Party/Event Activities Description – 2017
For registration information go to
www.computeradventures.com/event-reg/

Robot Battle

Ages 6 through 14
Course Code: LWRP-PE-A

Invite Computer Adventures and we will show up with all of our LEGO® Mindstorms NXT robot pals! During the party, you and your friends will program and customize your robots to battle head to head on our Sumo Battle board.
CAUTION: Robot battles can be exciting and inspiring. Be prepared for an extraordinary amount of screaming and laughter!
For children 6 & 7 years old, 90-minute party is recommended.
For children younger than 6 years old, an adult assistance is recommended for each child.

Lego Brickfilms

Age 7 through 14
Course Code: LBRK-PE-A

Lights…Camera…Action! This party will show you how to bring your LEGO® characters come to life. Using stop-motion animation and digital post-production editing, you will produce LEGO® Brickfilms much like the ones viewed on YouTube. At the end, we will have a "Movie Premiere" showcasing all the movies that were made. Copies of the movies will be available for download from our website within 24 hours of the party.
CAUTION: The next young "Steven Spielberg" or "George Lucas" may be in our midst!
For children younger than 7 years old, an adult assistance is recommended for each child.

Minecraft Adventures

Ages 8 through 14
Course Code: MCAV-PE-A

You and your friends will work together as our instructor guides you through a story to create a Minecraft Adventure Map! When the map is finished, you will play with your Minecraft creation. We will provide a server, a router, a projector, and a laptop that is connected through our local network without access to the Internet for every child. It's safe, fun, and exciting!
The host will get an internet link to download the Minecraft map and the children can keep on playing with their Minecraft Adventure Map.
