

Connecting Windows 10 to DuqNet

Prior to configuring your machine for DuqNet wireless you need to initialize your MultiPass account (credentials that you will be using for wireless). To do so, visit <http://www.duq.edu/multipass> and click the link to initialize Your MultiPass. Once you've followed the on-screen prompts and have initialized your account you can proceed with the following instructions. Keep in mind that you will use this password that you've just created to setup your wireless connection.

Review **Duquesne's Wireless Airspace Policy**

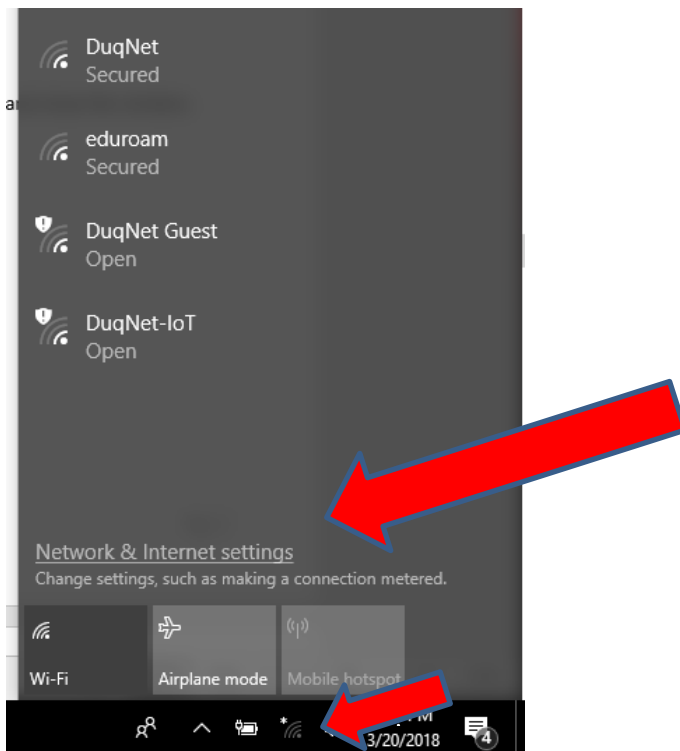

<http://www.duq.edu/about/campus/computers-and-technology/policies/duqnet-wireless-policy>

You will need to forget DuqNet if you have previously attempted to add it. Follow the steps below to do so. If you do not need to forget DuqNet, then please **skip to page 3**.

Users can follow the steps below to set up wireless on a device using Windows 10.

Delete, remove or forget Wireless Network Profiles in Windows 10

Look in the bottom right-hand corner of your screen to find your wireless icon. Left click the icon then select **Network Settings**.
