Program Director: Renee Bassaly, DO

Program Faculty: Renee Bassaly, DO Fellowship Director Assistant Professor - Division Director USF FPMRS

Kristie Greene, MD Assistant Professor - USF FPMRS

Allison Wyman, MD Assistant Professor - USF FPMRS

Trainees Per Year: 1

Program Length: 3 Years

Specialty Certification: Graduates are eligible to sit for ABOG FPMRS Boards

Program Description: The program strives to produce highly skilled graduates, capable of assuming leadership roles in the field of academic FPMRS. Fellows receive both didactic training and hands-on clinical experience in the office, and surgical suite settings, with increasing responsibilities over the course of their training. Fellows participate actively in caring for Urogynecologic, Urologic, and Colorectal patients with routine and complex clinical conditions, in a collaborative environment. Fellows are exposed to a very large number of in- and out-patient surgical opportunities, including Robotic, Laparoscopic, Transvaginal, and Open approaches. Office exposure includes new and existing patient evaluations, office urodynamics and cystoscopy, as well as interpretation of imaging studies including 4D ultrasound and MRI studies. Fellows also receive hands-on training in performing basic science, clinical, and translational research, and have access to a large collection of clinical patient data, as well as numerous imaging studies performed for urogynecologic indications. The research curriculum and experience have sufficient flexibility to accommodate different levels of interest and expertise among individual fellows.
