How to Use This Guide

This guide provides an introduction to the intricacies of referencing using the CQUniversity’s abridged version of the APA 7th Edition referencing conventions. Section 1 provides a brief overview of referencing. Section 2 and 3 offers detailed explanations of terms and concepts that are vital for the development of your knowledge, so you can become proficient at APA style referencing. There are subtle variations in the APA style of referencing, and it is important for you to use the CQUniversity APA Guide’s style.

Once you are familiar with some of the concepts and key words, you will find it much easier to use Section 5 of this guide, which contains examples of in-text citations and reference list items. Referencing requires attention to detail, so you will need to refer to these examples and explanations a number of times as you develop your skills.

Use these strategies to finding information quickly.

1. Use the contents page to locate particular concepts of referencing or source examples.
2. Use the index to find specific source examples.
3. Apply Ctrl + F and type into the search box to find information quickly.

What Is the Purpose of This Booklet?

When writing a university assignment, there are certain referencing rules you need to follow. Please note that there are other referencing styles (e.g., Harvard, Turabian, Vancouver and the Australian Guide to Legal Citation), so check your Unit Profile to confirm that the unit requires APA referencing. This booklet will explain what referencing is and show you how to reference using the CQUniversity APA referencing style.

What Is Referencing?

There are different types of university assignments (e.g., essays, oral presentations, reports, reflections, blogs, PowerPoint presentations, case studies). When you write an assignment, you will be expected to include the details of any resources that you have used in your assignment. These are called “in-text citations”. A citation is located at the place where you have used someone else’s words or ideas. In addition, a list of all the resources you have cited in-text is located at the end of the assignment; the list is called “references”. These processes are collectively known as “referencing”.

Why Do I Need to Reference?

Writing an assignment will often involve locating information from a range of different source types (e.g., webpages, journal articles, books, course readings). Each time you “borrow” ideas, data, information or illustrations from other sources to use in your assignment, you will need to cite and reference the source.

Referencing will help you to

- demonstrate your knowledge of a topic and provide evidence of scholarly research,
- give credit to the author or creator of the original source of an image, idea or piece of information, and
- avoid plagiarism and its associated penalties.

What Should I Reference?

You must cite and reference any source you use when writing an assignment even if you have just borrowed an idea or image, rather than copying exact words. This includes any of the following.

- **Hard copy:** Paper based sources, e.g., books, journal articles, newspapers, magazines, pamphlets and newsletters.
- **Electronic sources:** Online sources, e.g., webpages, videos, blogs, film clips, audio files, Moodle notes and readings.
- **Other sources:** Examples include interview transcripts and doctoral dissertations.
- **Visuals:** Examples include images, figures and tables.

Five Key Steps to Referencing

While researching and drafting	
Step 1.	Select quality sources to support your ideas e.g., book, journal, webpage
Step 2.	Record the relevant source details: author, date, title, publisher, URL etc.
In your assignment	
Step 3.	Use the notes you have made from the various sources to create sentences and paragraphs to provide evidence or examples to support your ideas.
Step 4.	Ensure that the author's surname and date of publication are included in-text when quoting or paraphrasing. This is called a citation. Make sure that the details are correct and that you follow the APA style guidelines. Page numbers are required for quoting.
At the end of the assignment	
Step 5.	Create a reference list, and each item must have a corresponding item as an in-text citation.

Section 1: What Does Referencing Look Like?

Referencing in the assignment	Example
<p><i>In this example of a paragraph, so you can see what referencing looks like in the body of the assignment.</i></p> <p><i>Notice the inclusion of the author's name and date in most sentences. These are known as citations. They let the reader know the details about the source of the information.</i></p> <p><i>These citations acknowledge all ideas or words that belong to another person even if it is not a direct quote.</i></p> <p><i>These citations are integrated into the sentences, so the paragraph flows and is easy to read.</i></p> <p><i>Note. Author surnames can be located either inside the brackets or used as part of the sentence. See section on styles of in-text citation for an explanation.</i></p>	<p>Retired Australians have been included as a campaign target for Volunteer Tourists for a number of reasons. The evolution of this group makes them attractive as they have commenced planning their retirements and are trying to do the most with their lives after their retirement, including travel. Research by Gibson (2002) on later life and retirement in the United States revealed that many of the participants experienced a feeling of more freedom to do what they want to do during retirement and later life. This is also evident in a report published by The Association of Superannuation Funds of Australia (ASFA, 2014) that states leisure activities form part of the standard budget for retirees in their 70s, and it contributes to an “important part of what many retirees want to do in retirement” (p. 9). This point is further supported by Upe (2013) who states that Australia has 5.5 million baby boomers, and many are able to travel as they are now retired. In addition, Solomon et al. (2013) explain that baby boomers are also much more active and physically fit than the preceding generation. These authors point out that baby boomers who are facing retirement are experiencing a shift in their retirement approach from achievement orientation to quality of life. In Australia the 55 plus age group makes up 24% of the population and they have 56% of the country's net wealth (Upe, 2013). They prefer to enjoy their retirement by spending their money rather than leaving it as an inheritance for their children (Solomon et al., 2013). It is evident that the over 55s have many traits that make them suitable candidates as Volunteer Tourists including their freedom, funds and a longing for education and new experiences.</p>

Reference list (end of the document)	Example
<p><i>You will need to include a list of all the sources you have cited in your assignment.</i></p> <p><i>The reference list is placed at the end of the assignment on a separate page.</i></p> <p><i>Each item in this list will have a correlating item in the assignment body or appendices.</i></p> <p><i>Each reference in your list will need to be set out using APA style.</i></p> <p>The reference list is:</p> <ul style="list-style-type: none"><i>in alphabetical order;</i><i>in double line spacing; and</i><i>formatted with a hanging indent.</i> <p><i>For more guidance, see Appendix H: Check your reference list</i></p>	<p style="text-align: center;">References</p> <p>Association of Superannuation Funds of Australia. Section 2: How Do I Use Citations In-Text?

Here are four key techniques you can use when you want to include other authors' ideas, words, images and data in your assignment. Have a look at the following pages for more detail on each of these techniques.

Paraphrasing	Summarising	Direct quotations	Tables and figures
<p>Convey the author's idea/words indirectly.</p> <p>Using this option, you must use some of your own words AND change the sentence structure. A citation must be included.</p>	<p>Briefly sum up another author's work e.g., a whole chapter or project.</p>	<p>Quoting an author's words exactly as they were written, using a short or long quotation. A citation must be included, e.g., author, year, and page number.</p>	<p>When using another author's figures, tables or data to support your own, you may copy and paste images, tables, charts and figures, but you must include your own title and a caption to cite the source. See Appendix K.</p>
<p>Example 1</p> <p>Jones (2016) found that significant reductions in infection rates (15%) could be achieved when nursing staff were reminded about hand hygiene.</p>	<p>Example 2</p> <p>A study by Jones (2009) found that attention to hand hygiene by nursing staff played a significant role in infection rates.</p>	<p>Example 3</p> <p>A short quotation: Reminders to nursing staff to pay extra attention to recommended hand hygiene procedures resulted "in a 15% reduction in infection rates" (Jones, 2016, p. 3).</p>	<p>Figure 1</p> <p><i>CQUniversity Research Officers Collecting Water Samples.</i></p>  <p><i>Note.</i> From <i>CQUni Pitching in to Help with Capricorn Coast Water Supply Study</i>, by CQUniversity, 2017 (https://www.cqu.edu.au/cquninews/stories/engagement-category/2017/cquni-pitching-in-to-help-with-capricorn-coast-water-supply-study).</p>

How to Paraphrase

Instead of quoting another author's words exactly, you may paraphrase them. To paraphrase, you must change some of the words AND change the sentence structure. When you use an author's ideas, but express them in different words, you are paraphrasing. A paraphrased item is not enclosed in quotation marks because it is not a word-for-word quotation. However, it is important that the sentence structure and the vocabulary are not too similar to the original text and that you acknowledge the source of the original document with an in-text citation. Failing to do so will result in plagiarism.

