Foreword

Data and information continue to be critical in the development of the education sector. As the country yearns for a knowledge based economy, everyone has set their focus on the contribution of the education sector as it is responsible for development of human capital to support the achievement of the long term development goals and even sustain the status once achieved. The policy and planning in the sector has to therefore be based on evidence so that the interventions we put in place for the sector's development remain grounded on facts. The Ministry thus takes the production of data and information very seriously and has taken considerable strides in ensuring credible, reliable and accurate data is produced for the purpose of effective policy and planning. The data produced by the sector also helps in tracking the achievements the sector has made against the commitments it has made to the public.

The 2016 statistical booklet puts emphasis on a range of indicators core to the sector. The booklet covers indicators transcending early childhood development and education, primary and secondary levels of education. It covers the distribution of learning institutions as our education supply points; enrollment and enrolment rates; number of teachers in their categories of employment (Government and School Board employed teachers), their levels of qualification and the pupil teacher ratio; status of school infrastructure with special emphasis on classrooms and sanitation facilities. These indicators are produced for private and public schools at all the three levels of education with rural and urban dimensions where possible. These indicators provide an opportunity to establish the progress made towards achieving the objectives of the education sector and to look into the future in terms of policies that need to be put in place towards ensuring equity in accessing education while also addressing quality issues.

The results presented in this booklet are the outputs of the Education Management Information System whose evolution the Ministry continues to invest in. The Ministry is committed to the continuous improvement of the credibility, reliability and accuracy of these results. Though the Ministry has made significant progress in the recent past, a number of challenges remain outstanding. These are expected to be resolved in the new regime of EMIS which targets precision in reporting. I wish to reiterate the Ministry's commitment in producing quality education statistics to inform management of education programs not only in basic education but across the sector.

Finally, I wish to point out that the booklet is very informative for the purposes of planning, resource allocation, research and programming in the country. It also creates an avenue for engaging other stakeholders in the private sector and interested development partners. I encourage all stakeholders to use the results extensively in the improvement of the sector.

Prof. George A. O. Magoha, CBS

CABINET SECRETARY FOR EDUCATION

Acknowledgements

I would like to thank everyone who put their time and energy to the production of the 2016 Basic Education Statistical booklet. This being the third consecutive statistical booklet produced by the Ministry since the Annual Schools Census was revived in 2014, it shows the sector is committed to the production of data in support of efficient policy formulation and planning and overall management of the education sector. I would like sincerely thank the UNICEF Kenya Country Office - Education under the leadership of Dr. Daniel Baheta for the consistent support that it has extended to the Ministry in the past two rounds of data collection and processing and even for supporting this round of data processing. The technical support received from Andriamamy Rakotomalala also supported by the UNICEF is deeply honoured.

I would like to thank the UNESCO Institute of Statistics under the UNESCO Regional Office for the quality assurance backstopping provided to the technical team in the data processing. I would also like to appreciate the tremendous effort put into this round of data collection and processing by the Central Planning and Project Monitoring Unit under the leadership of the Chief Economist. The immense energy put into this process by the unit cannot be overemphasized. The unit facilitated the distribution of data collection tools; verification of completeness of data submitted from schools; supported data entry, data cleaning, validation and the drafting of this booklet.

The dedicated contribution from the County Directors of Education; County Quality Assurance and Standards Officers; Sub County Directors of Education; Sub County Quality Assurance and Standards officer, Sub County EMIS Clerks and school heads deserve a lot of plaudits. Without the support and dedication from the field team, the 2016 results would not be here to be seen. The devotion from the field team ensured the sector achieves the objective of delivering the 2016 school census in time.

Finally I would like to thank the Kenya National Bureau of Statistics for their support in ensuring the results delivered meet the desired standards of quality set by the National Statistical System. The process and logistics involved were gruesome but thanks for the continued support by relevant stakeholders the 2016 school annual census was confirmed as credible.

Dr. Belio Kipsang, CBS
PRINCIPAL SECRETARY,
STATE DEPARTMENT OF EARLY LEARNING & BASIC EDUCATION

Executive Summary

The Ministry of Education has released the 2016 statistical booklet which continues to affirm its commitment to deliver reliable and accurate data information. The purpose for data collection is to help in planning and implementation of Education projects. The booklet covers Early Childhood Development and Education, Primary and Secondary based on the 2016 school census conducted in basic education institutions.

The number of Early Childhood Development and Education centres increased from 40,775 in 2015 to 41,248 representing a 1.2% growth in 2016 while the average size of a centre maintained an average of 78 (85 in public centres and 66 in private)

Primary schools increased from 31,333 in 2015 to 33,232 in 2016 representing 6.1% increase compared to 6.4% in 2015; the average school size dropped from 322 to 309. Growth in Private schools remained stagnant at 15% while Public schools decreased from 3.2% to 2.4% representing 0.8% decrease. In Secondary education, the number of schools increased from 9,440 in 2015 to 9,966 in 2016. Secondary schools also reported an increase of 5.6% between 2015 and 2016 compared to 8.1% between 2014 and 2015. Public schools increased by 3.8% compared to 18.7% in private schools. The average size of secondary schools increased from 271 in 2015 to 273 in 2016.

ECDE enrolment increased by 1% between 2015 and 2016 slowing down from growth of 4.9% between 2014 and 2015. Gender parity based on absolute enrolment dropped marginally from 0.97 to 0.96. Primary education, enrolment increased by about 190,000 students representing 1.9% between 2015 and 2016. Gender parity based on absolute enrolment has been stable for the last five years at 0.97. In secondary schools, enrolment increased by about 165,000 students representing 6.4% growth between 2015 and 2016. Girl's enrolment continued an impressive growth of 9.6% between 2015 and 2016 pushing up the gender parity 0.05 units from 0.9 to 0.95.

The number of special needs enrolled in primary schools stood at 222,700 pupils with 11,400 students enrolled in secondary schools. The number of girls with special needs in both primary and secondary is similar at 45%. In primary 44% of pupils with special needs have intellectual impairments while 34% have hearing and visual impairments (17% hearing and 17% visual). 14% have physical impairments while 8% have multiple special needs cases.

Gross Intake Rate (GIR) has stabilized at 100% while the Primary Completion Rate (PCR) had gained 1% to settle at 84% between 2015 and 2016. Transition from primary to secondary lost a percentage in 2016 having recorded 86% in 2015.

ECDE Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) continued to show stability with GER recording 76.6% in 2016 a drop from 76.4% in 2015. NER gained 0.03% points from 74.6% in 2015 to 74.9% in 2016. In Primary schools GER increased from 103.6% in 2015 to 104.2% in 2016 while NER increased from 88.4% in 2015 to 91.2% in 2016. In Secondary the GER increased from 63.3% in 2015 to 66.8% in 2016 while the NER increased from 47.8% in 2015 to 49.5% in 2016. The gap between GER and NER closed up from 1.8% in 2015 to 1.3% in 2016.

ECDE had a total of 110,819 according to the 2016 school census with 81% being female. 62.1% of the teachers were employed by the County Governments in public ECDE centers while 37.9% were in private centers. According to the school census, Primary schools had an increase of teachers by 6% from 332,166 in 2015 to 351,103 in 2016. 71.2% practice in public schools while 28.8% practice in private schools. Public schools had 86% employed by TSC while the rest are employed by school Boards. In Secondary, 138,138 teachers were reported. This being an increase of 7% from 129,306. 90% of them were in Public schools.

