There are actually 39 + apps shared within.

I will not describe all in detail. We'd be here all night.

I will leave much of the features for you to read at your leisure.

I will however, show pictures and describe some of my favorites.

Try These Out and See What Makes Sense for You to Have

Magnifying Glass

Hyperlapse

Create amazing time lapse videos with Hyperlapse from Instagram.

One of my most useful apps is Magnifying Glass as my vision is just plain BAD. I can't live without it when it comes to reading a menu in a dark restaurant.

Hyperlapse is the ability to speed up or slow down a movie. Take a video with your smartphone and speed it up for a fun effect.

AT&T Voicemail Viewer

You must have an AT&T U-verse® Voice or an AT&T Unified Messaging account in order to use this app. Voicemail-to-text is included with AT&T Voicemail Viewer for AT&T U-verse Voicemail and residential AT&T Unified Messaging accounts. Residential customers can order AT&T U-verse Voice or AT&T Unified Messaging by calling 1-800-288-2020 or by visiting att.com. Business customers can order AT&T Unified Messaging by calling the number on their bill or by visiting att.com. For information about AT&T U-verse Business Voice, please contact your AT&T Account Representative. The AT&T Voicemail Viewer app makes it easier to stay on top of your AT&T U-verse Voicemail or AT&T Unified Messaging voicemail messages directly from your Android device. Similar to looking at messages in your email inbox, Voicemail Viewer lists your messages, allowing you to choose the order in which you listen to them. With U-verse Voicemail and residential Unified Messaging, you can even read your messages as voicemail-to-text. Voicemail Viewer does not work with all Android devices. For more information and help, AT&T residential customers may visit our AT&T Voicemail Viewer web site at att.com/viewer and business customers may visit um.att.com/viewer. If you are an AT&T U-verse Voicemail or an AT&T Unified Messaging customer and are experiencing difficulty logging in to this app, please send an e-mail to vmviewer@att.com to include your wireline phone number associated with your mailbox, device you are using to access the app and the problem that you are experiencing.

AT&T Digital Life

The new Digital Life app will make it easier than ever for you to stay connected and in control of your home from virtually anywhere. Watch live video, arm and disarm your system, open the garage door, turn off the lights and even check the weather, all from the same customizable home screen.

AT&T Mark the Spot

AT&T Mark the Spot is an application that provides customers a means to provide feedback on their network experience to AT&T.

AT&T is committed to providing its customers with the best network experience possible.

AT&T Global Network

The AT&T Global Network Client for Android, along with AT&T Services such as ANIRA, AVTS, BIS, and MRAS, enables VPN access to corporate networks and provides access to over 1 million AT&T Wi-Fi hotspots all over the world Support:

The AT&T Global Network Client is compatible with smart phones and tablets running Android 4.0 or above. SSL VPN connections to the ANIRA VIG (network based tunnel server) and AVTS SIG (premises based tunnel server) are supported.

Wi-Fi Support:

The AT&T Global Network Client provides access to more than 1 million Wi-Fi hotspots in more than 100 countries.

Additional Information:

Please see the AT&T Global Network Client web site at <http://www.corp.att.com/agnc/android/> for documentation and additional details on client usage, setup and configuration.

Requirements:

You must have AT&T Remote Access Services (ANIRA, AVTS, BIS, and MRAS) to use this application for either VPN or Wi-Fi. End users who require login credentials should contact their company's IT department. For information about AT&T Service please contact your AT&T Sales Representative.

AT&T Messages

With AT&T Messages you can send and receive text and pictures messages from your tablet or computer. Your messages are stored in the network so you can continue the conversation even when you switch devices. AT&T Messages uses your AT&T mobile number, so whether you send messages from your phone, tablet or computer, everyone will know the message is from you. To use AT&T Messages on your Android tablet (version 3.2 of the Android operating system and higher), press install, then open the app and log in using your AT&T User ID and you are ready to go!

Key Features:

- AT&T Messages uses your mobile phone number regardless of which device you use.
- View, manage and respond to messages from your phone, tablet or computer. For example, start a text message conversation on your phone and continue it on your tablet, or manage messages online and text a response from your computer.
- Users of the AT&T Messages Android phone app also have their voicemail messages included in their message inbox. Voicemail shows up as visual voicemail in your inbox so you can select which one you want to listen to from your phone, tablet or computer.
- Conversations are organized by person - Communications are organized by person and sorted by when you receive them.

Requires Android 3.2 OS or higher tablet. Your texts are copied to and stored in your network inbox so that they are available on the web and tablet. If you no longer want your messages copied to your network inbox, visit www.att.com/messagesfaq for details on how to remove the service. An unlimited messaging plan is highly recommended with this application. Compatible device required. Standard messaging and data rates apply. For details, go to att.com/messages.

AT&T Smart Limits

Are your kids using their smartphones responsibly? Are they texting during school or after bedtime? Would you like to stay in touch with your family's texting and calling activity?
