6	In response to the United States Supreme Court decision in City of Richmond v. J.A. Croson
7	Company, the City of Baltimore appointed an independent task force to review and make an
8	assessment of the constitutional validity of its Minority Business Enterprise (MBE) and
9	Women=s Business Enterprise (WBE) Program that was established under Ordinance 86-790.
10	The study was completed in 1990 and a report was issued (A1990 Millemann Report≅) after
11	the task force spent over 600 hours compiling data and examining the basic constitutional
12	structure of Ordinance 86-790. The report revealed evidence of race- and gender-based
13	discrimination against minority and women=s business enterprises in the construction,
14	professional design, and service industries in the City and also in the Washington Metropolitan
15	Area and other portions of the State of Maryland involving private contractors who have
16	received City contract awards.
17	
18	In 1990, as a result of the findings and recommendations of the 1990 Millemann Report,
19	Ordinance 90-610 was enacted. Ordinance 90-610 modified and continued the City=s MBE
20	and WBE program in accordance with the recommendations of the 1990 Millemann Report
21	
22	In 1999, the City hired consultants to perform a second generation study to examine whether
23	previously identified patterns of discrimination against minority- and women-owned business
24	enterprises continued to persist and presently affected City procurement and to determine
25 26	whether race- and gender-neutral programs, in and of themselves, would be sufficient to
27	remedy the ongoing effects of identified discrimination in the award of construction, architectural and engineering, service, and commodity contracts by the City. This study,
28	completed in 2000 (the A2000 Disparity Study≅), included:
29	completed in 2000 (the A2000 Disparity Study=), included.
30	(1) a rigorous examination of over 14,000 City contracting and purchasing records and
31	contract files;
32	
33	(2) an in-depth review of the city=s contracting, purchasing, and remedial policies,
34	procedures, and practices;
35	
36	(3) an examination of City contracting to determine whether there exists a history or
37	pattern of behavior demonstrating that the City has declined or refused to award
38	contracts or subcontracts for purchases of goods and services to minorities and that
39	such decisions by the City cannot be explained by any legitimate reason;
40	
41	(4) an examination of City contracting to determine whether the City has been a passive
42	participant in a system of racial exclusion practiced by local businesses;
43	
44	(5) a statistical analysis of the disparity between utilization and availability of MBE and
45	WBE companies, controlling for such factors as firm size, age, and bonding capacity,

L	as well as race/gender factors;
2	
3	(6) a review of firms, identified by name, address, and types of services, that were
1 5	qualified, willing, and able to conduct business with the City;
	(7) input from personal interviews and analysis of 403 responses to a mail survey of
,	minority and majority vendors;
3	initially und inigorally volumes,
)	(8) personal interviews with City staff, and with 63 owners of businesses representing
	subcontractors, prime contractors, business leaders; and
	(9) identification and examination of specific problems that affect both minority vendors
	and other firms in their attempts to obtain City contracts, subcontracts, and purchase
	orders.
,	The 2000 Study produced evidence of a substantial disparity in the utilization of minority- and
'	women-owned businesses in the construction, commodity, architectural and engineering, and
	services industries in the Baltimore City market area. The consultants who conducted the
	2000 Disparity Study also evaluated the existing MBE/WBE Program under Ordinance 90-
	610 and recommended the creation of a new program that includes race- and gender-neutral
	and race- and gender-specific goals. The 2000 Disparity Study concluded, among other
	things, that:
	(1) while the City has made gains, there remain significant disparities between the
	availability of minority- and women-owned businesses and the utilization of these
	businesses to perform contracts in the construction, commodity, architectural and
	engineering, and service industries;
	(2) the previously identified patterns of discrimination against MBEs and WBEs persist in
	the relevant market area; and
	(3) efforts by the City to increase participation in public contracting through the use of
	race-and gender-neutral remedial assistance programs have not succeeded in
	eliminating the past patterns of discrimination against minority- and women-owned
	enterprises and the City should create an annual goals program for these targeted
	groups ; and
_	(4) a need exists in the City=s contracting program for the establishment of a Small
	Business Enterprise program as another race-neutral means of remedying the identified
	disparity .