Many lecturers would prefer you to paraphrase or summarise an author's words rather than use a direct quotation. This is because paraphrasing requires original thought and shows that you understand the ideas and can integrate them into your work.

Steps for paraphrasing	Examples
<ol style="list-style-type: none">1. <i>Read the sentence that you want to paraphrase a number of times to get the meaning of the text. Once you understand it, write it in your own words.</i>2. <i>Highlight any specialised technical words or specific terms. These must be included in your paraphrase, as without these words, the meaning of the paraphrase will change completely.</i>3. <i>Underline any keywords that can be changed.</i>4. <i>Find other words and phrases that have similar meanings that can be used to replace the keywords in the text. Use a thesaurus or dictionary to help if need be.</i>5. <i>Rewrite the ideas and reorganise the structure or order.</i>6. <i>Add a lead-in phrase where the author's family name becomes part of the sentence to use an author prominent citation and the year the article was published in parentheses.</i>7. <i>Choose author prominent or information prominent style (see next page for explanation).</i>	<p>Original text “Improved attention to hand hygiene reduced the rate of patient infections by 15% in a twelve-month period.”</p> <p>Paraphrase, author prominent Jones (2016) found that in the course of a year, a significant reduction in patient infection rates was achieved as the result of an enhanced focus on the hand hygiene procedures of nursing staff.</p> <p>Paraphrase, information prominent In the course of a year, a significant reduction in patient infection rates was achieved as the result of an enhanced focus on the hand hygiene procedures of nursing staff (Jones, 2016).</p>

Rules for paraphrasing	<i>Examples</i>
<ul style="list-style-type: none"> • <i>Ensure the paraphrased information supports the claim made by you as the writer.</i> • <i>Ensure the paraphrase is written differently from the original source.</i> • <i>Page numbers are not required for paraphrasing. However, for very long and complex work, a page number may be helpful for the reader to locate relevant information.</i> • <i>Provide a corresponding reference in the reference list at the end of the assignment to accompany each citation.</i> 	<p>Final version of student's work</p> <p>Nurses play an important role in the reduction of infection rates in hospitals.</p> <p>Jones (2016) found that in the course of a year, a significant reduction in patient infection rates was achieved as the result of an enhanced focus on the hand hygiene procedures of nursing staff.</p> <p>Reference</p> <p>Jones, A. (2016). An investigation of infection rates in Australian hospitals. <i>Journal of Australian Nursing, 12</i>(2), 34–45.</p>

Styles of Citation In-Text: Author Prominent and Information Prominent

Where you place a citation depends on the emphasis you wish to apply and can be important to the argument you present.

Author Prominent

When you want to emphasise the author, then you use the author's name as part of your sentence. The citation and the paraphrase would start something like this: Sherwood (2012) concludes that . . .

Information prominent

When you want to emphasise the information from an author, then your citation becomes information prominent. The citation will appear at the end of a sentence. The citation and the paraphrase will look something like this: . . . as evidenced from a recent Australian study (Jones, 2012).

How to Summarise

Instead of quoting or paraphrasing an author's words, work or ideas, you may decide to summarise them. A summary includes a condensed form of the information, keeping the main point of the text but omitting detailed examples. The original idea or meaning must be maintained. Technical words remain. Summarising is useful when you use the idea expressed in the source but not the specific language. Other advantages of summarising include expressing the key point of a source in fewer words and demonstrating your understanding of the source more effectively.

Steps for summarising	Examples
<ol style="list-style-type: none"> 1. <i>Read the text several times and check the meaning of unfamiliar words.</i> 2. <i>Underline technical words as they should not be changed.</i> 3. <i>Reread the text and make notes of the main points, leaving out examples and evidence.</i> 4. <i>Consider the main points as a whole and your purpose for using the information</i> 5. <i>Think of words or phrases which have similar meaning to those in the original text.</i> 6. <i>Develop an outline using short sentences written in your words. Rearrange these sentences to suit your purpose.</i> 7. <i>Remind your reader that you are summarising the work of someone else by citing their name in the summary (citation).</i> 	<p>Developing learning modules for adult learners requires the designer or educator to consider a range of appropriate strategies to match the students' preferences for learning. Duverge (2016) outlines several of these preferences. Firstly, educators should appreciate that adult learners would prefer to learn independently or explore the topic; therefore, tasks should be designed accordingly. Furthermore, adults like to know that the skills and knowledge they are expected to develop will be useful to their life or career.</p>
<p>Using more than one source for a paraphrase</p> <ul style="list-style-type: none"> • <i>Here is an example showing ideas from several sources combined into one summary.</i> • <i>Notice that a semi-colon has been used to separate each source in the citation, and the sources are ordered in alphabetical order.</i> 	<p>A key study by Lee (2016) found that many new university students experience considerable anxiety when learning how to cope with the academic literacy demands of assignment writing, and this finding is well-supported in the literature (Brown, 2012; Green et al., 2009; Redding & Shipton, 2011).</p>

Rules for Summarising	<i>Examples</i>
<ul style="list-style-type: none"> • <i>Do not provide the same citation at the start and at the end of each sentence. Note that the sentence in bold is not referenced.</i> • <i>Ensure the summarised version is much shorter than the original text and that it is written in your own words.</i> • <i>Include a citation details (author and date) for each source cited.</i> • <i>Page numbers are not required for paraphrasing unless otherwise specified by your lecturer.</i> • <i>Do not change the intended meaning of the original text.</i> • <i>Do not use quotation marks because it is not a direct quote.</i> • <i>Enter the complete source details in your reference list.</i> 	<p>In this example the source of the bold sentence is not clear. The student must repeat the citation within that sentence.</p> <p>Developing learning modules for adult learners requires the designer or educator to consider a range of appropriate strategies to match adult learners' preferences for learning. Duverge (2016) explains that adult learners would prefer to learn independently or explore the topic; therefore, tasks should be designed accordingly. Adults like to know that the skills and knowledge they are expected to develop will be useful to their life or career. Providing immediate feedback regarding errors or alternate explanations to assist with learning new concepts is a strategy that enables adults to learn from misunderstandings (Duverge, 2016).</p>

How to Use Direct Quotations

You are quoting when you use someone else's exact words in your writing. Direct quoting is one way of showing that you have gathered information from other authors to support your point of view or thesis. Do not overuse this technique. Instead, aim to paraphrase more of the words and ideas of others to show how well you understand them and can use the source to support your point of view. When you quote, you must indicate where the quotation begins and ends, and provide an in-text citation. The citation makes it clear whose words you are using and where you found them.

A general rule in academic work is that no more than 10% of an assignment should be in the form of direct quotations. You can use short quotations (fewer than 40 words) or long quotations (40 words or more).

