Car Price Guide

A small selection of cars available through the Motability Scheme

To see the full range of cars
visit [motability.co.uk](https://www.motability.co.uk)

Find out everything you need to know about the Motability Scheme, in a fully-accessible venue.

Open 9am - 4pm

Join us at an event near you

- Westpoint, Exeter - Saturday 27 July 2019
- Yorkshire Event Centre, Harrogate - Saturday 10 August 2019
- East of England Arena, Peterborough - Saturday 7 September 2019
- Royal Highland Centre, Edinburgh - Saturday 21 September 2019

On display at the event

50 +
cars from 25
manufacturers

35 +
scooters
and powered
wheelchairs

20 +
adapted cars
and WAVs

Over 40 cars available to test drive.*

FREE entry and FREE parking.

A free tea, coffee or soft drink.

Fully accessible
indoor venue.

Welcome to worry-free motoring

With the Motability Scheme you can simply exchange all, or part of your mobility allowance, to lease a brand new car. You can enjoy worry-free, affordable motoring as you'll have the freedom and reassurance of a new car with none of the worries associated with buying and running an older one. In this guide you'll find just a small selection of cars, grouped by car type and manufacturer. The full list of cars is available at motability.co.uk.

Simple, all-inclusive leasing

Every lease is all-inclusive, which means everything listed below is included in the price you pay. So the only running cost for your brand new car is fuel.

Insurance cover from RSA Motability

Up to two named drivers

Servicing and maintenance

Tyre replacement, windscreen repair and MOTs

Many adaptations at no extra cost

Support from our dedicated UK based Customer Services team

Full breakdown assistance

Allowances are awarded by either the Department for Work and Pensions (DWP) or Veterans UK. If your allowance is due to end during your lease, you just need to make sure that the allowance is renewed with the DWP. However, if your award is not renewed, for whatever reason, you just hand the car back – you won't be liable for any additional costs.

This Car Price Guide is updated regularly

The prices in this guide are for applications submitted through a Motability Scheme dealership between 1 July to 30 September 2019 and are updated every three months. We offer a firm 'price guarantee', which means the price confirmed when your order is accepted is the price you pay when you collect your car.

Who we are

We are Motability Operations Ltd, a company authorised and regulated by the Financial Conduct Authority. All Motability Scheme vehicles are leased to customers by Motability Operations Limited.

Are you eligible?

If you receive one of the following allowances and have at least 12 months' award remaining you can apply to lease through the Motability Scheme, even if your award does not cover the full length of the lease:

- The Enhanced Rate of the Mobility Component of Personal Independence Payment (£61.20 per week as of 8 April 2019)
- Higher Rate Mobility Component of the Disability Living Allowance (£61.20 per week as of 10 April 2019)
- War Pensioners' Mobility Supplement (£68.35 per week as of 10 April 2019)
- Armed Forces Independence Payment (Mobility element £61.20 per week as of 10 April 2019)

Wheelchair Accessible Vehicles	34

Suitability: Which type of car suits your needs?

The first thing you should think about is what you need from a car. What are the things you are going to be doing and what type of car best meets those needs? Here are a few things for you to consider before choosing your car.

Your current car

A good place to start is to think about your current car, if you have one, and decide what you like and dislike about it. It may be useful to refer to the quick checklist on page 6.

Fuel type

In order to work out the running costs, you'll need to consider what type of fuel your car uses. The Scheme offers a range of fuel types, such as petrol, diesel, hybrid and electric vehicles. Speak to your dealer about which might be right for you.

The size of your car

If you have a big family you may want to consider a large family car or MPV. If you find it difficult to change gear easily, an automatic might be a good choice. You can see all the cars listed by type, with a short description of what each category means e.g. hatchback, MPVs, 4x4, etc. on pages 10-16 of this guide.

Comfort

You'll also need to think about travelling in the car day to day. Small changes in type, model or specification can have a big impact on your comfort or the car's suitability. For example, seat height, door opening angle and positioning of the seat belts can all make a big difference.

Adaptations and Wheelchair Accessible Vehicles

For information on adaptations to make driving or travelling easier (such as hand or steering controls) and Wheelchair Accessible Vehicles (specially designed to allow a wheelchair user to travel whilst remaining in their wheelchair), please see pages 29 and 34 of this guide.

Still not sure which car is right for you?

If you are still not sure which car is for you, your local dealer will be glad to help. They'll take you through a Statement of responsibilities which is designed to make sure that the Scheme and the car you're considering is right for you.

To see the full list of cars available, go to **motability.co.uk** where you can use the online car search tool to narrow down your options.

Affordability: Which cars come within your budget?

Above all, we aim to make leasing a brand new car affordable. So once you have decided what sort of car would suit you best, you need to know which ones are within your budget.

