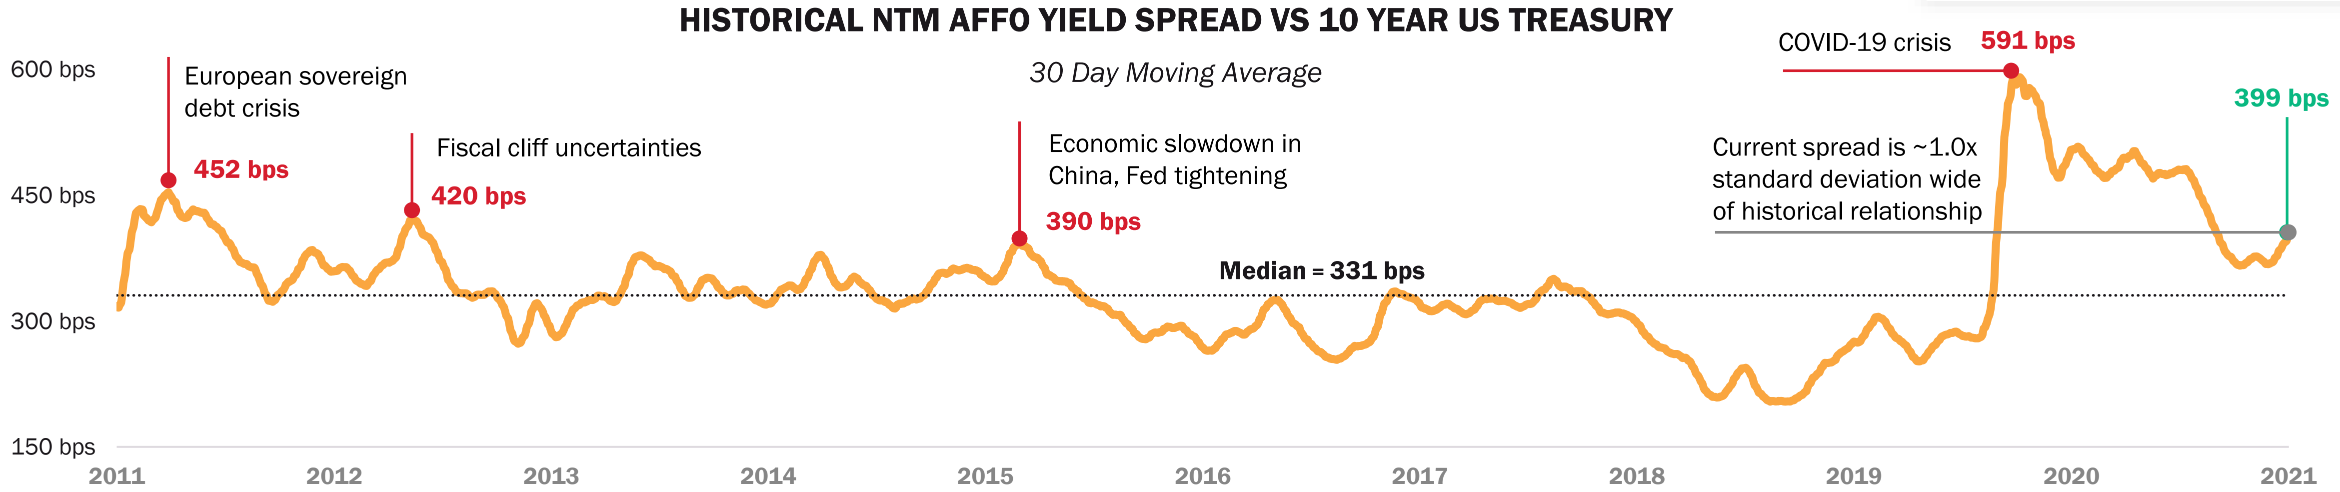
Valuation Considerations Normalizing for Historically Low Treasury Yields

Historically, O's equity valuation spread has normalized following periods of economic uncertainty…



In order for O's AFFO yield spread to **normalize to its historical median**, annual AFFO would have to decline to \$3.23, a 9% decline relative to the midpoint of O's 2021 AFFO/sh guidance(1).

