Installation instructions for GlobalProtect (Palo Alto VPN client)

Note: If you have the Cisco AnyConnect VPN client installed, please uninstall it before installing the GlobalProtect VPN.

1. In an Internet browser, goto <u>https://vpn.valleybakers.com</u>. When prompted for credentials, log in using your network credentials:

.,,///.	paloalto NETWORKS®

	LOG IN

2. It will then prompt you to select the proper version of a client. There are two versions of GlobalProtect VPN for Windows, 32 bit and 64 bit. To determine which version of windows your computer is running, for Windows 7 right click My Computer, and select Properties. For Windows 10 right click the Windows start button and select System. On this dialog, the System Type describes what version of windows that is installed on your computer. If you have a MAC download the Mac 32/64bit agent.