Choose a car to suit your budget

When you lease a car through the Motability Scheme, there are three pricing options. No matter which car you choose all come with our all-inclusive package of insurance, breakdown cover, servicing, tyres and glass repair and replacement. The three pricing options are:

- 1. Cars that cost less than your mobility allowance** – a range of over 100 cars on the Scheme cost less than your mobility allowance, meaning the remainder will be paid directly to you by the Department for Work and Pensions (DWP). These cars are available to lease at a fixed weekly amount for the whole of your agreement and any increases in your allowance that the DWP makes will be paid directly to you. For more information, see page 9 of this guide.
- 2. Cars that cost all of your mobility allowance** – we have a range of over 200 cars that cost the same as your allowance. There's no Advance Payment and you simply swap the whole of your weekly mobility allowance for the car of your choice.
- 3. Cars that cost all of your mobility allowance and also have an Advance Payment** – you can increase your choice of cars by topping up your allowance with a non-refundable upfront payment which we call the Advance Payment. This payment covers the difference between your allowance and the total cost of the lease over the course of your agreement.

Keeping fuel costs down

Don't forget that your lease includes everything, except fuel, to provide you with worry-free motoring, so you will need to take into account the car's fuel costs. To keep the running costs down you may want to consider a more fuel efficient engine. Each car listed has a 'miles per gallon' (mpg) figure; cars with a higher mpg cost less to run and usually provide lower CO₂ emissions over the course of your lease.

Remember the mpg given is a guide to help you compare cars and is based on test conditions. The actual mpg each car achieves in real world driving is likely to be lower than the official figure.

To give you an idea of costs, for each car listed we have highlighted the average annual fuel costs which can help you compare between cars and see which option might save you money.

Trade in your old car

You can trade in your privately owned car at most dealerships, which you could use to help finance the Advance Payment.

Test drive: Try out a few cars before you finally decide

Once you've worked out what type of car you want and looked at the available options, it's very important that you take a few different cars out for a test drive.

A test drive is the only way to find out properly whether a car is right for you and your dealer will be more than happy to arrange this. Even if you choose a car similar to the one you drive now, you may well discover that the manufacturer has made a number of changes and alterations to the latest model, so it is advisable to take a test drive to make sure you are still happy with your choice.

When you take a test drive, there are three important things to consider:

1. Take the time to check that you're comfortable getting in and out of the car
2. Ask the dealer to show you around the vehicle, and explain the features to you. Consider whether you need leather seats, adjustable seats, electric windows etc. Discuss these different features and any other optional extras with the dealer, and ask how much they will cost.
3. Take the car out on the road with the dealer. Check how comfortable it is to drive, or travel in, and how easy it is to park. Take your time on your drive and remember that the final decision is always yours.

Other things to think about on your test drive include:

- Opening and closing the door
- Seat height and adjustment
- Headroom
- Reaching for the seatbelt
- Visibility
- Reversing
- Boot space
- Loading the boot

Test driving automatics, adapted cars and WAVs

If you want to test drive an automatic car you will need to arrange this when you call the dealer as there are often fewer of these models available on site. To try out driving adaptations, it may be worth contacting a Driving Mobility Centre – see page 29 for further details. Meanwhile, if you are opting for a WAV, specialist WAV suppliers will travel to your home to help make this easier.

1 Vehicle descriptions: This guide uses abbreviations for the vehicle descriptions. We've included a glossary on a fold out at the back of this guide.

2 Fuel type: This shows you what kind of fuel the car takes, such as Petrol (P), Diesel (D), Electric (E) or if the car is a Hybrid (H).

3 Automatic: This shows which cars are classed as automatic (l) or semi-automatic (l). Cars classified as semi-automatic will vary from model to model.

4 DLA, PIP or AFIP holders: These prices are applicable for recipients of the Higher Rate Mobility Component (HRMC) of the Disability Living Allowance (DLA), the Enhanced Rate of the Mobility Component (ERMC) of Personal Independence Payment (PIP) and Armed Forces Independence Payment.

5 WPMS holders: These prices are applicable for recipients of War Pensioners' Mobility Supplement (WPMS.)

6 Advance Payment: The non-refundable amount payable upfront to your dealer in addition to your weekly mobility allowance.

7 Weekly Rental: This shows the relevant amount of mobility allowance that will be paid to Motability Operations Ltd each week. Total allowance means that the total amount of the higher rate mobility allowance is payable in exchange for your car. From April 2019, total allowance is £61.20 for recipients of HRMC of DLA, ERMC of PIP and AFIP; and £68.35 for recipients of WPMS.

8 Average mpg: This shows the average number of miles a car can travel for every gallon of fuel. This is for comparison purposes only and the actual figure achieved, is likely to be lower than the figure shown here. Average mpg figures quoted are as reported by the manufacturer.

9 Average fuel: This shows an approximate annual fuel cost for comparison purposes only. It is based on the average annual mileage driven by Motability Scheme customers (8,000) and the latest AA fuel price report.