The Pupil Teacher Ratio (PTR) in ECDE stood at 31 and 25 in public and private respectively. The overall PTR stands at 29. Primary schools has a similar PTR as ECDE at 29 with private schools having a teacher for every 17 pupils. Secondary schools PTR stands at 20 for both public and private.

The booklet has four key chapters including the methodology used during the collection of data, its processing and validation, the limitations and the steps taken towards the improvement of quality of data delivered by the Ministry. The annexes provide detailed information obtained at the County level.

Chapter One: Introduction

Education plays a major role in transforming the country into a more competitive nation globally as is in line with vision 2030 of ensuring quality and affordable education for all where education is not only a learning process but one that equips its people with the necessary know how to sustain themselves socially and economically. The Ministry therefore ensures Kenya has the necessary knowledge, skills and manpower to make it more prosperous.

Overview of the Ministry

The Ministry of Education in the current government structure was established through the Executive Order No 2 of May 2013. The order mandated the Ministry to among other functions, manage education and training matters in the country.

Vision

The vision of the Ministry is to have *a globally competitive education, training, research and innovation system for sustainable development.*

Mission

To provide, promote and coordinate the delivery of quality education, training and research and enhance integration of Science, Technology and Innovation into national production systems for sustainable development.

Core Values

The operational environment is governed by a desired set of core values, which constitute the desired organizational culture. The core values of the Ministry include:

1. **Integrity** – Committed to acting in an honest, accountable and transparent manner in all our undertakings.
2. **Professionalism** – Committed to the highest levels of achievement obtainable through competencies and critical skills.
3. **Teamwork** - Embrace teamwork and collaboration both within the Ministry and with all partners in the provision of education services.
4. **Excellence** - Committed to world class benchmarking of standards
5. **Efficiency**- Strive to achieve the highest value of benefit from the deployment of resources, particularly to the learner.
6. **Innovativeness and creativity** – Committed to setting and maintaining high standards of education and training through continuous improvement of service delivery.
7. **Upholding cultural diversity**- Education seeks to create a cohesive society where all people live together harmoniously regardless of race, tribe, creed, or geographic area of origin.

Organization of the Ministry

The Ministry is comprised of three State Departments i.e. the State Department of Basic Education; the State Department of Vocational and Technical Training; and the State Department of University Education. The three state departments have the following directorates:

State Department of Basic Education

1. **Administration and Planning:** The directorate provides shared services to technical directorates. The directorate is further arranged in various units that include Administration, Human Resource Management and Development, Accounts, Finance, Central Planning and Project Monitoring Unit (CPPMU), Information and Communication Technology; Procurement; HIV/AIDS Unit; Gender; and Guidance and Counseling.
2. **Directorate of Primary Education:** The directorate is responsible for the formulation of primary education policies; implementation of primary education; primary schools teachers training; and Primary Special Needs Education.
3. **Directorate of Secondary Education:** The directorate co-ordinates secondary education programs.
4. **Directorate of Teacher Education:**
5. **Directorate of Special Needs Education:**
6. Directorate of Field Coordination and Co-Curricula:
7. **Directorate of Early Years Education:** The directorate is responsible for the formulation of pre-primary education policies;
8. Directorate of Projects Delivery and Coordination
9. **Directorate of Policy, Partnerships and East Africa Community Affairs:** The directorate coordinates overall policy formulation and nurturing partnerships between the Ministry and its development partners within the country and beyond.
10. **Directorate of Adult and Continuing Education:** The directorate coordinates Adult and Education programs; provides basic education and training opportunities to adults and out of school youth aged 15 years and above who either missed to join the formal education system in their childhood or dropped out of school before attaining sustainable levels of education.

State Department of Vocational and Technical Training

11. **Administration and Planning:** The directorate provides shared services to technical directorates. The directorate is further arranged in various units that include Administration, Human Resource Management and Development, Accounts, Finance, Central Planning and Project Monitoring Unit (CPPMU), Information and Communication Technology; Procurement; HIV/AIDS Unit; Gender; and Guidance and Counseling.
12. **Directorate of Youth Training:** The directorate is mandated to revitalize and rehabilitate Youth Polytechnics countrywide. This directorate addresses issues of youth with regard to access of relevant education and training, employment and participation in national development.

13. **Directorate of Technical Vocational Education and Training (TVET):** The directorate is mandated to coordinate and implement technical education and training in the country. This includes enhancing access, equity, quality and relevance in technical education and training. The directorate also fosters linkages and collaborations between industry and TVET institutions.

State Department of University Education

14. **Administration and Planning:** The directorate provides shared services to technical directorates. The directorate is further arranged in various units that include Administration, Human Resource Management and Development, Accounts, Finance, Central Planning and Project Monitoring Unit (CPPMU), Information and Communication Technology; Procurement; HIV/AIDS Unit; Gender; and Guidance and Counseling.
15. **Directorate of Higher Education:** The directorate collaborates with relevant bodies to formulate and review of policies on Higher Education; expand access and improve quality and relevance of university education; coordinate admission of students to public universities.
16. **Directorate of Research Management and Development:** The mandate of the directorate includes: formulation of policy for research, science, Technology and Innovation; knowledge management; facilitating and guiding the national research system through policies that rationalize the integration of research and development into overall national economic development; and integrating research into national development.

In addition to the directorates, the Ministry has other key sector players which include The Teachers Service Commission (TSC); Semi-Autonomous Government Agencies (SAGA); Unions; Civil Societies; and the Kenya Private Schools Association.

Chapter Two: Methodology

The Ministry continues to deliver quality data to support the development of education countrywide hence the exemplary commitment to process and produce this statistical booklet. The sector has ensured the methodology used to produce the data is sustained at high standards that are beyond reproach, transparent and strives to improve future productions. The 2016 Annual Schools Census followed the process detailed below.

Data Collection Tools

During the 2016 Schools Census exercise, the Ministry made a slight improvement of the ECDE and Primary schools tool, not on the variables collected, but on the structure of the sections to ensure clear distinctions between the ECDE and Primary sections. This move was informed by the need to avoid challenges experienced by school heads where some figures meant for ECDE section found themselves in the primary section of the tool. There was no change made on the variables collected in secondary schools. Additional clarifications were made on the instructions for completing the primary and secondary tools to improve precision of the responses provided by school heads. Please see the tool annex 4a and 4b.

Data Collection and Processing

The data collection tools were printed and distributed to the two hundred and ninety (290) Sub County Offices in the month of August 2016. The Sub County Offices subsequently distributed the tools to their respective schools in the first two weeks of third term of 2016 which began in September of that year. The distribution was based on the updated master school list generated from the 2015 Schools Census data set. Schools spent the second half of the month of September to complete the tools after which they returned two copies of the tools to their respective Sub County Offices in the month of October. The third copy is expected to be maintained by schools for their records. The triplicate design of the data collection tools is maintained to ensure each school and the Sub County offices have copies as census records while the original copy is forwarded to the Ministry for central processing.

The first frontier of data processing was the Sub County Offices where coverage was assessed to ensure all schools participated in the census exercise. Establishment of new schools being a continuous process, there were schools that were obviously out of the 2015 schools master list. There are schools that closed down and this verification could only be possible at the Sub County level. The second level of verification carried out by the Sub County was the completeness of the submitted data collection tools. This was done to ensure possible data gaps are addressed while the data collection tools were still close to the data providers.