Steps for Using Quotations	Example
<ol style="list-style-type: none">1. <i>Read chosen texts and form ideas about your topic.</i>2. <i>Make a note of the ideas using your own words.</i>3. <i>Identify sentences in a journal article to support the idea. Make a note of this.</i>4. <i>Incorporate the quote into the paragraph by adding a few extra words just before the quoted words to help the quote fit smoothly into the sentence.</i>5. <i>Provide the surname, year of publication and the page number that the quote was taken from.</i>6. <i>Write the full publication details in the reference list at the end of the assignment.</i>	<p>Hand hygiene of medical staff → infection rates. Especially nurses → study found “Improved attention to hand hygiene reduced the rate of patient infections by 15% in a twelve-month period” (Jones, 2016, p. 34).</p> <p>Nurses play an important role in the reduction of infection rates in hospitals. A recent study showed “improved attention to hand hygiene reduced the rate of patient infections by 15% in a twelve-month period” (Jones, 2016, p. 34). This indicates that hand hygiene can result in significant reductions in the rate of infection.</p> <p style="text-align: center;">References</p> <p>Jones, A. (2016). An investigation of infection rates in Australian hospitals. <i>Journal of Australian Nursing</i>, 12(2), 34–45.</p>

Rules for Long Quotations	Example	
<p><i>When using quotations of more than 40 words:</i></p> <ul style="list-style-type: none">• <i>use them infrequently,</i>• <i>introduce it in your own words with the lead-in statement ending with a colon (:),</i>• <i>separate it from the lead-in statement and from the text that follows with Enter,</i>• <i>do not enclose it in quotation marks,</i>• <i>begin each long quotation on a new line,</i>• <i>indent them by 1.27 cm from the left margin (Ctrl + M), and</i>• <i>apply double line spacing,</i>• <i>no added space before or after the quotation.</i> <p><i>For a long information prominent quotation, the full stop goes after the quotation and before the citation.</i></p>	<p>Information prominent</p> <p>Though many may recoil from making their private lives public in digital spaces, there are obvious benefits for young people:</p> <p style="padding-left: 40px;">The public life is fun. It's creative. It's where their friends are. It's theatre, but it's also community: in this linked, logged world, you have a place to think out loud and be listened to, to meet strangers and go deeper with friends. (Nussbaum, 2007, p. 27)</p>	<p>Author prominent</p> <p>Rowan (2001) summarises the effects of a limited world view when she states that:</p> <p style="padding-left: 40px;">This poses a real challenge for educators. In many cases, we are drawing on educational resources, or curriculum documents which are in themselves fairly narrow in the view of the world they represent. This helps to make this view seem natural and normal. (p. 39)</p> <p>This view exemplifies the . . .</p>

Rules for Long Quotations	Example	
<p><i>If you need to omit a word or words from a quotation, indicate this with an ellipsis (three dots).</i></p> <p><i>If you need to add a word or words to a quotation, put them in square brackets [].</i></p>	<p>The use of emotive language can be effective in influencing audiences to believe in a certain way:</p> <p style="padding-left: 40px;">This passage attacks everyone who opposes the introduction of identity cards on personal terms. It also makes unsubstantiated assumptions about the backgrounds and economic circumstances of opponents in order to undermine their credibility. [Therefore], the passage ... demonstrates flawed reasoning. (Cottrell, 2011, p. 117)</p>	<p>Cottrell (2011) explains how emotive language can be used to persuade audiences:</p> <p style="padding-left: 40px;">The passage encourages complicity in the audience. By abusing opponents, the author encourages a division between in-groups, or “people like them”, or “people like us”. [In addition,] the passage draws on emotive subjects, referring to crime and security to win over the audience. (p. 117)</p>

How to Introduce Quotations and Paraphrased Sentences

Verbs That Help With Author Prominent Referencing. To assist with making citations part of your own writing and providing more information about the status of the information you are citing, you need to use signal words and phrases. Your choice of words can indicate whether the authors you are citing are presenting established findings, putting forward a case, making a suggestion or drawing conclusions. In addition, your work may become tedious to read if every quotation or paraphrase is introduced in the same manner. The signal word often becomes a place in writing where repetitiveness occurs. Table 1 provides examples of signal words useful for integrating other authors' ideas and words into academic writing.

Table 1

Signal Words for Use with In-text Citations

Say or Mean		Argue	Explain	Other
state	assert	dispute	describe	agree
remark	add	disagree	clarify	question
maintain	confirm	question	justify	offer
hold the view	find	debate	reason	predict
point out	affirm	claim	show	identify
highlight		imply	demonstrate	
emphasise		contend		
		suggest		

Use present tense to refer to research (though there are important exceptions).

Note. If you are citing more than one author, remember to change the verb form:

Single author: Smith (2020) argues that . . .

Multiple authors: Jones and Brown (2020) argue that . . .

How to Use Tables, Figures or Images

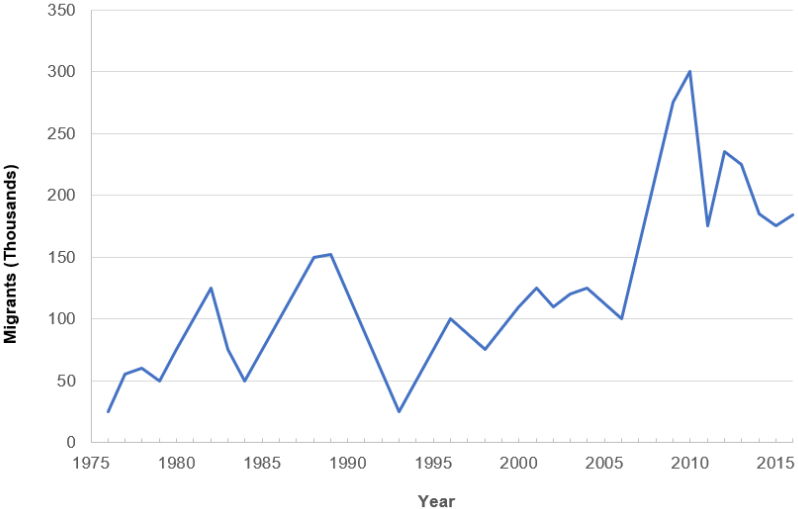

Sometimes it is useful to include reproductions or copies of items such as photos, graphs, tables, diagrams and drawings in your work. These items may be used as evidence to support academic arguments in the text. They can be used to present complex information clearly and effectively.

A **table** contains information that is organised using columns and rows. Figures can be maps, charts, diagrams, drawings, graphs and photographs. They must be labelled, cited and referenced, and each is done in a particular way. Tables and figures are often used in reports, but rarely appear in essays. They may be copied from another’s work, adapted from one or multiple sources of information or may be data from your own research.

Steps for using tables	Example																																																				
<ul style="list-style-type: none"> • Ask yourself if you need to provide exact numerical data or compare and contrast values in a table or if the trends or patterns provided by a graph would be better used in this case. • Decide whether you need the whole table or part of the table. • Refer to the table in the body of the report. Integrating the table as if it were a quote or part of the paragraph will assist your reader to understand why you included it. • Label the table within the text with a number e.g., Table 1, Table 2. If the table is placed within an appendix, it takes the appendix letter and a number e.g., Table A1. • If the table is required in text and does not take the whole page, place the table at either the top or bottom of the page. Add one blank double-spaced line between the table and any text to improve readability. 	<p>As seen in Table 2, asylum claims in 2013-2014 dropped in both Australia and New Zealand but increased in other countries.</p> <p>Table 2 <i>New Asylum Claims Lodged in Selected Regions by Semester 2013–2014</i></p> <table border="1" data-bbox="981 836 1787 1187"> <thead> <tr> <th rowspan="3">Regions</th> <th colspan="3">Semesters</th> <th colspan="2">% Change</th> </tr> <tr> <th>1st 2013</th> <th>2nd 2013</th> <th>1st 2014</th> <th>1st 2013</th> <th>2nd 2013</th> </tr> <tr> <th></th> <th></th> <th></th> <th>1st 2014</th> <th>1st 2014</th> </tr> </thead> <tbody> <tr> <td>Europe</td> <td>202,200</td> <td>270,600</td> <td>264,000</td> <td>24.40</td> <td>-2.40</td> </tr> <tr> <td>EU-28</td> <td>176,200</td> <td>220,300</td> <td>216,300</td> <td>22.80</td> <td>-1.80</td> </tr> <tr> <td>US/Canada</td> <td>46,100</td> <td>48,700</td> <td>58,600</td> <td>27.10</td> <td>20.30</td> </tr> <tr> <td>Japan/Rep of Korea</td> <td>2,100</td> <td>2,700</td> <td>3,300</td> <td>57.10</td> <td>22.20</td> </tr> <tr> <td>Australia/NZ</td> <td>5,900</td> <td>6,100</td> <td>4,700</td> <td>20.30</td> <td>23.0</td> </tr> <tr> <td>Total</td> <td>266,300</td> <td>328,100</td> <td>330,600</td> <td>24.10</td> <td>0.80</td> </tr> </tbody> </table> <p><i>Note.</i> The table shows that Europe had the highest rates of new asylum claims 2013–2014. Steps for using figures	Example
<p><i>Steps for choosing to use figures are similar to those provided for tables in the previous section. Figures can be maps, charts, diagrams, drawings, graphs and photographs. Section 3: How to Create a Reference List

At the end of your assignment, you will need to include a list of all the sources you have used in your assignment. This is known as a reference list. Your reference list will need to be formatted using APA style.