10 CO₂ emissions: This shows the emission levels in grammes per kilometre (g/km). A green tick highlights low emission vehicles which have a CO₂ of 100g/km or below. CO₂ figures stated are manufacturer reported CO₂ levels.

Points to note:

- From 1st January 2019, fuel consumption and MPF values are measured using the new Worldwide Harmonised Light Vehicle Test Procedure (WLTP) fuel economy tests, which typically give lower mpg performance values than the old New European Driving Cycle (NEDC) tests. Please consult manufacturer websites for the most up-to-date mpg performance values. The terms, conditions, prices, model features, adaptations and vehicle availability set out in this car price guide are correct at time of going to print. These may be subject to adjustment or withdrawal in the event of any changes taking place which affect the

- cost of the provision of the lease agreement or vehicle availability.
- Images are supplied for illustrative purposes only. The internal and external specification of the car you choose may differ. Customers are advised to check any specifically required features with their dealer at the point of application. Please note that Motability Operations Limited accepts no liability in relation to the accuracy of the information provided by third parties as set out herein.
- The lease agreement package with Motability Operations Limited comes with a mileage allowance of 60,000 for three year leases and 100,000 for five year WAV agreements. If you go over

- this amount, you will be charged 5p for each extra mile.
- Insurance is included, however, in the event of a claim you will be asked to pay an excess unless a third party is found to be at fault. Full insurance details are included in the Insurance Cover Booklet supplied with the Motability Scheme car.
- Restrictions and higher excesses are applied to drivers aged under 25, speak to your dealer for more information.
- Metallic paint comes as standard.
- CO₂ figures stated are manufacturer reported CO₂ levels.
- For full terms and conditions please visit motability.co.uk or contact our Customer Services team on 0300 456 4566.

Cars with lower emissions

Cars with a CO₂ emission level of 100g/km or less are considered low emission models, and throughout the guide these cars are highlighted with a green tick in the CO₂ column. CO₂ figures stated are manufacturer reported CO₂ levels. These cars not only have a less harmful effect on

the environment, but they tend to be more fuel efficient, giving you more miles per gallon (mpg) and helping you to save pounds at the pump. Here are just a few of the low emission vehicles on the Scheme.

	Fuel type	Automatic	DLA, PIP or AFIP holders		WPMS holders		Avg. mpg	Avg. fuel	CO ₂

Cars that cost less than your allowance

Over 100 cars are available to lease for less than your weekly mobility allowance, so you keep the difference. No Advance Payment is needed, you simply pay a fixed weekly amount for the whole lease. The remainder of your allowance will be paid directly to you by the Department for Work and Pensions (DWP). In the table below, the 'You Keep' column

shows how much this will be. This is calculated by taking your current allowance rate and subtracting the weekly rental of the car you are considering. If in future years the allowance goes up you will also get to keep any increases, so the amount listed in the "You Keep" column is the minimum weekly amount you will keep for the course of your lease.

Selection of cars by type

Over the next few pages we've selected just a few of the cars available and arranged them by car type. Whether you're looking for a small hatchback, an MPV to fit all the family or something a bit more sporty, we have plenty of options that'll suit your needs and your

budget. To help you understand the vehicle descriptions, please see the fold out glossary at the back of this guide. Don't forget, to browse the complete range of over 2,000 cars, including hundreds of automatics, you can visit motability.co.uk.

2-3 door small

2-3 door cars generally have wider doors with larger opening angles. This may make access easier, however be aware that closing the door and fitting in narrow parking spaces may be more difficult. Smaller vehicles tend to have lower CO₂ emissions than the larger vehicles. **For similar models see below or visit our website.**

Considerations: Wider front doors • Lower emissions • Smaller boot space • Seatbelts further back

Fiat 500 1.2 69bhp POP 3dr	P		£0	£55.75	£0	£55.71	53.30	912	116

Small automatic

These vehicles have the same benefits as their manual equivalents (see previous 'small' sections) but they are also automatic. Many of our customers prefer an automatic to make driving easier, especially around town. Automatic transmission is also essential for nearly all hand control adaptations. **For similar models see below or visit our website.**

Considerations: Lower emissions • Smaller boot space • Automatics are essential for some hand controls

Medium

The 4-5 door version of the medium sized car is useful if you often have passengers in the car as they will have their own doors to exit. As with the 2-3 door version the boot will be slightly bigger than the standard small car.

For similar models see below or visit our website.

