactly what's selling best on these different platforms.

In addition to all of this, you're going to gain access to case studies that Rachel has put together. You see, Rachel often tests different things to see what will work best, and she will report back precisely what happened. For example, in one case study, Rachel reported how she was able to generate \$54k in under one month with just one mug design. Other LHS members will create case studies like this too, reporting on some of the successes they have had.

Aside from getting access to the SpotWins Research tool, which is the one that helps you research what's selling, you are going to gain access to Rachel's own Picsplosion software. If you remember, that's the desktop tool that will give you the ability to create awesome designs for free. On top of everything else, you are going to get mock-ups that you can download that will allow you to market your designs with professional-looking images, checklists that you can follow to help you with your promotions, and so much more!

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

You are also going to be able to join the LHS Facebook group. It won't take you long to realize that people love it in there. The group has a moderator that is incredible, and he answers people's questions all of the time. The screenshot above shows some of the comments people have made about the group, its moderator, the community, and the support they receive.

This program also provides its members with "inevitable" checklists and spreadsheets. These are called "inevitable" because they are built to help ensure you find success with this program. One example is that you'll be provided a spreadsheet that helps you figure out how many designs a day you'll need to reach a certain goal. There's also one that's meant to help you if you start to scale up and begin hiring outsourcers.

You're going to get access to Rachel's personal stats too, which means you'll know which items are selling the best for her and information on how she's marketing them. There's also training that goes over things like the "80/20 Rule," which is a standard rule in business, and how that guideline applies to this particular business model. All of these checklists, spreadsheets, additional training, case studies, and tools bring the value of this training up immensely, but that's not all you're getting.

You may remember earlier in the lesson, where it was explained that you could upload your products to Amazon with the click of a button. When you join today, you'll be able to gain access to free Amazon integration for a year. You would normally pay \$97 a month for this, which adds up to \$1,164 over a year's time. This is going to save you a ton of time too, and even additional funds because you won't need to hire an assistant to list your products for you.

There's also another type of dropshipping that you can use if you have any other type of store. This is another kind of integration that also costs \$97 a month. You could also get a discount for it by paying \$997 a year. However, when you join today, you can gain access to this service for free for an entire year!

Hundreds of people have paid these fees for hands-off integration. There's also an eBay integration that normally costs people \$324 a year. You're going to get access to this free for one year when you join as well. Of course, even paying these fees is money well spent when you are making money with these products, but you aren't going to have to worry about any of these fees starting out, giving you plenty of time and opportunity to get your business up and running without having to invest anything upfront.

Over and above everything else, when you join LHS today, you are going to get free integration with Etsy for life. As previously shown, people are doing amazingly well when they sell their products on Etsy. This integration alone costs \$297 a month, which ends up costing many

sellers \$3,564 a year. You aren't ever going to have to worry about paying this fee. This integration is brand new, and members are super-excited to have this added on.

You'll also be receiving GearBubble credits. Your first \$100 worth of sales is on the house, which means you can send out your first 5 mugs and just collect the products. This is \$100 of real-world value being provided to help you get the jump start you need for your new business. The screenshot below breaks down everything that's included in this very special package.

As you can see, it's not an exaggeration when it's stated that you are receiving \$6,149 worth of bonuses, and that's not even including the value of the free designs, the comprehensive training, and the exclusive access to the member's only Facebook group!

It doesn't end there either. You are going to be able to use the SpotNiches software for free for 90 days as well. Rachel had this tool created for herself, and for good reason. It tells you what the most profitable, hidden-gem niches are, and it even shows you what has the highest probability of selling.

The screenshot below demonstrates how the tool works. All you do is type in a keyword, and it reveals how many searches related keywords have gotten and it ranks the opportunity possible with each potential search term. This tool currently works for both Amazon and eBay. It is a very powerful tool, and it's not available for sale anywhere outside of the membership.

The screenshot shows a web browser window with the 'eBay keyword monitor' tool. The search bar contains 'funny coffee cup' and the search button is highlighted. Below the search bar, there is a table with the following columns: Keyword, # of searches, # of eBay results, and Opportunity(%). The table lists various related keywords and their corresponding search volume and opportunity percentages.

When you join today, you will also get access to 90 days of weekly Q&A calls. That means that any questions that you have will be answered weekly with full transparency, and you'll be provided replays and transcripts for each session as well. Rachel has offered this once before, and she got lots of positive feedback. That's why she decided to throw this in for those who join today too.

As previously mentioned, the mugs you're getting done cost money to buy and ship. To get you started in the best way possible, Rachel is going to give you 5 boxes of free mugs that you can send directly to Amazon. That's a total of 180 mugs, which would normally cost you \$4.95 each, adding up to a real-world value of \$891.