This section contains some general guidelines that you will need to follow when writing your reference list. However, there are some more specific guidelines in the form of examples in Section 5 that will show you how to reference many different types of sources. There is also a Quick Guide for Referencing Multiple Authors (Appendix J).

Organising your resources is a useful skill, so as you decide what will be useful for your research and writing it is important to generate a draft reference list to avoid losing any relevant information about the source details. This process can be time consuming, but once done it provides a useful tool for developing in-text citations. Remember to check this initial list against those used in-text and remove any unused items because a reference list should only include references that have been used within your assignment. The reference list does NOT include all your background reading.

Steps for Creating a Reference List

When including a source in the reference list you must provide the reader with enough information to locate that source. The following pages demonstrate how specific sources are included in the reference list. This guide does not contain an exhaustive list of examples, so at times you will need to problem solve to decide how to reference the source you used.

There are two key steps when writing your reference list:

- Step 1.** Find the relevant details shown in the following figures. Look at the examples that follow and in Section 5; there is a pattern to this task.
- Step 2.** Format the details according to APA style. Each time you gather information it is placed in a similar order in the citation.

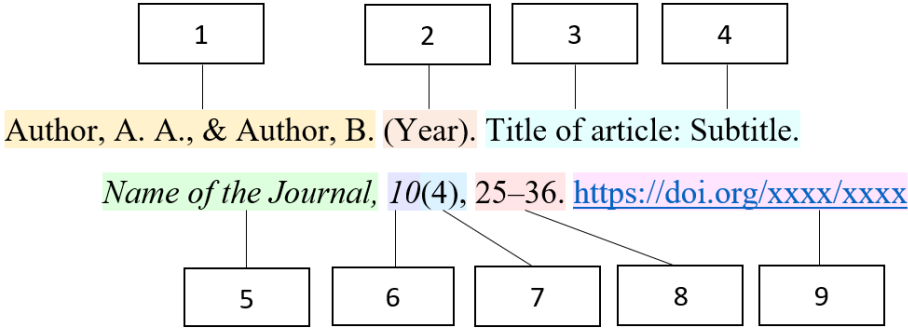

Steps for Adding Publication Details to the Reference List

Referencing books and ebooks	Example
<p>For a book or an ebook, the following elements should be presented in this order:</p> <ol style="list-style-type: none"> 1. Author's surname (family name) comes first followed by a comma and then the initials. Provide a space between initials. The second initial represents the middle name. Keep the order of the authors' names. 2. Place the copyright year in parentheses followed by a full stop. 3. Title of the book is in italics and sentence case i.e., capitalise the first letter of the title and any proper nouns. End with a full stop. 4. Capitalise the first letter of any subtitle. 5. If the book has an edition or volume number, place the number in parentheses after the title. This is not in italics. If both, add edition number first and volume second, separated by a comma. 6. Publisher (No publisher location needed.) 7. Include a DOI (Digital Object Identifier) number when available: https://doi.org/10.xxxx/xxxxxxxxxxx Do not include a URL or database URL for ebooks found in academic databases. Include a URL for ebooks found on other websites. No URL is needed for hard copies. 	<div style="text-align: center; margin-bottom: 10px;"> 1 2 3 4 5 </div> <p style="text-align: center;"> 6 7 </p> <p style="text-align: center;"> Author, A. A., & Author, B. (Copyright year). <i>Title of book: Subtitle</i> (7th ed., Vol. 3). Publisher. DOI or URL </p> <p>Hard Copy Book: Elements 1-6</p> <p>Cottrell, S. (2019). <i>The study skills handbook</i> (5th ed.). Macmillan Education.</p> <p>Ebook: Elements 1-7</p> <p>Štumpf, M. (2017). <i>Electromagnetic reciprocity in antenna theory</i>. https://doi.org/10.1002/9781119466420</p>

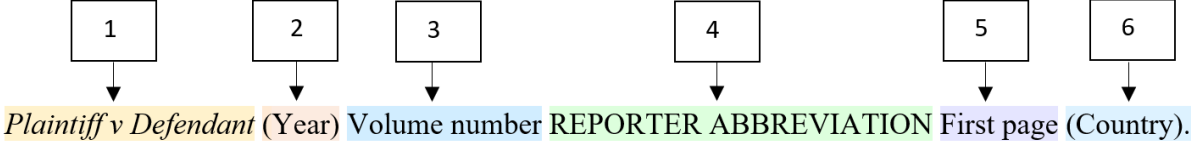

Note. The ordinal number is **not** in superscript, e.g., 4th not 4th.

More details about the uses of abbreviations, acronyms and the technical terms used in referencing can be found in Appendices A, B, C, D, E and F.

Referencing a chapter in an edited book.	Example
<p>For a chapter in a book or an ebook, the following elements should be presented in this order:</p> <ol style="list-style-type: none"> 1. Chapter author's surname (family name) followed by a comma and then the initials. 2. Place the copyright year in parentheses followed by a full stop. 3. Title of the book chapter in sentence case i.e., capitalise the first letter of the title and any proper nouns. End with a full stop. 4. Editors' initials followed by surname. Place (Ed.) for one editor and (Eds.) for multiple editors after the editors' names. 5. Title of book in sentence case and in italics. 6. If the book has an edition or volume number, placed the number in parentheses after the title. This is not in italics. If both, add edition number first and volume second, separated by a comma. 7. Page range of the chapter. 8. Publisher (No publisher location needed.) 9. Include a DOI (Digital Object Identifier) number for ebooks when available: https://doi.org/10.xxxx/xxxxxxxxxxx <p>Do not include a URL or database URL for ebooks in academic databases. Include a URL for ebooks found on other websites. No URLs needed for hard copies.</p>	<div style="text-align: center;"> <div style="display: flex; justify-content: space-around; margin-bottom: 10px;"> <div style="border: 1px solid black; width: 40px; height: 30px; display: flex; align-items: center; justify-content: center;">1</div> <div style="border: 1px solid black; width: 40px; height: 30px; display: flex; align-items: center; justify-content: center;">2</div> <div style="border: 1px solid black; width: 40px; height: 30px; display: flex; align-items: center; justify-content: center;">3</div> <div style="border: 1px solid black; width: 40px; height: 30px; display: flex; align-items: center; justify-content: center;">4</div> </div> <p style="text-align: center;">Chapter author, A. Referencing journal articles with a DOI	Example
<p>The following elements should be presented in this order:</p> <ol style="list-style-type: none">1. Author's surname (family name) comes first followed by a comma and the initials. Provide a space between initials. Keep the order of the authors' names.2. Place the year of publication in parentheses followed by a full stop.3. Title of article is in sentence case i.e., capitalise the first letter of the title and first letter of proper nouns (Australia). End with a full stop. No italics.4. Capitalise the first letter of any subtitle.5. Title of journal in italics and title case i.e., capitalise the first letter of all major words. End with a comma.6. Volume number in italics.7. Issue number in parentheses. No gap. No italics. If there is no issue number, follow the volume number with a comma.8. Include article page range e.g., 25–45.9. <i>Https</i> DOIs are hyperlinked (active, blue font and underlined). When an old DOI number is provided as doi:10.xxxx/xxxxx or http://dx.doi.org, change the DOI number to the https://doi.org/10.xxxx/xxxxxxxxxxx format.	<p>Example</p>  <p>The diagram illustrates the components of an APA journal article reference. It shows a sample reference: "Author, A. A., & Author, B. (Year). Title of article: Subtitle. Name of the Journal, 10(4), 25–36. https://doi.org/xxxx/xxxx". Each part of the reference is enclosed in a colored box and connected by a line to a numbered box (1-9) above or below it. Box 1 points to the author names, box 2 to the year, box 3 to the article title and subtitle, box 4 to the journal title, box 5 to the volume number, box 6 to the issue number, box 7 to the page range, and box 8 to the DOI link. Box 9 is not connected to any part of the reference.</p> <p>Example</p> <p>Jarvis, D., Stoeckl, N., Addison, J., Larson, S., Hill, R., Pert, P., & Watkin Lui, F. (2018). Are Indigenous land and sea management programs a pathway to Indigenous economic independence? <i>The Rangeland Journal</i>, 40(4), 415–429. https://doi.org/10.1071/RJ18051</p>

