Comparative Systems Activity

This is an extension activity for the Federal Reserve Bank of Atlanta's Economic Systems Infographic. You may view the infographic at https://www.frbatlanta.org/education/classroom-economist/infographics/economic-systems/full-view.aspx.

1. Using the CIA *World Factbook* at https://www.cia.gov/library/publications/the-world-factbook/index.html, look up each country and record the information for each on the chart below. Then use the information and the infographic to complete the analytical writing prompt.

	North Korea	Cuba	Iran	India	Saudi Arabia	United Kingdom	Australia	Hong Kong
						Kinguom		Kong
Geography								
Natural Resources: How								
many and what types of								
natural resources are								
available?								
Land Use: What								
percentage of the land is								
arable (capable of being								
farmed)?								
People								
Life Expectancy at								
Birth: How long are								
children born today								
expected to live?								
Total Fertility Rate:								
How many children does								
each woman have, on								
average?								
Literacy Rate: What								
percentage of people

2. For each country, find the section of the country's profile entitled "Economy—Overview." Read the description and identify the most important economic challenge facing the country. Describe this challenge in the table below.

Country	Biggest Economic Challenge
North Korea	
Cuba	
Iran	
India	

Saudi Arabia	
United Kingdom	
Australia	
Hong Kong	

3. Using a print or digital copy of the Economic Systems Infographic, find the continuum located at the bottom of the visual. Select two countries, one with an Economic Freedom Index number below 50 and one scoring above 50. Using the information you collected from the CIA *World Factbook*, write a paragraph for each country citing at least three pieces of evidence from your research supporting or refuting the country's current placement on the continuum. (Hint: Look for examples of how the country answers the three basic economic questions and examples of advantages and disadvantages of the economic system toward which the country leans.)