Considerations: Passenger exit/entry through their own doors • Front door shorter in length

• Seating for 5 adults

Large

These are large 4 door saloons or 5 door hatchbacks and are considerably larger than medium sized cars. Hatchbacks have integrated boots accessible from the rear seats, while the boot of a saloon is usually only accessible from outside the car. **For similar models see below or visit our website.**

Considerations: Boot style • Size of vehicle

Model	Fuel type	Automatic	Advance payment £	Weekly rental £	DLA, PIP or AFIP holders	WPMS holders	Avg. mpg	Avg. fuel	CO ₂
Mazda6 2.0 SKYACTIV-G 145bhp SE-L (NAV+) 4dr	P		£899	T/A	£0	£68.18	45.6	1,066	142

Large automatic

These are the same as the large cars but with an automatic/semi automatic transmission. Many of our customers prefer an automatic to make driving easier, especially around town. Automatic transmission is also essential for nearly all hand control adaptations. **For similar models see below or visit our website.**

Considerations: Boot style • Size of vehicle • Transmission type

Model	Fuel type	Automatic	Advance payment £	Weekly rental £	DLA, PIP or AFIP holders	WPMS holders	Avg. mpg	Avg. fuel	CO ₂

MPV

Multi-purpose vehicles (MPVs) benefit from extra headroom, legroom and higher seats, which some people may find easier to access. Some MPVs will have 7 seats – look for '7st' in the vehicle description, or check online. MPVs often come with higher emission levels and a lower average miles per gallon.

For similar models see below or visit our website.

Considerations: Storage space • Number of passengers • Ease of access • Fuel consumption

Estate

A typical estate will be an extended version of an existing saloon or hatchback with useful storage space for mobility aids etc. in the boot. If you are considering an estate but haven't driven one before it is important to take a test drive as they are longer than standard vehicles, which may affect how you get around in your local area. **For similar models see below or visit our website.**

Considerations: More storage space for mobility aids • Longer vehicle

Dacia Logan MCV 1.0 SCe 73bhp Access Estate 5dr	P		£0	£49.80	£0	£49.76	52.3	929	124

Coupe/Convertible

A coupe is a small car, usually with 2 doors, which will seat either 2 or 4 people. They are sporty looking cars, with a small, saloon style boot. A convertible is where the roof of the vehicle can come off – usually this will go into the boot of the car minimising the storage space. **For similar models see below or visit our website.**

Considerations: Sporty looking • Limited storage space • Seating space limited

Fiat 500C 1.2 69bhp POP 2dr	P		£0	£57.50	£0	£57.45	53.30	912	116
Mazda MX-5 1.5 132bhp SE+ Convertible 2dr	P		£299	T/A	£0	£64.20	44.8	1,085	138

SUV/4x4

There are a wide range of Sport Utility Vehicles (SUVs) available on the Scheme including a number of 4x4 vehicles. SUVs may have more space for seating and luggage, and also provide good visibility as the driver's seat is often higher. Not all SUVs have four wheel drive capabilities – 4WD indicates four wheel drive vehicles. **For similar models see below or visit our website.**

Considerations: Type of environment you will drive in • Height and size of vehicle • Fuel consumption

Selection of cars by manufacturer

With cars from all the main manufacturers to choose from, it can be difficult to know where to start. To help get you on the right track, we've selected some of the best prices available from each of our manufacturers. To help you understand the vehicle descriptions, please see the fold out glossary at the back of this guide.

Don't forget, you can go to motability.co.uk to search by specific make or model, and a host of other criteria to find the car that's right for you. Once you've browsed through and considered all of the options, why not use our "Save search" tool for those cars that you'd like to test drive? You can also use our website to find your local dealer.

Adaptations

Adaptations are a range of devices that can be fitted to your car to help make driving, or travelling, easier. Typically, adaptations fall into three categories: they can help you drive, stow your wheelchair or scooter, or get in and out of the car.

We currently offer around 400 different adaptations which can be fitted before your car is delivered. The cost of the adaptation is paid along with the Advance Payment to your dealer at the start of the lease.

The adaptations included over the next few pages are just a sample of the selection available – for a full list please see our website, [motability.co.uk/adaptations](https://www.motability.co.uk/adaptations). To take advantage of the prices listed, you must order any adaptations you need through your Motability Scheme dealer at the same time that you order your car. All prices include installation and any maintenance that may be required. Further adjustments carried out by your installer may result in an additional charge.

Choosing the right adaptation

Adaptations are not suitable for every type of car so it's important to consider the adaptations you need before you choose your car. Your local adaptation installer will be happy to help.

There are more than 100 installers across the UK and you can find all their contact details, and information on which adaptations they provide, at [motability.co.uk/findadealer](https://www.motability.co.uk/findadealer). If you don't have internet access you can call us on 0800 093 1000.

If you've never driven with an adaptation before, it may be worth visiting a Driving Mobility Centre for an assessment. These centres offer independent, professional information and advice and can help you find the adaptations that best suit your particular needs. There are a number of Centres across the UK, to find your nearest centre, visit [drivingmobility.org.uk](https://www.drivingmobility.org.uk) or call **0800 559 3636**. Please note that there may be a charge for assessments.

If you'd like to see how some of our most popular adaptations work, visit [motability.co.uk/adaptationsfilms](https://www.motability.co.uk/adaptationsfilms) to watch our online videos. Here you can also download our useful brochure 'Your guide to adaptations' which explains the basics of adaptations and gets you on the road to finding the right fit for your mobility needs.