Furthermore, having your mugs shipped into Amazon is going to allow them to carry Amazon's Prime label. This is going to make it easier for you to make sales and help to boost your rankings in the marketplace. Rachel expects that the profit you are going to be able to earn with the help of this jumpstart will end up paying for people's entry fee for the program, as long as they follow the training closely, of course. Over and beyond that, you should be able to make a significant profit off of this as well.

Hopefully, you can tell just how much value this offer carries. Rachel wouldn't feel bad at all charging \$5,840 for entry into this program because she knows that a serious student could earn that amount back their first month. You aren't going to have to pay that today, however, nor are you going to have to pay the \$4,380 or the \$2,920 values that she considered charging.

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

You can get access to everything you've seen today for just a single payment of \$1,997. That's a phenomenal deal, especially when you consider that the 180 bonus mugs that you'll be getting with this special offer will completely pay for this investment! Of course, there's a 2-pay option available as well if that helps you enroll this weekend.

## For The Final Time, Here's Everything You're Getting...

<b>Step By Step Video Training</b> – Based on Over \$1 Million Sold!	(\$2,997 VALUE)
<b>Gear Bubble VIP</b> – Automatically Integrate with Amazon, Etsy and eBay	(\$5,052 VALUE)

**TOTAL MARKET VALUE: \$15,221**

**7 5 3 Easy Payments of \$497**

Or Pay In Full To Save \$100!

**BuyLHS.com/jay**

Above, you'll find a breakdown of everything you are going to get when you join today. There should be no question that this is an extremely valuable offer.

You've seen the system: it really doesn't get any more proven than this. You've seen the results that Rachel's current students have created with it. And you now know that you can get up and running and making sales in the next 24 hours...without having to worry about Facebook advertising or purchasing expensive inventory. Rachel's also shown you exactly how to scale this business model to generate 5 -- and even 6 figures in sales per month.

