IBM SPSS Version 25 Installation and Registration

The following set of instructions will walk you through installing IBM SPSS Statistics on your computer. Version 25 is compatible with all supported Windows operating systems (Windows 7 and newer).

We suggest that you first obtain the SPSS license code before you begin downloading SPSS.

Students can obtain the SPSS license code from this link: <u>https://alaureatena.sharepoint.com/sites/walden-university/student-documents/spss/Pages/default.aspx</u>

Faculty can obtain the SPSS license code from this link: <u>https://laureatena.sharepoint.com/sites/walden-faculty-spss</u>

You may be prompted to enter your Office 365 credentials.

Simply copy and paste the code into a Word document so that you have it available when prompted to enter it at the end of the installation sequence. You can always enter the code later; however, having it on hand to enter during the installation is much easier.

SPSS Statistics software installation link for Windows is given below. Access the appropriate installation link depending on your operating system:

SPSS v25 Windows 32-bit install: <u>http://mym.cdn.laureate-</u> media.com/2dett4d/software/IBM/SPSS/v25/SPSS_Statistics_25_win32.exe

SPSS v25 Windows 64-bit install - <u>http://mym.cdn.laureate-</u> media.com/2dett4d/software/IBM/SPSS/v25/SPSS_Statistics_25_win64.exe

Not sure which if you have a 32-bit or 64-bit Windows Operating System? Access <u>Microsoft's page</u> for further clarification.

This installation requires at least 1GB of free space on your computer. Because of the large size of the installation file, it is recommended that you are on a DSL or better internet connection. Even with a strong internet connection, the installation may still take up to 30 minutes or longer. While the tool is installing, you may continue to work within other applications on your computer.

If you are using a Mac operating system, you may follow these instructions.

Note: <u>Java Runtime Environment</u> must be installed on your computer in order for SPSS to run. If you experience any issues with SPSS or if you are prompted, you may install Java SE Runtime Environment 7u45 from the Oracle website.

Opening SPSS_Statistics_25_win64.exe You have chosen to open: SPSS_Statistics_25_win64.exe which is: Binary File from: http://mym.cdn.laureate-media.com Would you like to save this file? Save File Cancel	When prompted, save the file in the desired location on your computer. (Note: Depending on your browser, this screen may look a little different.) This step may take up to about 20 minutes if you are on a 128 Kbps internet connection. Once the file has been saved, run the file.
SPSS_Statistics_25_win64(1).exe	Run the file by double-clicking on it from where it was saved.
Open File - Security Warning X Do you want to run this file? Name:oper\Downloads\SPSS Statistics 25 win64(1).exe Publisher: IBM Type: Application From: C:\Users\ccooper\Downloads\SPSS_Statistics_25 Run Cancel Image: Always ask before opening this file Image: While files from the Internet can be useful, this file type can potentially harm your computer. Only run software from publishers you trust. What's the risk?	If you receive a security warning, click Run .