Mechanical hand controls and left foot accelerator

If you find using foot pedals for braking or acceleration difficult, you may be better off using a hand control, such as a push/pull device or a radial accelerator. There are a number of different hand controls available from different manufacturers, but the basic function is the same across most models – the foot pedals are controlled by devices installed around the steering column and wheel, allowing you to use your hands to push or pull a lever to control the speed of the car or when you need to stop. Most push/pull hand controls can be ordered with a built-in indicator switch at no extra cost.

If you struggle to use your right foot to operate the standard accelerator and brake pedals, you may benefit from having a left foot accelerator fitted. This system transfers the original acceleration control of the car to an extra pedal fitted on the left side, allowing you to manage your speed in a way that's more comfortable for you. With most installations, the original accelerator pedal can still be used when the left foot pedal is not deployed, so the car can also be driven safely by any nominated drivers who do not require adaptations. We recommend seeking advice from an adaptations installer first if you have not used this type of adaptation before.

You'll find most mechanical hand controls and left foot accelerators are available at no extra cost – visit motability.co.uk for a full list.

Both mechanical hand controls and left foot accelerators are available from the following manufacturers:

- Adaptacar
- Alfred Bekker
- Auto Mobility Concepts
- BAS
- Brig-Ayd Controls
- Cowal Mobility Aids
- D S & P Mobility Electronics
- Elap Mobility
- Jeff Gosling Hand Controls
- Jim Doran Hand Controls
- McElmeel Mobility Services
- PB Conversions
- Techmobility

Speak to your local adaptation installer about which products may suit your choice of car – you'll find details on our website at motability.co.uk

Pedal modifications

If you have difficulty reaching the pedals when driving, you could opt to have the pedals extended. Mechanical modification to the original pedals of your car can bring them closer to the driving seat, allowing you to drive more comfortably while controlling the car with ease.

Alfred Bekker	Pedal Extensions (2 Pedals Automatic Transmission)	Nil
Cowal Mobility Aids Ltd	Pedal Extensions (2 Pedals Automatic Transmission)	Nil
D S & P Mobility Electronics	Pedal Extensions (2 Pedals Automatic Transmission)	Nil
Elap Mobility	Pedal Extension Mini Stamp (2 Pedal Extension) (Menox)	£66
Jim Doran Hand Controls	Pedal Extensions (2 Pedals Automatic Transmission)	Nil
McElmeel Mobility Services Ltd	Pedal Extensions (2 Pedals Automatic Transmission)	£50
PB Conversions	Pedal Extensions (2 Pedals Automatic Transmission)	Nil
Various Manufacturers	Hinged Accelerator Pedal	From Nil

Steering aids

If you have difficulty using a standard steering wheel, there are a number of solutions that may be able to help. A steering wheel ball can be fitted to allow for easier control. The driver simply holds the ball and uses it to move the wheel in the direction you want to go. If you're having hand controls fitted, then it is often essential to have a steering wheel ball to enable you to steer the car with one hand while operating any hand controls with the other.

Various Manufacturers	Steering Aids	From Nil
	Quick Release Steering Aids	From Nil
	Specialist Steering Aids	From Nil

Electronic accelerator

If you have limited mobility in your legs, or find push/pull hand controls too tiring, you may find that an electronic accelerator will help. These devices transfer accelerator control to a ring positioned either above or below the steering wheel or to a trigger device adjacent to the steering column. Electronic accelerators require less effort than mechanical hand controls and will all come with a hand operated push brake.

Alfred Bekker	Electronic Throttle Trigger With Push Brake (Fadiel)	£550
	Wireless Satellite Accelerator With Push Brake (Fadiel)	£690
BAS(NW) LTD	Over Ring Accelerator (Push Brake Not Included)	£395
Brig Ayd	Electrical Trigger Throttle & Brake System	£330
Elap Mobility	K5 Under Ring By Interface (Push Brake Not Included)	£345
	K0 Over Ring Wireless Removable By Interface (Push Brake Not Included)	£345
Guidosimplex	Ghost Rotating Electronic Under Ring (Interface) With Lateral Fitting (Push Brake Not Included)	£345
	Electronic Over Ring Accelerator - Mechanical Brake Not Included	£395

Remote control devices

If you have limited movement in your upper body, you could benefit from infrared controls. Once installed to the steering wheel, these controls allow for basic car functions, such as the horn, windscreen wipers and lights, to be operated by a single control pad, making it safer and more comfortable to drive.

BAS(NW) LTD	10 Way Remote Control Device (Sojadis)	£395
	10 Way Remote Control Up with Auto Cancelling Indicators (Sodajis)	£495

	12 Way Remote Control Device	£280

Wheelchair stowage – boot hoist

If you can't lift your wheelchair into the boot of your car, a hoist which stores your wheelchair in your car could be the solution. These wheelchair stowage systems can be a great help by taking the weight of the wheelchair and manoeuvring it effortlessly for you via a remote control. The size and weight of your wheelchair or scooter will affect the type of hoist you need, and the type of hoist you need will affect your choice of car. The price of the boot hoist includes a compatible tie-down to secure the wheelchair or scooter in the back of the car and most hoists also come with a suitable lifting bracket. Some hoists can be transferred to your next car, speak to your adaptation installer for further details.