The data collection tools were finally submitted to the Ministry's headquarters in the month of October/November 2016. The data entry did not happen until January 2017 owing to the increased surveillance in the 2016 national examination which involved most of the officers who are usually engaged in the data entry exercise. The data entry exercise was carried out by a team of one hundred (109) clerks, 14 from the Ministry's headquarters and 95 drawn from fortyseven (47) counties. The data entry exercise lasted two weeks beginning 16th January 2017.

Data cleaning was carried out in the month of February 2017.

Estimation for Non Response

During the data cleaning, the Ministry established that about 5000 schools had not submitted their questionnaires despite being in the previous school census. Similar to the cases established in the 2015 census, most of the schools in the missing category were private, some of which had been closed down due to administrative decisions. To cover 100% reporting, estimation was done taking the missing schools into account and simulating the results of the previous census.

Limitation of the 2016 Results

Completeness of the data collection tools

Reduced coverage compared to 2015

Update of what should be static data for instance a school connected to electricity in 2015 is not connected in 2016

Reporting

The 2016 Basic Education Statistical Booklet is a continuation of the annual statistical publication initiated in 2015 containing 2014 data. The booklet has been put together by a technical team from the Ministry of Education with technical oversight provided by an EMIS expert who also doubles up as an Education Economist. The booklet has been validated by the senior management of the Ministry.

Chapter Three: Highlights of 2016 Schools Census Results

This chapter provides highlights of the 2016 schools census results with provision for trend of selected indicators from 2012. The indicators presented hence include number of schools and corresponding school sizes for each level; enrolments and enrolment rates for each education level; comparative schooling profiles for selected years; promotion, repetition and dropout rates selected for internal efficiency indicators; teachers and pupil teacher ratios; deployment/distribution of teachers; text books and pupil text book ratios; classrooms and class sizes; proxy for system outputs measured by examination results for each of the relevant levels; and infrastructure.

Number of Schools

Table 1 below shows the trend in the growth of ECDE centers, primary and secondary schools. The number of ECDE Centers increased from 40,775 in 2015 to 41,248 in 2016 representing a growth of 1.2% growth. The growth saw an average of 7 new public and 3 new private centers per county compared to an average of 2 new public and 10 new private centers per county in 2015. The share of private ECDE centers therefore remained stagnant at 39%, the same share reported in 2015. The average size of an ECDE center in 2016 is 78 (85 in public centers and 66 in private).

Table 1: Number of Schools by Level

	2012	2013	2014	2015	2016
ECDE					
Public	24,654	24,702	24,768	24,862	25,175
Private	15,104	15,443	15,443	15,913	16,073
Total	39,758	40,145	40,211	40,775	41,248
Average school size	68	71	75	78	78
Primary					
Public	20,307	21,205	21,718	22,414	22,945
Private	6,242	6,821	7,742	8,919	10,287
Total	26,549	28,026	29,460	31,333	33,232
Average school size	368	352	338	322	309
Secondary					
Public	6,188	6,807	7,686	8,297	8,609
Private	986	1,027	1,048	1,143	1,357
Total	7,174	7,834	8,734	9,440	9,966
Average school size	267	269	267	271	273
Total Basic Education Institutions	73,481	76,005	78,405	81,545	84,446

Source: Ministry of Education

At primary level, the number of schools increased by 6.1% between 2015 and 2016 compared to 6.4% in 2015. Private schools continued to grow at 15% similar to the rate reported in 2015 while

the growth in public schools slowed down by 0.8 percentage points to record 2.4% in 2016 compared to 3.2% in 2015. The average school size dropped from 322 in 2015 to 309 in 2016.

Secondary schools reported an increase of 5.6% between 2015 and 2016 compared to 8.1% between 2014 and 2015. Public secondary schools increased by 3.8% compared to 18.7% for private schools. The growth in private schools is not necessarily an increase in newly established schools but includes schools that had not participated in the census in 2014 and 2015 despite them being in operation. The share of private schools increased from 12% in 2015 to 14% in 2016 further strengthening the role of the private sector in providing secondary education. The average size of a secondary schools gained four more students to stand at 271 compared to 267 in 2014.

Enrolment in Public and Private Schools

Table 2 shows enrolments in public and private schools for ECDE, primary and secondary levels of education. One out of three children in ECDE in 2016 was reported to be in private centers. At primary, 16% of the pupils go to private schools; and in secondary 8% of the students go to private schools.

Table 2: Enrolment in Public and Private Schools 2016

	Public	Private	Total	% Private
ECDE	2,144.6	1,055.3	3,199.8	33%
Primary	8,595.1	1,685.1	10,280.2	16%
Secondary	2,512.7	211.1	2,723.9	8%

Source: Ministry of Education

Enrolment by Level of Education and Gender

Table 3 below shows the evolution of enrolments in ECDE, Primary and Secondary levels of education as well as the gender composition of enrolments at these levels.

Table 3: Enrolment by Gender and Level of Education ('000)

		2012	2013	2014	2015	2016
ECDE	Boys	1,386.5	1,465.0	1,543.5	1,607.4	1,634.2
	Girls	1,324.3	1,400.4	1,476.4	1,560.5	1,565.6

Source: Ministry of Education

ECDE enrolment increased by 1% between 2015 and 2016 slowing down from a growth of 4.9% between 2014 and 2015. Gender parity based on absolute enrolment dropped marginally from 0.97 in 2015 to 0.96 in 2016. The average figures over the last five years indicate that ECDE gender parity largely remains within the region of parity (0.97 - 1.3).

The total number of pupils enrolled in Primary Education increased by about 190,000 representing a growth of 1.9% between 2015 and 2016. The primary gender parity index based on absolute enrolment has been stable for the last five years at 0.97. In secondary schools, enrolment increased by about 165,000 students representing a 6.4% growth between 2015 and 2016. Girls' enrolment at secondary continued its impressive growth recording a 9.6% increase between 2015 and 2016 and pushing up the gender parity 0.05 units from 0.9 to 0.95.

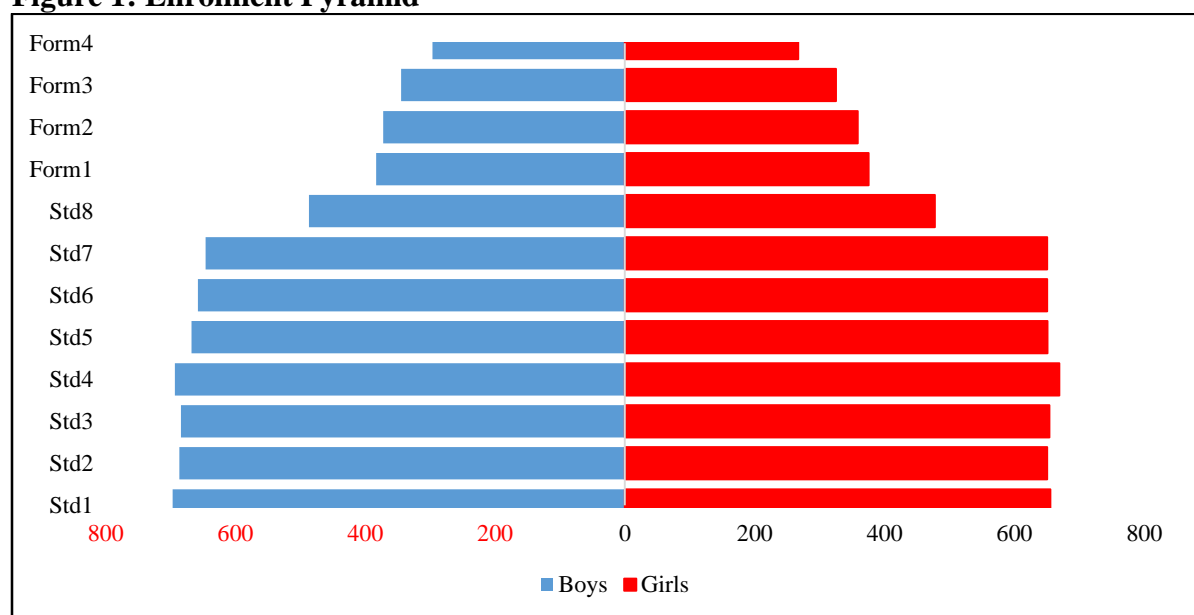

Table 4 below shows evolution of pupils and students by class from ECDE to the end of secondary education for the period between 2012 and 2016.

