Affiliate Disclosure: Some links mentioned below are affiliate links, we may earn some amount if you make a purchase.Microsoft Excel is one of the popular tools which is used to store data in an organized manner. You can store large data on excel spreadsheets and perform actions in an easy manner than any other tool. You can add diagrams, insert pie charts, save contacts and other information on the Excel Sheet. MS-Excel stores all this information in .xlsx and .xls format. But certain devices or OS allows only vCard format. So to overcome such situations we must learn the steps involved to convert excel files to VCF format. Automated Solution Download Systools Excel to vCard Converter for Windows In the steps mentioned below, we will let you know how the Excel to VCF conversion is done without using any software. There is no need to spend money on Excel to VCF converter if you can follow the steps mentioned carefully. The conversion of Excel file to VCF format can be divided into three steps. In the first step, we will export an Excel file to CSV format. In the second step, this CSV contact file will be imported and in the final step, these contacts are exported to VCF format. Check out the detailed step below Step 1: Convert Excel to CSV Format In order to convert Excel to VCF format, it is first converted in CSV format Open the Excel file which you want to convert to your system Click on the Office button at the top corner of the excel window Now click on Save As->Other formats The save dialog box will open, select the folder or location where you want to save file Now in Save As type option, click on the drop-down menu Here select the option CSV (Comma delimited) (\*CSV) Click on the save button and confirmed yes The Excel file is now converted to CSV format Step 2: Import Contacts from CSV File Go to Start Window and type contacts Click on the contacts icon to open a contact window Select the users available and click on the Import tab Now choose the format where you want to import, select CSV (Comma delimited) (\*CSV) file Now select the CSV file created before and click on next The excel contacts will be imported Step 3: Export Contacts to VCF Again go to the contacts window and click on export Now select the option vCards (folder of.vcf files) Click on the Export button Select the folder where you want to save converted files Your excel file will be converted to VCF format In this way, you can manually convert excel to VCF format. The above method is manual and free but requires a lot of time and is also cumbersome, an easy way to do the same is by using a third-party Excel to VCF converter. Systools Excel to vCard is one such software that will do the task for you. In the next step, we will let you know how Systools Excel to VCF converter can be used to accelerate the process of conversion.
