**Directions (1-5):** In these questions, relationships between different elements is shown in the statements. These statements are followed by two conclusions.

**Give answer**

**Q1.**

**Statements:**

$L \geq D < M < P < A = F$

**Conclusions:**

I.  $F > D$

II.  $P > L$

- (a) If only conclusion I is true
- (b) If only Conclusion II is true
- (c) If either conclusion I or II is true
- (d) If neither Conclusion I nor II is true
- (e) If both Conclusions I and II are true

**Q2.**

**Statements :**

$Z \geq M > F < A = B > S$

**Conclusions:**

I.  $Z > B$

II.  $F < S$

- (a) If only conclusion I is true
- (b) If only Conclusion II is true
- (c) If either conclusion I or II is true
- (d) If neither Conclusion I nor II is true
- (e) If both Conclusions I and II are true

**Q3.**

**Statements :**

$C > T > Q > R = F$

**Conclusions:**

I.  $Q \geq F$

II.  $T > F$

- (a) If only conclusion I is true
- (b) If only Conclusion II is true
- (c) If either conclusion I or II is true
- (d) If neither Conclusion I nor II is true
- (e) If both Conclusions I and II are true

**Q4.**

**Statements :**

$A = R \geq Q, P < Q$

**Conclusions:**

I.  $A \geq P$

II.  $R > P$

**Directions (71-80): Read the following passage carefully and answer the questions given below it. Certain words have been printed in bold to help you locate them, while answering some of the questions.**

Anyone who shops knows the cost of food is on the rise. Our grocery bills rise because the prices of key staple are on an upward trend that shows no sign of abating. When food suddenly costs more, those who can least afford it get hit hardest. On average, Canadians spend less than ten percent of their income on food. However, people living in poverty spend 50 percent and the poorest as much as 75 percent of their income on food. When prices mushroom, these people must do without, and it is women who most frequently eat last and least. The current global food situation is very serious and hence, we need to understand the reasons for such a dramatic increase in food prices in a short period.

It is argued that increases in energy costs are resulting in cost push inflation but the contribution of energy costs to overall costs in agriculture may not explain the huge increase in food prices.

Related to the current elevated energy prices, there has been a diversion of corn and edible oils to bio-fuels, which is significantly influenced by policy mandates. Very clearly this diversion to bio-fuels is a policy induced new reality, which coincided with price escalation in precisely those products and hence, is noteworthy.

The financialization of commodity trade and current extraordinary conditions in global financial markets could have influenced the spurt in prices. The recent reductions in interest rates in the U. S. and the injection of liquidity have resulted in investors seeking new avenues such as commodity markets, in view of the turbulence in financial markets and the low returns in treasuries. The relatively easy liquidity and low interest rates, by themselves, make holding of inventories attractive and thus induce greater volatility in commodity markets. The weakening of the U. S. dollar is also advanced as a reason for the recent **volatility** in commodity markets, including food items. It is evident that this phenomenon is now also coinciding with the across the board rise in food prices.

In brief, while there are demand and supply side pressures on food items, there is considerable merit in the argument that the recent extraordinary increases in food prices are closely linked to public policy responses to high energy costs in advanced economies, and the turbulence in financial markets and financial institutions. It is said that the impact of such policy induced diversion of food to bio-fuels is significant at this juncture and reflects a preference to fill the fuel tanks of automobiles rather than fill the empty stomachs of people. Similarly, it is sometimes held that the weight accorded to financial stability in public policy may now be at the expense of stability in real sector – especially of sensitive commodities like food. At the same time, there is a general consensus that public policy in regard to food in many economies around the world has not provided adequate incentive to farmers to increase the supply of food and other agricultural products to comfortably match the growing demand over the medium term.

**Q71. The passage lays emphasis on which of the following theme(s)?**

- (A) The abysmally throwaway prices offered for food commodities.
- (B) The worldwide acute shortage of food commodities.
- (C) Promoting the use of bio-fuel for automobiles.
- (a) A only
- (b) B only
- (c) C only
- (d) All the three
- (e) None of these

**Q72. In what way are bio-fuels responsible for the increasing cost of food?**

- (A) It is a policy mandated to use bio-fuel in place of petroleum products especially in developing countries.  
(B) Certain food commodities are being used for manufacturing alternative fuels.  
(C) The low cost of bio-fuels has created fluctuation in prices of other agricultural commodities.  
(a) A only  
(b) B only  
(c) C only  
(d) A and B only  
(e) None of these

**Q73. Which of the following situation(s) has/have prompted investors to look towards commodity markets?**

- (A) Low interest rates in the U. S.  
(B) Easy liquidity  
(C) Volatility in commodity prices  
(a) A and B only  
(b) B and C only  
(c) A and C only  
(d) All the three  
(e) None of these

**Q74. Which of the following shows a cause-effect relationship between its two components?**

- (a) Reduction in interest rates and abundance of food commodities  
(b) Reduction in energy prices and increase in food commodity prices.  
(c) Turbulence in financial markets and escalation in production of food commodities.  
(d) Dipping of U. S. dollar value and volatility in commodity markets  
(e) Injection of liquidity and the drop in investor confidence.

**Q75. Which of the following can be inferred from the passage?**

- (A) At present the demand for food items exceeds the supply.  
(B) Fuel production has been given higher priority than caring for the millions who are starving.  
(C) Farmers have not been motivated to increase their production of food.  
(a) A and B only  
(b) B and C only  
(c) A and C only  
(d) None of these  
(e) All A, B & C