Journal article without a DOI	Example
<p><i>For journals retrieved from academic databases, no URL is required. Only include elements 1-8. See previous page for details.</i></p> <p><i>Examples of academic databases: APA PsycNET, PsycINFO, Academic Search Complete, CINAHL, Ebook Central, EBSCOhost, Google Scholar, JSTOR (excluding primary source collections), MEDLINE, Nexis Uni, Ovid, ProQuest, PubMed, ScienceDirect, Scopus and Web of Science etc.</i></p> <ul style="list-style-type: none"> • <i>For hard copy journals without a DOI, no URL is required.</i> • <i>Exceptions: Articles found in UptoDate see Section 5.</i> • <i>For journals with no DOI and not found in an academic database, include the URL location after the page numbers.</i> <p><i>See the flow chart in Appendix G to help you select the correct information when referencing your journal article.</i></p>	<div style="text-align: center;"> <p>1 2 3 4</p> <p>Author, A. A., & Author, B. (Year). Title of article: Subtitle.</p> <p>Name of the Journal, 6(3), 275–300.</p> <p>5 6 7 8</p> </div> <p>Example</p> <p>Milne, J. (2017). Accurate chronic wound assessment in the community setting. <i>Journal of Community Nursing</i>, 31(2), 25–28.</p>

Referencing a legal case	Example
<p><i>For a legal case the following elements should be presented in the following order:</i></p> <ol style="list-style-type: none"><i>1. The case name (in italics). Only the name of the first plaintiff and the first defendant should be cited. If there are multiple proceedings between the parties, include the number of proceedings in square brackets after the case name.</i><i>2. The year of case</i><i>3. The volume number</i><i>4. Reporter abbreviation</i><i>5. The starting page of the source. In addition, when referring to a specific page in the case, add a comma and the page number of the reference after the starting page e.g., 1, 5.</i><i>6. If the country is not clear from the case name, provide the country abbreviation in parentheses after the first page number, followed by a full stop e.g., (U.K.). (Austl.).</i>	 <p><i>Plaintiff v Defendant</i> (Year) Volume number REPORTER ABBREVIATION First page (Country).</p> <p><i>In-text citation</i> According to the precedent set in <i>Mabo v Queensland</i> (1989), it is possible to claim (<i>Mabo v Queensland</i>, 1989).</p> <p><i>Reference example</i> <i>Mabo v Queensland</i> (1989) 166 CLR 186. <i>Mabo v Queensland [No. 2]</i> (1992) 175 CLR 1, 5.</p>

Referencing a webpage or a standalone document on the web	Example
<p>For information on a webpage, the following elements should be presented in the following order:</p> <ol style="list-style-type: none"> 1. Name of the author or organisation or department. End with a full stop. 2. Year of publication in parentheses. The month and day can be provided if available e.g., (2020, February 25) or (2020, February) or (2020). Provide the most specific date that is available on the webpage/document. For sources with the same author and same date, order oldest to newest. Use (n.d.) if no date is provided. End with a full stop. 3. Title of article is in sentence case i.e., capitalise the first letter of the title and first letter of any proper nouns (Australia). End with a full stop. The title is in italics. 4. If a subtitle is present, add a colon (:) and capitalise the first letter of the subtitle. End with a full stop. 5. If the author and the site name are the same, omit the site name from the reference. See Example 1. Title case and no italics. 6. URLs are hyperlinked (active, blue font and underlined). The words “retrieved from” are not required. On occasion a retrieval date may be required when the information is subject to change and is not achieved; see Section 5 for more examples. 	<div style="text-align: center; margin-bottom: 10px;"> 1 2 3 4 5 6 </div> <p>Author, A. A., & Author, B. (Year). <i>Title of article or document: Subtitle</i>. Site Name. https://xxxxx</p> <p>Example 1: When the author and the site name are the same, omit site name.</p> <p>Department of Education, Skills and Employment. (2017, April 10). <i>Child care reforms pass parliament</i>. https://www.education.gov.au/news/child-care-reforms-pass-parliament</p> <p>Example 2: When the author and site name are different, include site name.</p> <p>Grove, J. (2020, January 30). <i>What can be done to resolve academic authorship disputes?</i> Times Higher Education. https://www.timeshighereducation.com/features/what-can-be-done-resolve-academic-authorship-disputes</p>

Referencing a webpage or a standalone document on the web	Example
<p>Long URLs <i>Cut and paste URLs to avoid transcript errors. Do not change the URL. If the URL is very long, it is acceptable to shorten a URL using URL shortening services. Ensure that it links directly to the correct location.</i></p>	<p>Example Australian Bureau of Statistics. Rules about authors' names	Examples
<ul style="list-style-type: none"> • <i>In the reference list, the surname of each author needs to be spelt, and all other names are to be presented as initials.</i> • <i>Therefore, it is important to identify the author's surname. In the examples provided, "Cottrell" is always the surname, and other names need to be presented as initials.</i> • <i>When an author has two or more initials, the second or third initial represents the middle names.</i> • <i>Titles such as Doctor or Professor are not included.</i> 	<p>Stella Cottrell = Cottrell, S.</p> <p>Cottrell, Stella = Cottrell, S.</p> <p>Stella Maria Cottrell = Cottrell, S. Rules for using capitalisation in a reference list
<ul style="list-style-type: none"> • Sentence Case • <i>For sentence case, capitalise the first letter in the first word; all other words are in lower case. The exceptions are names or proper nouns (e.g., Australia).</i> • <i>Within a reference list, the title of a book, journal article, webpage or standalone document is in sentence case regardless of how the titles is capitalised in the original. See example below.</i> • <i>If the title contains a colon, the first letter after the colon is capitalised.</i>
<ul style="list-style-type: none"> • Title case • <i>For title case, capitalise the first letter of all major words. Do not capitalise articles, (i.e., "the", "a", "an") prepositions (e.g., "for", "on", "off", "in") or short conjunctions (e.g., "and", "but", "or"). Capitalise the first letter of the word "the" if it is the first word in the title. Capitalise the first letter of any preposition which has of four or more letters (e.g., "With", "Between", "From").</i> • <i>Journal names, businesses and organisations require title case (capitalise the first letter of all major words).</i>

Section 4: What is Academic Integrity?

Incorrect referencing techniques (even if they are innocent mistakes) can lead to problems with “plagiarism”. The word “plagiarism” comes from the Latin word “plagiarius” which means “kidnapper”. According to the McMillan Dictionary, plagiarism is “the process of taking another person’s work, ideas, or words, and using them as if they were your own” (McMillan Dictionary, n.d.). In other words, you would be plagiarising if you copied the ideas, words or thoughts of the authors of your research without acknowledging them in your paragraphs, even if you have paraphrased. This includes using another student’s work or your own previously submitted work, without acknowledging or citing it. Always act with integrity and use correct referencing techniques to make sure you do not accidentally plagiarise someone else’s work. Plagiarism is considered serious misconduct and must be avoided at all times. You should avoid plagiarism and report it because:

- plagiarism is unethical,
- plagiarism does not allow you to develop as an academic writer, and
- plagiarism attracts severe penalties.