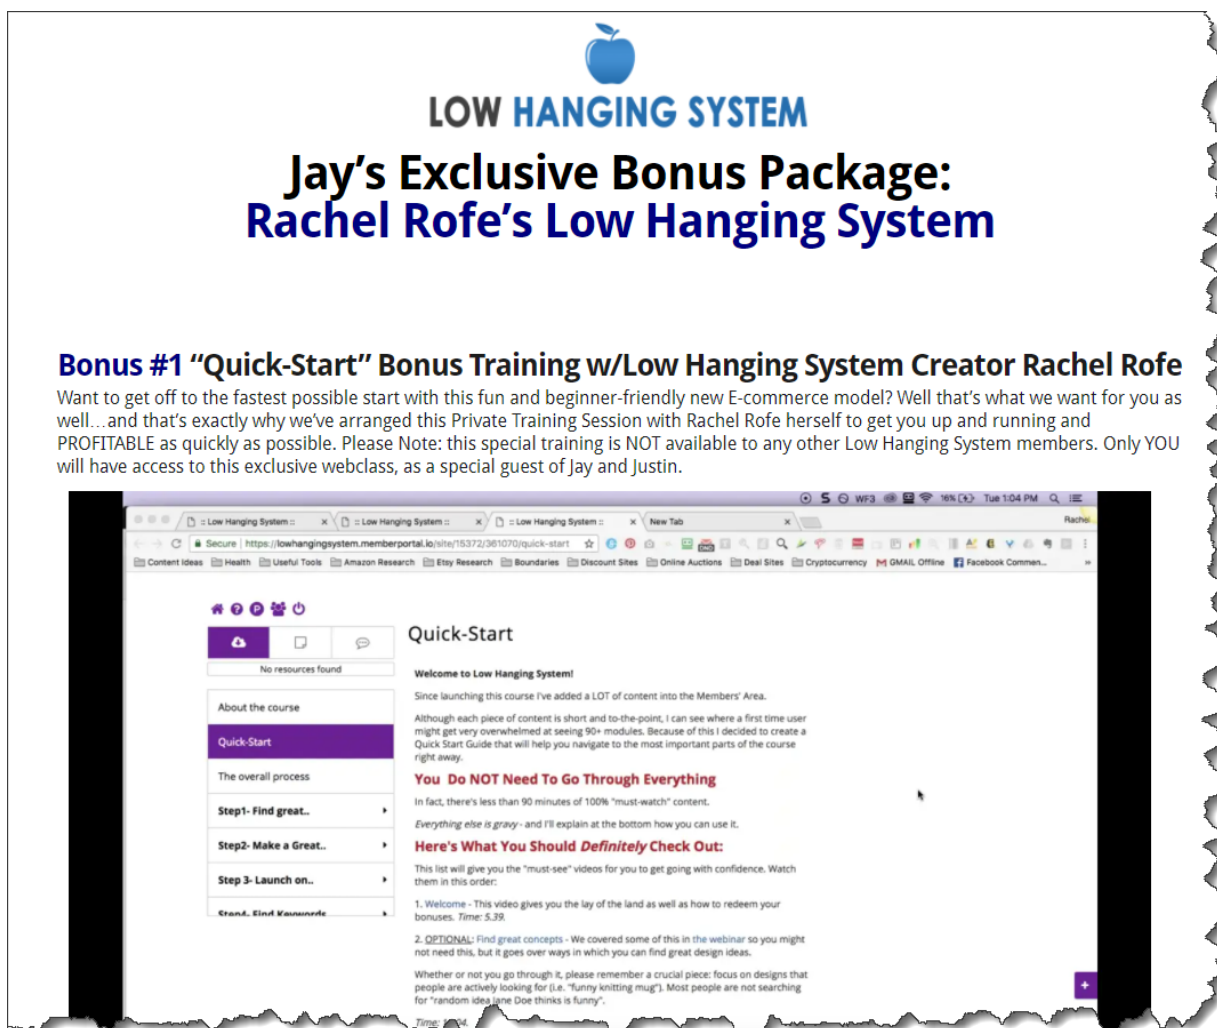

All that's left for YOU to do at this point -- is take action and get started right now. But please note: Rachel will be closing enrollment to this program very soon, and she has no plans to re-open it to new students again this year. As a result, this offer is extremely time sensitive and will not be available again after doors close this week (no exceptions I'm afraid).

## How to Access Jay's \$975.00 Bonus for Low Hanging System

  
**LOW HANGING SYSTEM**  
**Jay's Exclusive Bonus Package:**  
**Rachel Rofe's Low Hanging System**

**Bonus #1 "Quick-Start" Bonus Training w/Low Hanging System Creator Rachel Rofe**

Want to get off to the fastest possible start with this fun and beginner-friendly new E-commerce model? Well that's what we want for you as well...and that's exactly why we've arranged this Private Training Session with Rachel Rofe herself to get you up and running and PROFITABLE as quickly as possible. Please Note: this special training is NOT available to any other Low Hanging System members. Only YOU will have access to this exclusive webclass, as a special guest of Jay and Justin.

The screenshot shows a browser window with the URL <https://lowhangingsystem.memberportal.io/site/15372/361070/quick-start>. The page title is "Quick-Start" and it contains the following text:

**Welcome to Low Hanging System!**

Since launching this course I've added a LOT of content into the Members' Area.

Although each piece of content is short and to-the-point, I can see where a first time user might get very overwhelmed at seeing 90+ modules. Because of this I decided to create a Quick Start Guide that will help you navigate to the most important parts of the course right away.

**You DO NOT Need To Go Through Everything**

In fact, there's less than 90 minutes of 100% "must-watch" content.

Everything else is gray-- and I'll explain at the bottom how you can use it.

**Here's What You Should Definitely Check Out:**

This list will give you the "must-see" videos for you to get going with confidence. Watch them in this order:

1. Welcome - This video gives you the lay of the land as well as how to redeem your bonuses. Time: 5:39.
2. **OPTIONAL:** Find great concepts - We covered some of this in the webinar so you might not need this, but it goes over ways in which you can find great design ideas.

Whether or not you go through it, please remember a crucial piece: focus on designs that people are actively looking for (i.e. "funny knitting mug"). Most people are not searching for "random idea like Doe thinks is funny".

Jay has worked together with Rachel to put together what they feel is the best possible package to get your business up and running fast! First, they are providing you with an exclusive "quick-start" web class that Jay has arranged with Rachel.

For this web class, Rachel will also be presenting some "behind the scenes" special information that's not going to be included in the regular training. This is going to help you to kick off your success and sales with this system.

Next up is a training by Jay on Amazon sponsored ads. This is a goldmine. Amazon's pay-per-click advertising platform is incredible. The products that you are generating with this system are designed to sell with organic Amazon traffic, but if you want to scale up your business, you

**[CLICK HERE Now to Access the "Low Hanging System" - and Jay's \\$997.00 Bonus!](#)**

*NOTICE: Enrollment Will Close for Good on Sunday May 16<sup>th</sup> at Midnight PT*

are going to want to start investing in it, eventually. Using Amazon's PPC system is one of the best ways that you can do that.