Table 4: Enrolment by gender, Level and Class

	Boys ('000)					Girls ('000)

Source: Ministry of Education

Figure 1 below provides a summary of the enrolment in primary and secondary levels of education. The pyramid gives the number of boys and girls in standard one to form four presenting an opportunity to visualize the volume of enrolments at these levels.

Figure 1: Enrolment Pyramid

Learners with Special Needs

Table 5 below presents the total number of learners with special needs in primary and secondary schools in 2016. A total of 222,700 pupils and 11,400 students were reported as enrolled in primary and secondary schools respectively. The share of girls with special needs is similar in both primary and secondary schools at 45%. In primary schools, 44% of the pupils with special needs have intellectual impairments while 34% have hearing and visual impairments (17% hearing and 17% visual). 14% have physical impairments while 8% were reported to have multiple special need cases.

Table 5: Learners with Special Needs

	Hearing Impaired		Intellectually Impaired		Physically Impaired		Visually Impaired		Multiple Disabilities	
	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
Primary	19,880	18,300	55,143	43,143	10,279	7,948	17,901	13,166	19,414	17,553
Secondary	1,522	1,243	711	718	216	176	1,918	1,329	1,896	1,697
Total	21,402	19,543	55,854	43,861	10,495	8,124	19,819	14,495	21,310	19,250

Source: Ministry of Education

In secondary, one out three students with special needs is visually impaired. Physical impairment accounts for 28% while hearing impairment accounts for 24% of total the enrolment of students with special needs. Unlike primary schools where intellectual impairment accounts for the single largest share of enrolment at 44%, it only accounts for 13% of the total enrolment in secondary school raising concerns of what happens to the children beyond primary education.

Basic Education Schooling Profile

Table 6 below presents main schooling profile indicators between 2012 and 2016. As shown in the table, the Gross Intake Rate (GIR) has stabilized at 100% since 2015 indicating that only one generation joins class one and at the age prescribed by the Ministry of 6 years. Access to class 6 is beyond 100% indicating possible repetition or re-entry into the system by pupils who may have at one point dropped out. Access to standard eight, a proxy indicator for the Primary Completion Rate (PCR) gained a one percentage point between 2015 and 2016 to settle at 84%. Whereas these indicators depict maturity and stability of the education system, the booklet in a later section discusses regional variations with respect to these indicators.

Table 6: Schooling Profile Indicators

	2012	2013	2014	2015	2016
Primary					
Access Std1	106%	104%	102%	100%	100%
Access Std6	97%	102%	100%	103%	105%
Access Std8 (Primary completion)	82%	80%	79%	83%	84%
Transition Primary to Secondary					
Promotion rate Std8 to Form1	69%	75%	81%	81%	
Transition rate Pri. to Sec.	73%	79%	86%	85%	
Secondary					
Access Form1	53%	60%	63%	68%	70%
Access Form4	46%	49%	48%	52%	57%
Retention					
In Primary Std1 to Std6	92%	98%	98%	104%	107%
In Primary Std1 to Std8	77%	77%	78%	83%	84%
In Secondary Form1 to Form4	87%	82%	76%	76%	82%

Source: Ministry of Education

Transition from primary to secondary lost a percentage point between 2016 having recorded 86% in 2015. About 15% of the children who complete primary schools never have a chance of joining secondary education.

Since 2012, access to Form 1 has been on an increasing trend gaining 17 percentage points in just 5 years. With 70% of the students expected to be in Form 1 joining secondary schools, this has to be one of the better performing education systems in Sub Saharan Africa. The probability that the students who are in Form 1 in 2016 will complete their secondary education in the prescribed period is also highly ranking at 82%. Figure 2 below shows the combined schooling profile for primary and secondary levels of education and the evolution between 2014 and 2016. Ideally in a universal education context, the GIR is expected to be 100% and retention at all grades maintained at 100% such that the completion rate is 100%. As Kenya is pursuing universal secondary education, the Primary GIR should be 100% and the secondary completion 100%.

Figure 2: Schooling Profile 2014 - 2016

In Figure 2, the Primary GIR has stabilized at 100% over the three years plotted indicating that most of the children joining school are from one generation. The retention between class 1 and class 7 is generally high at 100% with possible cases of children coming back to the system. Retention between class 7 and class 8 continues to remain an unanswered phenomenon in the sector. There is consistency in the share of pupils completing class 7 who fail to make it to class 8 averaging 20% between 2014 and 2016. Another 15% (2016) of the pupils who complete class 8 do not make it to Form 1. As indicated in Table 7 below and depicted in Figure 2 above, Transition between class 8 and Form one has significantly improved in the last three years. Retention in secondary has also made significant leap gaining 6 percentage points from 2015 to record 82% in 2016.

Table 7: Comparison of Access Rates 2009 - 2016

	2009	2014	2015	2016
Std1	113%	102%	100%	100%
Std2	113%	100%	101%	100%

Gross Enrolment Rates and Net Enrolment Rates

Table 8 shows the evolution of Gross Enrolment Rates (GER) and Net Enrolment Rates (NER) in ECDE, primary and secondary levels of education.

ECDE

ECDE GER and NER continued to show stability with the GER recording 76.6% in 2016, a marginal gain from 76.5% in 2015. The NER gained 0.3 percentage points from 74.6% in 2015 to 74.9% in 2016.