Investment Strategy: Returns Must Exceed Long-Term WACC

REALTY INCOME

WACC viewpoint balances near-term earnings per share growth with long-term value accretion

LONG-TERM

Weighted Average Cost of Capital

- **Drives investment decision-making at the property level**
- Considers required "growth" component of equity returns
- Long-term WACC is the hurdle rate for acquisitions
- Focus on higher long-term IRR discourages risk-taking

KEY ASSUMPTIONS & CALCULATION: LONG-TERM COST OF EQUITY	
Beta vs. S&P 500 (since S&P 500 Index Inclusion on 4/6/15)	0.86
Long-term 10-year U.S. yield (Fitted Instantaneous Forward Rate)	3.1%

Long-Term Cost of Equity (CAPM methodology)	**6.2%**

Assumed long-term dividend growth rate	4.0%
Long-Term Cost of Equity (Yield + Growth methodology)	**8.0%**

KEY ASSUMPTIONS & CALCULATION: LONG-TERM WACC	
65% Weight: Long-Term Cost of Equity	**7.1%**
35% Weight: Cost of Debt (unsecured, 10Y, fixed)	**1.9%**
Long-Term WACC	**5.3%**

SHORT-TERM

"Nominal 1st-Year Weighted Average Cost of Capital

- **Used to measure initial (year one) earnings accretion**
- Higher stock price (lower cost) supports faster growth
- Spread on short-term WACC required to generate accretion
- Unwilling to sacrifice quality to generate wider spreads

KEY ASSUMPTIONS & CALCULATION: NOMINAL 1ST-YEAR WACC	
62% Equity: AFFO Yield	**5.2%**
33% Debt: unsecured, 10-year, fixed	**1.9%**
5% Retained Free Cash Flow	**0%**
Nominal 1st-Year WACC	**3.9%**