How Will They Know I Have Plagiarised?

While enrolled at CQUni, each time you upload an assignment it is processed through the *Turnitin* program. This is a program that checks for similarity between your work and others; therefore, identifying possible plagiarism in your assignment. You can learn to use *Turnitin* to check your assignment for accidental plagiarism before you submit your final copy to your lecturer. Watch the video:

<https://www.youtube.com/watch?v=44n03oRjwCg&feature=youtu.be>

If it seems you have plagiarised, you will be sent an email to advise you that plagiarism has been detected in your assignment. You will need to answer the email and explain what happened. You may also be required to attend some academic integrity training. You may face severe academic penalties, including possibly failing and being withdrawn from the course.

Steps for Avoiding Plagiarism

<i>Record the sources you use.</i>	Before beginning to take notes from any source, record all the bibliographic information.
<i>Take careful notes.</i>	Take carefully written notes. Develop a system to distinguish between what you have copied directly from the source, (directly quoted) what you have put into your own words (paraphrased or summarised) and your comments about the information in that source.
<i>Paraphrase appropriately.</i>	Change words and structure of the original work keeping only technical words the same.
<i>Use in-text citations in every written draft.</i>	Get into the habit of including citations in-text (author, date) as you write each draft of your assignment.
<i>Keep your work secure.</i>	Avoid sharing paper or electronic drafts of your work with other students.
<i>Use Turnitin to check for text matching on assignment drafts.</i>	You can use the <i>Turnitin</i> software to check your draft assignment for evidence of matching text before submission.

Section 5: How to Create In-Text Citations and Reference List Items

This Abridged Guide to the APA Referencing Style (7th ed.) provides referencing guidance about how to cite specific sources in the text of your assignment (in-text citations) and in the reference list. However, this guide does not contain an exhaustive list of examples, so it may be necessary to examine more than one example or a combination of examples to identify the best way to reference a specific item. Sometimes you need to problem solve to decide how to reference the item you have used.

When adding a reference to the reference list, you must provide the reader with enough information to enable them to locate the source. The following specific examples of referencing, and the examples provided in Section 3, will help you to work out what kind of information you need to collect about your source. Find one of the examples in this guide similar to your source and gather similar information for your reference. Then if you are still unsure, you can ask the Academic Learning Centre (ALC) to assist you. Look out for ALC advertised workshops:

Journals and Magazines

Each reference includes the following details in this order: author’s surname, author’s initial(s), year of publication, article title (sentence case), name of journal (in italics and title case), volume number (in italics), issue number (in parentheses), page range and a DOI if available. The volume number, issue number and page range are usually printed at the top of the article above the abstract. This information can also be found in the footers of the pages.

Use the DOI flow chart to help select the correct information to form a complete reference for your selected journal article: See Appendix G.

Webpage or Standalone Document on the Web

Include the following details in this order: author’s surname, author’s initial(s), year, title of document or webpage, site name (if different from author) and finally the web address. Remember, for online sources, the author is not always a person. Instead, it could be an organisation, a company, a government department, etc. URLs should be hyperlinked (Active, blue font and underlined).

For in-text citations, write the organisation’s name in full followed by the acronym in parentheses for the first in-text citation. Subsequent in-text citations only use the acronym. See examples below. In addition, see Appendices C to E for more detail about abbreviations and acronyms.

Suggested texts such as journal articles, book chapters or webpages should be cited and referenced as an original source; see section related to books, book chapters, journals, ebooks etc.). CQUniversity provided study materials such as Study Guides may also be referenced; see section below. However, try to source published or reputable resource material where possible. The sources below should not be used too frequently. Other sources that you have located while researching are more suitable.

Appendices

Appendix A: What Do the Terms and Abbreviations Used in This Guide Mean?

Key terms	Explanation
Appendix	An appendix (single) or appendices (multiple) is placed after the reference list. Each appendix is on a new page. The word “Appendix” is in the centre and bold with an identifying capital letter e.g., Appendix A . Each appendix is placed in order that they appear in the text. When referring to information contained in an Appendix, write a sentence clearly stating where that information can be found. Example: The survey used can be found in Appendix A. You can also use referencing brackets (parentheses) to direct the reader to the information (see Appendix A). For guidance on how to refer to a table placed in an appendix, see Section 2: How to use tables and figures.
Author	The person, group or organisation that created the source. There may be single or multiple authors; or single or multiple editors; or organisations may be credited as authors rather than specific individuals. If the source has no designated author, you may use the title in place of the author.
Bibliography	A complete list of all sources consulted when preparing a piece of work, whether cited in-text or not. It records the full publication details of each source in the same way as for a reference list. Use a bibliography only if specifically requested to do so.
Copy or reproduce	Inserting an image, figure or table from a source into your own work without modifying it in any way. If you reproduce a table or figure within your work, you should label appropriately. See section on tables and figures and Appendix K.
Ebook (ebook)	An ebook is an electronic version of a hard copy book that can be downloaded. However, printed copies may not exist, and the ebook may be the only version of the text. You may find a complete book or chapters of the ebook. Some of these are free, but others must be bought from publishers or suppliers.
In-text citation or in-text referencing	This is an acknowledgement of any paraphrased or quoted information used within an assignment. It is a record of the author, date of publication and sometimes page number of any sources used. Use surnames for in-text citations (no initials). The position of the in-text citation varies depending on whether you use author

Key terms	Explanation
	prominent or information prominent citations. An essay with few or no citations will be a cause of concern, and it may indicate plagiarism or limited research. See Section 2.
Journal article	Journals are collections of articles that are published on a regular basis to report current research within a discipline. Journals are sometimes referred to as magazines, periodicals or serials.
Paraphrase	Paraphrasing is putting someone else's ideas into your own words. When you paraphrase, you must provide an in-text citation to show that the material comes from another source. "Although it is not required to provide a page or paragraph number in the citation for a paraphrase, you may include one ...[to] help interested readers locate the relevant passage within a long or complex work" (APA, 2020, p. 269). Check with your lecturer for their preference around the inclusion of page numbers when paraphrasing and summarising.
Quotation	A direct quotation is the exact reproduction of someone's words. A quote is marked with double quotation marks or other special formatting. It requires a citation. See Section 2: How to use direct quotes.
Reference list	The complete list of all sources paraphrased or quoted used in your work. The reference list appears at the end of your work. It records the full publication details of each source, and it is arranged in alphabetical order. Every in-text citation should appear in the reference list, and every item in the reference list should be mentioned at least once in the assignment. Additionally, the citations that appear in the text must have the same spellings and dates as the ones in the reference list. See Appendix H for a checklist.
Source	The place where the information was found. Source type refers to whether the source is a book, article, webpage etc. and whether it is a hard copy or electronic. Referencing rules differ for each source type.
Summary	A brief account of another person's ideas or research in your own words. A summary of a work or section of a work, or a general reference to someone's work or ideas, requires a citation.
URL	This is the abbreviation for Uniform Resource Locator (URL). It also known as the web address. The URL should link directly to the text were possible. URLs are hyperlinked (blue, active and underlined). A very long URL can be shortened using a URL shortening service. Ensure that it links directly to the correct location.