Autochair Ltd	40Kg 4 Way Transferable Boot Hoist (Smartlifter Lm Range)	£195

Techmobility	40 Kg 2 Way Transferable Boot Hoist	£55
	70 Kg 2 Way Transferable Boot Hoist	£230

Wheelchair stowage – roof top system

If you can't lift your wheelchair and you need the boot space of your car to store other things, rooftop wheelchair stowage could be beneficial. This system consists of an electric hoist which, when attached to your wheelchair, lifts it up and stores it in a box fitted to the roof of your car. The type, size and weight of your wheelchair will affect the type of hoist you need, and costs will vary accordingly. Rooftop stowage systems may mean that you are no longer able to park in underground car parks or spaces where there are height restrictions.

Elap Mobility	Chair Topper Roof Mounted Wheelchair Stowage Box	£1,825
---------------	--	--------

Wheelchair swivel seats

A wheelchair swivel seat enables you to move in and out of the car without needing to rise from the seat. Once locked in position, the actual seat itself is transferred from the wheelchair base unit to a swivel base inside the car, all without the wheelchair user having to move position. It's easy and comfortable for both the passenger and the person assisting. The wheelchair base unit is then stored in the car boot. There are both manual and powered wheelchair options available. Like permanent swivel seats it's worth checking with an installer if this adaptation is compatible with the car of your choice.

Elap Mobility	12 Inch Carony C/W Compact Seat & Turnout Electric Inc Anti Tip	£3,690
Guidosimplex	Wheelchair Swivel Seat System (12 Inch Gtran)	£1,750

Permanent swivel seats

If you're finding getting in and out of your car increasingly difficult or uncomfortable, you may benefit from having a swivel seat fitted inside your car. The way in which they operate varies from model to model, but the basic function allows the car seat to rotate by 90°, move out to beyond the sill of the door and in some cases lower or tip, to help make getting in and out of your car easier. Swivel seats can be manual or powered and can be fitted to either the driver or the passenger side. Your adaptations installer will be able to advise if a swivel seat will be suitable for your needs and whether it will be compatible with your choice of car.

Elap Mobility	Manual Transferable Swivel Seat (Turnout With Bev Seat)	£1,918
	Manual Transferable Swivel Seat (Turnout With Compact Seat)	£1,315
	Programmable Electric Transferable Swivel Seat (Turny Evo With Compact Seat)	£3,227
	Electric Transferable Swivel Seat (Turnout With Compact Seat)	£1,806
	Manual Transferable Swivel Seat (Rotating)	£787
	Manual Transferable Swivel Seat (Rotating With 2 Arm Rests)	£1,087
Guidosimplex	Programmable Electric Transferable Swivel Seat (Dtran Basic)	£3,150
	Programable Electric Transferable Swivel Seat (Rtran Aluminium)	£2,050
	Programmable Electric Transferable Swivel Seat (Dtran Excellent)	£4,400

Electric person hoist

If you are a wheelchair user, another option for accessing the car is via an electric person hoist, which physically lifts you into the car. A specially designed canvas sling is put in position with very little movement required from the wheelchair user. Heavy duty hooks in the sling are then slipped onto the hoist and the hoist is raised electronically.

Autochair Ltd	Person Lift Transferable (Smart Transfer) Up To 149Kg	£495
	Transfer Kit For Person Lift (Smart Transfer/Milford Eco)	Nil
BAS(NW) Ltd	Person Lift Transferable (Handilift) Up To 110Kg	£425

General

There are a number of different types of adaptations available to choose from, all of which have been designed to help improve or enable your travel experience. For more information, visit motability.co.uk.

Adaptacar Limited	Electric Parking Brake	£337
Alfred Bekker	Stalk Extension (Left to Right, or Right to Left)	Nil
Elap Mobility	Electric Parking Brake	£353
Jeff Gosling Hand Controls Ltd	Easy Release Handbrake (Vehicle Specific)	Nil
Jim Doran Hand Controls	Electric Handbrake	£400
Various Manufacturers	Easy Release Handbrake	From Nil
	Pedal Guards	From Nil

Transfer plates

Transfer plates assist in accessing the vehicle from a wheelchair by bridging the gap between the wheelchair and the car seat. This adaptation can be fitted on the driver or the passenger side. Your adaptations installer will be able to tell you if this is suitable for your needs and will also be able to advise whether it will be compatible with your choice of vehicle.

