CONTENTS

	Acknowledgments	xiii
	Introduction	xv
1	Introduction	1
	What Is Minecraft?	1
	Minecraft Versions	2
	Getting Started	3
	Basic Crafting	3
	Forging	4
	Creative Mode	5
	Cheats	7
	Redstone	7
	Using Mods	7
	Making Mods	8
	Installing the Example World	8
	Summary	9
2	Basic Redstone	11
	The Very Basics	11
	Obtaining Redstone	11
	Coordinates in Minecraft	12
	Placing Redstone	12
	Redstone Power	13
	Levers	13
	Buttons	14
	Pressure Plates	15
	Tripwires	17
	Redstone Blocks	18
	The Redstone Tick Rate	18

	Torches	18
	Redstone Lamps	21
	Redstone Repeaters	22
	Comparators	24
	Pistons	25
	Making a Door	27
	Hoppers, Dispensers, and Droppers	29
	Hoppers	29
	Dispensers	29
	Droppers	30
	Summary	30
3	Redstone Logic Gates	31
	Basic Logic Gates	31
	Inverters	31
	AND Gates	32
	De Morgan's Law	33
	Or Gates	34
	XOR Gates	36
	Logic Gate Example	37
	Clocks	38
	RS NOR Latches	40
	Monostables	42
	T-Flip-Flops	42
	Logic Theory	44
	Binary	44
	Logic Diagrams	45
	Summary	48
4	Advanced Redstone	49
	Block Updater Detector Switches	49
	Making Piston Doors	50
	Building a 2x2 Door	50
	Building a 2x2 Flush Door	52

	Block Swappers	55
	The Very Compact Block Swapper	55
	The Flush Block Swapper	56
	Piston-Tape Memory	58
	Displays	62
	Summary	65
5	Miscellaneous Redstone	67
	Rails and Minecarts	67
	Rails	68
	Minecarts	69
	A Minecart Example	72
	Liquid Physics	72
	Lava	73
	Water	74
	Hoppers	75
	Command Blocks	76
	Player Traps	76
	Command Block Player Trap	77
	A Redstone Player Trap	78
	TNT Cannons	80
	Summary	81
6	Server Hosting and Tools	83
	Server Hosting	83
	Server Hosting on a LAN	84
	Server Hosting Using Hamachi	85
	Server Hosting Using Port Forwarding	88
	Server Properties Options	92
	Renting Servers	93
	MCEdit	93
	Minecraft, Python, and Pi	96
	Installing Minecraft on the Raspberry Pi	96
	Running Minecraft	96
	Connect to the Pi from a Second Computer	97
	Summary	99

- 7** **qCraft** 101
 - Getting qCraft 101
 - Installing the Example World 102
 - Quantum Dust 103
 - Essence of Observation 103
 - Essence of Superposition 106
 - Essence of Entanglement 107
 - Automated Observers 108
 - Quantum Computers 110
 - Quantum Portals 113
 - Summary 115

- 8** **ComputerCraft** 117
 - Installing the Example World 117
 - A Computer Block 118
 - Getting Started 119
 - Example Code 122
 - A Light Chaser Example 124
 - Computer Networks 126
 - Disk Drives 128
 - Monitors 131
 - Clock Example 133
 - Turtles 135
 - Summary 138

- 9** **Modding with Forge** 139
 - Overview of the Modding Process 139
 - Preparing Your Computer 140
 - Install Minecraft 140
 - Installing Java 140
 - Adding Java to Your Path 141
 - Installing Eclipse 142
 - Installing Forge 144
 - Setting Up Eclipse 145

	A Quick Tour of Eclipse	146
	Java Basics	146
	Packages	147
	Classes	147
	Member Variables	148
	Methods	148
	Classes and Instances	149
	Inheritance	149
	Public and Private	149
	Naming Conventions	150
	Summary	150
10	Example Mod: Thorium	151
	Setting Up the Project	151
	Creating a Project	152
	Creating a Package	153
	Linking the Projects	153
	Basic Block Ore	154
	Creating the ThoriumOreBlock Class	154
	Packages and Eclipse	156
	Creating the Thorium Mod Class	157
	Creating the mcmod.info File	158
	First Run	159
	Making the Mod Usable	160
	Adding a Custom Texture	161
	Creating a Texture Image File	161
	Localized Names	162
	Spawning Ore Blocks	164
	Mining Thorium	168
	Forging Thorium Ore into Thorium	168
	Creating a New Block	169
	Adding a Crafting Recipe	170
	Making Thorium Glow	171
	Summary	172

- 11** More Modding Examples 173
 - Releasing a Mod 173
 - Building a JAR File 173
 - Installing a Mod 175
 - More on Modding 179
 - Item Example: Cooked Bone 180
 - Item Example: Hardened Diamond 181
 - Item Example: Obsidian Axe 182
 - Armor Example 183
 - Armor Item Classes 184
 - Armor Texture Files 185
 - Adding Armor to the Mod File 187
 - Armor Recipes 187
 - Graphical User Interfaces (GUIs) 187
 - Changes to the Mod Class 188
 - The “BlockSwitchableLight” Class 189
 - The “SmallThingsGUI” Class 190
 - Summary 191
- A** Resources 193