Appendix B: Symbols and Their Use

Symbol	Use in citations and references
<p>& (Ampersand)</p> <p><i>The ampersand is used to abbreviate “and” between authors’ names in information prominent citations and in the reference list. However, use the word “and” when providing an author prominent in-text citation with two or more authors</i></p> <p><i>Note. See Appendix I for citing multiple authors and Appendix J for referencing multiple authors.</i></p>	<p>Citations</p> <p>... (Smith & Jones, 2018). Smith and Jones (2018) ...</p> <p>Reference</p> <p>Smith, N., & Jones, B. (2018). <i>Title: Subtitle</i>. Publisher.</p>
<p>() (Round brackets: parentheses)</p> <p><i>Round brackets, known as parentheses, come in pairs and contain material that help clarify a point, but often indicate the information within is less important than surrounding information.</i></p>	<p>Parentheses are used to enclose a citation. The use of parentheses (a word or phrase inserted) for other purposes should be avoided in academic writing. Use wording to show the value of a piece of text rather than using parentheses. If something is not important enough to include in the main text, consider leaving it out completely.</p>
<p>[] (Square brackets in a citation)</p> <p>Example 1: <i>For information prominent citations, use square brackets within parentheses when adding an acronym or initialisms to your writing for the first time.</i></p> <p>Example 2: <i>Use square brackets when adding extra words to quotations that help the reader to understand the meaning. This is useful when you need to fit a quotation into your own sentence correctly. When editing quotations, avoid changing the quotation’s meaning.</i></p> <p>Example 3: <i>Square brackets are also used with sic to indicate that a spelling error was present in the original text.</i></p>	<p>Example 1</p> <p>The impact of this program has been dramatic (World Health Organization [WHO], 2011).</p> <p>Example 2</p> <p>In fact, Rumelhart (1981) asserts that schemata “are the fundamental elements upon which all information processing depends . . . [and play a key role] in guiding the flow of processing in the system” (pp. 33–34).</p> <p>Example 3</p> <p>In his report, “the building inspector estimated that there [sic] house was a fire hazard” (Wilson, 2013, p. 32).</p>

Appendix C: Acronyms and Their Use

Acronyms	Examples
<p><i>Acronyms are words formed from the first letter of each word in a long name. These can then be said as a word. You must not create an acronym of your own. Use the existing ones that are recognised, for example, Technical and Further Education (TAFE) or Queensland and Northern Territory Aerial Services Ltd (QANTAS).</i></p> <p><i>The first time an acronym is used, you must write the full name first followed by the acronym in parentheses. After that, the acronym may replace the full name or phrase. Always use the full name or phrase in the abstract section of your document.</i></p>	<p><i>An author prominent in-text citation</i></p> <p>The first time you use a name that you want to shorten to an acronym or initialism, type the name in full and then type the acronym or initialism in parentheses after it:</p> <p style="padding-left: 40px;">According to the World Health Organization (WHO, 2011), this program has had a dramatic impact. This is demonstrated by the data emerging from this study (WHO, 2011).</p> <p><i>An information prominent in-text citation</i></p> <p>The first time you use a name that you want to shorten to an acronym or initialism use the name in full and then type the acronym or initialism in square brackets after it. Appendix D: Initialisms and Their Use

Initialisms	Examples
<p><i>Initialisms are a series of capital letters made up of the initial letters of a series of words. Initialisms cannot be said as a word; for example: USA (initialism for United States of America) or NLA (initialism for National Library of Australia)</i></p> <p><i>The first time an initialism is used, give the full name or phrase followed by the initialism in parentheses. After that, the initialism may be used in place of the full name or phrase. Always use the full name or phrase in the abstract in your assignment.</i></p>	<p>In academic writing, initialisms are introduced in the same way as acronyms.</p> <p><i>An author prominent in-text citation</i></p> <p>The Department of Education, Skills and Employment (DESE, 2020) states that from 2021, Indigenous, regional and remote students will be included in the Higher Education Participation and Partnerships Program (HEPPP).</p> <p><i>An information prominent in-text citation</i></p> <p>... <p>DOI (Digital Object Identifier)</p> <p><i>Many journal articles and online documents are assigned a DOI. It is a unique string of letters and numbers that identifies a document. All DOIs begin with the number 10 and can often be found on the first page of a journal article, or in the database information. If a DOI is provided, it should be included at the end of the reference. DOIs should be in the https://doi.org/10.xxxx/x format even if it is presented as doi:10.xxxx/xxxx. DOIs are hyperlinked (active, blue font and underlined).</i></p>	<p>Shariff, J. F. (2011). Initialisms	Examples
<p>pp. (multiple pages)</p> <p><i>In-text citation</i> Use pp. when referring to a quote or data from multiple pages. Use a comma between numbers for pages that are not in sequence.</p> <p><i>Reference list</i> The use of p. and pp. is not required when referring to whole books, journal articles or webpages. However, pp. may be used when referring to a chapter in a book. Appendix E: Abbreviations and Their Use

An abbreviation is a shortened form of a word. Words can be shortened in a number of ways, including omitting parts of the interior of the word, or cutting off the end of a word. If the end of the word is removed to create an abbreviation, then a full stop is added. If the interior of the word is removed, leaving the last letter; no full stop is needed. Here are examples.

Abbreviations and explanations of their use in references	Examples
<p>cat. no. (catalogue number) <i>A catalogue number is used to identify an item in a record. It is used for tracking purposes.</i></p>	<p>Australian Bureau of Statistics. (2020, December 11). <i>ABS corporate plan, 2020-2021</i> (cat. no. 1005.0). https://www.abs.gov.au/AUSSTATS/abs@.nsf/productsbyCatalogue/ED09CF8070B516CCCA25863B00040961?OpenDocument</p>
<p>ca. (circa) <i>From Latin meaning ‘around’ or ‘about’. Used when we can only approximate the publishing date. Square brackets are placed around the approximate date instead of parentheses. This approximation may be made by looking at the latest entry in the reference list of the source.</i></p>	<p>Citation ... (Aristotle, ca. 350 B.C.E./1994). <p>Comp. (compiler) <i>The person who assembles a training or educational package is called a compiler.</i></p>	<p>Use the same format as for an edited book but use (comp.) instead of (Ed.).</p>

Abbreviations and explanations of their use in references	Examples
<p>e (eLocator or article number) <i>Journal article with an article number or an eLocator</i> <i>If a journal article does not provide a page range, use an eLocator or article number.</i></p>	<p><i>Sands, M., & Aunger, R., (2020). <p>Ed. or Eds. (editor or editors) <i>One editor: (Ed.) More than one editor (Eds.)</i> <i>If each chapter authored separately, cite and reference the chapter as a “Chapter in an edited book”. You do not use Ed. for in-text citations.</i></p>	<p>Citation Crisp et al. (2016) outline . . .</p> <p>Reference example Crisp, J., Taylor, C., Rebeiro, G., & Walters, D. (Eds.). Abbreviations and explanations of their use in references	Examples
<p>para. Abbreviations and explanations of their use in references	Examples
<p>Vol. or Vols. (volume or volumes)</p> <p><i>Sometimes books are one part of a set or series. Each book in the set or series is labelled a volume.</i></p> <p><i>Journals publish a set number of volumes each year, so volume numbers are used to identify in which volume an article appears. However, do not include the words “Vol.” or “Vols.” when referencing journals. Place the journal volume number in italics after the journal title. If the journal does not use volume numbers but gives the season or the month, include the season or the month after the publication year.</i></p>	<p>Book</p> <p>Corsini, R. J., (Ed.). Appendix F: Latin Words and Their Use as Abbreviations

Latin words and their abbreviations. Are used in academic writing at times but they should be kept to a minimum and used inside parentheses. Below are examples of Latin words (or their abbreviations), used inside parentheses when citing in text or in the reference list.

