You should see 2 text fields where you can enter a username and password. The default username for your Asus RT-N12 D1 is an administrator. The default password is the administrator. Enter a & user name: password, press Enter and now you should view your router control panel. If the login credentials above don't work with your Asus RT-N12 D1 router and then try this method Try different ID/password combinations widely used by Asus that you'll find below. In this list is the most popular combination of default usernames and passwords used by Asus. Sometimes usernames and passwords don't work that we set out at the top of this guide. Then you can try the username/password combination below to gain access to your Asus RT-N12 D1 wireless router. # Username Password 1adminadmin2rootadmin3adminpassword4as5adminpicer6adsladsl12347 (empty)asus8linaroliroadmina10rootroot11n/an/IP default login for my Asus route You try a different route? Are you trying the following IP? In the list below, we list all known router IP for Asus manufacturers. Maybe this will work for you. # Default Router IP 1192.168.1.12192.168.50.13192.168.0.14acquired via DHCP5192.168.2.16192.168.1.2207 Manuals for Asus RT-N12 D1 Manual Info updated Feb. 16, 2021 The majority of ASUS routers have a default username of admin, a default password of admin, and the default IP address of 192.168.1.1. This ASUS credential is required when logging into the ASUS router's web interface to change any settings. Since some models don't follow the standards, you can see those in the table below. Under the table also instructions on what to do to unlock your ASUS router password, it is necessary to reset your ASUS router to its factory's default password, or the password reset does not work. Tip: Press ctrl+F (or cmd+F on Mac) to find your model number quickly. list of default passwords (Confirm February 2021) Instructions and FAQs Forgot your ASUS router password? Have you changed your ASUS router username and/or password and forgot what you changed? Don't worry: all ASUS routers come with the default factory setting the password you can return by following instructions below. Reset the ASUS router to the default password If you decide to return your ASUS router to the factory default, you need to reset 30-30-30 as follows: When your ASUS router is powered, press and hold the reset button for 30 seconds. Although still holding the reset button is pressed, disconnect the router power and hold the reset button for another 30 seconds While still holding the reset button, switching power over to the unit again and hold it for another 30 seconds. Your ASUS router should now be reset to its new factory settings. Check the table to see what they are (Most likely administrators/administrators). If the factory resets it doesn't work, check the factory's reset guide ASUS 30 30 30. Important: Remember to change the default username and password to improve the security of your router after reset the factory, because the default password is available across the web (as here). I still can't access my ASUS router with the default password Make sure you've followed the reset instructions correctly because the ASUS router should always go back to their factory default settings when reset. Otherwise, there is always a risk that your router is damaged and may need to be repaired or replaced. Default login for ASUS 98% IP address: 192.168.1.1 username: admin Password: admin 1 % IP address: - Username: password 0 % IP Address: 192.168.1.1.1 Username: root password: admin 0 % IP Address: 192.168.1.1 Username: - Password: admin ASUS RT-N12 Router Login as Administrator at ASUS RT-N12 Router using the guide below. Connect your PC or Laptop via cable to your router. Or use your wireless network instead. Recommendations - It is recommended that the connection be done using the attached cable on the ASUS RT-N12 router. That will prevent you from losing your connection in the middle of the configuration/setup process. Using your preferred web browser and entering your RT-N12 router's IP address in the address bar, you'll load the login screen. You can find the ip address behind your router. Now enter your router's default user name and password and you'll be granted access to its administrator panel. If you don't happen to know what usernames and passwords then feel free to find some default for the RT-N12 router by ASUS. ASUS RT-N12 Routers Support If you have trouble logging in to the RT-N12 router, then you may use an incorrect username or password. Don't forget to save the login details after you reset it. Forgot your Login Password? Try the hard reset function. To do this, press and hold a small black button usually located behind your router case for about 10 seconds. Doing so will reset your router factory settings. The router's logon page not loaded? If for some reason the administrator website fails to load, then check if the device you are using is connected to wi-fi. You can also find the exact IP address set as the default for In many cases, the problem associated with loading the router's login screen associated with it has a different IP from the one that tried to load. In this case, your network will definitely use a different IP address. If that happens, check the list of our IP address routers, and then find the correct address. If you need any help, see our tutorial on how to find your router's IP address. Address.