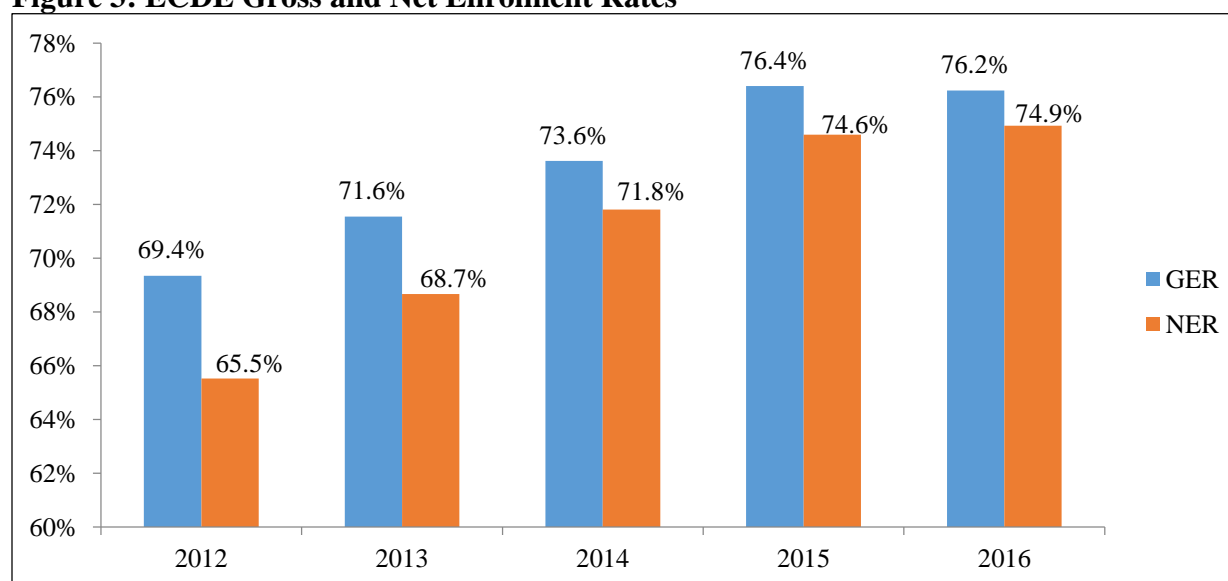

Table 8: Gross and Net Enrolment Rates

	2012	2013	2014	2015	2016
ECDE					
GER	69.4%	71.6%	73.6%	76.5%	76.6%
NER	65.5%	68.7%	71.8%	74.6%	74.9%
Primary					
GER	106.4%	105.0%	103.5%	103.6%	104.2%
NER	88.0%	88.1%	88.2%	88.4%	91.2%
Secondary					
GER	50.5%	54.3%	58.7%	63.3%	66.8%
NER	41.7%	44.5%	47.4%	47.8%	49.5%

Source: Ministry of Education

The gap between GER and NER closed up from 1.8 percentage points in 2015 to 1.3 in 2016 indicating that over time, children are starting schools when they are actually meant to be in school. Figure 3 below presents the evolution of GER and NER at ECDE.

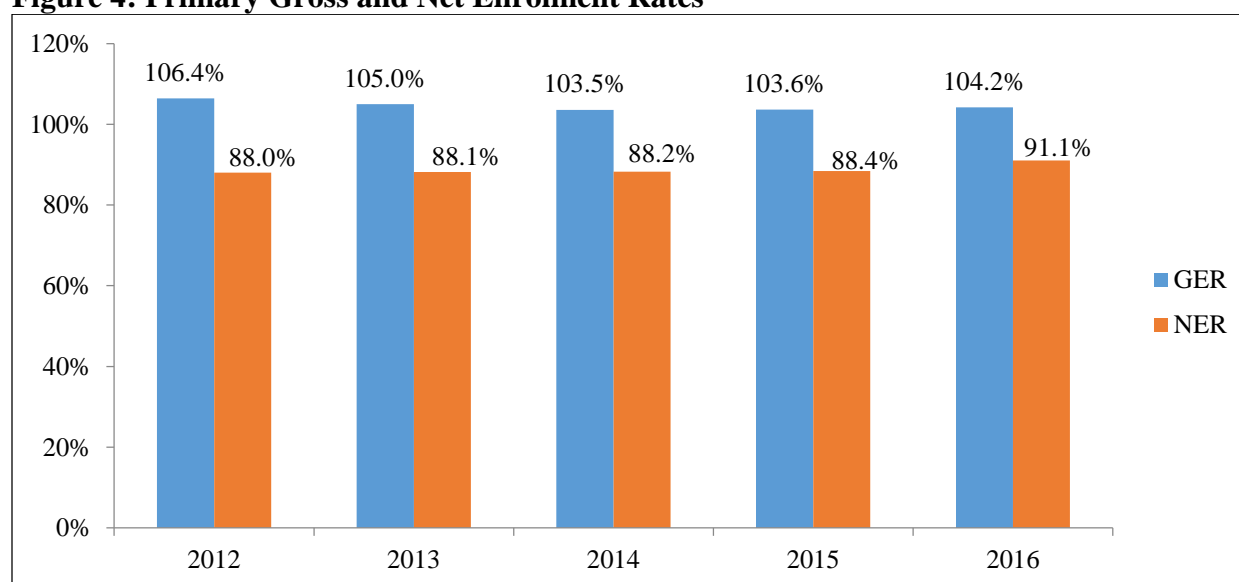

Figure 3: ECDE Gross and Net Enrolment Rates

Primary Education

In primary, the GER remained above the 100% mark increasing from 103.6% to 104.2%. Overall, these numbers show that the number of overage and underage pupils has reduced in the system. As discussed in the schooling profile section, children are increasingly joining school at the prescribed age. The marginal increment could be due to the coverage of schools where some, especially private schools, were missed in the 2015 census exercise. In comparison to the GER¹ from latest household survey targeting the school going children, the GER from the administrative data is within acceptable range of variation. The NER passed the 90 percent mark to reach 91.1% in 2016.

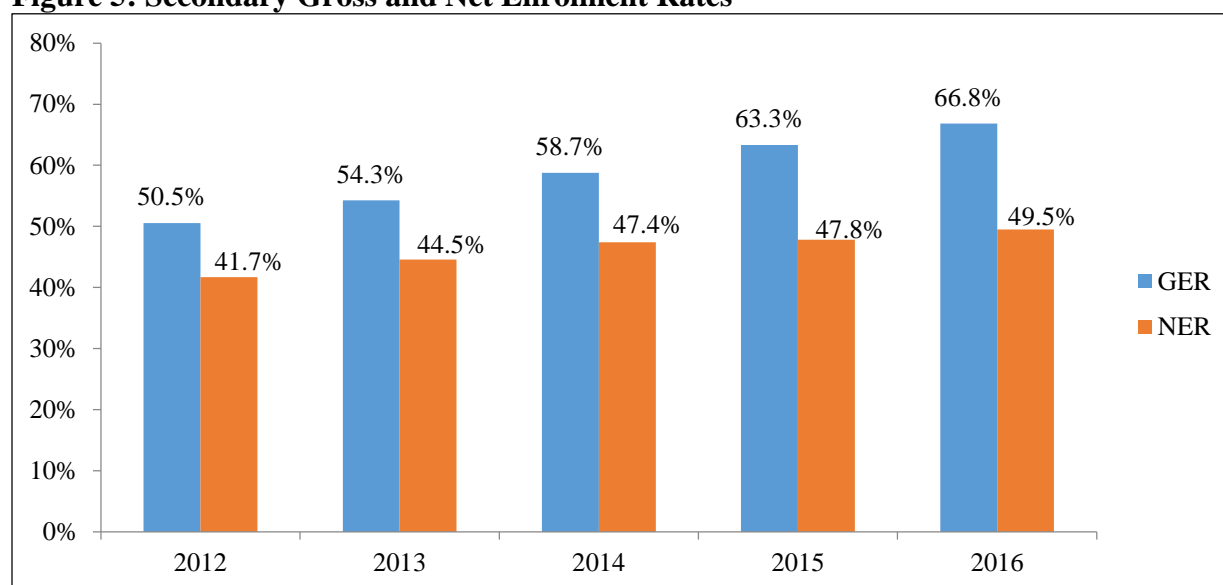

Figure 4: Primary Gross and Net Enrolment Rates

Secondary Education

Secondary GER gained 3.5 percentage points from 2015 to settle at 66.8% further strengthening the growth of secondary education in the country. The NER gained only 1.7 percentage points in the same period to reach 49.5%.