This is what Jay Boyer and other successful marketers do to promote their products on Amazon because they know that they would be leaving large amounts of revenue on the table if they didn't utilize this means of driving traffic. This case study training will show you exactly how to use Amazon's sponsored ads to generate more sales, and also how to do it without breaking the bank. There are ways to spend \$1 on paid ads and get \$8, \$9, or \$10 back. Jay is going to show you how he does it in this over-the-shoulder training so that you can send your profits to the moon.

## Bonus #2 Case Study: The Amazon PPC Goldmine

Amazon Sponsored Product Ads are one of the most profitable pay per click advertising platforms available anywhere online, and absolute best way to scale up the sales of your products on Amazon. Jay created this Exclusive Bonus Training himself to show you how to 5x your return on investment with these super-powerful, super-targeted ads.

The screenshot shows an Amazon search results page for 'coffee grinder'. The search bar at the top contains 'coffee grinder'. Below the search bar, there are several product listings. The first listing is for a 'KRUPS F20342 Electric Spice and Coffee Grinder with Stainless Steel Blades, Black' priced at \$19.99. The second listing is for a 'Proctor Silex E160BY Fresh Grind Coffee Grinder, White' priced at \$12.85. The third listing is for a 'Hamilton Beach 80365 Custom Grind Hands-Free Coffee Grinder, Platinum' priced at \$20.49. There is also a sponsored listing for a 'Kuisenital Manual Ceramic Burr Coffee' priced at \$25.99. The page includes navigation links, a search bar, and various filters and sorting options.

1. What are Amazon Sponsored Ads?
2. Why use Amazon Sponsored Ads?
3. Case Study: a successful Sponsored Ads campaign
4. How to find keywords related to your Amazon product
5. How to set up a new Sponsored Ads campaign

Another case study you'll find in this bonus package is all about some of Jay's bestselling physical product. In fact, by reviewing this material, you are going to find out what Jay's #1 bestselling product is. He doesn't mind if you jump in and start selling a similar product to his. It's not a mug, but it is a kitchen product. He hopes that you are also able to build a list of buyers with low-hanging system, and that this case study will help you to do that as well.

### **Bonus #3 Jay's Best-Selling Amazon Product Revealed!**

#### **Jay's Top Product: Case Study**

In this complete case study Jay will walk you through the complete process of how he selected his first Amazon FBA product (hint: it's a kitchen product!), found a supplier, launched & promoted it, all in just 4 weeks time. This product has gone on to generate 6-figures in sales, and it's Jay's best selling Amazon product to date.

### **Bonus #4 Done-For-You eCommerce Funnel — Automate Your Sales & Profits**

#### **Physical Product Funnel**

Just plug your own Low Hanging System products into this proven, high-converting ClickFunnels sales sequence, send some traffic, and watch the sales roll in! Jay got this proven E-commerce funnel from his friend Russell Brunson, who has used it to generate over \$17,000 per day for his own E-commerce product sales. When you're ready to start promoting your best-selling Low Hanging System products outside of Amazon, you'll be able to drop them right into this funnel and start multiplying your profits w/this system!