Latin words	Example in citation or reference list
<p>et al. abbreviation for “et alia” meaning “and others” <i>When a work has three or more authors, only use the surname of the first author, followed by et al.</i> <i>There should always be a full stop after “et al.” as the end of the word has been removed to create an abbreviation.</i> Do not italicise et al.</p>	<p><i>In-text citation</i> . . . (Robbins et al., 2001).</p> <p><i>Reference example</i> Robbins, S. P., Millett, B., Cacioppe, R., & Waters-Marsh, T. (2001). <i>Organisational behaviour</i> (3rd ed.). Prentice Hall Australia.</p>
<p>Sic means ‘thus’ or ‘so’ <i>Used in a quotation, in italics and in square brackets. It indicates that the word directly before it is an error that appeared in the original text. This is to preserve the authenticity of the quotation. This error may be incorrect spelling, punctuation or grammar.</i> Note. <i>The square brackets are not italicised.</i></p>	<p>In his report, “the building inspector estimated that there [<i>sic</i>] house was a fire hazard” (Wilson, 2013, p. 32).</p>
<p>Circa means ‘around’ or ‘about’ It is abbreviated to ca. <i>Used when an approximate publishing dates is available. Place square brackets around the approximate date instead of parentheses. This approximation may be made by looking at the latest entry in the reference list of the source you are using.</i></p>	<p>Aristotle. (1994). <i>Politics</i>. (B. Jowett, Trans.). The Internet Classics Archive. http://classics.mit.edu/Aristotle/politics.html (Original work published ca. 3500 B.C.E.)</p>

Appendix G: Referencing a Journal Article With or Without a DOI

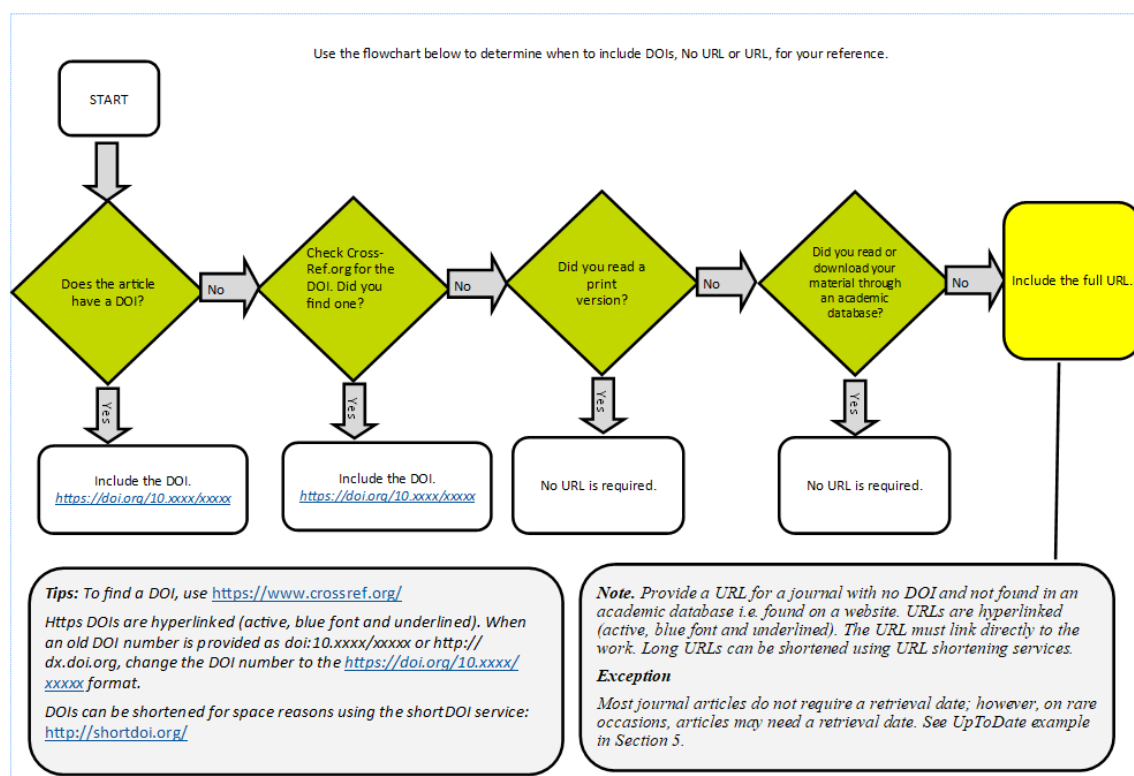

When referencing a journal article, it can be difficult to know what information to include to form a complete reference. Use the Figure 4 flow chart below to clarify whether to include a DOI, no URL or a URL at the end of the reference.

Note 1. If a journal article does not have a DOI number, no URL is needed if it is found in an academic database. Examples of academic databases: APA PsycNET, PsycINFO, Academic Search Complete, CINAHL, Ebook Central, EBSCOhost, Google Scholar, JSTOR (excluding primary source collections), MEDLINE, Nexis Uni, Ovid, ProQuest), PubMed, ScienceDirect, Scopus and Web of Science etc.

Note 2. Most journal articles do not require a retrieval date; however, on rare occasions, articles may need a retrieval date if they are retrieved from databases where articles are periodically updated. These articles/journals often have editors. See UpToDate example in Section 5.

Appendix H: Check Your Reference List

Check	Key point
	The reference list begins on a new page. It should be the last page of your assignment; however, the appendices go after the reference list.
	Margins are set at least 2.54 cm top and bottom and left and right.
	Font style and size is same as for the rest of the assignment: Times New Roman 12 pt.
	Line spacing in the reference list is double line.
	The title is References and it is in bold, centred, and has the same font style and size as the document.
	The reference list is aligned with the left margin.
	All lines after the first line of each entry should be indented half an inch (1.27cm) from the left margin. This is called a hanging indentation.
	A blank line space is not used after each reference.
	Numbers, letters and bullet points are not used to indicate new references.
	The reference list is arranged in alphabetical order according to the first author's surname (family name). The surname must be written in full and initials used to represent given names.
	References by the same author in different years should be ordered by year. Place the oldest work first.
	References which have the same author and same year of publication are listed alphabetically according to the title of the book/article, and a lower-case letter is added to the date: Example - Education Queensland. (2007a). Education Queensland. (2007b). Add a letter to both the reference and the in-text citation.
	If there is no author or authoring body (institution, corporation or other organisation), the reference is listed alphabetically according to the title of the article. If a source is authored by an organisation rather than an individual, it is listed alphabetically according to the organisation's name. For example: Education Queensland.
	URLs are hyperlinked (active, blue font and underlined).
	Cut and paste URLs to avoid transcript errors. Do not change the URL. If the URL is very long, it is acceptable to shorten a URL using URL shortening services. Ensure that it links directly to the correct location.
	Any reference that starts with a number precedes the alphabetical listing and is listed numerically; for example, 3D Networks. (2007). <i>Delivering on . . .</i> will appear before Anderson, J. (2013) . . .
	Every in-text citation appears in the reference list, and every item in the reference list is to be mentioned at least once in the assignment. Additionally, the citations that appear in the assignment itself must have the same spelling and dates as the ones in the reference list. Exception: Personal communication may be included in-text; however, it does not need to be included in the reference list.

<i>Authoring body (no acronym or initialisation is required for the reference list).</i>	Correct: National Institute of Mental Health. (2020). Incorrect: National Institute of Mental Health (NIMH). (2020).
<i>Use an ampersand to separate two corporate authors.</i>	American Psychological Association & National Institute of Health. (2020).

Appendix K: Citing and Referencing Figures and Tables

When including a figure (image or graph) or a table into an assignment, provide source details below the figure or table. Use the templates below to assist you. The source details should also be included in the reference list. For more details on how to label your tables and figures see Section 2: How to use tables, figures and images.

Caption templates and examples for tables and figures

- Identify which type of **source** you took your figure or table from
- Choose the correct **template** (journal article, book, book chapter and webpage). Note. If the table or figure has not been adapted, use the word *from*. If the table or figure has been adapted, use the phrase *adapted from*.
- The **examples** below simply demonstrate how to use the template.
- The **reference list example** indicates how to reference the figure or table in a reference list.