¹ The 2014 Kenya demographic and Health Survey indicates a primary GER of 104.5%

Figure 5: Secondary Gross and Net Enrolment Rates

Internal Efficiency Indicators

Table 9 presents promotion and repetition rates in 2016 for primary and secondary levels of education. The two have been selected to represent internal efficiency of the education system. The indicators have been computed using enrolments from 2015 and 2016 as well as repetition from 2016, all these by grade.

Table 9: Internal Efficiency Indicators 2016

	Promotion Rate			Repetition Rate		
	Boys	Girls	Total	Boys	Girls	Total
Std1	95.0%	96.8%	95.8%	3.4%	2.9%	3.2%
Std2	97.3%	98.1%	97.7%	3.0%	2.5%	2.7%
Std3	99.1%	99.5%	99.3%	3.0%	2.4%	2.7%
Std4	94.7%	94.7%	94.7%	3.4%	2.8%	3.1%
Std5	96.8%	97.0%	96.9%	3.1%	2.7%	2.9%
Std6	96.7%	96.1%	96.4%	3.4%	2.9%	3.2%
Std7	78.0%	72.7%	75.3%	4.6%	3.9%	4.2%
Std8	81.3%	78.4%	79.8%	1.2%	1.0%	1.1%
Form1	97.5%	95.2%	96.4%	0.2%	0.3%	0.2%
Form2	95.2%	90.1%	92.6%	0.4%	0.3%	0.3%
Form3	86.4%	80.3%	83.4%	0.8%	0.6%	0.7%
Form4				3.8%	2.2%	3.0%

Source: Ministry of Education

On average, the promotion rate is 92% at primary level of education and 91% in secondary. Similar to the schooling profile, the promotion rates are quite high from Class 1 to class 6 averaging 97%, 20 percentage points higher than the average in class 7 and class eight which stands at 77.6%.

According to the results, there is no significant difference between the promotion rates of boys in comparison to that of girls in primary schools. In secondary however, there is a 4.5 percentage difference between the promotion rate of boys and girls with girls recording 88.5% and boys 93%.

The repetition rate in 2016 is 2.9% and 1.1% in primary and secondary schools respectively. Class 7 reported the highest repetition rate in primary at 4.2%, 1.3 percentage points higher than the average. In secondary schools, Form 3 recorded the highest repetition rate at 3% compared to the 1.1% for that entire level of education. Generally, the repetition rate for boys is higher than that of girls throughout the two levels of education.

Teachers and Teacher Qualification

The table 10 shows the number of teachers by level of education. The numbers are disaggregated by gender and status (public and private schools) as well as the status of employment - whether employed by the Teachers Service Commission (TSC) or by the Schools Board of Management (BOM). There are a total of 110,819 teachers in ECDE according to the 2016 schools census, 81% of them female. Of all the teachers in ECDE, 62.1% are employed by county governments in public ECDE centres while the 37.9% are employed by management in private ECDE centres.

Table 10: Members of the Teaching Staff

STATUS	SECTOR	TSC_M	TSC_F	BOM_M	BOM_F	TOT_TSC	TOT_BOM	TOT_TRS
Public	ECDE			12,673	56,150		68,823	68,823
	Primary	106,266	107,930	19,789	16,062	214,196	35,851	250,047
	Secondary	48,068	31,499	29,075	15,005	79,567	44,080	123,647
Private	ECDE			8,288	33,708		41,996	41,996
	Primary			48,509	52,547		101,056	101,056
	Secondary			9,153	5,338		14,491	14,491

Source: Ministry of Education

The total number of teachers in primary schools in 2016 was 351,103 having increased by 6% from 332,166 in 2015. Half of the teachers reported in 2016 are female. Of the total number of teachers at this level, 71.2% practise in public schools while 28.8% practice in private schools. Out of the teachers practicing in public primary schools, 86% are employed by the TSC while the rest are employed by school boards. The share of female teachers employed by the TSC in primary schools is 50% while that of teachers employed by school boards is 45%.

In secondary, a total of 138,138 teachers were reported in 2016, 90% of them in public secondary schools. This was an increase of 7% from 129,306 reported in 2015. Close to 4 out of 10 teachers in public secondary schools are employed by school boards. The share of female teachers in secondary schools is much lower than the first two levels of education, recording 37.5% in 2016.

