

Financial Aid: Federal Student Loans

Many students take out federal and/or private student loans to pay for college or graduate school. Private loans are typically more costly and provide fewer consumer protections and repayment options than federal student loans. This paper focuses on federal student loans, highlighting current interest rates, borrowing limits, and repayment options – it is one of a series of brief SOUND Wealth Management Group (SWMG) educational documents on financial aid.

The Basics

The two main types of federal student loans offered by the U.S. Department of Education are Stafford Loans and PLUS Loans (also referred to as Direct Loans and Direct PLUS Loans). The two subsections that follow describe in greater detail the similarities and differences between the two types of loans.

■ Stafford Loans

There are two types of Stafford Loans: subsidized and unsubsidized. *Subsidized* Stafford Loans are available only to undergraduate students attending school at least half time and are based on financial need. Conversely, *unsubsidized* Stafford Loans are available to both undergraduate and graduate students and are not based on financial need; any student attending at least half time is eligible. “Subsidized” means the government generally pays the interest that accrues while the student is in school, during the six-month grace period after graduation, and during any deferment or forbearance periods. “Unsubsidized” means the student pays the interest that accrues during these periods.

Both subsidized and unsubsidized Stafford Loans have annual borrowing limits. To be considered for either type of Stafford Loan, students must fill out the federal government’s Free Application for Federal Student Aid (FAFSA) form. For more helpful information on financial aid, we encourage you to look into the other articles in our education series that explore topics such as the submission process and how to weigh your options when considering financial aid.

■ Plus Loans

There are two types of PLUS Loans: Grad PLUS Loans and Parent PLUS Loans. The first, Grad PLUS Loans, are available to graduate and professional students attending at least half time. While the other, Parent PLUS Loans, are only available to parents of dependent undergraduate students attending at least half time. Both types of PLUS Loans require a credit check. Additionally, Grad PLUS Loans require students to fill out the FAFSA, while Parent PLUS Loans require both the FAFSA and a separate application. The following table shows which loans are available to undergraduate and graduate students:

STUDENT	LOANS AVAILABLE
Undergraduate	<ul style="list-style-type: none">• Stafford Loan (subsidized)• Stafford Loan (unsubsidized)• Parent PLUS Loan
Graduate	<ul style="list-style-type: none">• Stafford Loan (unsubsidized)• Grad PLUS Loan

Borrowing Limits & Interest Rates

Stafford Loans are the most common federal loan that students use to help pay for college or graduate school. Here are the current borrowing limits:

- **For dependent undergraduate students:** the Stafford Loan limits are \$5,500 for freshman (including up to \$3,500 subsidized); \$6,500 for sophomores (including up to \$4,500 Subsidized); and \$7,500 for juniors and seniors (including up to \$5,500 subsidized), with a maximum loan limit of \$31,000.
- **For independent undergraduate students and dependent students whose parents are unable to obtain a PLUS Loan:** the Stafford Loan limits are \$9,500 for freshmen (including up to \$3,500 subsidized); \$10,500 for sophomores (including up to \$4,500 subsidized); and \$12,500 for juniors and seniors (including up to \$5,500 subsidized), with a maximum loan limit of \$57,500.
- **For graduate students:** the Stafford Loan limits are \$20,500 per year (or \$40,500 for certain medical training), with a maximum loan limit of \$138,500 (or \$224,000 for certain medical training), including undergraduate borrowing.

PLUS Loans have no dollar borrowing limits per year; graduate students and parents are able to borrow up to the full cost of attendance (minus other financial aid received).

The following table shows the interest rate for Stafford and PLUS Loans issued July 1, 2019, through June 30, 2020 (the rate is fixed for the life of the loan but resets each July for new loans):

LOAN	INTEREST RATE (2019/2020)
Stafford Loan – Undergraduate Students (subsidized and unsubsidized)	4.53% (5.05% for 2018/2019)
Stafford Loan – Graduate Students (unsubsidized only)	6.08% (6.6% for 2018/2019)
PLUS Loan (Grad and Parent)	7.08% (7.6% for 2018/2019)

Repayment Options

One of the main benefits of federal student loans is that the government offers several repayment options. The most commonly repayment options are listed below for your reference:

- **Standard Repayment Plan:** With this original repayment plan, you pay a fixed amount each month over a 10-year term.
- **Graduate Repayment Plan:** The repayment term is still 10 years, but payments start out lower in the early years of the loan and then increase gradually, usually every two years. This plan is for borrowers with relatively low current incomes who expect their incomes to increase in the future. Borrowers electing this payment option will ultimately pay more for their loan compared to the standard loan plan because of the additional interest that accumulates in the early years of the loan when the outstanding balance is higher.
- **Extended Repayment Plan:** You extend the time you have to repay your loan (up to 25 years). Your fixed monthly payment is lower than it would be under the standard plan, but you will ultimately pay more for your loan because of the additional interest that will accumulate over the longer repayment period. This plan may be combined with a graduated plan.
- **Income-Based Repayment (IBR) Plan:** This option is available only to Stafford Loan and Grad PLUS Loan borrowers (not Parent PLUS Loan borrowers). Your monthly loan payment is based on your annual discretionary income, and you must have a partial financial hardship to qualify. If you do, you'll pay 10% of your income to student loan payments. After 20 years of on-time payments, the remaining balance is generally forgiven (payments may be forgiven after 10 years for those in certain public interest jobs.)

- **Loan Consolidation:** This is technically not a repayment option, but it can affect the amount you pay each month. With loan consolidation, several student loans are combined into one loan, sometimes at a lower interest rate, so you can write one check each month. A federal consolidation loan has a fixed interest rate for the life of the then and is based on the weighted average of the interest rates on the loans being consolidated, rounded up to the nearest one-eighth of \$1. Consolidated loans are generally eligible for any of the repayment plans listed above; however, consolidation loans that include Parent PLUS Loans are not eligible for IBR.

In addition to offering several repayment options, federal student loans offer loan deferments during periods of economic hardship. In this case, Stafford Loan, Grad PLUS Loan, and Parent PLUS Loan borrowers can defer their loan payments for up to three years. (However, for unsubsidized Stafford Loans, Grad PLUS Loans, Parent PLUS Loans, interest will continue to accrue.)

What Will Your Monthly Payment Be?

Before you or your child borrow for college, it's important to know how much you will need to pay back each month once payments start. The following chart shows monthly repayment amounts for different borrowing totals over 10- and 20-year terms at a 5% interest.

Borrowing Total	Monthly Payment (10-year term)	Monthly Payment (20-year term)
\$10,000	\$106	\$66
\$20,000	\$212	\$132
\$30,000	\$318	\$198
\$40,000	\$424	\$264
\$50,000	\$530	\$330
\$60,000	\$636	\$396
\$70,000	\$742	\$462

If you have questions or would like further information regarding financial aid services, we invite you to contact SOUND Wealth Management Group for a complimentary, no obligation consultation. As Certified College Planning Specialists® (CCPS) and members of The National Institute of Certified College Planners we can provide professional guidance to assist you in making the appropriate choices. Let's have the conversation...
