

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, May 19, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (89 fires)
New large incidents:	8
Large fires contained:	3
Uncontained large fires: **	15
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	5
***Complex IMTs committed:	2

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there is one fire being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### **Southwest Area (PL 4)**

New fires: 8  
New large incidents: 0  
Uncontained large fires: 4  
Type 1 IMTs committed: 4  
Type 2 IMTs committed: 4

**Hermits Peak**, Santa Fe NF, USFS. IMT 1 (SW Team 1), IMT 1 (CA Team 5), IMT 1 (CA Team 2) and IMT 2 (SW Team 3). Twelve miles northwest of Las Vegas, NM. Grass and timber. Extreme fire behavior with crowning, group torching and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

**Black**, Gila NF, USFS. IMT 2 (SW Team 5). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with short crown runs, uphill runs and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

**Cerro Pelado**, Santa Fe NF, USFS. Transfer of command from IMT 1 (GB Team 1) to IMT2 (RM Team Black) will occur tomorrow. Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with flanking and backing. Residences threatened. Evacuations, area, road and trail closures in effect.

**Bear Trap**, Cibola NF, USFS. IMT 2 (SW Team 4). Twenty-two miles southwest of Magdalena, NM. Timber. Active fire behavior with running, flanking and backing. Structures threatened. Area, road and trail closures in effect.

**Crooks**, Prescott NF, USFS. Eleven miles south of Prescott, AZ. Timber and brush. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Last report unless significant activity occurs.

**Southern Area (PL 2)**

New fires: 26  
 New large incidents: 5  
 Uncontained large fires: 6  
 Type 2 IMTs committed: 1

**Mesquite Heat**, Texas A&M Forest Service. IMT 2 (SA Gold Team) mobilizing. Started on private land 11 miles south of Abilene, TX. Grass, brush and timber. Extreme fire behavior with crowning, group torching and running. Residences threatened. Evacuations and road closures in effect.

**Coconut**, Texas A&M Forest Service. Started on private land 18 miles south of Vernon, TX. Grass, brush and timber. Extreme fire behavior with group torching and crowning. Residences threatened.

**Pope 2**, Texas A&M Forest Service. Started on private land 24 miles southeast of Eldorado, TX. Grass and brush. Active fire behavior. Residences threatened.

\* **Sandstone Mountain**, Texas A&M Forest Service. Started on private land two miles southeast of Llano, TX. Grass and brush. Moderate fire behavior. Residences threatened.

\* **Dry Branch**, Texas A&M Forest Service. Started on private land seven miles west of Evant, TX. Grass and brush. Active fire behavior. Residences threatened. Evacuations in effect.

**Full Moon**, Avon Park Air Force Base, DOD. Fifteen miles northeast of Avon Park, FL. Brush and grass. No new information.

\* **4 Corners**, Florida Forest Service. Seven miles northeast of Duette, FL. Grass and southern rough. Moderate fire behavior with short-range spotting and flanking. Last narrative report unless significant activity occurs.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion**: An upper trough will deepen over the Intermountain West and northern Plains, pushing a strong cold front through the Great Basin, central Rockies, and central Plains. Upper ridging is forecast to strengthen along the East Coast. Widespread elevated to critical conditions will develop from the southern Great Basin through the Southwest, Colorado, and the central and southern High Plains. The most critical conditions are expected across New Mexico and southern Colorado into central Texas where west to southwest winds of 15-25 mph with gusts to 40 mph combine with afternoon relative humidity in the single digits. Record high temperatures will continue across central Texas today as well. Elevated to locally critical conditions are also expected this afternoon and tonight across the Sacramento Valley of California due to a north wind event. Windy and dry conditions are forecast across north-central and northeast Montana today as well. Showers and mountain snow are forecast across the Pacific Northwest into the northern Rockies. Showers and thunderstorms will develop across the Dakotas into the Great Lakes with severe thunderstorms forecast for the Upper Midwest while scattered showers and thunderstorms are likely from the Tennessee Valley to the Carolinas.

## Extended Attack

Operational Engagement Category

After the initial size-up of the fire and/or transfer of command from an initial attack Incident Commander (IC), task yourself with answering the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the assigned resources and support functions associated with the fire?
- Can you control the fire with the resources available (either on the incident or en route) under expected conditions?
- Have you developed a plan to attack the fire?
  - Direct or indirect
  - Anchor points
  - Escape routes
  - Safety zones
  - Head or flank attack
  - Priority areas
- Have you communicated the plan to all personnel assigned to the incident, including new arrivals?
- Can you see the entire fire area? Do you have lookouts posted?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
  - If you are using the black, is it completely burned and without reburn potential?
- Are safety guidelines and the Standard Firefighting Orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of resources that have been ordered?
