

Wholesale Clothing for Plus Size, A Profitable Niche

Wholesale clothing distributors that sells plus size for women are not very many. The demand is growing due to the ever growing population of obesity in America. See how to find sources and add plus size to your inventory.

Dec. 30, 2008 - [PRLog](#) -- The most popular items wholesale clothing companies carry are apparel that are sizes 0-8. Most specifically if the trend are those like the ones you see from Forever21, Wet Seal, Charlotte Russe and similar places where they are meant for skinny and petite consumers. Now, that's a problem for those who wants the same fashionable style but wears 10 and above. They too can look good in those cut, colors and style if made for their specific size. But where to find them? In a lot of cases, they are almost in every department store but costs more than the average size. Absolutely! More labor intensive and more fabric to use. But does it really have to be that costly?

Clothing retailers who wants to engage in selling plus size clothing can find sources either by product sourcing in places like Los Angeles or New York. But you can also find it through the internet. If through the internet, it is difficult to know if you are buying good quality pieces with the price you're willing to pay and vice versa until it is in your possession. In this case, before you place an order from the site that you saw, make a little bit of research. Not every site you found on the first page of any major search engines vouches for the quality they sell. More often than that, they are on first page because they are well optimized so retailers like you can find them first. What you can do is to find reviews on what people are saying about these sites. Can it be from independent review centers, forums, blogs, news, anything that sounds reliable. If more people are talking about good things about a particular site(s), then most likely they are reputable source(s) and you can go ahead and place your order.

As plus size demand grows bigger, there is no denying there is money to be made in this type of niche. Plus size women wants to look good too like normal average sized women their height and age. It is very likely that if you hit the jackpot of finding your best supplier, you then will have better edge than your competing retail store for style, trend, selection to choose from and the price effectiveness.

If you're interested to stock up some plus size apparel, start looking for your supplier of wholesale clothing that carries trendy, stylish, wide selection, good quality and cost-efficient. At the end of the day, you will be amazed on how much profit you made.