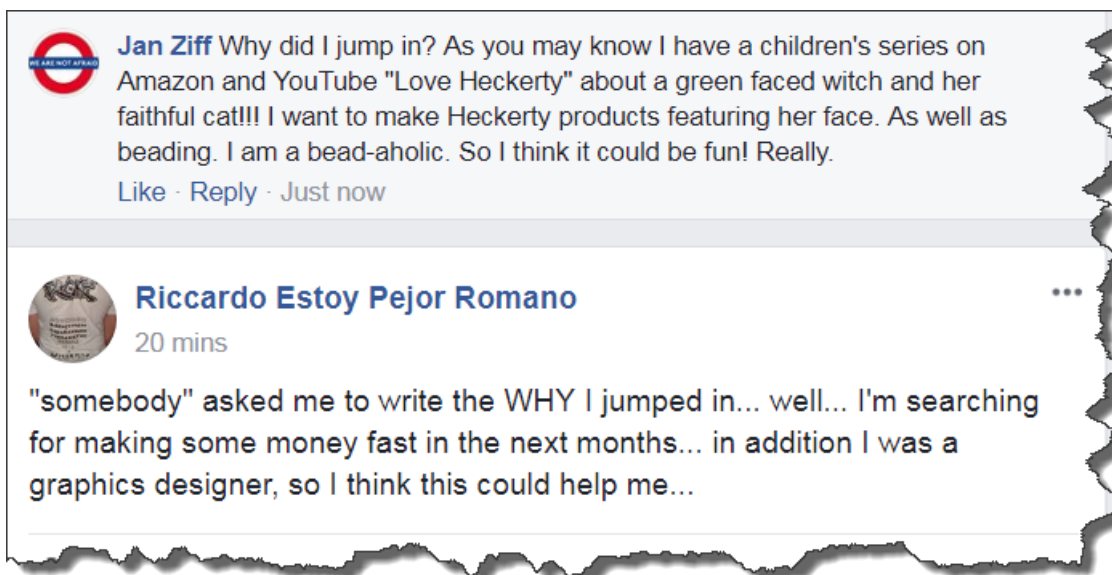

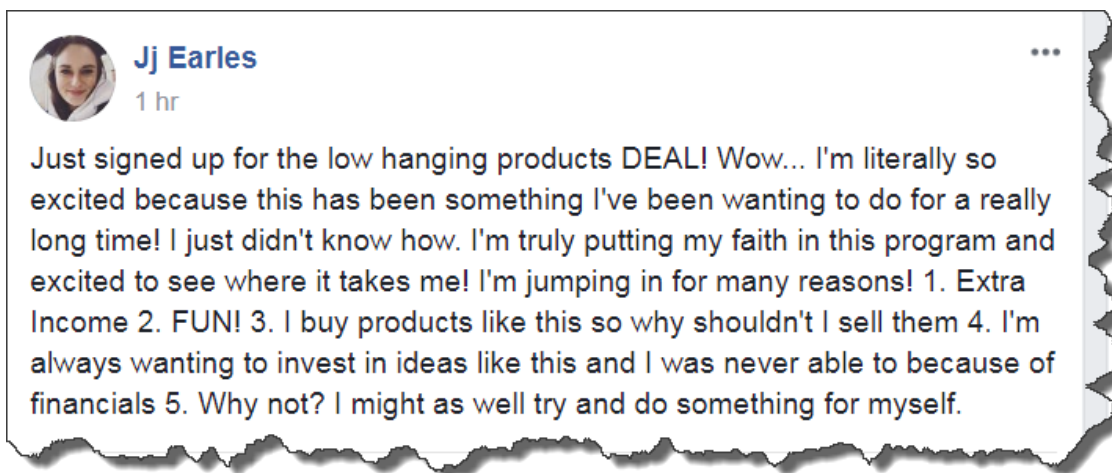

This bonus package alone is worth over \$975.00. That means it's worth the price of admission into the program itself. You won't be able to find any of these trainings and software anywhere else, because they're only available to subscribers of Jay Boyer and James Jones with your enrollment in Rachel's LHS Program. Take advantage of this tremendous deal and start changing your life today by taking action. Visit <http://buylhs.com/jay> to get started now before Rachel closes the doors to new members at the end of the weekend!

## What People Are Saying About “The Low Hanging System”

The response to Rachel’s Low Hanging System has been phenomenal! I think that most new LHS members loved the fact that they jump in and start making sales with a hot-selling gift item like this (yes, even if they had no experience selling physical products online) , with no risk, no up-front costs, and with very little time investment. Here’s some comments left in the Facebook group by new members who can’t wait to get started!

I just saw the LowHangingSystem webinar and signed up because it seems simple and something I can do without taking a lot of time. I'm excited to see how it works.

I signed up for the Low Hanging System because I recognize the value of this system and because it is easy to get started. The bonuses from GearBox and you, Jay, made it worthwhile. I expect to recoup my money quickly. Can't wait to get the bonuses.

Hi there - I just signed up for the Low Hanging System and I'm really excited about it. I'm a photographer and have been meaning to sell my photographs as posters and canvases for years, and this sounds like a really simple way to do it. Thanks JJ! Thanks Rachel!

Hi Jay, I purchased Rachel's low hanging system. HONestly, this looks like the simplest way to get started selling on Amazon. I'll partner with my daughter

Hello group. Just wanted to stop in and say I recently purchased both Greg Cesars program and LHS from Rachel due in no small part to Jay's added bonuses and the value I see in the programs. Can't wait to take action!

Here's my reason for joining: for years I had my own card/gift stores in San Francisco, have a BA in graphic design, have been looking for something creative and fun and outrageously profitable...I'm excited!!

My daughter-in-law just two days ago sent me a white mug with the sweetest sentiment about how much she appreciates me, her mother-in-law. It meant so much to me, so I'll take that as a prophetic act that pushed me into this! I've looked into online marketing a lot and this seems really good.

Ready to get started with Low Hanging System to create multiple streams of passive income moving forward this year? Great! But please know, this is an extremely time-sensitive offer, and Rachel will be removing it at the end of the weekend so that she can turn her attention to coaching new LHS members.

Don't get left behind...click on this link right now to reserve your spot in this program before this special offer disappears Sunday at midnight: <http://buylhs.com/jay>
