

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 22, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity:

Initial attack activity:	Light (94 new fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires:***	8
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there is 1 large fire being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0800 Mountain time unless significant activity occurs.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Critical fire weather conditions will return to the Four Corners as a cold front passing through the Great Basin creates a gusty southwesterly flow across the southern Great Basin and the Southwest. The winds will interact with critically dry fuels and very low afternoon humidities to create a favorable burning environment. Scattered wet storms will be possible across the Northern Great Basin. Drier and slightly warmer conditions will be possible along the West Coast as a high pressure ridge begins to approach from the west. Conditions will remain dry across northern Minnesota and New England. In Alaska, scattered showers will be present across the western Interior while high pressure over the Yukon Territory will keep the eastern Interior warm and dry.

Aviation Mishap Response

Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life. Rescuers first!!!
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.

Activity: *Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.*
