It also shows how many recipes contradict each other. If you have two different mods that have the same recipe using the same materials, then you have a conflict and you will have no way to access all items by means. This mod does its best to support other crafting tables using an automated detection system, but there is no guarantee that the behavior will match the desired result. Screenshots: Config: See [recipehandler.cfg](#) configuration file for options. Wanted: Minecraft Forge How to Install: Make sure you've already installed Minecraft Forge. Find the Minecraft app folder. On the windows open Run from the Start Menu, enter %appdata% and click Run. On the Mac open finder, hold the ALT and click Go then library to the top bar menu. Open your app support folder and look for Minecraft. Place the mod that you have just downloaded (jar file) in the Mod folder. When you run Minecraft and click the mods now you have to see the mod installed. For example, if I wanted to craft a solution from the masters to build a mod, I needed sand, gravel and clay. When I manually work it out, it will show me that I can craft a solution. Recipes appear only when I create a certain element of fashion. Is there anything in the settings I can do about it?
