## Pathways for Qualifications

## Purpose of this brochure

The purpose of this brochure is to give you at a glance a clear idea of the potential academic or vocational route that a qualification offers you. Which educational and training doors are open and accessible for you? What are your possibilities in terms of education and training?

A pathway is then the route to a qualification that you can follow. To illustrate more precisely these routes, SQA is using the National Qualifications Map that positions all the qualifications, national and foreign, in the context of Seychelles. Bear in mind that a relevant number of years of experience may lead to acceptance in specific programmes of education and training.