Figure 6: Primary Teachers Qualification

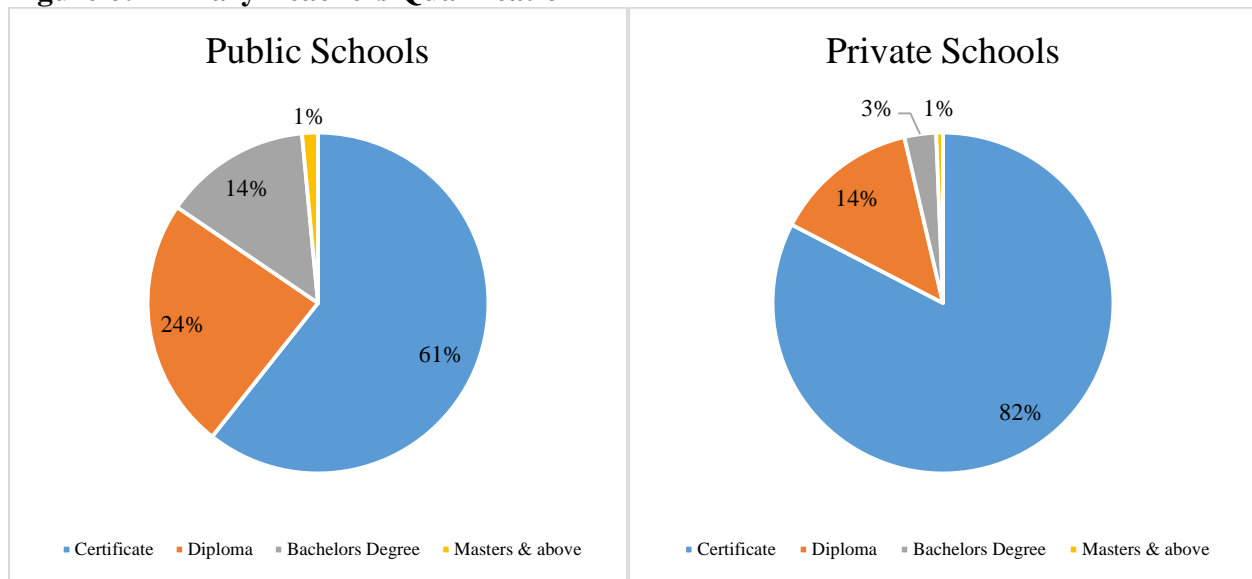

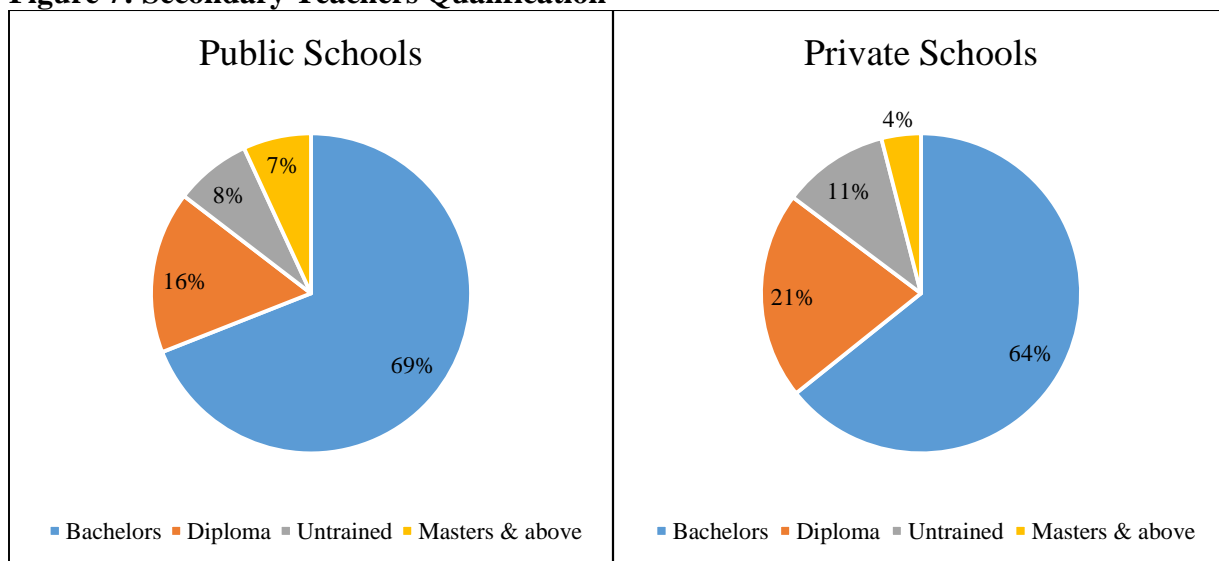

Figure 6 above shows the qualification of teachers in primary schools. Majority of teachers in primary have certificate qualification with 61% and 82% of teachers in public and private schools respectively reported to be certificate (P1) holders. About one quarter of the teachers in public primary schools have diploma qualifications compared to 14% in private schools. A bigger proportion of teachers in public schools have had a chance to advance their studies to bachelor degree level with 14% reporting having this qualification compared to 3 out of 100 teachers in private schools.

Figure 7: Secondary Teachers Qualification

As shown in Figure 7 above, about one quarter (24%) of teachers in secondary schools have qualifications lower than bachelor degree. 17% of teachers have diploma (16% in public while 21% in private schools). Over slightly over two thirds (68%) of teachers have bachelors as their highest qualification (69% in public and 64% in private schools). 8% of teachers are considered untrained (8% in public and 11% in private schools). These are mostly teachers who are employed by school boards to address teacher shortage in the short term. 7% of teachers in public secondary schools have postgraduate qualification compared to 4% in private secondary schools.

Pupils/Students Teacher Ratios

As indicated in Table 11 below, the Pupil Teacher Ratio (PTR) for ECDE in 2016 is 31 and 25 for public and private centres respectively. Overall, the PTR is 29 children for every teacher. Similar to ECDE, the primary PTR is 29. In private schools, there is an average of a teacher for every 17 pupils. In public primary schools, The PTR based on teachers employed by the TSC is one teacher for every 40 pupils which is in line with international standards for teacher distribution. Including the teachers employed by school boards, the ratio improves to a teacher for every 34 pupils.

Table 11: Pupil/Student Teacher Ratios– 2016

	Public			Private	Total		
	TSC	SMC	Total	Total	TSC	SMC	Total
Teachers							
ECDE			68,823	41,996			110,819
Primary	214,196	35,851	250,047	101,056	214,196	136,907	351,103
Secondary	79,567	44,080	123,647	14,491	79,567	58,571	138,138
PTR							
ECDE			31	25			29
Primary	40		34	17			29
Secondary	32		20	15			20

Source: Ministry of Education

The student teacher ratio at secondary level stood at 20 for both public and private schools. The PTR for public schools was established to be 5 units higher than that of private schools.

Schools Infrastructure

Classrooms and Average Class Sizes

Table 12 presents the status of classrooms in primary and secondary schools in terms of permanent and temporary structures. 13% of classrooms in primary schools are temporary in nature with significant variation between public and private schools. In public primary schools, 89% of structures used as classrooms are made of permanent materials compared to 82% in private schools.

Table 12: Classrooms in Primary and Secondary Schools

	Permanent in use	Temporary in use	Total	Average Class size
Primary				
Public	202,749	24,386	227,135	38
Private	68,250	14,501	82,751	20
Primary Total	270,999	38,887	309,886	33
Secondary				
Public	59,919	1,875	61,794	41
Private	8,050	732	8,782	24
Secondary Total	67,969	2,607	70,576	39

Source: Ministry of Education

In secondary schools, 4% of classrooms are temporary and similar to primary schools, the share of temporary structures is higher in private schools compared to public schools at 8% and 3% respectively. The average class size in secondary schools is 39 students per class (41 students per class in public schools and 24 students per class in primary schools). It is important to note that these are national averages and as such mask existing disparities across sub national administrative units.

Library and Science Laboratories in Secondary Schools

Table 13 presents the number of secondary schools that have study libraries and science laboratories. The table is based on the schools that responded to this question in the 2016 census exercise. A total of 2,758 schools have a study library representing 28% of secondary schools (24% of public secondary schools and 48% of private secondary schools).

Table 13: Library and Science Laboratories in Secondary Schools

Schools Status	Availability of Library			Availability of Science Laboratory		
	Yes	No	Total	Yes	No	Total
Public	2,103	6,487	8,590	5,873	2,719	8,592
Private	655	697	1,352	1,082	268	1,350
Grand Total	2,758	7,184	9,942	6,955	2,987	9,942

Source: Ministry of Education

On science laboratories, a total of 6,955 schools reported having at least a laboratory representing 70% of all secondary schools in the country (68% of public secondary schools and 80% of private secondary schools).

Pupils/Students Toilet Ratios

As presented in Table 14 the Pupil Toilet Ratio (PToR) in public primary schools in 2016 was 29:1 and 32:1 for boys and girls respectively. The toilet ratio for boys is well within the national norms of 30:1 while the toilet ratio for girls is way above the national norm of 25:1. In public secondary schools, the ratio was 19:1 for boys and 20:1 for girls. The toilet ratio in private primary and secondary schools for boys was 19:1 and 11:1 respectively while that of girls was 18:1 and 16:1 respectively.

Table 14: Number of Toilets and Pupil/Student Toilet Ratios

	Boys	Girls	Boys	Girls
Primary				
Public	150,575	132,073	29	32
Private	45,676	46,639	19	18
Primary Total	196,251	178,712	27	28
Secondary				
Public	67,118	59,641	19	20
Private	9,085	6,800	11	16
Secondary Total	76,203	66,441	18	20

