

# Campus Custom Development

Do you have ideas for customizing your Student Information System (SIS) data? With Campus Custom Development, you can make the most of your Infinite Campus investment. Use your Infinite Campus data in new, customizable ways with this time-saving, optional service. Certified technical experts help get the data you want, where and when you want it.

## Benefits

Building on years of experience with successful projects, Campus Custom Development can amplify the power of your information system by creating unique reports and connectivity tools that meet your specifications.

- Reduce redundant data entry by automating data exchange between Infinite Campus and third-party systems via the Campus Data Extract Utility.
- Provide your stakeholders with dynamic, interactive reports to fulfill process-specific needs.
- Create custom tabs in Infinite Campus District Edition to utilize data in creative ways that work for your district.

## What We Do

From the smallest district to the largest state, Campus Custom Development can handle your needs. Our team helps reduce and eliminate redundant data entry by automating data exchange between Infinite Campus and third-party systems. Our services include:

- Online Registration
- Highly specialized report cards
- Complex transcripts
- Virtually unlimited custom report abilities via Microsoft SQL Reporting Services, including consolidated reports from multiple data sources
- Third-party interface subscription
- Data Extract Utility
- GPA custom calculations

# Campus Online Registration

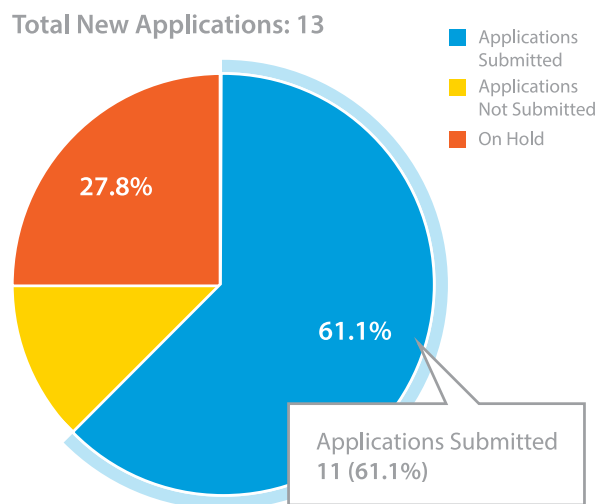

Because of the high demand for customizing Campus Online Registration, this has become a priority to build for our customers.

New student and existing student registration is a paper-intensive, inefficient process. Campus Online Registration is designed to streamline these processes for both current and new students with a configurable, flexible solution that adapts to meet your district needs. With Campus Online Registration you can:

- Remove dependency on paper forms and go paperless
- Modernize and streamline administrative processes for registration
- Have an online registration system that is already integrated in real time with your district's current SIS
- Decrease repetitive forms for parents to complete
- Provide pre-populated forms for parents

## Online Registration Dashboard

The Online Registration Dashboard provides a place where users can see the status of applications for a selected school year, by school name, by total students and number of applications submitted and not submitted (started, not completed). A status of new and existing student applications can be viewed. This allows administrators to keep track of applications to plan for staffing needs.

When we first envisioned Online Registration, we sent a basic plan to Custom Development. From that, the team created a product far beyond our expectations. We were very pleased with not only the product, but its functionality. Through patience and listening to our needs, Custom Development created a functional tool from our vision. We had a marvelous experience and would work with them again in the future.”

Dr. Bryn Lapenta, Senior Director Office of Accountability  
Washoe County School District  
Reno, Nevada

## Campus Multi-language Editor

The Multi-language Editor allows districts to establish which language the Online Registration tools display on the Campus Portal. Districts can use the Multi-language Editor to translate the information to reach as many parents as possible.

## Data Validation

Campus Online Registration allows administrative staff to review potential matches to existing records and link to those records to avoid duplicates.

Infinite Campus Online Registration Application Number 115

\* Indicates a required field

✓ Student(s) Primary Household → ✓ Parent/Guardian → ✓ Emergency Contact → ✓ Other Household → ✓ Student → Review → Staff Approval

### Application Review

#### Household

The Household record is not linked to a Campus record. A new household record will be created when the application is posted.

[Override HouseholdID](#)

#### Home Address

456 Main St  
Schenectady, NY 12345

The Home Address record is linked to a Campus record. AddressID 2565 will be updated when the application is posted.  
Notice: AddressID 2565 is occupied by the Kenny,Kendra household, HouseholdID: 15338

[Link Address](#) [Unlink Address](#)

#### Mailing Address

## Parent/Guardian email notifications

Keep parents up-to-date with application status changes. Parents receive email messages when starting a new parent application or when application statuses are changed.

## Data Extract Utility

The Data Extract Utility provides an automated data extract tool for the purpose of transferring data via a flat file from Infinite Campus servers. This can be used to upload Campus data into third-party software.

**Detail Information**

\*Extract Instance Name :

Transportation :  SMB FTP  SFTP  FTPS  PULL

File Name :  student

## GPA Custom Calculations

Does your district have a unique or specific way to calculate GPA and class rank?

If so, the Custom Development team can work with you to automate this process for easier reporting to staff, students and parents.

---

If you can imagine it and your data supports it, Campus Custom Development can help you report it.
