*Leukemia Research*

Dear Editor:

Please find attached for your kind review our manuscript entitled “Outcome of Patients with Myelodysplastic Syndromes in the Veterans Administration Population”.

The study is analysis of VA MDS cases through VA central cancer registry database. To our knowledge this is the first report on outcome of MDS in the VA population. The database is complimentary to SEER registry since it does not report cases to SEER data therefore offering another large cohort of MDS patients in the United States.

Look forward to your favorable consideration.

Most sincerely,

Rami Komrokji, MD  
H. Lee Moffitt Cancer and Research Institute
