Participation Bonds

Participation bonds are fully secured; therefore Fedgroup Participation Bond Managers does not provide any guarantee with respect to the capital or the return of the fund. Independent financial advice should be sought as not all investments are suitable for all investors.

About Fedgroup Participation Bonds and FedBond	Fedgroup Participation Bonds is a registered collective investment scheme in participation bonds. Fedgroup Participation Bond Managers manages the FedBond Fund and has done so since 1 January 1991. Participation bonds allow investors to invest in a fund that holds a portfolio of first mortgage bonds over commercial, industrial and retail property in South Africa. The fund lends up to 75% of the value of the property to a borrower and charges interest on the loan. The loan is secured against the title deeds of the property. The loan amount is limited in respect of the value of the property, and the remaining balance of 25% serves as additional security, which can be used as a recovery mechanism in the event that the borrower defaults. The investment is fully secured. Participation bonds are governed by the Collective Investment Schemes Control Act 45 of 2002 and are strictly regulated by the Financial Sector Conduct Authority, which adds to the already low risk associated with investing in a participation bond. The manager or its directors may periodically have an interest in a property. Potential conflicts of interest are managed through our conflict of interest policy, ensuring that all transactions are concluded on an arm's length basis in the interests of the investors. The annual financial statements of Fedgroup Participation Bonds and the FedBond Fund are subject to an external audit by their auditors on an annual basis.
Fund objective and investment strategy	The objective of the FedBond Fund is to earn a higher level of income than money market funds, while protecting the capital value. The investment strategy is structured to achieve this objective.
Risk profile	Fully secured and very low risk. A maximum of 75% of the value of the property is bonded and the property acts as security for the loan.
Fedgroup fees	Zero fees. As the interest and costs are charged to the bondholder, the fund is able to offer investors the opportunity to invest without charging any fees. All or part of the investment may be repurchased by the manager provided that the repurchases will only be effected five working days after receipt by the manager of written notice and all necessary documentation as determined by the manager.
Capital withdrawal and redemption	The tax-free savings product may be withdrawn with five working days' notice.
Interest rates	The interest rate applicable to the tax-free savings option is determined by the manager from time to time. It is linked to the prime lending rate and will move in accordance with it.