Alfred Bekker	Foldable Transfer Plate (Manual)	£9
Autochair	Transfer Plate (Turbo Slide)	£75
	Transfer Plate (Manual)	£9
BAS(NW) Ltd	Transfer Plate (Manual)	£9
	Transfer Plate (Electric)	£545

Elap Mobility	Transfer Plate (Manual)	£9
	Transfer Plate (Electric)	£606
Guidosimplex	Transfer Plate (Seg Seat)	£9

Wheelchair Accessible Vehicles (WAVs)

Did you know that the Motability Scheme also offers a range of over 500 Wheelchair Accessible Vehicles which have been specially converted to enable you to remain in your wheelchair when travelling? The vast majority of our customers choose to lease a brand new WAV which are available on a five year, 100,000 mile lease; however we also offer a limited number of Nearly New WAVs on a three year, 60,000 mile lease – see page 35 for more information.

Over the next few pages we provide a short summary of our WAV options, highlighting the key differences between each model. Depending

on the car or van used for the WAV conversion and the company that has converted it, there is likely to be lots of other small differences that could make the difference between one that is suitable and one that is not. The only way to see which WAV is right for you, is to contact the WAV suppliers who will be able to provide demonstrations of different WAVs at your home.

To find out more we highly recommend that you visit motability.co.uk/wavs or call **0800 093 1000** and request a copy of 'Your guide to Wheelchair Accessible Vehicles'.

- 1 Seats:** The number of seats fitted as standard including space for the wheelchair user.
- 2 Entry height:** This measurement gives the maximum possible headroom for entry into the WAV at the point of the door frame, including a 50mm buffer.
- 3 Ramp or lift:** Almost all small WAVs are fitted with a ramp while, large WAVs tend to have a lift. Lifts are generally the more expensive option.
- 4 WAV size:** Within this guide we have organised WAVs into four sizes: small (S); medium-small (MS); medium-large (ML); large (L).
- 5 Reference number:** Each vehicle has a unique reference number which you can use to find the vehicle on our website. Type the reference number in the search box found at the top of all pages on motability.co.uk, click on the result and you'll find extra information about that WAV, including an image and layout.
- 6 Position:** The vast majority of WAVs are converted so the wheelchair user is a passenger, rather than the driver and almost all WAVs position the wheelchair user towards the rear of the vehicle, however a few have been adapted so the wheelchair user can sit upfront next to the driver. These are listed as UFP within the vehicle descriptions, but you should be aware that they are a more expensive option.

Nearly New WAVs

If you would prefer a WAV on a shorter three year lease, a lower Advance Payment or need a quicker delivery time, then perhaps our Nearly New WAV option would suit you?

Each Nearly New WAV is no more than three years old, has low mileage and has been carefully checked by a Motability Scheme approved supplier. We have included example pricing, however as stock is limited and availability varies across each supplier, you will need to contact the WAV suppliers directly to find out which WAVs are currently available.

Advance Payments

Small	From £0
Medium-Small	From £895
Medium-Large	From £895
Large	From £1,295

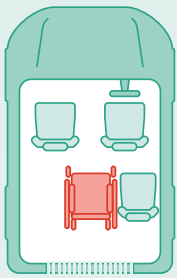

WAV sizes explained

If you are looking for a Wheelchair Accessible Vehicle (WAV) there are some key decisions that will help narrow down your choice of suitable vehicles. The size and weight of your wheelchair and the number of passengers you regularly travel with will both affect the size of vehicle that you need. Below is a summary of the key differences between each of the WAV sizes.

As the style and layout of each WAV conversion will vary from supplier to supplier, it is important to see like-for-like WAVs from different suppliers to make sure that the things that matter for you and your family are included in any conversion

you are considering. The detailed results on our online WAV Search tool includes an image of the seat layout for each WAV featured on the Scheme, but remember seat size and type will vary between suppliers, so be sure to arrange a home demonstration. It's also worth speaking to the converter if you have different requirements as some seats may be able to be moved to an alternative position and additional seats may be available at an extra cost. Search the full range of WAVs and find contact details for all suppliers at [motability.co.uk/wavs](https://www.motability.co.uk/wavs).

Small

Base vehicles include:

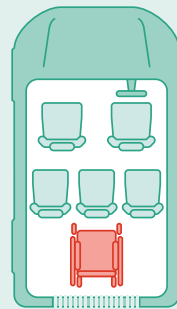

Fiat Qubo; Fiat Doblo; Citroën Berlingo; Peugeot Partner; Ford Tourneo Connect; Kia Soul; Volkswagen Caddy

Features:

all small WAVs will be fitted with a ramp for entry and they usually have a lowered floor to give more headroom inside the vehicle and reduce the angle of the ramp. They will have at least one passenger seat in the rear, but no more than five. These WAVs tend to feel the most similar to driving a standard car.

