

Genuine Subaru Performance Parts

A select group of performance and appearance parts to increase your driving pleasure.

If you thought you couldn't love your Subaru more, check out our line of Genuine Subaru Performance Parts to make your vehicle even more fun to own. Engineered specifically to enhance the performance, endurance or, in some cases, the look of your vehicle, these Genuine Subaru Performance Parts allow you to customize, without asking you to compromise the quality and integrity of your Subaru.

About **STI** performance parts.

STI Performance Parts are developed under the over-arching concept of "total tuning." This is defined as engineering by design to help improve the overall handling and performance characteristics of the vehicle. STI Performance Parts have been created in close cooperation with the development team of STI (Subaru Tecnica International), a 100% wholly owned subsidiary of Fuji Heavy Industries Ltd. (FHI). This relationship differs from generic performance parts manufacturers as the synergy created by STI and FHI helps to produce a high quality product, designed

specifically for the unique power train requirements of the Subaru. Real time performance parts data is constantly gleaned from the fierce battle grounds of the WRC and fed directly back to the STI development group to aid in developing the highest level of product for the most demanding of conditions. By installing Genuine STI Performance Parts on your Subaru, you can be confident of the optimum balanced AWD driving experience.

Parts not marked with asterisk(s) are covered by the Limited Warranty for Genuine Subaru Replacement Parts and Accessories. See dealer for complete warranty details.

* Parts with one asterisk are covered by the Parts Only Limited Warranty for Select Genuine Subaru Performance Parts (Labor Excluded). Parts intended for off-highway application only. May bring vehicle out of compliance with safety/emissions standards. Can only be lawfully installed by end user. See dealer for complete warranty details.

** Parts with 2 asterisks sold "as is" without any warranty coverage. Intended for off-highway application only. May bring vehicle out of compliance with safety/emissions standards. Can only be lawfully installed by end user. See dealer for complete warranty details.

SPT High Flow Air Intake

The SPT High Flow Air Intake is constructed of 319 diecast aluminum, manufactured to ensure the smoothest high flowing bends. Each system includes a silicone-reinforced boot, anti-vibration mounting system, stainless steel t-bolt clamps, and a SPT 4-layer cotton gauze filter with a built in velocity stack for smooth air flow. The intake is coated in new gunmetal gray-textured powder-coat finish. Professionally dyno tested and when combined with the SPT Heat Shield and SPT Performance Exhaust System, produces up to 30hp and 20 lb-ft of torque on a stock 2007 STI, up to 10hp and 17 lb-ft of torque on a stock 2007 WRX, and up to 30hp and 30lb-ft of torque on a stock 2007 Legacy GT Sedan when measured at the wheel. Installation of High Flow Air Intake System will result in increased turbocharger and diverter valve air flow sounds during operations. This condition is indicative of normal operation.

SPT Heat Shield

The SPT Heat Shield helps ensure that the SPT Intake is able to supply the engine with cool air, which reduces the loss of power that comes from a heated intake charge. Cooler air is drawn from inside the passenger front wheel well and behind the headlight - not from the hotter areas surrounding the turbocharger, engine and radiator. Unlike a traditional cold-air intake, which places the filter element as low as possible in the vehicle, this setup helps to supply cool air, limiting the risks of water ingestion.

STI Inverted Adjustable Struts and Springs^{†*}

Inverted strut and fixed spring design lowers the vehicle approximately 15mm. Front spring stiffness is increased 35% over stock, and 30% over stock on the rear springs. Front and rear struts include a 4-position strut dampening adjustment which may be adjusted to the dampening force of a stock WRX, to harder than a stock STI suspension. Struts are designed exclusively for the 2005-2007 Impreza WRX STI models.

SPT Performance Strut Set^{†*}

Adjustable damping allows struts to be dialed in to match anticipated driving conditions. Fast on-car adjustment on each strut changes rebound and compression settings from street to rally or track. Patented check valve minimizes hydraulic fluid foaming to help keep shock performance fade-free. Front struts have 4 stages of adjustment. Rear struts have 8 stages of adjustment. Manufactured for Subaru of America by KYB®.

SPT Radiator Shroud

A functional and good looking accessory that helps to increase the air flow across the radiator by closing the gap between the radiator and core support. The shroud is manufactured of highly polished stainless steel.

All Impreza Models (2002-2007):
SOA8431080

SPT Turbo Heat Shield

The SPT Turbo Heat Shield helps to retain heat within the turbocharger which helps to maintain turbocharger exhaust gas velocity. The shroud also helps keep heat generated by the turbocharger away from the intercooler. The SPT Turbo Heat Shield can be used in conjunction with the stock turbo heat shield and is manufactured of highly polished stainless steel.

Impreza WRX STI Performance Clutches

STI Clutch Disc – Organic 7.7MM**

Organic friction material provides higher torque and temperature capabilities than stock disc. Some clutch judder may result when clutch is partially engaged. Use only with clutch cover ST302104S000.

Impreza WRX STI (2004-2007): ST301004S020 (6 M/T)

STI Clutch Cover – Organic 7.7MM**

Heavy-duty cover allows for a more efficient transfer of engine power. For use with the 240mm diameter clutch disc ST301004S020. Exerts pressure of 1,150 kgf (2,535 lbf).

Impreza WRX STI (2004-2007): ST302104S000 (6 M/T)

STI Clutch Disc – Ceramic Metal 5MM**

Ceramic/metal friction material with higher temperature range and friction coefficient is recommended for competition or off-road use. Clutch judder will be experienced when clutch is half engaged. Use only with clutch cover ST302104S010.

Impreza WRX STI (2004-2007): ST301004S000 (6 M/T)

STI Clutch Cover – Ceramic Metal 5MM**

Heavy-duty cover allows for a more efficient transfer of engine power. Recommended for competition or off-road use. For use with the 240mm diameter metallic clutch disc ST301004S000. Exerts a pressure of 1,150 kgf (2,535 lbf).

Impreza WRX STI (2004-2007): ST302104S010 (6 M/T)

STI Lightweight Flywheel**

(7.2 kg or 15.8 lbs. vs. stock flywheel weight of 8.6 kg or 18.9 lbs.)

Machined from high strength chromium molybdenum. Reduced rotating mass of the lighter flywheel allows engine to rev faster. Recommended when replacing stock clutch cover and disc with the STI clutch cover and disc sets.

Impreza WRX STI (2004-2007): ST123104S000 (6M/T)

Impreza WRX Performance Clutches

STI Lightweight Flywheel**

(5.5 kg or 12.1 lbs. vs. 10.5 kg or 23.15 lbs.)