Source: Ministry of Education

Schools Access to Electricity

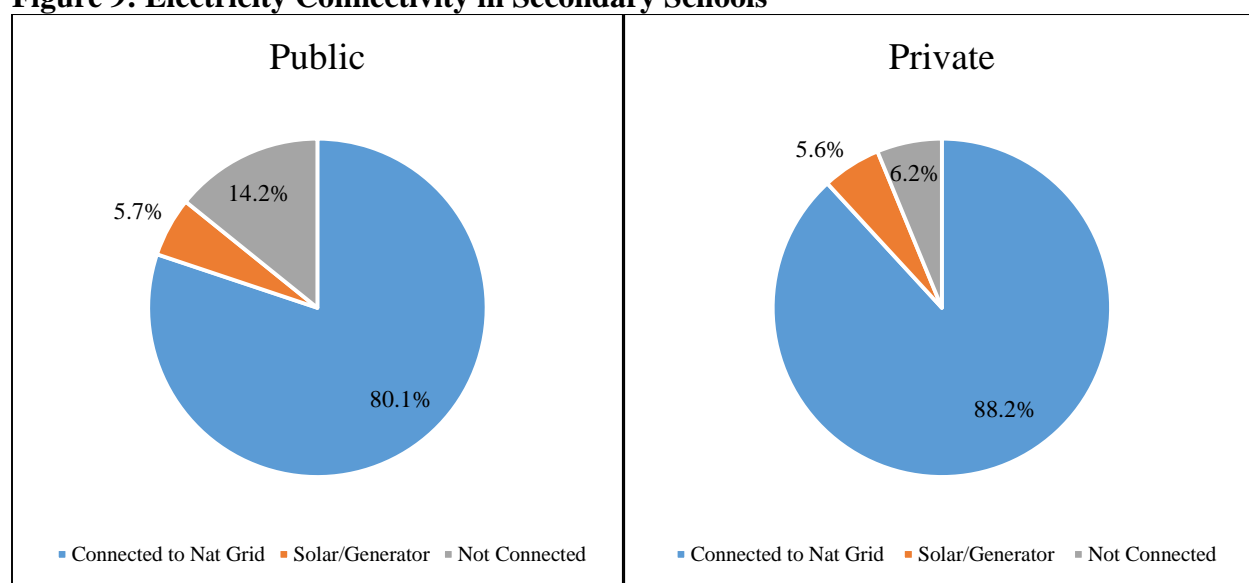

Results of the 2016 school census indicate that 80.5% of all primary schools are connected to electricity while 19.5% are not connected. Figure 8 shows the status of electricity connectivity in primary schools. 85.1% of all public primary schools are connected to an electricity source - 70% connected to the National Grid while 15.1% connected to other sources of electricity like solar and generator. 14.5% of public primary schools are not connected to any source of power. In private schools the results show that 70.2% of the schools are connected to an electricity source with 6 out of 10 schools are connected to the national grid while 8% are connected to power through solar and generator.

Figure 8: Electricity Connectivity in Primary Schools

In secondary schools, 87% of all secondary schools are connected to electricity while 16.7% are not. Figure 9 indicates that 85.8% of public secondary schools are connected to electricity (80% connected to the national grid and 5.7% connected to either solar or generator power). In private schools, 93.8% are connected to a power source (88.2% connected to the national grid while 5.6% connected to either solar or generator power). The proportion of public secondary schools not connected to a power source is about twice the proportion of schools without power in private secondary schools at 14.2% and 6.2% respectively.

Figure 9: Electricity Connectivity in Secondary Schools

Schools Access to Water

Figure 10 shows access to different water sources in public and private primary schools. Overall 92.5% of all primary schools have access to a source of water with 57.5% having access to tap or borehole water. In public schools close to half of the schools have access to piped water (tap and borehole) while one quarter relies on rain for their water needs. In private schools about 8 out of 10 schools have access to piped water.

Figure 10: Water Source in Primary Schools

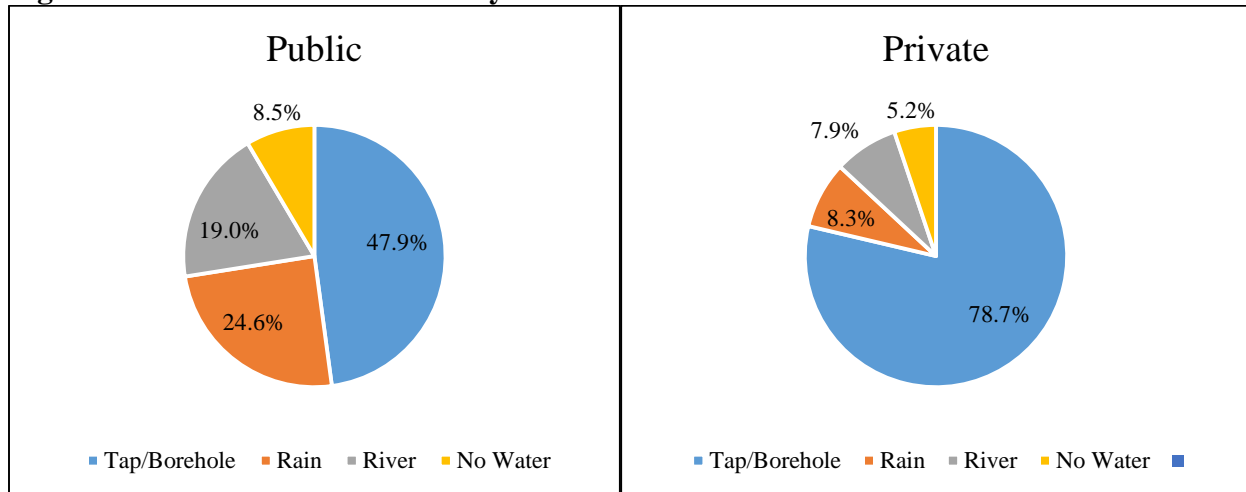

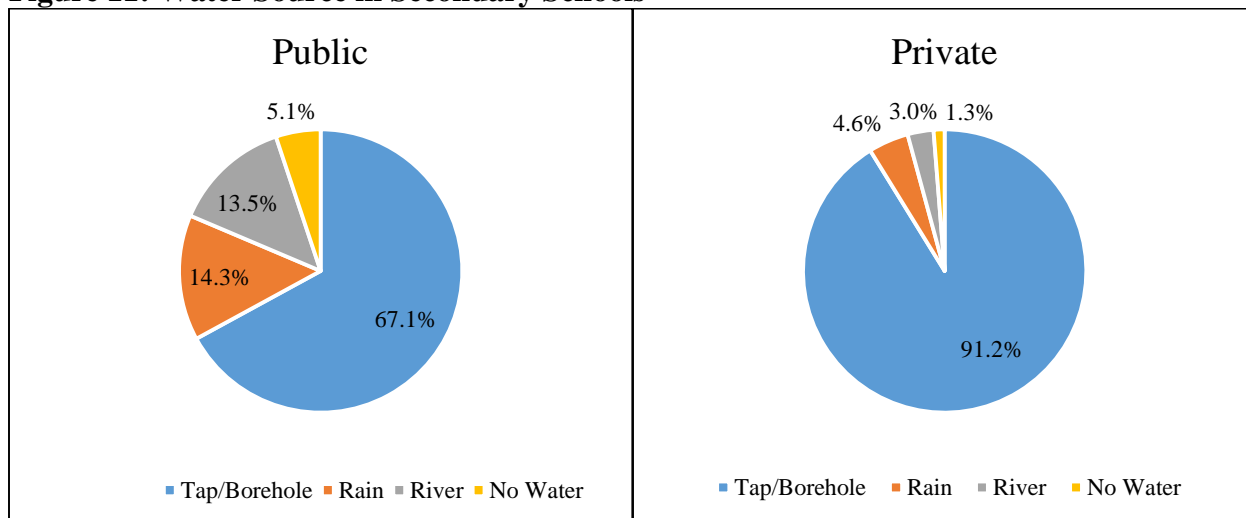

Figure 11 shows access to different water sources in public and private secondary schools. At least 95.4% of all secondary schools have access to water source. 67% of public secondary schools have access to piped water compared to 91.2% of private secondary schools. About one quarter of public secondary schools rely on harvested rain and river water for their needs compared to only 7% of private schools.

Figure 11: Water Source in Secondary Schools