From
£895
Advance
Payment

Medium-Small

Base Vehicles include:

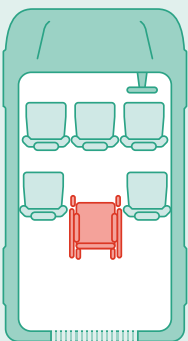

Volkswagen Caddy Maxi; Ford Grand Tourneo Connect; Vauxhall Combo

Features:

will have more space than a small WAV which either means extra passenger seats, more room for equipment or a more flexible seating position. Like the Small WAVs these vehicles will have more of a car-like feel in terms of size. With this size WAV, the wheelchair user can be positioned behind the second row of seats in the rearmost part of the car, but many conversions have options to sit further up in between the second row of rear seats.

From
£2,795
Advance
Payment

Medium-Large

Base Vehicles include:

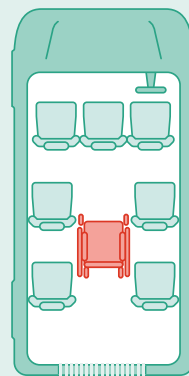

Citroën Space Tourer; Ford Custom; Peugeot Traveller; Volkswagen Shuttle; Volkswagen Transporter; Renault Trafic; Vauxhall Vivaro

Features:

these WAVs are based on larger vehicles and are the most common WAV for users with larger wheelchairs as their size allows more flexible seating arrangements. They can carry up to nine passengers including the wheelchair user and driver, and some conversions allow two wheelchair users. The majority of medium-large WAVs are still fitted with a ramp, however if you need a lift these can sometimes be fitted, but you should be aware that there will be reduced head height in these cases.

From
£2,995
Advance
Payment

Large

Base Vehicles include:

Peugeot Boxer; Renault Master; Fiat Ducato

Features:

these conversions are based on the largest vehicles available on the scheme and in terms of size are more like a commercial vehicle. The conversions based on these vehicles are good for larger families or those travelling in the largest or heaviest wheelchair. All are fitted with a lift and most can be converted to allow for two wheelchair passengers as well as space for other passengers in standard seats.

From
£5,695
Advance
Payment

Some suppliers work with a network of regional dealers to supply and support your WAV. For a full list of WAV suppliers visit motability.co.uk/findadealer or call **0800 093 1000**.

WAVs that wheelchair users can drive

There are two main conversion types: you can transfer into a standard or adapted driver seat from your wheelchair (listed in the description as IT) or the vehicle can be driven directly from your wheelchair (listed in the description as DFW). Because these vehicles have additional bespoke adaptations to allow you to drive independently, they tend to have a higher Advance Payment than a passenger WAV. To browse our complete range visit motability.co.uk.

Considerations: More independence • Higher Advance Payments • May require additional driving adaptations

CAR PRICE GUIDE 07/19

This guide uses abbreviations to describe some of the specifics about particular models of cars. To make this easier to understand they are in the following order:

Model – Engine size – Type of engine – Power output – Trim – Body style – Number of doors – Number of seats – Accessories

Not all descriptions will contain each piece of information so we have also included a glossary to help you. This can be folded into the page you are reading.

Abbreviations for model descriptions

2dr/3dr/4dr/5dr/6dr	2/3/4/5/6 doors
5/7/8/9st	5/7/8/9 seater
2WD/4WD	2 wheel drive / 4 wheel drive
AC or A/C	Air conditioning
ACS	Low speed collision avoidance system (Ford only)
BHP	Brake horsepower
CDI	Common-rail direct injection (diesel vehicle)
CDTi	Common-rail diesel turbo injection
Cnv pck	Convenience Pack (SEAT only)
CRD(i)	Common rail diesel (injection)
D-4D	Diesel engine (Toyota only)
DAP	Driver Assistance Pack
dCi	Direct common-rail injection
DFW	Drive from wheelchair
DiG-S	Direct injection gasoline – supercharged
DiG-T	Direct injection gasoline – turbocharged
e-HDi	Efficient high-pressure diesel injection
ELWB	Extra long wheel base
Est	Estate
HDi	High-pressure diesel injection
i-DTEC	Honda diesel engine
ISG	Intelligent stop go
IT	Internal transfer
i-VTEC	Honda petrol engine
JTDm	Jet turbo diesel
kW	Kilo watt
LS	Lowering suspension
LWB	Long wheelbase
Nav	Satellite navigation
PHEV	Plug-in hybrid electric vehicle
Prk or Park	Parking sensor/camera
RW	Ramp and winch
sDrive/xDrive	2 wheel drive / 4 wheel drive (BMW only)
SL	Side lift
SS or S/S	Start stop system
ST	Sport tourer (estate)
SVP	Smart vision pack (Nissan only)
SW	Stationwagon (estate)
SWB	Short wheel base
TD(C)i	Turbo diesel (common-rail) injection
T(F)SI	Turbocharged (fuel) stratified injection
TL	Tail lift
(T)TiD	(Twin) turbo injection diesel
TSS	Toyota Safety Sense
UFP	Upfront passenger
VTi	Variable timing injection
WP	Winter Pack
