Molina Healthcare of Washington Medicaid Preferred Drug List (Formulary)

11/01/2021

INTRODUCTION

We are pleased to provide the 2021 *Molina Healthcare of Washington Apple Health (Medicaid) Preferred Drug List (Formulary)* as a useful reference and informational tool. This document can assist medical providers in selecting clinically-appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by Pharmacy and Therapeutics (P&T) Committee and Washington State Drug Utilization Review (DUR) Board, and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. All the information in the document is provided as a reference for drug therapy selection.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of a Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an advisory body of clinical professionals. The P&T Committee's voting members include physicians and pharmacists, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, general principles are noted below.

- The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LIPITOR). Generic drugs are listed in lowercase italics (e.g., *atorvastatin*).
- The second column (Requirements/Limits) contains any special requirements for coverage of your drug.
- If the OTC and Prescription versions of the product are covered, then both are listed.
- Extended-release and delayed-release products require their own entry.
- Dosage forms on the document will be consistent with the category and use where listed.

PRESCRIPTION QUANTITIES

Prescriptions should be written for a therapeutic supply of medications (the amount to appropriately treat a medical condition) up to a maximum of a 30-day supply. Trial quantities may be used when trying new treatments, if appropriate. Drugs listed with DS indicator are covered up to a 90-day supply.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. In this document, *lowercase italicized type* indicates generic availability. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product into the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

PLAN DESIGN

The document represents a closed formulary plan design and does not have any tiering. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non formulary prescription request criteria. Log in to www.molinahealthcare.com to check coverage.

PRIOR AUTHORIZATION REQUEST PROCEDURE

Prescriptions for medications requiring prior approval or for medications not included on the Molina Drug Formulary may be approved when medically necessary and when formulary options have demonstrated ineffectiveness. When these exceptional situations arise, the physician may fax a completed drug prior authorization form to Molina at (800) 869-7791. The forms may be obtained by logging into the website www.molinahealthcare.com. Trials of pharmaceutical samples will not be considered as rationale for approving a prior authorization request.

MOLINA BEHAVIORAL HEALTH PROVIDER RESOURCES

Second Opinion Program

The Second Opinion Program is designed to improve prescribing practices for children ages 17 and younger. In collaboration with The Pediatric Mental Health Advisory Group and the Drug Utilization Review Board, the agency established pediatric mental health guidelines to identify children who may be at high risk due to off-label use of prescription medication, use of multiple medications, high medication dosage, or lack of coordination among multiple prescribing providers.

The guidelines include, but are not limited to, the following:

- Alpha-agonists age and dose limits
- Antidepressant therapy duplications
- Antipsychotic age and dose limits
- Antipsychotic therapy duplications
- Attention deficit hyperactivity disorder (ADHD) age and dose limits
- ADHD therapy duplications
- Insomnia medications
- Mental Health Polypharmacy (medication therapy includes five or more mental health drugs)

Seattle Children's Hospital provides pediatric mental health second-opinion medication reviews. Second-opinion reviews are required when a psychiatric medication is prescribed outside of guidelines set by the Pediatric Mental Health Workgroup. Seattle Children's Hospital schedules second-opinion reviews between their psychiatrists and the pediatric prescribers within Molina's network after the Seattle Children's Hospital Second Opinion Network (SON) Program receives the necessary information about the child and the requested medication dosage. In addition, they are responsible for sending the written second opinion review back to the Washington State Health Care Authority (HCA).

As part of the authorization process, prescribers are required to engage in a phone consultation from the SON. If a SON review is required, the SON team will call the prescriber to schedule an appointment. To receive payment for the phone consultation, use procedure code 99441 on the claim. If you are a prescriber and have any questions, please contact Molina at (800) 869-7165.

What is expedited authorization (EA)?

The EA process is designed to eliminate the need to request authorization. The intent is to establish authorization criteria and associate these criteria with specific codes, enabling pharmacies to create an “EA” number when appropriate.

Reminder: EA numbers are only for drugs listed in this table.

Note: Use of an EA number does not exempt claims from edits, such as per-calendar-month prescription limits or early refills.

EA Guidelines:

Diagnoses - Diagnostic information may be obtained from the prescriber, client, client’s caregiver, or family member to meet the conditions for EA. Drug claims submitted without an appropriate diagnosis/condition code for the dispensed drug are denied.

Documentation - Dispensing pharmacists must write both of the following on the original prescription:

- The full name of the person who provided the diagnostic information
- The diagnosis/condition and/or the criteria code from the attached table

Product	EA code	Criteria
Buprenorphine	85000000077	Buprenorphine monotherapy for pregnant clients
	85000000078	Buprenorphine monotherapy for non-pregnant clients while prior authorization is initiated. Limited to 32mg per day, seven (7) days at a time for up to fourteen (14) days every six (6) months. NOTE: Providers (prescribers or pharmacies) must initiate a prior authorization for further fills.