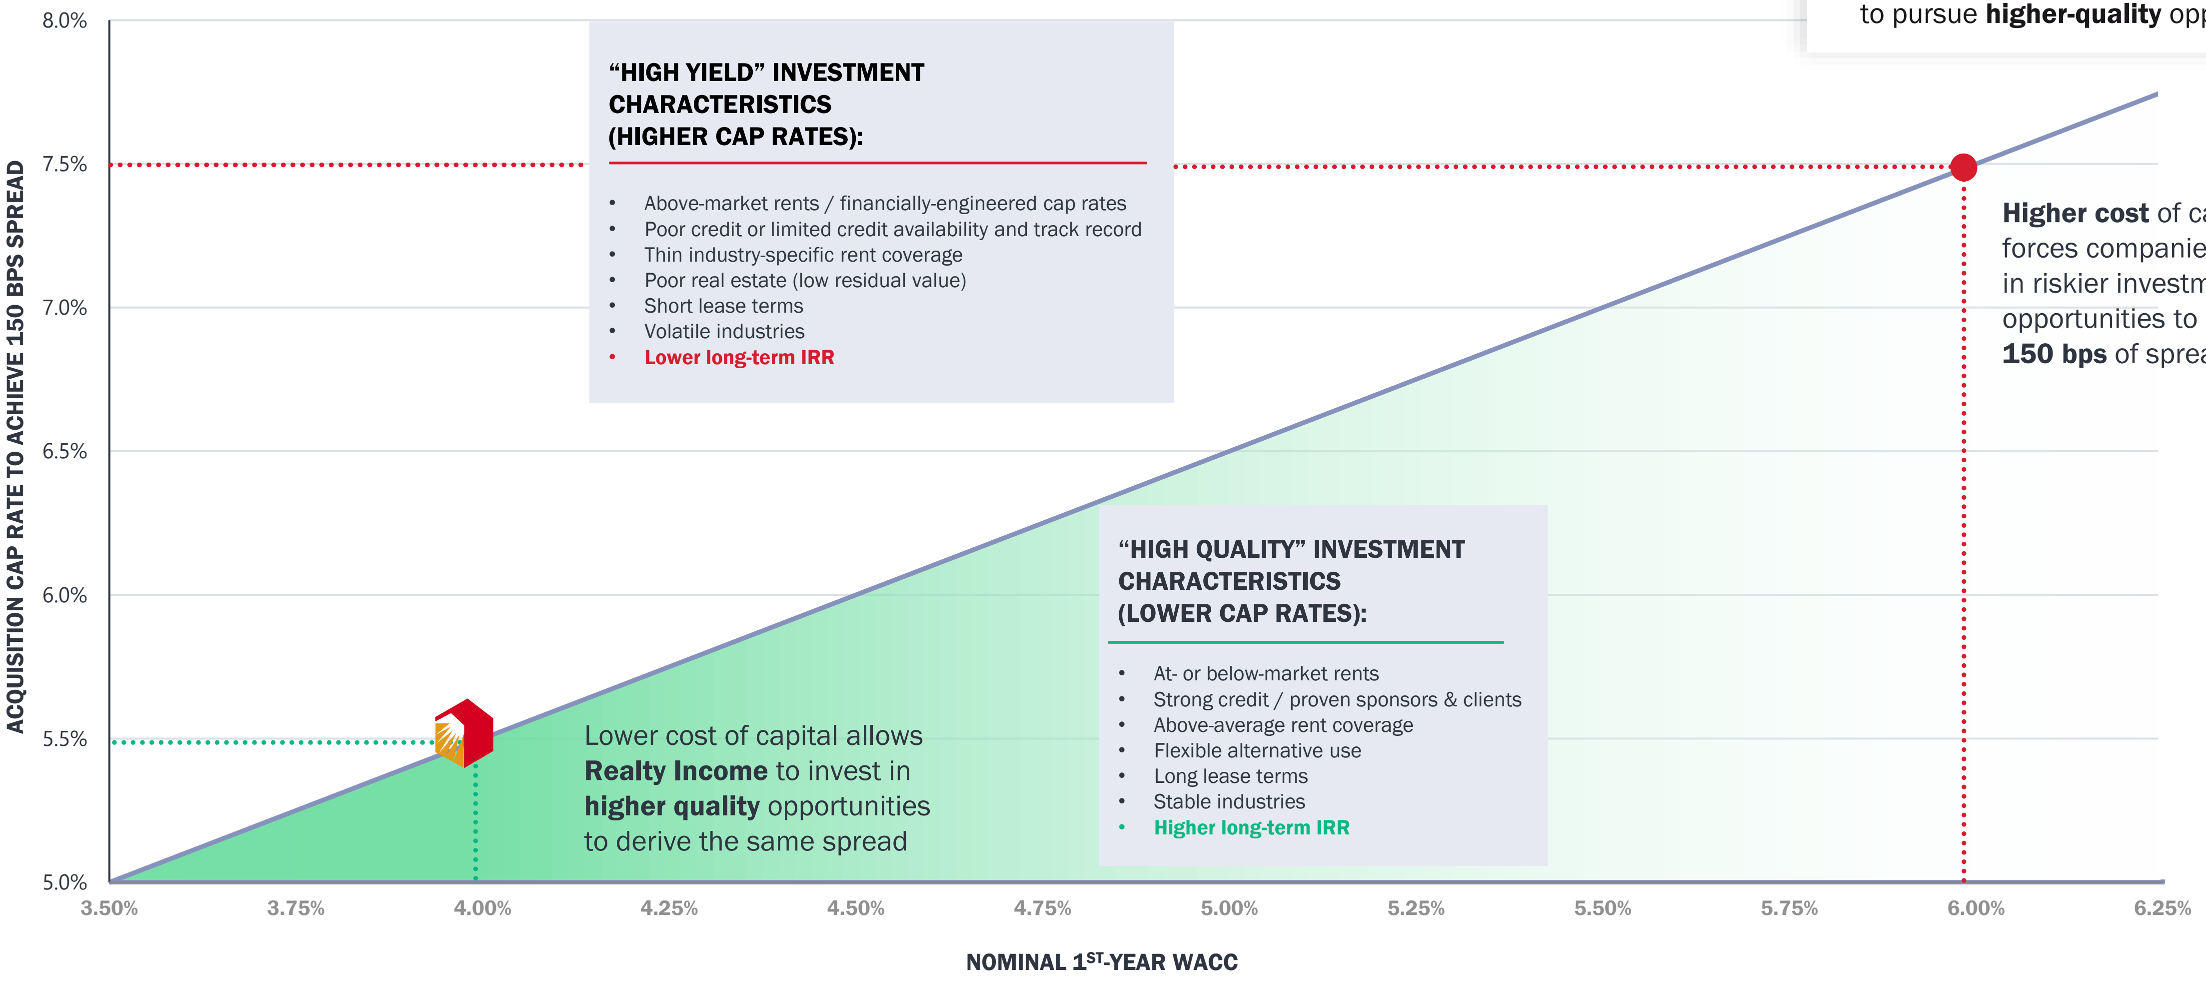
LOW NOMINAL WACC supports ability to spread invest in high-quality real estate opportunities

LONG-TERM WACC considers growth requirements of equity and supports focus on residual value of acquisitions

Note: Cost of capital information uses illustrative assumptions only (as of 7/30/2021). AFFO yield is based on the NTM AFFO/sh consensus. Cost of debt is based on a mix of USD-denominated and GBP-denominated debt.

Philosophical Capital Allocation Mindset:
Utilizing Low Cost of Capital to Assemble Highest-Quality Portfolio in Marketplace

Net lease peers with **higher cost** of capital than **Realty Income** cannot "afford" to pursue **higher-quality** opportunities



Note: Cost of capital information uses illustrative assumptions only.
