Facebook

Facebook (FB) has not done as well as everyone had thought. Facebook has gone down **\$9.90**. (As of 6/9/2012) As of today, I do NOT recommend buying Facebook because of this "crash"! If you buy Facebook please E-Mail me and tell me why and it will be in

the next issue. I personally think that Facebook will NOT earn that \$9.90 it lost back anytime soon. If you think this is a good Stock to buy please E-Mail me and tell me why and it will be in the next issue.

Please Read:

I heard a lot of you could not open the first issue. That was just a draft. This one will be easy to open and, if you prefer I can send this to you in the mail.

Stocks for YOU!

Abbott Laboratories (ABT) is a great company! Soon, Abbott will be breaking up into two companies! That means that if you have shares of Abbott when that happens you will get different shares for doing NOTHING! Please consider buying Abbott Laboratories (ABT) before that happens.

If you get one of these stocks because of the reason that we give please email us!

If you like Abbott then you will love Apple (AAPL) I bought it at \$418.44 on 10/18/2011. In about 7 months and 12 days ONE share went up \$143.85! You should really consider getting both Apple (AAPL) and Abbot (ABT), they are outstanding!
